Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 1 of 39 Filed: August 17, 2020

1 1. INTRODUCTION

Grimsby Power Incorporated ("Grimsby Power") is a corporation incorporated pursuant to the *Business Corporations Act* (Ontario) with its head office in the Town of Grimsby. Grimsby Power
owns and operates the electricity distribution infrastructure serving approximately 11,750
residential and commercial customers within the Town of Grimsby municipal boundaries.
Grimsby Power also owns and operates a 230kV to 27kV transformation station, known as
Niagara West MTS, which supplies Grimsby Power and Niagara Peninsula Energy Inc. a
neighbouring Local Distribution Company (LDC).

Grimsby Power filed an Incentive Regulation Mechanism (IRM) application for 2020 rates August
12, 2019 and had rates approved by the Ontario Energy Board under file number EB-2018-0038
effective January 1, 2020. Grimsby Power's last comprehensive rebasing was for 2016 under
Ontario Energy Board file number EB-2015-0072.

Grimsby Power sought and received approval from the OEB to defer its comprehensive rebasing
schedule for 2021 for one year. As per the deferral approval letter from the OEB dated May 15,
2020 the OEB expects Grimsby Power to adhere to the process for Price Cap Incentive Rate –
setting application for the 2021 rate year.

The Applicant hereby applies to the Ontario Energy Board (the "OEB" or "the Board") pursuant to
Section 78 of the *Ontario Energy Board Act, 1998 (the "OEB Act")* for approval of its proposed
distribution rates under the parameters set out in the Ontario Energy Board's 4th Generation
Incentive Regulation Mechanism ("IRM") for rates effective January 1, 2021.

Specifically, Grimsby Power hereby applies for an order or orders granting distribution rates
updated and adjusted in accordance with Chapter 3 of the Filing Requirements for Electricity
Distribution Rate Applications dated May 14, 2020. This application for adjusted rates pertains to
all customers within Grimsby Power's service territory.

In the event that the Board is unable to provide a Decision and Order in this Application for
implementation by the Applicant as of January 1, 2021, Grimsby Power requests that the Board
issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges
as interim until the decided implementation date of the approved 2021 distribution rates.

29	If the effective date does not coincide with the Board's decided implementation date for 2021
30	distribution rates and charges, Grimsby Power requests to be permitted to recover the
31	incremental revenue from the effective date to the implementation date.
32	In the preparation of this application, Grimsby Power used the following OEB models:
33	• 2021 IRM Rate Generator Model updated July 14, 2020 (attached as Appendix A)
34	GA Analysis Work Form updated August 11, 2020 (attached as Appendix C)
35	Account 1595 Analysis Work Form posted Jun 17, 2020 (attached as Appendix D)
36	Grimsby Power confirms that the values used as billing determinants in the pre populated model
37	are correct. Grimsby Power made changes to the model as described further in this application.
38	The rates and other adjustments being applied for and as calculated through the use of the
39	above models include the following:
40	A Price Cap Incentive Rate-Setting ("Price Cap IR") option to adjust its 2020 rates. The
41	Price Cap IR methodology provides for a mechanistic and formulaic adjustment to
42	distribution rates and charges in the period between Cost of Service applications.
43	Grimsby Power received approval to shift the rate design for residential customers towards
44	fully fixed rates in 2016 (EB-2015-0072). In 2019 Grimsby Power transitioned to fully fixed
45	distribution rates for the residential rate class. As such no transition adjustments will be
46	requested in this application.
47	An adjustment to Retail Transmission Service Rates in accordance with Board Guideline
48	G-2008-0001 - Electricity Distribution Retail Transmission Service Rates revised on June
49	28, 2012.

- 50 Along with revisions to its distribution rates, Grimsby Power also seeks approval of the 51 following matter;
- Continuance of Rate Riders for which the sunset date has not yet been reached
- Continuance of the Specific Services

- Continuance of Retail Service Charges adjusted by the inflation factor
- Continuance of Loss Factors
- Continuance of the Smart Metering Entity charge
- Continuance of the MicroFit monthly charge
- 58 The impact of this application, as filed, is an increase to a typical residential customer consuming
- 59 750 kWh of \$1.41 per month or 1.21%.
- 60 A summary of total bill impacts from this application, as filed, is shown below.

				Tot	al
				Total	Bill
RATE CLASSES / CATEGORIES (eg: Residential TOU, Residential Retailer)	Consumption (kWh)	Demand kW (if applicable)	Units	\$	%
RESIDENTIAL SERVICE CLASSIFICATION - RPP	750		kWh	\$ 1.41	1.2%
RESIDENTIAL SERVICE CLASSIFICATION - RPP	1,300		kWh	\$ 2.13	1.2%
RESIDENTIAL SERVICE CLASSIFICATION - Non-RPP (Retailer)	750		kWh	\$ (1.51)	-0.9%
GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION - Non-RPP (Retailer)	2,000		kWh	\$ (4.40)	-1.0%
GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION - RPP	2,000		kWh	\$ 3.50	1.2%
GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION - RPP	5,800		kWh	\$ 9.40	1.1%
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non-RPP (Other)	75,000	200	kW	\$ (199.25)	-1.3%
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non-RPP (Other)	290,000	720	kW	\$ (821.63)	-1.5%
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non-RPP (Other)	23,000	65	kW	\$ (55.36)	-1.2%
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non-RPP (Other)	23,000	65	kW	\$ (55.50)	-1.2%
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non-RPP (Retailer)	250,000	570	kW	\$ (744.12)	-1.5%
UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION - Non-RPP (Retailer)	50		kWh	\$ 0.70	1.3%
UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION - RPP	200		kWh	\$ 0.88	1.5%
UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION - RPP	600		kWh	\$ 1.50	1.3%
STREET LIGHTING SERVICE CLASSIFICATION - Non-RPP (Other)	440	1	kW	\$ (1.14)	-1.2%
STREET LIGHTING SERVICE CLASSIFICATION - Non-RPP (Retailer)	61,000	170	kW	\$ (39.67)	-0.2%
EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION - Non-RPP (Other)	4,500,000	11,000	kW	\$6,059.93	0.7%

61

62 2. DISTRIBUTOR'S PROFILE

- Grimsby Power Inc. ("Grimsby Power") is a corporation incorporated pursuant to the *Business Corporations Act* (Ontario) with its head office in the Town of Grimsby. Grimsby Power owns and
 operates the electricity distribution infrastructure serving approximately 11,750 residential and
- 66 commercial customers within the Town of Grimsby municipal boundaries.

67 On October 1, 2015 Grimsby Power amalgamated with its affiliate Niagara West Transformation

- 68 Corporation and now owns and operates a 230 kV to 27kV transmission station. The
- 69 transmission station, known as Niagara West MTS, supplies Grimsby Power and Niagara
- 70 Peninsula Energy Inc. a neighboring Local Distribution Company (LDC).

Grimsby Power receives electricity from the provincial electricity grid and transports it safely and
reliably through its electricity distribution network of 69 square kilometers. This electricity network
includes one municipal transformer station (Niagara West MTS), 357 kilometers of overhead

- 74 lines, 333 kilometers of underground cable, 1,491 distribution transformers (overhead and
- vinderground pad mounts), and 3,675 poles.
- 76

77 3. PUBLICATION NOTICE

- 78 Grimsby Power will post a notice related to the application on its website at
- www.grimsbypower.com and have a hard copy available upon request. Grimsby Power's officeis closed to the public due to COVID-19.
- 81

82 4. PRICE CAP ADJUSTMENT (3.2.1)

In calculating 2021 rates, Grimsby Power has applied a Price Cap Adjustment of 1.85% to its
base distribution rates as approved in our 2020 IRM application (EB-2019-0038). The application
of the 1.85% adjustment is based on the rate-setting parameters provided by the Board's 2021
IRM Rate Generator model. Table 1 shows the default values used in the determination of the
Price Cap Adjustment. This adjustment is subject to change based on the OEB's issuance of the
inflation factor for incentive rate setting for 2021 rates. At such time the OEB will adjust the price
escalator within Grimsby Power's application.

Price Cap Parameters										
Price Cap Parameters										
Price Escalator		2.00%								
V Eactor	Less: Productivity Factor	0.00%								
X-Factor	Less: Stretch Factor Group II	0.15%								
Price Cap Index		1.85%								

Table 1

93

- 94 The price cap index adjustment has not been applied to the following components of distribution95 rates:
- Rate adders and riders
- Low voltage service charges
- 98 Retail Transmission Service Rates
- 99 Wholesale Market Service Rate
- Rural Rate Protection Charge
- Standard Supply Service Administrative Charge
- 102 Capacity Based Recovery
- 103 MicroFIT Service Charge
- 104 Specific Service Charges
- Transformation and Primary Metering Allowances; and
- Smart Metering Entity Charge
- 107

108 5. REVENUE TO COST RATIO ADJUSTMENTS (3.2.2)

109 As part of Grimsby Power's 2016 Cost of Service Application (EB-2015-0072) a rate mitigation

110 proposal for the Unmetered Scattered Load (USL) rate class was accepted by the Board. This

rate mitigation proposal would adjust the revenue to cost ratio for the USL rate class in both 2017

and 2018. In 2018 the revenue to cost ratio for the USL rate class was adjusted to reach 80%

113 which meets the lower boundary of the Board approved policy range, as such, no further revenue

114 to cost adjustments are required.

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 6 of 39 Filed: August 17, 2020

116 6. RATE DESIGN FOR RESIDENTIAL ELECTRICITY (3.2.3)

- 117 On April 2, 2015, the OEB released its Board Policy: A New Distribution Rate Design for
- 118 Residential Electricity Customers (EB-2012-0210). The policy stated that electricity distributors
- 119 will transition the residential rate class to a fully fixed monthly distribution service charge. This
- transition was to be implemented over a period of four years. The first year of the transition took
- 121 place in 2016 as per Grimsby Power's 2016 Cost of Service application (EB-2015-0072).
- In the 2019 IRM application (EB-2018-0035) Grimsby Power sought approval for the fourth year
 and final year of the transition to fully fixed residential distribution rates. With the approval of the
 2019 application, Grimsby Power's residential customers had a fully fixed distribution rate and no
- 125 further transition adjustments are required.
- The application, as filed, does not indicate that any rate class will have a bill impact above the10% threshold for which rate mitigation would apply.
- 128

129 7. RTSR ADJUSTMENTS (3.2.4)

- 130 In reference to Board Guideline G-2008-0001 Guideline *Electricity Distribution Retail*
- 131 *Transmission Service Rates*, issued October 22, 2008 and with revisions up to June 28, 2012
- 132 (Revision 4.0), Grimsby Power is applying for an adjustment of its Retail Transmission Service
- 133 Rates based on a comparison of historical transmission costs adjusted for new Uniform
- 134 Transmission Rate (UTR) levels and revenues generated from existing RTSRs. The expectation
- 135 of this approach is to minimize variances in the USoA Accounts 1584 and 1586.
- 136 Grimsby Power used the 2021 IRM Rate Generator Model (Tab 10-15) to determine the
- 137 proposed adjustments to the current Retail Transmission Service Rates approved in Grimsby
- 138 Power's 2020 IRM application (EB-2019-0038). The worksheets reflect the Uniform
- 139 Transmission Rates (UTR) approved by the Board effective January 1, 2020 and Hydro One's
- 140 most recent approved rates. Grimsby Power understands that Board staff will update each
- 141 distributor's 2021 RTSR worksheet values in the rate generator model to incorporate UTR
- 142 adjustments approved for 2021.

- 143 The proposed adjustments of the Retail Transmission Service Rates and detailed calculations
- 144 are presented in Appendix B – RTSR Adjustments and Rates (tabs 10-15).
- 145 The billing determinants utilized in this model were derived from the 2019 RRR 2.1.5 -
- 146 Performance Based Regulation, section 2.1.5.4 – Demand and Revenue. Grimsby Power
- 147 confirms that the billing determinants used in the model are accurate. The loss factor applied to
- 148 the metered kWh is the loss factor approved by the Board during the last rebasing in 2016. Table
- 149 2 below shows the current and proposed Retail Transmission Service Rates along with the dollar
- 150 value of the change.

1	51
1	52

Rate Class	Current RTSR- Network	Current RTSR- Connection	Proposed RTSR- Network	Proposed RTSR- Connection	Change RTSR- Network	Change RTSR- Connection
Residential Service Classification	0.0069	0.0040	0.0072	0.0040	0.0003	0.0000

154

155 8. DEFERRAL AND VARIANCE ACCOUNTS (3.2.5)

156 Grimsby Power has completed the Board Staff's 2021 IRM Rate Generator-Tab 3 Continuity 157 Schedule, and Tab 4 Billing Determinants for Deferral/Variance. The allocation of the deferral 158 and variance balance is based on kWh, kW and customer count from Grimsby Power's 2019 159 RRR filing. Grimsby Power confirms that the quantities in the model are accurate and is

160 requesting disposition of all Group 1 accounts with the exception of 1595.

161 The threshold test shows a claim per kWh of \$0.0023 which is above the disposition threshold of 162 \$0.001per kWh (debit or credit); therefore, Grimsby Power is seeking to dispose its Group 1 deferral and variance account balances in this application. The total amount requested for 163 164 disposition is \$519,995. This amount excludes the 1568 LRAM Variance Account balance and 165 the residual balances from account 1595 from and 2017 and 2018. None of the 1595 accounts

166 are eligible for disposition 167 Grimsby Power is proposing a rate rider recovery period of one-year.

- 168 Actual interest has been calculated based on the Board's prescribed rates. The projected
- 169 interest for the period of January 1, 2020 to December 31, 2020 is based on the Board's
- 170 prescribed rate of 2.18% for January through June and 0.57% for July through December. Table 3
- and 4 below show the projected interest on December 31, 2019 principal balances.
- 172

Total including Account 1568		6.329	0	(111,277)	519,99					

177 The deferral and variance continuity schedule and subsequent tabs allow for the allocation of

178 variance amounts to Grimsby Power rate classes.

179 Grimsby Power has an Embedded Distributor rate class that does not contribute to all of the

180 variance balances. The Embedded Distributor rate class only contributes to variances in 1584 181 RSVA-Retail Transmission Network Charge and 1586 RSVA-Retail Transmission Connection 182 Charge. The Network and Connection charges are applied to the Embedded Distributor based 183 on the approved rates from Grimsby Power's tariff sheet. The difference between the Uniform 184 Transmission Rates and the Network and Connection charged according to Grimsby Power 185 tariffs creates balances for the Embedded Distributor in the 1584 and 1586 variance accounts. 186 All other charges that pertain to the Embedded Distributor rate class are charged at final IESO 187 rates and therefore the expense would be equal to the revenue and no dollar value would be 188 placed in any other variance account except 1584 and 1586.

189 To allocate the variance balances appropriately amongst its rate classes Grimsby Power had to 190 make certain changes to the 2021Rate Generator Model. Grimsby Power changed tab 4 Billing 191 Det. For Def-Var to include quantities for the Embedded Distributor in Metered kWh for 192 Wholesale Market Participants (WMP) and Metered kW for Wholesale Market Participants 193 (WMP) and removed the kWh value from Metered kWh for Non-RPP Customers (excluding 194 WMP) and removed the kW from Metered kW for Non-RPP Customers (excluding WMP). Those 195 changes to the model do not allow for any allocation of 1588, 1589 or 1580 to the Embedded 196 Distributor, which accurately depicts how the Embedded Distributor has contributed to variance 197 accounts.

The Embedded Distributor does not contribute to the variance amounts in 1550 either therefore; another change to the model was required. In order to allocate the value of 1550 to all rate classes except the Embedded Distributor Grimsby Power used the % of Total kWh adjusted for WMP to calculate the allocation instead of the % of Total kWh.

The charging parameters noted above mirror that of a Wholesale Market Participant although the customer does not pay the IESO directly. The changes to the model accommodate the need to align the allocation of variance balances to rates classes that have contributed to the variance balance. In Table 5 Tab 4 is shown prior to any adjustments to the Embedded Distributor quantities, Table 6 shows Tab 4 after the changes. Table 7 and 8 show the allocation of the variance account balances before and after the changes to the model.

224

225 Grimsby Power believes the above model changes allow for the proper allocation of variance

balances to the rate classes that contributed to the account balances.

227 The Deferral and Variance account balances match the Audited Financial Statements and the

228 2.1.7 RRR Trial Balances with four exceptions. The four exceptions include account 1580, 1595
2014, 1595 2017 and 1568.

Grimsby Power is not requesting the disposition of account 1568 in this IRM application so no
amounts were entered for the variance account. This created a difference between the 2.1.7
RRR Trial Balance and the 2019 Balance.

233 The variance of \$18,957 between 2.1.7 RRR and the 2019 balance for account 1580 RSVA –

234 Wholesale Market Service Charge is due to the entire balance for 1580 being input in to 2.1.7,

which included 1580 Sub-account CBR Class B, which is now separated into a separate line

236 item.

- The final variance is between 1595 2014 and 1595 2017 for \$602. The discrepancy between these two accounts and 2.1.7 RRR is from an error in entering the amount under 1595 2014 instead of 1595 2017 in 2.1.7 RRR.
- 240

241 9. ADJUSTMENTS TO DEFERRAL AND VARIANCE ACCOUNTS (3.2.5)

During Grimsby Power's 2020 IRM Application the 1588 Power and the 1589 RSVA – Global
Adjustment accounts were adjusted to show the impact of true ups booked in 2019 that belonged
to 2018.

- In January of 2019 Grimsby Power booked true up amounts to both the 1588 Power and 1589
- 246 RSVA Global Adjustment G/L accounts that pertained to 2018. The true up amount booked for
- 1588 was \$70,885 and the amount booked for 1589 was (\$116,738). These values were
- represented in the 2020 GA Analysis Workform (Table 9 below) and entered as principal
- 249 adjustments in the GPI_2020_IRM_GENERATOR_MODEL 2019-12-12. These adjustments
- created a variance between RRR and the 2018 Balance.
- 251

252

9 Embedded Distributor Rate Class billed at Final Posted Rate		Grimsby's Embedded Distributor rate class is invoiced at the final posted rate. The adjustment represents a decrease in revenue due to the difference between the second an final rates listed in the table (Note 4) above.	No	Pertains to current year		Ĩ

253

254 To correctly reflect the activity in 2019 Grimsby Power has reversed those two adjustments in

- Tab 3 Continuity Schedule of the 2021 Rate Generator (cell BF26 (\$70,885) and cell BF27
 \$116,738).
- 257 Grimsby Power kept its 2019 books open into 2020 and was able to book the true up for
- 258 December 2019 in the 2019 G/L's so no further principal adjustments for 1588 and 1589 are
- 259 required.
- Grimsby Power believes that these adjustments, if approved by the Board, will align the costsand recovery for Grimsby Power customers.
- Grimsby Power has not made any adjustments to accounts previously approved by the OEB on afinal basis.
- 264

265 10. WHOLESALE MARKET PARTICIPANTS (3.2.5.1)

- In accordance with Chapter 3 filing requirements a distributor must not allocate any account
 balances in Account 1588 RSVA Power, Account 1580 RSVA Wholesale Market Services
 Charge and Account 1589 RSVA Global Adjustment to a wholesale market participant (WMP).
 A WMP refers to any entity that participates directly in any of the IESO-administered markets.
 These WMPs must not be allocated the RSVA account balances related to charges which WMPs
- 271 settle directly with the IESO.
- 272 Wholesale Energy, Wholesale Market Services, and Global Adjustment for WMPs are charged to
- the WMP by the IESO, and therefore WMPs have not contributed to the 1580 RSVA Wholesale
- 274 Market Service Charge Account, 1588 RSVA Power Account, and 1589 RSVA Global Adjustment
- 275 account balances.
- 276 Grimsby Power's WMP customer belongs to the General Service 50 to 4,999 kW rate class.
- Grimsby Power is proposing not to charge a Rate Rider for the Disposition of Global AdjustmentAccount to the WMP customer.
- 279 Grimsby Power ensured that the rate riders are appropriately calculated for the following
- 280 remaining charges that are still settled with the WMP. These charges include Account 1584 -
- 281 RSVA Retail Transmission Network Charge, Account 1586 RSVA Retail Transmission

282 Connection Charge and Account 1595 – Disposition/Refund of Regulatory balances.

283 Accounts 1580-RSVA-Wholesale Market Service Charge, 1588–RSVA-Power and 1589-RSVA-

284 Global Adjustment are allocated to all classes based on kWh with WMPs kWh excluded. Grimsby

Power used the WMPs 2019 consumption as reported in 2.1.5.4 filings.

286

287 11. GLOBAL ADJUSTMENT (3.2.5.2)

288 The Global Adjustment (GA) variance account 1589 captures the difference between the GA

amounts billed to non-RPP Class B customers at the 2nd estimate and the actual Global

290 Adjustment amount paid by Grimsby Power to the IESO for non-RPP Class B customers.

291 To dispose of the (\$17,652) balance in account 1598 Grimsby Power is proposing a volumetric

rate rider of (\$0.0003) for all Non RPP Class B customers with the exception of the Embedded

293 Distributor. The table below shows the GA rate rider for Non RPP Class B customers.

			Total Metered Non-RPP 2019 Consumption excluding WMP	Total Metered 2019 Consumption for Class A Customers that were Class A for the entire period GA balance accumulated	Total Metered 2019 Consumption for Customers that Transitioned Between Class A and B during the period GA balance accumulated	Non-RPP Metered Consumption for Current Class B Customers (Non-RPP Consumption excluding WMP, Class A and Transition Customers' Consumption)	% of total kWh	Total GA \$ allocated to Current Class B Customers	GA Rate Rider	
			kWh	kWh	kWh	kWh				
	RESIDENTIAL SERVICE CLASSIFICATION	kWh	1,833,869		0 0	1,833,869	2.9%			
	GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION	kWh	3,996,666		0 0	3,996,666	6.2%	(\$1,100)	(\$0.0003)	kWh
	GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION	kWh	57,564,197		0 0	57,564,197	89.7%	(\$15,842)	(\$0.0003)	kWh
	UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION	kWh	1,156		0 0	1,156	0.0%	\$0	\$0.0000	kWh
	STREET LIGHTING SERVICE CLASSIFICATION	kWh	742,610		0 0	742,610	1.2%	(\$204)	(\$0.0003)	kWh
004	EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION	kWh	0		0 0	0	0.0%	\$0	\$0.0000	
294		Total	64,138,498	(0 0	64,138,498	100.0%	(\$17,651)		

295 In 2017 one Grimsby Power customer opted in to the Industrial Conservation Initiative (ICI)

296 program and became a Class A customer effective July 1, 2017. The customer again opted in to

the ICI program effective July 1, 2018 and July 1, 2019. Throughout 2019, Grimsby Power's

298 Class A customer paid the Global Adjustment based on their Peak Demand Factor as invoiced by

- the IESO creating no variance in 1589 for Class A.
- 300 In accordance with Chapter 3 Filing Requirements updated on May 14, 2020 global adjustment
- 301 rate riders for applicable classes have been calculated on an energy basis (kWh).

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 15 of 39 Filed: August 17, 2020

302 GA Analysis Workform

- 303 Grimsby Power completed the 2021 GA Analysis Work Form as presented in Appendix C.
- 304 Grimsby Power bills its customers based on the second estimate GA with the exception of the 305 Embedded Distributor, which is billed at the final posted rate.
- The 2019 RRR Filing data showed 109,616,566 non-loss adjusted kWh for Non RPP Class B
 customers. The Non-RPP Class B Including Loss Adjusted Consumption, Adjusted for Unbilled
 (kWh) was 114,617,787. Using these two figures the loss factor calculated by the 2021 GA
 Analysis Work Form is 1.0456 which is only 0.0001 lower than the current approved loss factor of
 1.0457.
- 311 The expected GA Variance calculated using the GA Analysis work form is (\$20,705). This 312 variance was derived using the amount of loss adjusted consumption billed less the adjusted 313 unbilled consumption from the previous month plus the adjusted unbilled consumption from the 314 current month. This consumption total was then multiplied by the second estimate of GA from the 315 IESO. This gave the total dollar consumption at GA Rate Billed of \$12,596,616. That same 316 consumption value was then multiplied by the actual GA rate posted which totaled \$12,575,911. 317 The calculated amount of GA paid to the IESO at the final posted rate was \$20,705 lower than 318 the amount billed to customers.
- The actual net change in the principal amount from the G/L was (\$133,676). The unresolved difference between the G/L and the GA Analysis work form was (\$112,971) or (0.90%) prior to any adjustments. Table 10 below shows the analysis of expected GA amount table from the GA Analysis work form.
- 323
- 324

- 326 Within the reconciling items portion of the GA Analysis Workform Grimsby Power removed the
- 327 impacts to GA from prior year RPP Settlement true up process of \$116,738, removed prior year
- end unbilled to actual difference of \$422 and added the current year end unbilled to actual
- 329 revenue difference of \$19,280.
- 330 The last item reported in the reconciliation of GA was an adjustment to account for the Embedded
- 331 Distributor being invoiced at the final posted GA rate instead of the 2nd estimate. The analysis of
- the expected GA in the GA Analysis workform calculates GA revenue from the Embedded
- 333 Distributor at the 2nd estimate. A reconciling item is required to show the actual GA revenue from
- the Embedded Distributor at the final posted rate.
- The calculated dollar value of GA revenue for the Embedded Distributor at the second estimate is \$5,490,705. The amount of revenue Grimsby Power actually received through charging at the final posted rate was \$5,470,813. This means that the revenue in the model is overstated by \$19,892. Table 11 below shows the calculation.
 - F) Difference Between C)=A*B E)=A*D Embedded A) Embedded D) Embedded Dist at 2nd Embedded B) Dist Final Dist **Estimate and** Distributor GA 2nd at 2nd Posted at Final **Final Posted** kWh Estimate **Estimate GA** GA Posted GA -\$ Jan-19 2,345,384.32 0.08306 \$ 194,808 0.08092 \$ 189,788 5,019 **Feb-19** 2,502,127.99 0.08236 \$ 206,075 0.08812 \$ 220,488 \$ 14,412 \$ \$ Mar-19 2,643,551.19 0.07575 200,249 0.08041 212,568 \$ 12,319 \$ \$ 288.007 0.12333 284,433 -Ś Apr-19 2,306,272.44 0.12488 3,575 \$ 3,898,830.88 0.13049 508,758 0.12604 \$ 491,409 -\$ 17,350 May-19 \$ Jun-19 4,853,572.36 0.14772 716,970 0.13728 \$ 666,298 -\$ 50,671 \$ \$ Jul-19 6,991,030.65 0.08854 0.09645 674,285 \$ 55,299 618,986 Aug-19 6,140,130.97 0.10974 \$ 673,818 0.12607 \$ 774,086 \$ 100,268 **Sep-19** 4,814,361.17 0.16392 \$ 789,170 0.12263 \$ 590,385 -\$ 198,785 \$ \$ **Oct-19** 3,841,776.17 0.1368 525,555 \$ 0.11886 456,634 68,921 \$ **Nov-19** 4,374,163.19 0.10109 442,184 0.09953 \$ 435,360 -\$ 6,824 \$ \$ \$ 11,111 **Dec-19** 4,357,443.98 0.09066 395,046 0.09321 406,157 Total 4,089,053.78 \$ 5,490,705 \$5,470,813 -\$ 19,892

3,577

0.0%

Unresolved Difference Unresolved Difference as % of Expected GA

Payments to IESO

On February 21, 2019 the Board issued accounting guidance related to commodity pass through 353 354 accounts 1588 and 1589. Grimsby Power implemented the new guidance issued by the Board 355 effective January 1, 2019 for the settlement of RPP commodity. Grimsby Power is in a unique 356 situation where there is no need to journalize an accrual for the Cost of Power. Grimsby Power 357 leaves its books open until the invoices from the IESO and Hydro One are received so that only the 358 actual cost of power expenses are booked. Furthermore, Grimsby Power relies on accrual accounting for the purposes of accounting for revenue. Each month Grimsby Power accrues 359 360 revenue for each rate class. A majority of this revenue accrual is based on actual consumption 361 and demand values. The use of actual consumption values for most customers results in smaller 362 amounts in variance accounts.

363 Taking into consideration the new accounting guidance Grimsby Power ran its previous

364 methodology for settling Global Adjustment and Power, set out in Appendix E, in parallel with the

365 OEB illustrative commodity model issued February 21, 2019 for all of 2019. Grimsby Power found

366 no material difference in the amounts used for settlement and entry into account 1588 and 1589.

Table 13 below shows the settlement values based on the OEB methodology and the former GPImethodology.

369

371

372 With the two models running in parallel over a 12 month period Grimsby Power did not find any

373 systemic issues with its process. Grimsby Power is confident that the values approved on an374 interim bases are in line with the current OEB methodology.

375 To further confirm that the disposition amounts for 2017 and 2018 are in line with current

376 methodology Grimsby Power performed an analytical review of account 1588 for 2017 through

377 2019. Table 14 below is a summary of the account 1588 balance explanation for each year. The

378 full review documents for 2017 – 2019 are included as Appendix F-H.

Table 14

379 380

381

Analytical Review Summary of Account 1588 Balance 2017 - 2018

Account 1588 Balance Explanation		2017	2018	2019
RPP UFE Variance	\$	41,427.13	\$161,590.64	\$147,450.24
Non-RPP UFE Variance	\$	5,319.84	\$ 32,096.99	\$ 23,819.75
Total UFE Variance - expected in Account 1588	\$	46,746.97	\$ 193,687.63	\$ 171,269.99
Transaction Debit/(Credit) (per the DVA				
continuity schedule)	\$	46,616.00	\$ 188,284.00	\$ 189,136.43
Difference \$	\$	130.97	\$ 5,403.63	-\$ 17,866.44
Difference %		0%	3%	-10%

382 In each of the three years, the discrepancy between the account balance and the calculated

balance is 10% or less. The total difference over the three years is (\$12,331.84) or -0.03%.

384 Since 2019 Grimsby Power's rate rider for 1588 and 1589 has been approved on an interim basis.

385 Grimsby Power believes that its methodology used previous to 2019 is in line with the OEB's

methodology and that no adjustments are required. Grimsby Power is requesting that all 1588 and

387 1589 rate riders be approved on a final basis.

388

389 13. CAPACITY BASED DEMAND RESPONSE (CBDR) (3.2.5.4)

390 Grimsby Power follows the OEB's Accounting Guidance on CBDR issued July 25, 2016.

391 Grimsby Power records WMS revenues for CBDR on all consumption effective January 1, 2016 392 and onwards for Class B customers, excluding Wholesale Market Participants, in Account 4062 393 Billed - WMS Sub-account CBDR class B. Costs recorded from charge type 1351 for CBDR 394 class B consumption is recorded in Account 4708 Charges – WMS, Sub-account CBDR Class B. 395 Grimsby Power tracks the variance between the revenue billed to customers for Class B CBDR 396 and the costs recorded under Charge Type 1351 for CBDR in Account 1580 WMS Sub-account 397 CBDR Class B. Carrying charges are applied to monthly opening balances at the Board's 398 prescribed rate.

The balance of 1580 Sub-account CBR Class B was not added to Account 1580 WMS control
 account because when separated the volumetric rate rider for CBR Class B was above \$0.0000

for all rate classes. As per the Chapter 3 filing guide section 3.2.5.4 Capacity Based Recovery
only when the volumetric rate rider for the allocated Class B rounds to zero at the fourth decimal
place in one or more rate classes will the Sub-account Class B will be added to the 1580 WMS
control account. As a result, the total balance of Account 1580 Sub-account CBR Class B
reported on the continuity schedule is \$18,957 more than the reported balance in 2.1.7 Trial
Balance and the 1580 RSVA – Wholesale Market Service Charge is \$18,957 less than 2.1.7.

407

408 14. LRAM Variance Account (LRAMVA) (3.2.6)

- 409 Grimsby Power is not applying for the disposition of account 1568.
- 410

411 **15. TAX CHANGE (3.2.7)**

The OEB's 2008 report entitled Supplemental Report of the Board on 3rd Generation Incentive Regulation for Ontario's Electricity Distributors prescribes a 50/50 sharing of impacts of legislated tax changes from distributors tax rates embedded in its OEB approved base rate known at the time of the application.

Grimsby Power has completed the Board's 2020 IRM Rate Generator Model (Tab 8. STS-Tax
Change and Tab 9. Shared Tax-Rate Rider), and calculated annual tax changes allocated to
customer rate classes on the basis of the 2016 Board approved billing determinants and
distribution rates (2016 COS file number EB-2015-0072). As there is no tax change from the
2016 year of cost of service, no rate rider has been generated (please see Table 15 below).

439 **19. BILL IMPACTS**

440 Grimsby Power has provided the bill impacts from this application in Appendix K.

441 Utilizing the 2021 Rate Generator model the total bill impacts, as filed, for 2021 for Grimsby

Power customers are at or below 1.5%. A majority of the increase in the total bill is due to the

443 change in Network charges and the increase in the deferral/variance rate rider.

The largest percentage bill increase applies to a Unmetered Scattered Load customer with
consumption of 200 kWh. The total bill impact for this type of customer is \$0.88 or 1.5%. The
largest increase in dollars will impact the Embedded Distributor rate class. The total bill impact
for this customer is \$6,059.93 or 0.7%. Only five unmetered scattered load customers and one
Embedded Distributor will be affected by the increases indicated above.

A typical residential customer with monthly consumption of 750 kWh will see a monthly bill
increase of \$1.41 or 1.2%. The remaining rate category comparisons have a total bill impact of
less than 1.5%.

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 23 of 39 Filed: August 17, 2020

Table 16 below shows the summary of the Bill Impacts from Tab 20 of the 2021 Rate GeneratorModel.

			Tal	ole 1	6

457 The year over year dollar value change in the Network charge for 2021 is above 4%.

458 The year over year change is due to increased rates charged by Hydro One and the IESO for

459 Network Service. Hydro One's Network Service rate increased by 3% and the IESO Network
460 Service rate increased by 2%.

461 Tab 14 of the rate generator model calculates a total recovery amount for Network Service of462 \$1,831,940.

At current rates and with current consumption and demand values the revenue generated would
only be \$1,755,446. This figure would fall short of the current calculated recovery amount of
\$1,831,940 by \$76,494.

To collect the amount required to recover costs paid to Hydro One and the IESO the following
additional amounts need to be recovered from each rate class through the 2021 RTSR Network
rates:

Rate Class	Additional Recovery Amount above Current Rates at Current Consumption and Demand Values	
Residential Service	\$	29,580
General Service Less Than 50 kW Service	\$	5,777
General Service 50 To 4,999 kW Service	\$	1,611
General Service 50 To 4,999 kW Service	\$	18,098
Unmetered Scattered Load Service	\$	98
Street Lighting Service	\$	171
Embedded Distributor Service	\$	21,158
	\$	76,494

469

470 The above-indicated values cause the year over year change to be above 4%.

Grimsby Power submits that the proposed total bill impacts for all customers are below the 10%
threshold above which mitigation measures must be considered. Grimsby Power believes the
proposed bill impacts are just and reasonable.

474 **20. CERTIFICATION**

475 Grimsby Power has followed the instructions provided in the OEB's 2021 IRM Rate Generator

476 Model as well as Chapters 1 & 3 of the OEB's Filing Requirements for Electricity Distribution Rate

477 Applications issued May 14, 2020.

478 Grimsby Power has assessed the organization's processes and procedures and to the best of my

479 knowledge the following statements regarding accounts1588 RSVA Power and 1589 RSVA GA
480 balances are true:

- 481 Grimsby Power has appropriately established a process to settle RPP claims to accurately
 482 allocate amounts to 1588 and 1589.
- Sufficient controls have been designed and implemented to provide reasonable assurance
 of the accuracy, consistency and completeness of the accounts balances. This includes
 regular management review and yearly third party auditor review of all regulatory account
 balances.

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 25 of 39 Filed: August 17, 2020

487 - The staff responsible for the disposition of the two accounts is sufficiently trained for the
488 preparation and review of the account balances.

489 As a result, Grimsby Power applies for an Order or Orders approving the Tariff of Rates and

490 Charges set out in Appendix J to this Application as just and reasonable rates and charges

491 pursuant to section 78 of the OEB Act, to be effective January 1, 2021.

Rate-Setting Method	Price Cap IR			
1. Select the last Cost of Service rebasing year.	2016			
2. For Accounts 1588 and 1589, please indicate the year the accounts were last disposed on a final basis.	2018			
a) If the accounts were last approved on a final basis, select the year that the balance was last approved on a final basis.				
b) If the accounts were last approved on an interim basis, and				
i) there are no changes to the previously approved interim balances, select the year that the balances were last approved for diposition on an interim basis. ii) there are changes to the previously approved interim balances, select the year that the balances were last approved for disposition on a final basis.	2018			
(e.g. If 2017 balances reviewed in the 2019 rate application were to be selected, select 2017.)				
3. For the remaining Group 1 DVAs, please indicate the year the accounts were last disposed on a final basis.	2020			
a) If the accounts were last approved on a final basis, select the year that the balance was last approved on a final basis.				
b) If the accounts were last approved on an interim basis, and	2018			
i) there are no changes to the previously approved interim balances, select the year that the balances were last approved for diposition on an interim basis.				
ii) If there are changes to the previously approved interim balances, select the year that the balances were last approved for disposition on a final basis.				
4. Select the earliest vintage year in which there is a balance in Account 1595. (e.g. If 2016 is the earliest vintage year in which there is a balance in a 1595 sub-account, select 2016.)	2017			
5. Did you have any Class A customers at any point during the period that the Account 1589 balance accumulated (i.e. from the year the balance selected in #2 above to the year requested for disposition)?	Yes			
6. Did you have any Class A customers at any point during the period where the balance in Account 1580, Sub-account CBR Class B accumulated (i.e. from the year selected in #3 above to the year requested for disposition)?	Yes			
7. Retail Transmission Service Rates: Grimsby Power Incorporated is:	Partially Embedded Within	Hydro One Networks		
8. Have you transitioned to fully fixed rates?	Yes	(If necessary, enter all host-distributor	s [·] names in the a	above green shaded cell.)

Legend

Pale green cells represent input cells.

Pale blue cells represent drop-down lists. The applicant should select the appropriate item from the drop-down list.

Red cells represent flags to identify either non-matching values or incorrect user selections.

Pale grey cells represent auto-populated RRR data.

White cells contain fixed values, automatically generated values or formulae.

Grimsby Power Incorporated TARIFF OF RATES AND CHARGES

Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2019-0038

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Rate Generator for 2021 Filers GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering equal to or over 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Incentive Rate-setting Mechanism Rate Generator for 2021 Filers

Data on this worksheet h If you have identified any Have you confirmed the

If a distributor uses the actual GA price to bill non-RPP Class B customers for an entire rate class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refunded the general GA rate rider as they did not contribute to the GA balance.

situation.

<u>Notes</u>

1. Regarding the small business deduction, if applicable,

a. If taxable capital exceeds \$15 million, the small business rate will not be applicable.

b. If taxable capital is below \$10 million, the small business rate would be applicable.

c. If taxable capital is between \$10 million and \$15 million, the appropriate small business rate will be calculated.

2. The OEB's proxy for taxable capital is rate base.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.

If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.

If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

In the Green Cells below, enter all proposed rate riders/rates.

In column A, select the rate rider descriptions from the drop-down list in the blue cells. If the rate description cannot be found, enter the rate rider descriptions in the green cells. The rate rider description must begin with "Rate Rider for".

In column B, choose the associated unit from the drop-down menu.

In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.

In column E, enter the expiry date (e.g. April 30, 2020) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).

In column G, a sub-total (A or B) should already be assigned to the rate rider unless the rate description was entered into a green cell in column A. In these particular cases, from the dropdown list in column G, choose the appropriate sub-total (A or B). Sub-total A refers to rates/rate riders that Not considered as pass through costs (eg: LRAMVA and ICM/ACM rate riders). Sub-total B refers to rates/rate riders that are considered pass through costs.

This schedule supersedes and replaces all previously approved schedules of Rates. Charges and Loss Factors

EB-2020-025

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering under 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2020-025

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering equal to or over 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EMBEDDED DISTRIBUTOR SERVICE CLASSIFICATION

This classification applies to Niagara Peninsula Energy Inc. an electricity distributor licensed by the Ontario Energy Board, that is provided electricity by means of this distributor's facilities. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	17,274.46
Distribution Volumetric Rate	\$/kW	1.4882
Rate Rider for Disposition of Deferral/Variance Accounts (2021) - effective until December 31, 2021	\$/kW	0.3482
Retail Transmission Rate - Network Service Rate	\$/kW	3.5259
Retail Transmission Rate - Line and Transformation Connection Service Rate	\$/kW	0.6311

Effective and Implementation Date January 1, 2021

This schedule supersedes and replaces all previously approved schedules of Rates. Charges and Loss Factors

EB-2020-025

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	4.55
ALLOWANCES		
Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for Transformer Losses - applied to measured demand & energy	%	(1.00)

SPECIFIC SERVICE CHARGES

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Temporary service install & remove - overhead - with transformer	\$	1,000.00
Specific charge for access to the power poles per pole/year		
(with the exception of wireless attachments)	\$	45.39

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	104.04
Monthly fixed charge, per retailer	\$	41.62
Monthly variable charge, per customer, per retailer	\$/cust.	1.04
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.62
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.62)

Effective and Implementation Date January 1, 2021

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors	
	EB-2020-025

Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.52
Processing fee, per request, applied to the requesting party	\$ 1.04
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 4.16
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the	
Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$ 2.08

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will b	e implemented
upon the first subsequent billing for each billing cycle.	
Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0457
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0352

Incentive Rate-setting Mechanism Rate Generator for 2021 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2020 of \$0.1368/kWh (IESO's Monthly Market Report for May 2020) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
 Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.
 Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

APPENDIX B – RTSR Adjustments and Rates (Tabs 10-15)

Ontario Energy Board

Incentive Rate-setting Mechanism Rate Generator for 2021 Filers

Columns E and F have been populated with data from the most recent RRR filing. Rate classes that have more than one Network or Connection charge will notice that the cells are highlighted in green and unlocked. If the data needs to be modified, please make the necessary adjustments and note the changes in your manager's summary. As well, the Loss Factor has been imported from Tab 2.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.

If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.

If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 28 of 39 Filed: August 17, 2020

APPENDIX C – GA Analysis Workform

Ontario Energy Board

GA Analysis Workform

Account 1589 Global Adjustment (GA) Analysis Workform

Input cells Drop down cells

Utility Name GRIMSBY POWER INCORPORATED

Note 1

For Account 1589,

a) If the account was last approved on a final basis, select the year that the balance was last approved on a final basis.

b) If the account was last approved on an interim basis, and

i) there are no changes to the previously approved interim balances, select the year that the balances were last approved for diposition on an interim basis. OR

ii) there are changes to the previously approved interim balances, select the year that the balances were last approved for disposition on a final basis. An explanation should be provided to explain the reason for the change in the previously approved interim balances.

(e.g. If 2017 balances reviewed in the 2019 rate application were to be selected, select 2017)

instructions:

1) Determine which scenario above applies (a, bi or bii). Select the appropriate year to generate the GA Analysis Workform tabs and the Principal Adjustments tab.

For example:

• Scenario a -If 2018 balances were last approved on a final basis - Select 2018 and a GA Analysis Workform for 2019 will be generated.

• Scenario bi - If 2018 balances were last approved on an interim basis and there are no changes to 2018 balances - Select 2018 and a GA Analysis Workform for 2019 will be generated.

• Scenario bii - If 2018 balances were last approved on an interim basis, there are changes to 2018 balances, and 2017 balances were last approved for disposition - Select 2017 and GA Analysis Workforms for 2018 and 2019 will be generated.

2) Complete the GA Analysis Workform for each year generated.

3) Complete the Principal Adjustments tab. Note that the number of years that require principal adjustment reconciliations are all shown in one Principal Adjustments tab, depending on the year selected on the Information Sheet.

See the separate document GA Analysis Workform Instructions for detailed instructions on how to complete the Workform and examples of reconciling items

				Adjusted Ne	et Change in			Unresolved Difference as %

Notes

1) The "Transaction" column in the DVA Continuity Schedule is to equal the transactions in the general ledger (excluding transactions relating to the removal of approved disposition amounts as that is shown in a separate column in the DVA Continuity Schedule) 2) Any principal adjustments needed to adjust the transactions in the general ledger to the amount that should be requested for disposition should be shown separately in the "Principal Adjustments" column of the DVA Continuity Schedule 3) The "Variance RRR vs. 2019 Balance" column should equal principal adjustments made in the current disposition period. It should not be impacted by reversals from prior year approved principal adjustments.

Complete the table below for the current disposition period. Complete a table for each year included in the balance under review in this rate application. The number of tables to be completed is automatically generated based on data provided in the Information Sheet

APPENDIX E – Former (Prior to 2019) GA Methodology Description

Appendix A GA Methodology Description Questions on Accounts 1588 & 1589

1. Please complete the Table below for principal adjustments on the DVA Continuity Schedule for Account 1588:

Grimsby Power Response

1.)

Reconciliation of Account 1588 - 2018

			Was the amount a "Principal Adjustment" in the previous year?
		Principal Adjustments	(Y/N)
	Balance December 31, 2018	122,868.81	
Reversa	ls of Principal Adjustments - previous year		
1.	Reversal of Cost of Power accrual from previous year	- 87,519.71	Y
2.	Reversal of CT 1142 true-up from the previous year		
3.	Unbilled to billed adjustment for previous year		
4.	Reversal of RPP vs. Non-RPP allocation		
	Sub-Total Reversals from previous year (A):	- 87,519.71	

5.	Cost of power accrual for 2018 vs Actual per IESO bill		
6.	True-up of CT 1142 for 2018 consumption recorded in 2019 GL	70,884.51	Ŷ
7.	Unbilled accrued vs. billed for 2018 consumption		
8. act	True-up of RPP vs. Non-RPP allocation of CT 148 based on ual 2018 consumption		
9.	Other		
	Sub-Total Principal Adjustments for 2018 consumption (B)	70,884.51	
	Total Principal Adjustments shown for 2018 (A + B) -	16,635.20	
l. Fo	or Disposition - 1588 (should match Total Claim column on DVA		
	Continuity Schedule	106,233.61	

- 1. In booking expense journal entries for Charge Type (CT) 1142 and CT 148 from the IESO invoice, please confirm which of the following approaches is used:
 - a. CT 1142 is booked into Account 1588. CT 148 is pro-rated based on RPP/non-RPP consumption and then booked into Account 1588 and 1589 respectively.
 - b. CT 148 is booked into Account 1589. The portion of CT 1142 equaling RPP minus HOEP for RPP consumption is booked into Account 1588. The portion of CT 1142 equaling GA RPP is credited into Account 1589.
 - c. If another approach is used, please explain in detail.

d. Was the approach described in response to the above questions used consistently for all years for which variances are proposed for disposition? If not, please discuss.

Grimsby Power Response

1) Grimsby Power follows approach a) booking charge type 1142 to account 1588. Charge type 148 is pro-rated based on RPP/non-RPP consumption and booked into account 1588 and 1589 respectively.

- 2. Questions on CT 1142
 - Please describe how the initial RPP related GA is determined for settlement forms submitted by day 4 after the month-end (resulting in CT 1142 on the IESO invoice).

2. a) The amount that goes to 1142 represents the difference between the cost at the OEB approved RPP rates and the cost at the weighted average price plus Global Adjustment.

To find that value Grimsby Power uses a report from the customer information system (CIS) to determine kWh consumption for RPP customers. The consumption information provided by the CIS is the previous month's consumption data. For example, to report June data to the IESO during the first few days of July the settlement would be based on May consumption.

The RPP consumption data is split between On Peak, Mid Peak, Off Peak, Tier One and Tier Two. The consumption values for each time/usage period are then multiplied by the current OEB approved RPP rate (on, mid, off, tier one and tier two). This gives the total RPP cost.

That same data is then multiplied by the weighted average price and the second estimate GA. This is the total at the weighted average price plus Global Adjustment.

The cost at RPP rates is then subtracted from the cost at the weighted average price plus Global Adjustment. That difference goes to 1142.

b. Please describe the process for truing up CT 1142 to actual RPP kWh, including which data is used for each TOU/Tier 1&2 prices, as well as the timing of the true up.

2. b) The true up process follows the same steps as above except the data used for each month is actual data for the month. For example the true up for June would

use the actual data for June. The weighted average price is verified against the weighted average price posted by the IESO for the current month and the GA used in the true up calculation is the final posted rate from the IESO.

The true up is completed on a regular basis. All months are trued up within the year with the exception of December which is trued up in the following year.

c. Has CT 1142 been trued up for with the IESO for all of 2018?

Grimsby Power Response

- 2. c) The true up for 1142 was completed for all months in 2018 except December.
 - d. Which months from 2018 were trued up in 2019?
 - i. Were these true ups recorded in the 2018 or 2019 balance in the General Ledger?

Grimsby Power Response

2. d) December 2018. This true up was recorded in the 2019 balance in the General Ledger.

e. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?

Grimsby Power Response

- 2. e) Yes.
- 3. <u>Questions on CT 148</u>
 - a. Please describe the process for the initial recording of CT 148 in the accounts (i.e. 1588 and 1589).

Grimsby Power Response

3. a) Grimsby Power determines the Global Adjustment cost split between RPP and Non-RPP customers by determining the difference in cost between the actual cost of Global Adjustment (Charge Type 148 from IESO invoice, no accrual) and a calculation of Global Adjustment costs attributable to RPP customer consumption. Specifically, Grimsby Power uses a report from the customer information system (CIS) to determine kWh consumption for RPP customers. The consumption information provided by the CIS is the previous month's consumption. Those kWhs are then multiplied by the 2nd Global Adjustment estimation from the IESO. The result of that calculation is the Global Adjustment for RPP customers. This amount is booked to 4705. This

amount is subtracted from the Global Adjustment cost on the IESO invoice. The result is the Global Adjustment for non-RPP Customers. This amount is booked to 4707.

The revenue from RPP customers is booked to offset 4705 and the revenue from non RPP customers is booked to offset 4707. The difference between revenue and expense is then booked to 1588 and 1589 respectively.

b. Please describe the process for true up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.

Grimsby Power Response

3. b) As described above the initial recording of amounts related to 1588 and 1589 are based on consumption data from the previous month. The true up process consists of using the actual month consumption data by RPP rate class, weighted average price and actual month final GA rate.

c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as the initial GA expense in Account 1589?

Grimsby Power Response

3. c) As described in 3. a) above the actual GA rate is multiplied by the actual RPP consumption. The non RPP rate is found by subtracting the RPP GA amount from the total GA charged.

d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated RPP/non-RPP consumption proportions to actual based on actual RPP-non-RPP consumption proportions?

Grimsby Power Response

3. d.) Grimsby Power trues up the initial recording of CT 148 based on actual consumption proportions.

e. Please indicate which months from 2018 were trued up in 2019 for CT 148 proportions between RPP and non-RPP

i. Were these true ups recorded in the 2018 or 2019 balance in the General Ledger?

Grimsby Power Response

3. e.) December 2018 was trued up in 2019 and the true ups were recorded in the 2019 General Ledger.

f. Are all true-ups for 2018 consumption reflected in the DVA Continuity Schedule?

Grimsby Power Response

3. f) Yes.

4. Questions regarding principal adjustments and reversals on the DVA Continuity Schedule:

Questions on Principal Adjustments - Accounts 1588 and 1589

a. Did the applicant have principal adjustments in its 2019 rate proceeding which were approved for disposition?

Grimsby Power Response

4. a) Yes

 b. If yes, please provide a break-down of the total amount of principal adjustments that were approved (e.g. true-up of unbilled, true up of CT 1142, true up of CT 148 etc.) for each of Accounts 1588 and 1589.

Grimsby Power Response

4. b)

		Pro	019 Rate oceeding justment	Adjustment Cell
RVSA - Power	1588	-\$	87,520	Cell BF28
RSVA - Global Adjustment	1589	\$	141,563	Cell BF29

c. Has the applicant reversed the adjustment approved in 2019 rates in its current proposed amount for disposition?
 NB: only the principal adjustments amounts that were disposed in the

previous proceeding should be reversed in this proceeding. For example, if no amount related to unbilled to billed adjustment for 2018 consumption

was included in 2019 proceeding, this amount should <u>not</u> be included as a "reversal" from previous year.

Grimsby Power Response

4. c) Yes

d. Please confirm that the allocation of charge type 148 has been trued up to actual proportion of RPP/non-RPP consumption in the GL.

Grimsby Power Response

4. d) Grimsby Power confirms that CT148 has been trued up to the actual RPP/Non RPP consumption in the GL.

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 31 of 39 Filed: August 17, 2020

APPENDIX I – Current Tariff Sheets

Schedule A To Decision and Rate Order Tariff of Rates and Charges OEB File No: EB-2019-0038 DATED: December 12, 2019

Effective and Implementation Date January 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2019-0038

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

EB-2019-0038

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering under 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0038

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering equal to or over 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Service Charge	\$	214.39
Distribution Volumetric Rate	\$/kW	3.1352

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to electricity consumption that is not metered and is billed based on estimated usage. Such connections include street lighting equipment not owned by or operated for a municipality or the Province of Ontario, traffic signals and other small services etc. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

STREET LIGHTING SERVICE CLASSIFICATION

All services to street lighting equipment owned by or operated for a municipality or the Province of Ontario shall be classified as Street Lighting Service. Consumption is as per the Ontario Energy Board's street lighting load shape. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2020-025

RESIDENTIAL SERVICE CLASSIFICATION

This class refers to the supply of electricity to residential customers residing in detached or semi-detached dwelling units, as defined in the local zoning by-law. Residential Service means a service which is less than 50 kW supplied to single-family dwelling units that is for domestic or household purposes, including seasonal occupancy. At Grimsby Power's discretion, residential rates may be applied to apartment buildings with 6 or less units by simple application of the residential rate or by blocking the residential rate by the number of units. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2020-025

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering under 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non-residential customer that is identified by the billing system as registering equal to or over 50 kW on a demand meter in any one month of the year. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	\$	4.55
ALLOWANCES		
Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for Transformer Losses - applied to measured demand & energy	%	(1.00)

SPECIFIC SERVICE CHARGES

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Temporary service install & remove - overhead - with transformer	\$	1,000.00
Specific charge for access to the power poles per pole/year		
(with the exception of wireless attachments)	\$	45.39

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	104.04
Monthly fixed charge, per retailer	\$	41.62
Monthly variable charge, per customer, per retailer	\$/cust.	1.04
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.62
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.62)

Effective and Implementation Date January 1, 2021

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors	
	EB-2020-025

Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.52
Processing fee, per request, applied to the requesting party	\$ 1.04
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 4.16
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the	
Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$ 2.08

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will b	e implemented
upon the first subsequent billing for each billing cycle.	
Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0457
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0352

Grimsby Power Inc EB-2020-0025 2021 IRM Application Page 36 of 39 Filed: August 17, 2020

APPENDIX K – Bill Impacts

Incentive Rate-setting Mechanism Rate Generator for 2021 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2020 of \$0.1368/kWh (IESO's Monthly Market Report for May 2020) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
 Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.
 Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.
