Attn: Kirsten Walli

RE: Collus PowerStream Corp (License ED-2002-0518) 2018 4th Generation IRM Application EB-2017-0034

In accordance with instructions released by the Ontario Energy Board ("OEB") updating Chapter 3 of the *Filing Requirements for Electricity Distribution Rate Applications*, Collus PowerStream submits its application for approval of the 4th Generation Incentive Ratesetting Mechanism (IRM4) based rates effective May 1, 2018. An electronic copy of the Application has been filed on the OEB's RESS Filing System and two (2) hard copies are enclosed.

On October 23, 2017 Collus sent a letter to the Board Secretary expressing concerns that the required special purpose audit would not be completed on time for the November 6 filing deadline despite the infield audit work taking place in mid-July 2017. An extension to the November 6, 2017 deadline was requested but as of yet, no response has been received. Therefore, in order to meet the filing deadline and ensure rates effective May 1, 2018, Collus has removed the Group 1 disposal until the special purpose audit report is complete. Once the audit report is received and management has reviewed it will be submitted promptly as part of this application along with the GA Analysis Work Forms.

If you have any questions, please do not hesitate to contact the undersigned at thesselink@collus.com or (705)445-1800 ext 2274.

Yours truly,

Tim Hesselink, CPA, CGA Regulatory Manager

ONTARIO ENERGY BOARD 1 2 3 **IN THE MATTER OF** the Ontario Energy Board Act, 1998. 4 C. S.O. 1998, c.15 (Sched. B); 5 6 7 **AND IN THE MATTER OF** an Application by Collus 8 PowerStream Corp. for an Order or Orders pursuant to 9 Section 78 of the Ontario Energy Board Act, 1998 10 approving or fixing just and reasonable rates and other service charges for the distribution of electricity 11 12 **Application** 13 14 1. The applicant is Collus PowerStream Corp. ("Collus"), an electricity distribution 15 company owned 50% by The Town of Collingwood and 50% by Alectra Utilities 16 Corporation. Collus serves about 17,000 mostly residential and commercial 17 electricity customers in the Towns of Collingwood, Stayner, Creemore and 18 Thornbury. Collus, an Ontario corporation with its head office in Collingwood, 19 Ontario, carries on the business of owning and operating electricity distribution 20 facilities under Electricity Distribution Licence ED-2002-0518. 21 22 2. Collus hereby applies to the Ontario Energy Board (the "Board" or the "OEB"), pursuant to section 78 of the Ontario Energy Board Act, 1998 as amended (the 23 24 "OEB Act") for an Order or Orders approving its proposed electricity distribution 25 rates and other charges, effective May 1, 2018. 26 3. Collus last appeared before the OEB with a cost of service rebasing application 27 28 for 2013 rates in the EB-2012-0116 proceeding. 29 30 4. Collus is seeking approval for electricity distribution rates using the OEB's 2018 31 IRM Rate Generator Model. Collus confirms that it has worked with OEB staff to 32 make any necessary adjustments to prepopulated values, and that the billing determinants in the models as filed are accurate. 33 34

1	5.	Collus requests that, pursuant to Section 34.01 of the OEB's Rules of Practice
2		and Procedure, this proceeding be conducted by way of written hearing.
3		
4	6.	The Applicant confirms that the application and related documents will be
5		published on its website (<u>www.collus.com</u>).
6	7	The persons offerted by this Application are the retempyone of Collyp' coming
7	7.	The persons affected by this Application are the ratepayers of Collus' service
8		territory.
9 10	8.	The Applicant requests that a copy of all documents filed with the OEB in this
11		proceeding be served on the Applicant at follows:

1. Introduction

- 2 Collus has selected the Price Cap Incentive Rate-setting ("Price Cap IR") option to file its
- 3 2018 Distribution Rate Application. In preparing this Application, Collus has complied with
- 4 Chapter 3, Incentive Rate Setting Applications, of the Board's Filing Requirements for
- 5 Distribution Rate Applications 2017 Edition for 2018 Rate Applications, dated July 20,
- 6 2017 (the "Filing Requirements").
- 7 All rates referenced in this Application and included in the accompanying 2018 Proposed
- 8 Tariff of Rates and Charges are based on the output of the OEB's 2018 IRM Rate
- 9 Generator Model Version 1.1, as posted on the OEB website September 8, 2017 (the
- 10 "2018 IRM Model" or the "Model").
- 11 The application includes a completed Lost Revenue Adjustment Mechanism Variance
- 12 Account (LRAMVA) Work Form Version 2.0, as posted by the OEB on July 18, 2017 for
- the disposition of the 1568 balances up to December 31, 2015 and a completed "STS-Tax"
- 14 Change" worksheet in the 2018 IRM Rate Generator model for the sharing of the impact
- 15 of legislated tax changes.
- On March 30, 2017, Collus PowerStream received a final OEB Decision and Rate Order
- 17 for Rates effective May 1, 2017 which included a requirement in its next rate application
- to file the results of a special purpose audit of the balances in its RSVA Power and RSVA
- 19 GA accounts. In compliance with the OEB's instructions as set out in the Decision, Collus
- 20 engaged an audit firm to complete the work in July 2017. Collus has not yet received the
- 21 audit report. Once the audit report is completed and management has had an opportunity
- 22 to review the document, the report will be submitted to the OEB.
- 23 Collus is not seeking disposition of the 2016 year-end total balance for Group 1 accounts
- 24 including interest projected to April 30, 2018 as the special purpose audit verifying the
- 25 balances is incomplete. Since Collus has complied with the OEB's request and this
- 26 circumstance is beyond the control of the utility, Collus is requesting the OEB reconsider
- 27 Group 1 disposal once the audit report becomes available. In order to file by the
- November 6th, 2017 deadline, the Group 1 disposition was removed, but these amounts
- 29 are currently over the threshold.

EB-2017-0034
Collus PowerStream Corp.
2018 IRM Application
Filed: November 6, 2017

2. Summary of Application

- 2 Collus' current rates, effective May 1, 2017, were approved by the Board in its Decision
- 3 dated March 30, 2017 on Collus' 2017 4th GIRM Application (EB-2016-0064).
- 4 Collus is submitting a 4th GIRM Application for rates effective May 1, 2018.
- 5 Collus requests an Order or Orders approving:
- Monthly Service Charge and Distribution Volumetric rates adjusted by the Board's
 price cap formula effective May 1, 2018;
- A rate rider for Disposition of Lost Revenue Adjustment Mechanism Variance
 Account (LRAMVA);
- 3. A rate rider with respect to the tax change amount from the impact of the legislated
 tax changes to be shared 50/50 between shareholders and ratepayers;
- 12 4. Updated Retail Transmission Service rates effective May 1, 2018; and
 - 5. An order declaring Collus' current (i.e. 2017) rates as interim rates effective May 1, 2018, and a rider that would allow for the recovery of any foregone incremental revenue between May 1, 2018 and the effective date of the Board's Rate Order if and only if the preceding approvals cannot be issued in time to implement final rates, effective May 1, 2018.

18

13

14

15

16

17

1

1 3. Price Cap Adjustment

- 2 The rates and tariffs entered in the Rate Generator Model are taken from the Board-
- 3 approved 2017 Tariff of Rates and Charges, as per the Board Rate Order (EB-2016-0064)
- 4 dated March 30, 2017 and attached to this Application as Appendix E.
- 5 Collus has the following rate classes:
- 6 Residential
- 7 General Service Less Than 50 kW
- 8 General Service 50 to 4,999 kW
- Unmetered Scattered Load
- 10 Street Lighting
- 11 Since rebasing took place in 2013, Collus has one significant industrial customer who has
- 12 now exceeded the General Service 50 to 4,999 kW consumption. An updated rate class
- 13 will be included in the next Cost of Service, expected to be filed in August 2018. For the
- 14 purposes of this application, this customer has been included in the General Service 50
- 15 to 4,999 kW class.
- 16 The Price Cap index of 1.75% is calculated in the Board's Rate Generator model, based
- on the preliminary 4th GIRM parameters. This is determined using an inflation factor of
- 18 1.90%, a productivity factor of 0.00%, and a stretch factor of 0.15% (Cohort II) based on
- 19 the updated benchmarking study for use for rates effective in 2018.

4. Tax Changes

- 2 The Board's 4th GIRM Supplemental Report determined that a 50/50 sharing of the impact
- 3 of currently known legislated tax changes, as applied to the tax level reflected in the Board-
- 4 approved base rates for a distributor, is appropriate. The tax costs to be shared in 2018
- 5 are related to the income tax rate changes as shown on Schedule 8 "STS-Tax Change"
- 6 in the 2018 IRM Model.
- 7 At the time of filing this Application the legislated tax rates for 2018 are changed from the
- 8 tax rates which underpin the current distribution rates with respect to the availability of the
- 9 Small Business Deduction which increases the tax rate. The additional tax cost is \$65,617
- 10 as calculated by the Board's rate model. Under the Board's guidelines any tax savings or
- 11 cost is shared 50% 50% with ratepayers resulting in an amount of \$32,809 to be
- recovered from customers through the following the tax change rate riders:
- \$0.11 per customer for Residential
- \$0.0001 per kWh for General Service less than 50 kW
- \$0.0191 per kW for General Service greater than 50kW
- \$0.0001 per kWh for Unmetered Scattered Load
- \$0.1906 per kW for Street lighting
- 18 Collus recognizes that should further legislated tax changes for 2018 occur during the
- 19 course of this proceeding, the tax change calculation may be updated and rate riders
- 20 updated as part of the draft Rate Order process.

5. Lost Revenue Adjustment Mechanism Variance Account ("LRAMVA")

- 3 In the Guidelines for Electricity Distributor Conservation and Demand Management (EB-
- 4 2012-0003) (the "CDM Guidelines"), the Board approved the generic variance account,
- 5 Account 1568 LRAM Variance Account. This account was created in relation to the CDM
- 6 programs for the 4-year period January 1, 2011 to December 31, 2014, in recognition of
- 7 the new CDM targets assigned to distributors.
- 8 Distributors are required to calculate the variance between the actual CDM savings
- 9 achieved and the level of CDM savings assumed in the setting of their rates. The variance
- in the CDM savings is to be calculated for each customer class and the approved rates
- 11 applied to determine a dollar amount. These amounts are to be recorded in Account 1568
- 12 and reported in the annual trial balance filed under electricity Reporting and Record-
- 13 keeping Requirements ("RRR") section 2.1.7.
- 14 Collus had new cost of service ("COS") rates approved for 2013. This was the first COS
- 15 filing where the load forecast incorporated the anticipated CDM savings related to the new
- 16 CDM targets assigned to distributors.
- 17 The previous COS application was filed for 2009 rates and there was no load reduction
- with respect to the new CDM targets assigned to distributors for the 2011 to 2014 time
- 19 period.
- 20 As the 2011 and 2012 rates do not contain any adjustment for these programs, the entire
- 21 amount of the OPA reported savings represents the variance between CDM in rates and
- 22 actual CDM results.
- 23 Collus has calculated the LRAMVA for 2011-2015 based on the Board's guidance. The
- amounts booked are summarized in Table 5.1 below.

Table 5.1: LRAMVA Amounts as at December 31, 2015

	AC1	TUAL					
							Total
Rate Class		2011	2012	2013	2014	2015	Principal

Streetlights		-	-	\$ (2,726.97)	\$ (2,846.25)	\$ (2,884.20)	(8,457.42)	(395.67)	(8,853.09)
USL		-	-	\$ (66.51)	\$ (41.69)	\$ (54.33)	(162.53)	(7.83)	(170.36)
	\$	8,899.72	\$ 24,662.35	\$ (20,005.84)	\$ 8,465.70	\$ 29,857.98	\$ 51,879.92	\$ 2,839.92	\$ 54,719.84

- 2 The table amounts from 2011 to 2015 have been updated to the IESO's Final Verified
- 3 Results.
- 4 The forecast in the original Cost of Service application was calculated on expected savings
- 5 prorated by class based on consumption. The actual results reveal savings above
- 6 forecast in the GS<50 class and below forecast in the GS>50 class.
- 7 Section 13.4 of the CDM Guidelines provides that "At a minimum, distributors must apply
- 8 for disposition of the balance in the LRAMVA the time of their Cost of Service rate
- 9 applications. Distributors may apply for the disposition of the balance in the LRAMVA on
- an annual basis, as part of their Incentive Regulation Mechanism rate applications, if the
- 11 balance is deemed significant by the applicant." Collus is making a request for disposition
- of the December 31, 2015 ending principal balance of \$51,880 plus carrying charges of
- 13 \$2,840 as part of this application.

6. Retail Transmission Service Rates

- 2 Collus has adjusted its Retail Transmission Service Rates (RTSR) to recover the
- 3 wholesale transmission costs that it will be charging. Collus used the Board's 2018 RTSR
- 4 worksheets included in the 2018 IRM Rate Generator model and followed the direction in
- 5 the Board's Guideline: Electricity Distribution Retail Transmission Service Rates, G-2008-
- 6 0001, Revision 4.0, June 28, 2012.
- 7 Collus has assumed no change in the wholesale transmission rates that it will be charged
- 8 for 2018. Collus is billed for transmission costs for all delivery points by Hydro One
- 9 Networks Inc. (HONI) and has entered HONI's approved rates into the model. Collus
- 10 anticipates that information regarding 2018 wholesale transmission rates will be available
- and that the RTSR Model will be updated with 2018 wholesale rates at the time of the draft
- 12 Rate Order filing. All of Collus transmission costs are invoiced from HONI.
- 13 Collus has determined the 2016 wholesale quantities billed. The 2016 wholesale
- 14 quantities and the 2017 approved wholesale rates were used to calculate the estimated
- wholesale transmission costs for 2017 and for 2018.

Table 6.1: Proposed RTSR Rates

Transmission Rates	Billed at Current Rates	Forecast Wholesale Cost	Change \$	Change %
Network	\$ 1,927,264	\$ 1,927,264	\$ 0	0.00%
Connection	\$ 1,109,466	\$ 1,109,466	\$ 0	0.00%

16

7. RSVA – Power and RSVA Global Adjustment Special

2	Purpose Audit

- 3 On March 30, 2017, Collus PowerStream received a final OEB Decision and Rate
- 4 Order for Rates effective May 1, 2017 which included a requirement in its next rate
- 5 application to file the results of a special purpose audit of the balances in its RSVA
- 6 Power and RSVA GA accounts, in compliance with the OEB's instructions as
- 7 set out in the Decision.

- 8 On October 23, 2017 Collus sent a letter to the Board Secretary expressing
- 9 concerns that the special purpose audit would not be completed on time for the
- November 6, 2017 IRM filing deadline despite the infield audit work taking place in
- 11 mid-July 2017. An extension to the November 6, 2017 deadline was requested
- but as of yet, no response has been received.
- 13 Therefore, in order to meet the filing deadline and ensure rates effective May 1,
- 14 2018, Collus has removed the Group 1 disposal until the special purpose audit
- 15 report is complete.
- 16 Collus is aware that there will be auditor reallocations of balances between the
- 17 RSVA Power and RSVA Global Adjustment balances which will off-set the
- balances significantly. This should reduce much of the large GA balance that is
- only applicable to non-regulated price plan customers.
- 20 Once the audit report is received and management has reviewed it will be
- 21 submitted promptly as part of this application along with the GA Analysis Work
- 22 Forms.

8. Deferral and Variance Accounts

- 2 On July 31, 2009 the Board issued its Report on Electricity Distributors' Deferral and
- 3 Variance Account Review Initiative (EDDVAR). The EDDVAR Report sets out the policy
- 4 framework for the review and disposition of deferral and variance accounts ("DVA") for
- 5 electricity distributors. As part of this framework, the Board has decided to review certain
- 6 deferral and variance accounts within a distributor's IRM application.
- 7 Collus has entered the data for the Group 1 Accounts into the appropriate schedules of
- 8 the IRM Rate Generator model (Appendix C). Table 7.1 below summarizes the Group 1
- 9 Account balances as at December 31, 2016, as per the model.

Table 7.1: Summary of the Group 1 Account Balances at December 31, 2016

Description	Account	Amount
LV Variance Account	1550	1,173,941
Smart Metering Entity Charge Variance Account	1551	(17,822)
RSVA - Wholesale Market Service Charge ⁵	1580	(1,168,781)
Variance WMS – Sub-account CBR Class A⁵	1580	-
Variance WMS – Sub-account CBR Class B⁵	1580	67,847
RSVA - Retail Transmission Network Charge	1584	58,070
RSVA - Retail Transmission Connection Charge	1586	157,300
RSVA - Power⁴	1588	(5,899,482)
RSVA - Global Adjustment ⁴	1589	5,901,332
Disposition and Rec/Ref of Reg Balances (2009)	1595	-
Disposition and Rec/Ref of Reg Balances (2010)	1595	50,477
Disposition and Rec/Ref of Reg Balances (2011)	1595	-
Disposition and Rec/Ref of Reg Balances (2012)	1595	(12,075)
Disposition and Rec/Ref of Reg Balances (2013)	1595	99,819
Disposition and Rec/Ref of Reg Balances (2014)	1595	-
Disposition and Rec/Ref of Reg Balances (2015)	1595	159,549
Total Group 1 Balance		570,173
LRAM Variance Account	1568	103,540
Total including Account 1568		673,712
Threshold Test (Total claim per kWh)		\$0.0019

10

EB-2017-0034 Collus PowerStream Corp. 2018 IRM Application Filed: November 6, 2017 Page 16 of 21

- 1 As shown in Table 7.1 above, the threshold of \$0.0010 per kWh debit or (credit) has been
- 2 exceeded and as a result, Collus had planned disposition of the Group 1 balances.
- 3 However, since the special purpose audit has not yet been completed, as identified above,
- 4 Collus has not included the disposition of the Group 1 accounts at this time. Collus
- 5 anticipates updating the relief sought in this Application to include the Group 1 disposition,
- 6 once it has the final audit report.
- 7 Collus has reviewed and can confirm that the prepopulated billing determinants are
- 8 correct.
- 9 The Board has also given distributors the opportunity to request disposition of the
- 10 balances in Account 1568 Lost Revenue Adjustment Variance account (LRAMVA). This
- is discussed in Section 5, LRAMVA, above. Collus is requesting to dispose of the Account
- 12 1568 balance in this Application.

- 2 Collus completes and files the "Regulated Price Plan vs. Market Price Variance for
- 3 Conventional Meters" and Regulated Price Plan vs Market Price Variance for Smart
- 4 Meters" data submissions with the Independent Electricity System Operator ("IESO") by
- 5 the fourth business day of each month as required.
- 6 Collus uses the IESO's 1st GA estimate to bill its customers, which is applicable to all
- 7 customer classes except for Class A.
- 8 The IESO data submission is filed using the 2nd monthly estimate of the GA.
 - A) The "Regulated Price Plan vs. Market Price Variance for Conventional Meters" submission is completed by downloading the consumption information for the month from our settlement provider by each individual interval metered RPP tiered pricing customer and summarizing the data.
- B) The "Regulated Price Plan vs Market Price Variance for Smart Meters" submission is completed by downloading the consumption information for the

month from our settlement provider for the following calculation:

- Total System Load
- Less Non-RPP Interval Metered Customers
- Less Streetlighting
 - Less Non-Designated Loads
 - o non-interval metered spot rate customers
 - retail customers: settlement information for the current month is not available for retail customers so billed information for the month from the billing system is used as an estimate.
- When Collus receives the IESO invoice on the tenth business day of the month, the actual GA charged to Collus is reconciled and trued up to the estimate as filed. The calculated difference is then entered as an adjustment in the following month's data submission.
- Line 148 of the IESO invoice "Class B Global Adjustment Settlement Amount" is allocated
 in a percentage split to account "4705 Power Purchased" and "4707 Charges Global

- 1 Adjustment" based on a comprehensive excel work form which summarizes all the above
- 2 noted consumption data. The split allocates the GA charged by the IESO to the RPP and
- 3 Non-RPP customers as follows, using A and B as defined on the previous page.
- 4 Power Purchased: (RPP) (A + B) / Total System Load
- 5 Charges GA: (Non-RPP) Total System Load (A + B) / Total System Load
- 6 These amounts are posted to the general ledger only after the IESO invoice arrives and
- 7 the splits are determined.

- 8 Collus bills its customers on a cycle basis. Collus has the following billing cycles;
- Residential, General Service Less than 50 kW and Unmetered Scattered Load,
 the cycles below are billed on a non-calendar monthly basis
 - 4 cycles for Collingwood, 1 cycle billed each week
- 12 o 1 cycle for Stayner, billed every four weeks in conjunction with one
 Collingwood cycle
 - 1 cycle for Creemore, billed every four weeks in conjunction with one Collingwood cycle
 - 1 cycle for Thornbury, billed every four weeks in conjunction with one Collingwood cycle
 - General Service greater than 50 kW and Streetlighting
- o 1 cycle billed on a calendar month
- 20 Collus receives the GA calculations for each Class B non-RPP customer from Utilismart
- 21 who provides Collus with Settlement Services. The Class B GA is imported into the billing
- 22 system daily to align with consumption.
- 23 For billing purposes, Collus uses the following GA calculation for non-RPP customers;
- Residential and General Service less than 50 kW are billed a weighted average
 GA of the 1st monthly GA estimate based on the number of days in each month of
 the billing cycle
 - General Service greater than 50 kW are billed the 1st monthly GA estimate

Filed: November 6, 2017
Page 19 of 21

Collus records unbilled revenue in the accounting system monthly and reverses it in the subsequent month. The monthly unbilled amounts are based on estimation for January to November. The components of a customer's most recent bill are divided by the number of days in the billing period. Then the estimated daily revenue is multiplied by the remaining days to month-end. The estimation technique is not used for year-end. The monthly unbilled amounts for December are recorded based on actual consumption. The billing system is set-up for a rate change on January 1 with no actual change to the rates occurring. This allows the billing system to split bills processed in January and February of the new year between revenue earned before and after December 31st. Therefore, exactly correct unbilled consumption and dollars is posted for the year.

As of December 31, 2016, Collus only had one Class A GA customer. Due to the expansion of the IESO Industrial Conservation Initiative (ICI), the number of customers has increased to five as of July 1, 2017. The global adjustment for Class A customers is billed using line 147 of the IESO invoice allocated based on each customer's contribution to the total peak demand factor.

Collus completes the IESO's Embedded Generation Information submission, which provides the total kWh generated as well as the total billed to Class A customers. Prior to July 1, 2015 Collus did not have any registered Class A GA customers. Beginning July 1, 2015 Collus registered one Class A GA customer with the IESO.

9. Rate Change Summary and Bill Impacts

- 2 Appendix A shows the proposed Tariff of Rates and Charges, incorporating the effect of
- 3 the 2017 price cap adjustment and updated transmission rates.
- 4 Appendix B shows the resulting bill impacts, as calculated by the Board's Rate Generator
- 5 model.

2021

Pursuant to EB-2012-0410 Collus will be transitioning its residential fixed and variable distribution rates to a fully fixed distribution rate over a four year period, completing the transition with rates effective May 1, 2019. After the first year of the renewed rate design, the split between fixed and variable was 56.9% and 43.1%. This transition continued in 2017 adjusting to an average split of 71.2% fixed and 28.8% variable. With the proposed rates effective May 1, 2018 the fixed and variable split is now 85.6% and 14.4% respectively. Per section 3.2.3 of the *Filing Requirements for Electricity Distribution Rates Applications* – 2017 Edition for 2018 Rate Applications, Collus has calculated the impact of the above change on its 10th percentile customers. Collus extracted its billing data for all customers who had 12 months of consumption in 2016. From the data set Collus calculated the 10th percentile customers. The 10th percentile was calculated to be those customers with monthly consumption of 245 kWh or less. When the bill impact on these customers was calculated, their total bill impact was an increase of \$2.93 or 5.9% which is below OEB's threshold of 10%. As a result, no mitigation plan is required.

Table 9.1: Summary of the Average Monthly Consumption per Percentile Grouping

Avg. Monthly Consumption (kWh)	Percentile
245	10
339	20
422	30
494	40
575	50
663	60
765	70
905	80
1,132	90
3,872	100

1 Bill Impacts for Collus:

- A typical Residential customer using 750 kWh per month will see an increase of
 \$0.45 or 1.1% in the Delivery line and an increase of \$0.47 or 0.4% on the total
 monthly bill.
- A typical General Service less than 50 kW demand customer using 2,000 kWh per
 month will see an increase of \$5.77 or 6.9% in the Delivery line and an increase of
 \$6.06 or 2.1% on the total monthly bill.
- 8 The typical bill impacts calculated for other classes range from an increase of 0.1% for
- 9 General Service greater than 50 kW, an increase of 0.1% for Unmetered Scattered Load
- and an increase of 1.6% for Street Lighting on the total monthly bill.

Table 9.2: Customer Bill Impacts per Rate Class

RATE CLASSES / CATEGORIES	Units	Total			
		\$	%		
RESIDENTIAL SERVICE CLASSIFICATION - RPP	kWh	\$0.47	0.4%

EB-2017-0034

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2017-0034

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non residential account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2017-0034

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Service Charge (Based on 30 Day Month)	\$	102.13

Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

Effective and Implementation Date May 1, 2018

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2017-0034

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/ documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

STREET LIGHTING SERVICE CLASSIFICATION

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Appendix B Bill Impacts Summary

Board File Number EB-2017-0034

Incentive Regulation Model for 2018 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2017 of \$0.1101/kWh (IESO's Monthly Market Report for May 2017, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

 Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Threshold Test

Total Claim (including Account 1568)

Total Claim for Threshold Test (All Group 1 Accounts)

Threshold Test (Total claim per kWh) ²

As per section 3.2.0 or the 2016 Filing Requirements for Electricity Distribution Rate Applications, an applicant may elect to dispose of the Group 1 account balances below the threshold. If doing so, please select YES from the adjacent drop-down cell and also indicate so in the Manager's Summary. If not, please select NO.

\$375,943 \$272,403

\$0.0009 Claim does not meet the threshold test.

¹ Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

² The Threshold Test does not include the amount in 1568.

³ The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

No input required. This worksheet allocates the deferral/variance account balances (Group 1 and 1568) to the appropriate classes as per EDDVAR dated July 31, 2009

Allocation of Group 1 Accounts (including Account 1568)

		% of Customer	% of Total kWh adjusted for			cated based on Fotal less WMP			cated based on otal less WMP	
Rate Class	% of Total kWh		•	1550	1551	1580	1584	1586	1588	1568

Total	100.0%	100.0%	100.0%	0	0	0	0	0	0	54,720

^{**} Used to allocate Account 1551 as this account records the variances arising from the Smart Metering Entity Charges to Residential and GS<50 customers.

Input required at cell C13 only. This worksheet calculates rate riders related to the Deferral/Variance Account Disposition (if applicable) and rate riders for Account 1568. Rate Riders will not be generated for the microFIT class.

Default Rate Rider Recovery Period (in months)
Proposed Rate Rider Recovery Period (in months)

¹ When calculating the revenue reconciliation for distributors with Class A customers, the balances of sub-account 1580-CBR Class B will not be taken into consideration if there are Class A customers since the rate riders, if any, are calculated separately.

² Only for rate classes with WMP customers are the Deferral/Variance Account Rate Riders for Non-WMP (column H and J) calculated separately. For all rate classes without WMP customers, balances in account 1580 and 1588 are included in column G and disposed through a combined Deferral/Variance Account and Rate Rider.

Summary - Sharing of Tax Change Forecast Amounts

For the 2013 year, enter any Tax Credits from the Cost of Service Tax Calculation (Positive #)

1. Tax Related Amounts Forecast from Capital Tax Rate Changes	2013	2018
Taxable Capital (if you are not claiming capital tax, please enter your OEB-Approved Rate Base)	\$ 19,642,856	\$ 19,642,856

Columns E and F have been populated with data from the most recent RRR filing. Rate classes that have more than one Network or Connection charge will notice that the cells are highlighted in green and unlocked. If the data needs to be modified, please make the necessary adjustments and note the changes in your manager's summary. As well, the Loss Factor has been imported from Tab 2.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connenction columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

Incentive Regulation Model for 2018 Filers

If applicable, please enter any adjustments related to the revenue to cost ratio model into columns C and E. The Price Escalator and Stretch Factor have been set at the 2017 values and will be updated by OEB staff at a later date.

Update the following rates if an OEB Decision has been issued at the time of completing this application

Regulatory Charges		Proposed
Wholesale Market Service Rate (WMS) - not including CBR	\$/kWh	0.0032
Capacity Based Recovery (CBR) - Applicable for Class B Customers	\$/kWh	0.0004
Rural or Remote Electricity Rate Protection Charge (RRRP)	\$/kWh	0.0003
Standard Supply Service - Administrative Charge (if applicable)	\$	0.25

Time-of-Use RPP Prices

As of	No	ovember 1, 2017
Off-Peak	\$/kWh	0.0650
Mid-Peak	\$/kWh	0.0950
On-Peak	\$/kWh	0.1320

Debt Retirement Charge (DRC)

Debt Retirement Charge (DRC)	\$/kWh	0.0070 If your utility's DRC differs from the value in Cell D29, please update this
		value.

In the Green Cells below, enter any proposed rate riders that are not already included in this model (e.g.: proposed ICM rate riders). Please note that existing SMIRR and SM Entity Charge do not need to be included below.
In column A, the rate rider descriptions must begin with "Rate Rider for".
In column B, choose the associated unit from the drop-down menu.
In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.
In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.
In column C, enter the expiry date (e.g. April 30, 2019) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).
In column G, choose the sub-total as applicable in the bill impact calculation from the drop-down menu.

Amount for Final Disposition

Table 1-a. LRAMVA Totals by Rate Class

Please input the customer rate classes applicable to the LDC and associated billing units (kWh or kW) in Table 1-a below. This will update all tables throughout the workform.

The LRAMVA total by rate class in Table 1-a should be used to inform the determination of rate riders in the Deferral and Variance Account Work Form or IRM Rate Generator Model. Please also ensure that the principal amounts in column E of Table 1-a capture the appropriate years and amounts for the LRAMVA claim.

NOTE: If the LDC has more than 14 customer classes in which CDM savings was allocated, LDCs must contact OEB staff to make adjustments to the workform.

Customer Class	Billing Unit	Principal (\$)	Carrying Charges (\$)	Total LRAMVA (\$)
Residential	kWh	\$5,858	\$392	\$6,250
GS<50 kW	kWh	\$95,626	\$4,573	\$100,199
GS>50 kW	kW	-\$40,984	-\$1,722	-\$42,706
Streetlights	kW	-\$8,457	-\$396	-\$8,853
Unmetered Scattered Load	KWh	-\$163	-\$8	-\$170
Total		\$51.880	\$2.840	\$54.720

Table 1-b. Annual LRAMVA Breakdown by Year and Rate Class

In column C of Table 1-b below, please insert a 'check mark' to indicate the years in which LRAMVA has been claimed. If you inserted a check-mark for a particular year, please delete the amounts associated with the actual and forecast lost revenues for all rate classes for that year, up to and including the total. Any LRAMVA from a prior year that has already been claimed cannot be included in the current LRAMVA disposition, with the exception of the case noted below.

If LDCs are seeking to claim true-up amounts that were previously approved by the OEB, please note that the "Amount Cleared" rows are applicable to the LDC and should be filled out. This may relate to claiming the difference in LRAM approved before the May 19, 2016 Peak Demand Consultation, and the lost revenues that would have been incurred after that consultation, as approved by the OEB. If this is the case, reference to the decision must be noted in the rate application. If this is not the case, LDCs are requested to leave those rows blank.

Depending on the period of LRAMVA to be claimed, LDCs are expected to adjust the totals for carrying charges in row 82 of Table 1-b and the years included in the LRAMVA balance in row 83, as appropriate.

Table A-1. Changes to Generic Assumptions in LRAMVA Work Form

Please document any changes in assumptions made to the generic inputs of the LRAMVA work form. This may include, but are not limited to, the use of different monthly multipliers to claim demand savings from energy efficiency programs; use of different rate allocations between current year savings and prior year savings adjustments; inclusion of additional adjustments affecting distribution rates; use of a different LRAMVA threshold; etc. All important changes should be highlighted in the work form as well.

Table 2-a. LRAMVA Threshold

Please provide the LRAMVA threshold approved in the cost of service (COS) application, which is used as the comparator against actual savings in the period of the LRAMVA claim. The LRAMVA threshold should generally be consistent with the annualized savings targets developed from Appendix 2-1. If a manual update is required to reflect a different allocation of forecast savings that was approved by the OEB, please note the changes and provide rationale for the change in Tab 1-a.

Table 2-c. inputs for LRAMVA Thresholds
Please complete Table 2-c below by selecting the appropriate LRAMVA threshold year in column C. The LRAMVA threshold values in Table 2-c will auto-populate from Tables 2-a and 2-b depending on the year selected. If there was no LRAMVA threshold established for a particular year, please select the "bank" opin. The LRAMVA threshold values in Table 2-c will be auto-populated in Table 3-a and 2-b depending on the year selected. If there was no LRAMVA threshold established for a particular year, please select the "bank" opin. The LRAMVA threshold values in Table 2-c will be auto-populated in Table 3-a and 3-b depending on the year selected. If there was no LRAMVA threshold established for a particular year, please select the "bank" opin. The LRAMVA threshold values in Table 2-c will be auto-populated in Table 3-a and 3-b depending on the year selected. If there was no LRAMVA threshold established for a particular year, please select the "bank" opin. The LRAMVA threshold values in Table 3-c will be auto-populated in Table 3-c will be 3-

Year	LRAMVA Threshold	Residential	GS<50 kW	GS>50 kW	Streetlights	Unmetered Scattered Load

LRAMVA Work Form: Distribution Rates

Version

Table 3. Inputs for Distribution Rates and Adjustments by Rate Class

Please complete Table 3 with the rate class specific distribution rates that pertain to the years of the LRAMVA disposition. Any adjustments that affect distribution rates can be incorporated in the calculation by expanding the "plus" button at the left hand bar. Table 3 will convert the distribution rates to a calendar year rate (January to December) based on the number of months entered in row 16 of each rate year starting from January to the start of the LDC's rate year. Please enter 0 in row 16, if the rate year begins on January 1. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas in Table 3-a accordingly.

Note: LDC to make note of adjustments made to Table 3 to accommodate the LDC's specific circumstances

Table 3-a. Distribution Rates by Rate Class

Table 3-a below autopopulates the average distribution rates from Table 3. Please ensure that the distribution rates relevant to the years of the LRAMVA disposition are used. As such, please clear the rates related to the year(s) that are not part of the LRAMVA claim. The distribution rates that remain in Table 3-a will be used in Tabs 4 and 5 of the work form to calculate actual and forecast lost revenues. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas from Table 3-a, as well as the distribution rate links in Tabs 4 and 5.

LRAMVA Work Form: Determination of Rate Class Allocations

Version 2.0 (2017)

Instructions

LDCs must clearly show how it has allocated actual CDM savings to applicable rate classes, including supporting documentation and rationale for its proposal. This should be shown by customer class and program each vear.

LRAMVA Work Form: Carrying Charges by Rate Class

Version 2.0 (2017)

Legend

User Inputs (Green)

Auto Populated Cells (White)

Instructions (Grey)

Instructions

1. Please update Table 6 as new approved prescribed interest rates for deferral and variance accounts become available. Monthly interest rates are used to calculate the variance on the carrying charges for LRAMVA. Starting from column I, the principal will auto-populate as monthly variances in Table 6-a, and are multiplied by the interest rate from column H to determine the monthly variances on carrying charges for each rate class by year.

2. The annual carrying charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what should have been collected based on actual CDM savings. As the amounts calculated in Table 6-a are cumulative, LDCs are requested to enter any collected interest amounts into the "Amounts Cleared" row in order to clear the balance and calculate outstanding variances on carrying charges.

Table 6. Prescribed Interest Rates

Table 6-a. Calculation of Carrying Costs by Rate Class

LRAMVA Work Form: Documentation for Streetlighting Projects

Version 2.0 (2017)

Instructions

Please provide documentation and/or data to substantiate program savings that were not provided in the IESO's verified results reports (i.e., streetlighting projects).

Appendix E

Collus PowerStream Approved 2017 Tariff Sheet
Board File Number EB-2017-0034

Effective and Implementation Date May 1, 2017
This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2016-0064

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the

APPLICATION

distributor's Conditions of Service.

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2016-0064

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2016-0064

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/ documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to the Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.
