Again... this is concerning in what isn't being said.  
\$0.40-\$0.50/month average increase... is that per cubic foot of usage?

In the Amalgamation EB-2017-0306 it is noted that 'cost recovery' will not hinder customers (unless I read that incorrectly).

Delivery of service... if approved by OEB does that mean transport of goods (gas) will be done, as determined by the companies in question? (ie: many people of North Bay/Nipissing are against the Energy East Pipeline proposal - since terminated - as it would be going through our watershed).

I apologize for sounding skeptical, I do appreciate the opportunity to speak towards this. Just timing, Christmas (aka family chaos) and timeline to be considered an Intervenor is very challenging. Many just shrug their shoulders. I, however, am a customer who would like to know what is going on.

Regards.
