1 Exhibit 8: Rate Design

2 This Exhibit documents the calculation of SLHI's proposed distribution rates by rate class for the 2018

3 test year, based on the rate design as proposed in this Exhibit.

4 SLHI has determined its total 2018 service revenue requirement to be \$2,200,916. The total revenue

5 offsets in the amount of \$121,197 reduces SLHI's total service revenue requirement to a base revenue

6 requirement of \$2,079,719 which is used to determine the proposed distribution rates. The base

7 revenue requirement is derived from SLHI's 2018 capital and operating forecasts, weather

- 8 normalized usage, forecasted customer counts, and regulated return on rate base. The revenue
- 9 requirement is summarized in Table 8-1 below:

10

5 Current Fixed / Variable Proportion

Based on applying the existing approved monthly service charges to the forecasted number of
customers for 2018 along with the existing approved distribution volumetric charge, excluding rate
riders, the adjustment for Low Voltage ("LV") and the transformer allowance, to the 2018 forecasted
volumes, the following Table 8-3 outlines SLHI's current split between fixed and variable distribution
revenue.

13 Proposed Monthly Service Charge

14 Except for the Residential classes (see Section 8.2, SLHI proposes to maintain the fixed/variable

15 proportions assumed in the current rates to design the proposed monthly service charges. This

16 proposal is consistent with the Ontario Energy Board's ("Board") Decision in the following cases:

1	Centre Wellington Hydro Ltd 2013 Cost of Service Rate (EB-2012-0113);
2	Atikokan Hydro Inc 2012 Cost of Service Rate (<i>EB-2011-0293</i>);
3	Espanola Regional Hydro Distribution Corporation - 2012 Cost of Service Rate (EB-2011-0319);
4	Horizon Utilities Corporation - 2011 Cost of Service Application (EB-2010-0131);
5	Hydro One Brampton Networks Inc 2011 Cost of Service Application (EB-2010-0132);
6	Kenora Hydro Electric Corporation Ltd 2011 Cost of Service Application (<i>EB-2010-0135</i>); and.
7 8 9	In Horizon Utilities Corporation's ("Horizon") decision on their 2015 rates (EB-2014-0002) the Board approved Horizon's proposal to maintain the fixed/variable split. The following outlines the Board findings with regards to proposed fixed/variable split.
10 11 12 13	The Board accepts Horizon's proposal. While the Board's current policy direction is to move toward an increased fixed charge, this consideration was not the sole basis upon which the Board reached its Decision. The Settlement Agreement contains a re-opener provision which would address any policy change related to an increased fixed charge.
14 15	A fixed/variable split above the ceiling was approved in Horizon's last cost of service proceeding. In this application, Horizon has maintained the fixed/variable split.
16 17 18 19	The Board notes that a principle of rate design is that in most circumstances rate stability is desirable. Counter-direction in rates can be confusing to ratepayers. Horizon has chosen to maintain a fixed/variable split that moves above the ceiling. Intervenors argue that this is contrary to the Board's report in EB-2007-0667.
20	The following table outlines the proposed monthly service charge by rate class for 2018.

7 Proposed Volumetric Charges

8 The variable distribution charge is calculated by dividing the variable distribution portion of the base

9 revenue requirement by the appropriate 2018 Test Year usage, kWh or kW, as the class charge

10 determinant.

11 The following Table provides SLHI's calculations of its proposed variable distribution charges for the

12 2018 Test Year which maintains the same fixed/variable split used in designing the current approved

13 rates, with the exception of the residential rate class (see Section 8.2).

Table 8-6 Proposed Distribution Volumetric Charge

3 Proposed Adjustment for Transformer Allowance

Currently, SLHI provides a transformer allowance to those customers that own their transformation 4 5 facilities. SLHI proposes to maintain the current approved transformer ownership allowance of \$0.3741 per kW ("Transformer Allowance"). The Transformer Allowance is intended to reflect the 6 7 costs to a distributor of providing step down transformation facilities to the customer's utilization 8 voltage level. Since the distributor provides electricity at utilization voltage, the cost of this transformation is captured in and recovered through the distribution rates. Therefore, when a 9 10 customer provides its own step down transformation from primary to secondary, it should receive a credit of these costs already included in the distribution rates. 11

The amount of Transformer Allowance expected to be provided to the customers in the General Service > 50 kW class that owns their transformers has been included in the volumetric charge calculation for this class. This means the General Service > 50 kW volumetric charge of \$1.2478 per kW will increase by \$0.0651 per kW to a total of \$1.3129 per kW to recover the amount of the Transformer Allowance over all kWs in the General Service > 50 kW class.

The Forecasted 2018 kW for the transformer allowance is shown in Table 8-7 below. The column titled "Mill kW" is separated because there is no change forecasted for 2018 due to the shut- down of the mill.

8 8.2 Rate Design Policy

9 In regards to the Residential class, on April 2, 2015, the OEB released its Board Policy: A New 10 Distribution Rate Design for Residential Electricity Customers (EB-2012-0410), which stated that 11 electricity distributors will transition to a fully fixed monthly distribution service charge for 12 residential customers. This will be implemented over a period of four years, beginning in 2016. The 13 approach to the implementation of the policy, including mitigation expectations, was described in a 14 letter from the OEB published on July 16, 2015.

1 In 2016 and 2017 SLHI implemented the first and second year movements of this policy. In 2018,

2 SLHI proposes to implement the third year of this policy. In proposing a transition to a fully fixed

3 monthly service charge, SLHI has followed the approach set out in Tab 12 of the RRWF and the

- 4 resulting Residential monthly fixed charge is provided in the tables below.

1 8.3 Retail Transmission Service Rates (RTSRs)

SLHI currently pays for transmission service to Hydro One that is then passed onto SLHI's customers
per the Board-approved rate. As described in Exhibit 1, Section 1.4, 'Host/Embedded Distributor',
SLHI is fully embedded in Hydro One's sub transmission system. Hydro One is the transmission
customer of the IESO for all SLHI load. Hydro One pays the IESO wholesale transmission charges
calculated at the Ontario Uniform Transmission Rates and passes them on to SLHI at Hydro One's
approved rates.

The Board has provided the 2018_RTSR_Workform. SLHI has completed this Workform to determine the RTSR's and has filed the Workform as part of this application. The RTSR Workform is also provided in Appendix 8A in PDF format. Table 8-10 provides the RTSR rates generated from the 2018

- 11 Workform.

13

14 8.4 Retail Service Charges

15 SLHI is not proposing any changes to the retail service charges in this application.

16 8.5 Regulatory Charges

17 On December 15, 2016 the Board issued a Decision with Reasons and Rate Order (EB-2016-0362)

18 establishing that the Wholesale Market Service rate (including CBR) used by rate regulated

19 distributors to bill their customers shall be \$0.0036 per kWh and the rate for rural and remote rate

20 protection ("RRRP") to be \$0.0021 per kWh, effective January 1, 2017. On June 22, 2017 the Board

issued its Decision on EB-2017-0234 to reduce the RRRP charged by Distributors to \$.0003 per kWh

1 effective July 1, 2017. In addition, the OESP charge used by rate-regulated distributors to bill their

2 customers was discontinued as of May 1, 2017 as per Decision and Order EB-2017-0135 dated March

3 23, 2017. SLHI has reflected these charges in this Application.

On March 28, 2013, the Board issued a Decision and Order (EB-2012-0100/EB-2012-0211)
establishing a Smart Metering Entity Charge of \$0.79 per month for Residential and General Service <
50kW customers effective May 1, 2013. The Smart Metering Entity Charge is currently in effect until
October 31, 2018 subject to change through a Board Decision and Order. SLHI has reflected a Smart
Metering Entity Charge of \$0.79 per month in this Application.

9 8.6 Specific Service Charges

10 SLHI is proposing the current specific service charges be maintained in this application.

With respect to the specific service charges, two minor wording changes are proposed. The first, entitled Returned Cheque (plus bank charges). SLHI proposed to change this wording to Returned ltem (plus bank charges). With the changing environment on how bills are paid, payments are returned in all forms, not only by cheque. This change will more closely resemble the reality of what is occurring in the industry.

The second is entitled Specific charge for access to the power poles - \$/pole/year (with the exception of wireless attachments). SLHI is not proposing a change to the dollar value, simply the wording as a general housekeeping item to make it more specific, and all inclusive. SLHI's proposal is to rename this specific charge to Specific charge for all attachments to the power poles (including street lighting attachments) \$/pole/year (with the exception of wireless attachments).

21 8.7 Low Voltage Service Rates

Forecasted low voltage charges of \$321,797 from Hydro One for 2018 have been allocated to each rate class based on the proportion of proposed retail transmission connection revenue collected from

each class.

Table 8-11 illustrates a summary of the last three historical year actual low voltage charges and the

26 year over year variances. The three year historical average was used as the forecast for the 2017

27 Bridge and 2018 Test years.

1 Materiality Analysis on Distribution Losses

SLHI's distribution 5-year average Loss Adjustment factor is 5.34%. This is consistent with SLHI's 2 2013 COS Loss Factor of 5.39%. Pursuant to the Filing Requirements, as the Distribution Loss 3 Adjustment factor is more than 5%, SLHI provides the following explanation. Although SLHI has 4 completed some voltage conversions since the last COS, the reduction in line loss is minimal. This is 5 due to the large service territory and low density. The 1.4% increase in the line loss in 2016 may be a 6 result of the change to true monthly billing at the end of 2015. This resulted in less estimation 7 required for the unbilled revenue calculated at the end of each fiscal year. Therefore the 2014 unbilled 8 9 revenue that was reversed on Jan 1, 2015 was not calculated using the 2015 year end method. This 10 would affect the results of the 2016 unbilled revenue because the same method was used for 2015 and 2016. There are some preliminary plans to undergo a study to explore smart grid options to help 11 reduce line loss. 12

13 8.9 Tariff of Rates and Charges

14 The current and proposed tariff of rates and charges are provided in Appendix 8B and Appendix 8C in

15 this Exhibit. The current definition of rate classes and the current terms and conditions of service has

16 been maintained in this application.

17 For the current tariff of rates and charges from the current approved rate order dated March 30, 2017

18 (EB-2016-0103), please see Appendix 8B.

For the proposed tariff of rates and charges please see Appendix 8C and tab 4. 2-TS Tariff Schedule
from the following live Excel file "Sioux Lookout_2018
Tariff_Schedule_and_Bill_Impact_Model_V2_Revised_20180108".

22 8.10 Revenue Reconciliation

23 The following Table 8-16 provides detailed calculations of the revenue per rate class under current

7 8.11 Bill Impacts

Appendix 8D to this Exhibit presents the results of the assessment of customer total bill impacts by
level of consumption by rate class.

This Appendix 8D is consistent with tab 5. 2-W Bill Impacts from the following live Excel file "Sioux Lookout_2018 Tariff_Schedule_and_Bill_Impact_Model_V2_Revised_20180108". SLHI notes that it made one change to the formula in cells G239, G293, G455 and J239, J293, J455 on tab 5.2-W Bill Impacts to change the volume to calculate on kWh not kW for the LRAMVA rate rider for the Street Light and General Service 50 to 4,999 KW rate classes in order to properly reflect the impact.

15 Impacts are shown using the applicable current approved rates and the proposed 2018 distribution

16 rates, including Rate Riders for the recovery Deferral and Variance accounts discussed in Exhibit 9.

1 The rate impacts are assessed on the basis of moving to the proposed distribution rates.

In accordance with section 2.8.12.1 of the Chapter 2 Filing Requirements, SLHI has determined that a residential customer consuming at the lowest 10th percentile of consumption is equal to 518 kWh per month. SLHI extracted residential consumption data from its information system for the 2016 calendar year for all customers with a full year of data. Only the data for customers with 12 months of data was used to calculate a seasonally normalized average consumption. SLHI sorted the data set of 1,894 records in ascending order based on average monthly consumption per customer. The 189th entry was 518 kWh.

9 The bill impacts for this customer is included in Appendix 8D.

10 8-11 Rate Mitigation

11 With the exception of the Street Lighting Rate Classes, SLHI submits that the bill impacts of its 12 proposed 2018 electricity distribution rates are reasonable and do not require rate mitigation.

- 13 The Street Lighting Rate Class has a total bill impact of (40.36%) due to the update to the Cost
- 14 Allocation Model for Street Lights. Given that this is a reduction to the customer's bill, SLHI is not
- 15 proposing any mitigation strategy.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Note that for the application of the Retail Transmission Rate - Network Service Rate and the Retail Transmission Rate - Line and Transformation Connection Service Rate the following sub-classifications apply:

General Service 50 to 1,000 kW non-interval metered General Service 50 to 1,000 kW interval metered General Service >1,000 to 4,999 kW interval metered.

Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

RESIDENTIAL SERVICE CLASSIFICATION

This classification applies to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separate metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartment building also qualify as residential customers. All customers are single-phase. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Appendix 8D: Bill Impacts

Ontario Energy Board

Tariff Schedule and Bill Impacts Model (2018 Cost of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. The OEB has established that, when assessing the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, a utility shall evaluate the total bill impact for a low volume residential customer consuming at the distribution's for the consumption percentilet, to a minimum of 50 kWh per month. Refer to page 62 of Chapter 2 Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact chart for the specific class.

2. Due to the change to energy consumption used in the calculation of GA rate riders for the 2017 rate year, the separate "GA Rate Riders" line is only applicable to the "Proposed" section of the bill impact tables.

3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.
