Attention: Ms. Kirsten Walli, Board Secretary
Regarding: 2018 Cost of Service Application (EB-2017-0048)

Dear Ms. Walli,

Hydro Hawkesbury Inc. ("HHI") acknowledges the Ontario Energy Board's Oral Decision from the Settlement Day presentation February 17, 2016 and thus submits its Rate Order for 2018 Distribution Rates effective January 1, 2018.

HHI. confirms a copy of the Rate Order has been filed through the Board's e-filing service together with updated models.

Should the board have questions regarding this matter please contact Michel Poulin at the contact information provided below.

Respectfully Submitted,
Yours truly,

INTRODUCTION

Hydro Hawkesbury Inc. (the “Applicant” or “HHI”) filed a Cost of Service application with the Ontario Energy Board (the “OEB”) on July 12, 2017, under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the “Act”), seeking approval for changes to the rates that HHI charges for electricity distribution, to be effective January 1, 2018 (OEB file number EB-2017-0048) (the “Application”).

The OEB issued a Letter of Direction and Notice of Application on August 22, 2017. In Procedural Order No. 1, dated October 10, 2017, the OEB approved VECC and SEC for intervenor status as well as prescribing dates for the following: written interrogatories from OEB staff, VECC, and SEC; HHI’s responses to interrogatories; a settlement conference; and various other elements in the proceeding.

Following the receipt of interrogatories, HHI filed its interrogatory responses with the OEB on November 13, 2017, with the remainder of the responses filed by November 21, 2017.

On November 17, 2017, OEB Staff submitted a proposed issues list as agreed to by the parties. On November 21, 2017, the OEB issued its decision on the proposed issues list, approving the list submitted by OEB staff as the final issues list (the “Issues List”).

The settlement conference was convened on November 22, 2017, in accordance with the OEB’s *Rules of Practice and Procedure* (the “Rules”) and the OEB’s *Practice Direction on Settlement Conferences* (the “Practice Direction”).

HHI and the following intervenors (the “Intervenors”), participated in the settlement conference:

- Vulnerable Energy Consumers Coalition (“VECC”);
- School Energy Coalition (“SEC”).

HHI and the Intervenors are collectively referred to below as the “Parties.”

Ontario Energy Board staff (“OEB staff”) also participated in the settlement conference. The role adopted by OEB staff was set out on page 5 of the Practice Direction. Although OEB staff was not a party to the Settlement Proposal, as noted in the Practice Direction, OEB staff that did participate in the settlement conference are bound by the same confidentiality and privilege rules that apply to the Parties to the proceeding.

The Parties reached a full settlement with respect to the issues in this proceeding.

Hydro Hawkesbury presented the parties’ settlement proposal to the OEB on February

15, 2018. A copy of the presentation material was filed as Exhibit K1.1.

Decision and Order – Settlement.

In its Decision and Order issued on February 23, 2017, the OEB concluded that the severed Settlement Agreement be accepted.

The following Rate Order presents a brief review of the Board's decision and how the utility has complied and implemented the Board's rulings. The detailed supporting material, including all relevant calculations showing the impact of the Settlement Agreement and the February 23, 2018, Decision on Hydro Hawkesbury's revenue requirement; the determination of the final rates and customer rate impacts are provided in the commentary and Appendices which follow.

This Rate Order includes all tables and appendices that represent the evidence and the settlement between the Parties at the time of filing the settlement proposal.

SUMMARY

A Revenue Requirement Work Form, incorporating all terms that have been agreed to in this Decision is filed with this Rate Order. Through the settlement process, HHI has agreed to certain adjustments to its original Application. The changes are described in the following sections.

HHI has provided the following Table 1 highlighting the changes to its Revenue Requirement from HHI's Application as filed as a result of interrogatories and the Settlement Agreement.

RRFE OUTCOMES

In its Decision, the OEB found that the settlement proposal, including the refund related to the 110kV substation, benefits consumers and produces outcomes that are consistent with the operational effectiveness and other performance objectives of the RRF. Further details on the 110kV substation are presented in the next section.

1 PLANNING

1.1 Capital

As part of the Settlement Agreement, the Parties accepted HHI's evidence that the gross capital expenditures were appropriate and that the rationale for planning and pacing choices was adequately explained. HHI, therefore, accepts the Board Approved capital expenditures of \$165,830 for the test year of 2018.

A summary of gross capital expenditures is presented in Table 4 - 2018 Gross Capital below.

Table 4 - 2018 Gross Capital Additions

Note: the terms "Additions" and "Expenditures" are used interchangeably and refer to the cost involved for adding new assets or bettering existing assets within a utility.

1.2 OM&A

Per the Settlement Agreement, HHI agreed to a reduction of \$35,000 to the proposed 2018 OM&A budget; the parties agree that the proposed OM&A budget is appropriate. For illustrative purposes, HHI has allocated the \$35,000 reduction across the categories of OM&A spending, but the Parties acknowledge that HHI is at liberty to manage the reduction as it sees fit, given the actual cost pressures faced by the company. HHI does not believe that the proposed reduction will materially impact the service quality or reliability of its distribution system.

As detailed and agreed to in the Settlement Agreement, HHI is transitioning over the next year when its two remaining linemen retire to completely rely on external contractors to manage 100% of its capital and O&M activities. Currently, HHI does not have a formal service agreement with its primary contractor Sproule Inc. The Parties have agreed that HHI will enter into a service agreement with Sproule Inc. to formalize the terms of their working relationship within 1 year. HHI will file a copy of that agreement under the EB-2017-0048 docket number to confirm compliance with this term of the Settlement Proposal.

2 REVENUE REQUIREMENT

HHI accepts the Settlement Agreements proposed Board Approved Revenue Requirement in the amount of \$1,958,356 as appropriate and have been correctly determined in accordance with OEB accounting policies and practices.

A summary of the adjusted Revenue Requirement reflecting adjustments and settled issues in accordance with the above is presented in Table 6 - 2018 Revenue Requirement below.

2.3 Working Capital Allowance

HHI accepts the Board Approved Working Capital Allowance of \$1,478,441 as being appropriately calculated. The components include adjustments in relation to OMA reductions and to the Cost of Power in relation to changes to the commodity prices as of July 1, 2017 and to the Global Adjustment as a result of the province's Fair Hydro Plan, as published in the Regulated Price Plan Prices and the Global Adjustment Modifier for the Period July 1, 2017 to April 30, 2018 issued on June 22, 2017. The derivation of the Cost of Power is presented in Attachment E of the settlement agreement.

2.6 Other Revenue

HHI accepts the Settlement Agreements proposed Board Approved Other Revenues in the amount of \$214,216 as appropriate and as being correctly determined in accordance with OEB accounting policies and practices.

In the Settlement Agreement, the Parties agreed that HHI would forecast net revenue of \$30,000 with respect to the disposal of 3 vehicles that will likely become unused by HHI in 2018, noting that all three vehicles have been fully depreciated; because the forecasted sale is a one time occurrence, the Parties have agreed to amortize the revenue from the sale by including 1/5th or \$6,000 related to the sale of the Test Year Revenue Requirement.

The parties also agreed to update the Specific Service Charges to reflect a revised MicroFit charge of \$10/customer.

5 ACCOUNTING

5.1 Disposition of Deferral and Variance Accounts

HHI accepts the Settlement Agreement's evidence that all elements of the applied for deferral and variance accounts are appropriate as updated through the interrogatory process, including the balances in the existing accounts and their disposition on a harmonized basis commencing January 1, 2018, and the continuation of existing accounts. Specific to the clearance of the 2015 and 2016 LRAMVA, the parties accept the updated balances as appropriate for clearance. The agreed upon disposition period for all rate riders is 1 year.

5 OTHER

5.1 Effective Date

HHI accepts the Board's decision that rates new rates should be made effective January 1, 2018 and have an implementation date of March 1, 2018.

In accordance with the Decision, Hydro Hawkesbury has calculated foregone revenue and rate riders to recover the difference between the effective date of January 1, 2018, and the implementation date of March 1, 2018. With respect to all other rate riders, HHI proposes to extend their sunset date by two months or February 28, 2019.

5.2 110kV transformer station refund

HHI accepts the Board's decision that the refund related to the 110kV substation benefits consumers and produces outcomes that are consistent with the operational effectiveness and other performance objectives of the RRF.

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

Notes:

- General** Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.
- ⁽¹⁾ All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- ⁽²⁾ Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- ⁽³⁾ Net of addbacks and deductions to arrive at taxable income.
- ⁽⁴⁾ Average of Gross Fixed Assets at beginning and end of the Test Year
- ⁽⁵⁾ Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- ⁽⁶⁾ Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- ⁽⁷⁾ Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- ⁽⁸⁾ 4.0% unless an Applicant has proposed or been approved for another amount.
- ⁽⁹⁾ The default Working Capital Allowance factor is **7.5%** (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth and trends from historical actuals to the Bridge and Test Year forecasts.

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 - Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors - Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes - If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.
- (5) Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.
- (6) Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

(7) Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

(8) Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

(9) Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

(10) Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

- (11) The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2017 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2018 and 2019 Price Cap IR models, as necessary. For 2018 and 2019, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2017 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Notes:

- ¹ The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- ² The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. A distributor transitioning to fully fixed rates over a four year period and began the transition in 2016 would input the number "3" into cell D40. A distributor transitioning over a five-year period would input the number "4". Where the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, a distributor may propose an additional transition year.
- ³ Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and volumetric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design as proposed by the applicant. However, the RRFW does not replace the rate generator model that an applicant distributor may use in support of its application. The RRFW provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILS, etc.

² The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calculated as: $\text{[MSC x (average number of customers or connections) x 12 months]} / \text{(Class Allocated Revenue Requirement)}$.

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

⁽¹⁾ Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

⁽²⁾ Short description of change, issue, etc.

B. Bill Impacts

Tariff Schedule and Bill Impacts Model (2018 Cost of Service Filers)

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. **The OEB has established that, when assessing the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, a utility shall evaluate the total bill impact for a low volume residential customer consuming at the distributor's 10th consumption percentile19, to a minimum of 50 kWh per month. Refer to page 62 of Chapter 2 Filing Requirements For Electricity Distribution Rate Applications issued July 14, 2016.**

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2016 of \$0.113/kWh (IESO's Monthly Market Report for May 2016, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact chart for the specific class.
2. Due to the change to energy consumption used in the calculation of GA rate riders for the 2017 rate year, the separate "GA Rate Riders" line is only applicable to the "Proposed" section of the bill impact tables.
3. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to customers residing in residential dwelling units. Energy is generally supplied as single phase, 3-wire, 60-Hertz, having nominal voltage of 120/240 Volts and up to 400 amps. There shall be only one delivery point to a dwelling. The Basic Connection for Residential consumers is defined as 100 amp 120/240 volt overhead service. A Residential building is supplied at one service voltage per land parcel. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.
