**Interrogatory #1**

Ref: Exhibit A Tab 4 Page 3 of 4

Preamble: For in-franchise contract rate classes, Union is proposing to dispose of the net 2015 DSM-related deferral and variance account balances as a one-time adjustment with the first available QRAM after Board approval. This one-time adjustment approach is consistent with the methodology used for the disposition of 2014 deferral account and earnings sharing balances in the 2014 Disposition of DSM Deferral and Variance Accounts (EB-2015-0276) proceeding.

- a) Please provide a table (or tables) that show the following information:
  - i) the number of customers within each in-franchise contract class that Union forecasts it will charge a one-time adjustment relating to the 2014 LRAM, DSMVA and DSMIDA accounts if this application is approved;
  - ii) for each in-franchise contract class the minimum, maximum, average, and median one-time adjustments Union forecasts it will charge if this application is approved, along with the related % distribution and total bill impact for each representative charge (namely the % impact of the one time charge in relation to the annual distribution and total bill for the relevant customer);
- b) Please confirm that in-franchise contract class customers continue to have the option of paying the approved one-time adjustment over time; if so confirmed please provide the process by which customers seeking to make their payment over time may arrange to do so, and explain how the maximum time period available to customers for such payments is determined. If not confirmed, please explain why this option is no longer available to in-franchise contract customers.
