

## **Attachment 7 - Legal and Regulatory Proceedings**

The applicant and its directors and officers have not been subject to penalties, fines, payments as a result of investigation or any disciplinary actions by a regulatory body in Ontario or any jurisdiction within North America in the past 5 years. However, the applicant's affiliates would include Ontario Power Generation Inc., which given the size of the entity, the complexity of its business, and the various regulatory regimes within which it operates, is likely to have been subject to fines and penalties, and it would be a major undertaking to canvass the entire organization to compile a comprehensive list. OPG can confirm that, with respect to any of its penalties, fines, payments as a result of investigation or any disciplinary actions by a regulatory body in North America within the past 5 years, nothing is or was material to the company.
