List of Appendices

The following Appendices are attached to and form an integral part of this Settlement Proposal:

Appendix "A" – Revenue Requirement Work Form Appendix "B" – Fixed Asset Continuity Schedule Appendix "C" – Cost of Capital

Appendix "**D**" – Bill Impacts

Table 4

Appendix "E" - 2018 Proposed Tariff of Rates and Charges

Appendix "F" – Status of Management Action Plan

Appendix "G" - DVA Continuity Schedules

In addition to the Appendices listed above, EPLC submitted additional responses to the Interrogatories and updated the Application. The complete record in this matter may be found on the OEB's website at:

http://www.rds.oeb.ca/HPECMWebDrawer/Record?q=CaseNumber=EB-2017-0039&sortBy=recRegisteredOn-&pageSize=400

SETTLEMENT PROPOSAL

PREAMBLE

Essex Powerlines Corporation ("**EPLC**") filed a cost of service application with the Ontario Energy Board (the "**OEB**") on August 28th, 2017 under section 78 of the *Ontario Energy Board Act*, 1998, S.O. 1998, c. 15, (Schedule B) (the "**Act**"), seeking approval for changes to the distribution rates that EPLC charges for electricity distribution and other charges to be effective May 1, 2018 (OEB Docket Number EB-2017-0039) (the "**Application**").

The OEB issued a Letter of Direction and Notice of Hearing on December 6th, 2017, pursuant to which Hydro One Networks Inc. ("**Hydro One**"), the School Energy Coalition ("**SEC**") and the Vulnerable Energy Consumers Coalition ("**VECC**") applied for status as intervenors.

On December 21st, 2017 EPLC filed an affidavit confirming publication and service as required by the Letter of Direction.

On January 18th, 2018 a public meeting was hosted by the OEB at the Essex Centre Sports Complex.

The OEB issued Procedural Order No. 1 on January 26th, 2018 granting intervenor status to Hydro One, SEC and VECC. SEC and VECC were granted cost eligibility.

In accordance with Procedural Order No. 1, a settlement conference was convened on March 13th and continued on the 14th, 2018 in accordance with the OEB's Rules of Practice and Procedure (the "Rules") and the OEB's Practice Direction on Settlement Conferences (the "Practice Direction"). Additional settlement communications occurred subsequent to the Settlement Conference. Andrew Pride acted as facilitator for the settlement conference which lasted for two days.

EPLC and the following intervenors (the "Intervenors"), participated in the settlement conference:

SEC; VECC; and Hydro One.

EPLC, SEC and VECC are collectively referred to herein as the "**Parties**". Hydro One's interest in the proceeding was solely in respect of the Embedded Distributor rate and Hydro One takes no position on any matter with the exception of section 3.3.2 of this Settlement Proposal.

OEB staff also participated in the settlement conference. The role adopted by OEB staff is set out in page 5 of the Practice Direction. Although OEB staff is not a party to this Settlement Proposal, as noted in the Practice Direction, OEB staff who did participate in the settlement conference are bound by the same confidentiality requirements that apply to the Parties to the proceeding.

This document is called a "**Settlement Proposal**" because it is a proposal by the Parties to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB's approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As

set forth later in this Preamble, this agreement is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this agreement, the Parties understand and agree that, pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB does accept may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept).

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties who took on a position on a particular issue must agree with any revised Settlement Proposal as it relates to that issue prior to its resubmission to the OEB.

The Parties acknowledge that this settlement proceeding is confidential in accordance with the Practice Direction. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings, and the rules of that latter document do not apply. Instead, in this settlement conference, and in this Agreement, the Parties have interpreted "confidential" to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement - or not - of each issue during the settlement conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the settlement conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the settlement conference but were a) any persons or entities that the Parties engage to assist them with the settlement conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

This Settlement Proposal provides a brief description of each of the settled and partially settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include (a) additional information included by the Parties in this Settlement Proposal, and (b) the Appendices to this document. The supporting Parties for each settled and partially settled issue, as applicable, agree that the evidence in respect of that settled or partially settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal.

There are Appendices to this Settlement Proposal which provide further support for the proposed settlement. The Parties acknowledge that the Appendices were prepared by EPLC. While the Intervenors have reviewed the Appendices, the Intervenors are relying on the accuracy of the underlying evidence in entering into this Settlement Proposal.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not EPLC is a party to such proceeding. For greater certainty, the adoption or use of any methodology or calculation in this Settlement Proposal reflects the Parties' agreement to adopt such methodologies or calculations solely for the purpose of this Settlement Proposal, and should not be construed as the Parties' general acceptance of any one or more of such methodologies or calculations in current or future proceedings before the Board.

Where in this Agreement, the Parties "Accept" the evidence of EPLC, or the Parties or any of them "agree" to a revised term or condition, including a revised budget or forecast, then unless the Agreement expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

SUMMARY

The Parties are pleased to advise the OEB that they have reached an agreement with respect to all but one issue. The sole unresolved issue pertains to the interim recovery of a net amount of \$1.8 million from customers identified in the Board Staff audit (*Audit of Group 1 and Group 2 Deferral and Variance Accounts* report, dated March 2017 at section 10.1. The Parties have included a proposal in section 4.2.1 regarding recommended procedural steps to resolve this issue.

A summary of the changes in the revenue requirement resulting from interrogatories and the Settlement Proposal is provided in Table 1 below. Included in the changes in IRR are the changes in the cost of capital published by the OEB.

In reaching this settlement, the Parties have been guided by the Filing Requirements for 2018 rates and the Approved Issues List.

DETAILED SETTLEMENT

1. PLANNING

1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained giving due consideration to:

Customer feedback and preferences
Productivity
Compatibility with historical expenditures;
Compatibility with applicable benchmarks;
Reliability and service quality;
Impact on distribution rates;
Trade-offs with OM&A spending;

Government mandated obligations;

The objectives of EPLC and its customers; and

Distribution system plan.

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 2

Interrogatories: 2-SEC-14 to 2-SEC-26

2-VECC-11 to 2-VECC-23 2-Staff-12 to 2-Staff-48

Updated Asset Continuity Schedule

Rationale:

For the purposes of settlement, the Parties accept the evidence of EPLC that the level of planned capital expenditures, as summarized in Table 2 below, and the rationale for planning and pacing choices are appropriate to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system, is appropriate.

The Parties acknowledge that EPLC retains the full discretion to manage its capital spending in the Test Year and beyond in accordance with the actual operating conditions it confronts in any year.

Table 2. Planned Capital Expenditures

	oplication Igust 28th, 2017)	IRR (March Variance Over 2nd, 2018) Original Application			nt Proposal 3th, 2018)	Variance Over IRs		
System Access	\$ 1,745,828	\$ 1,745,828	\$	-	\$ 1,745,828	\$	-	
System Renewal	\$ 2,693,082	\$ 2,693,082	\$	-	\$ 2,693,082	\$	-	
System Service	\$ 707,281	\$ 707,281	\$	-	\$ 707,281	\$	-	
General Plant	\$ 1,036,809	\$ 1,036,809	\$	-	\$ 1,036,809	\$	-	
Total Assets	\$ 6,183,000	\$ 6,183,000	\$	-	\$ 6,183,000	\$	-	

1.2 Operations, Maintenance and Administration

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

	Customer feedback and preferences;
J	Productivity;
	Compatibility with historical expenditures;
	Compatibility with applicable benchmarks;
	Reliability and service quality;
J	Impact on distribution rates;
	Trade-offs with capital spending;
	Government-mandated obligations; and
J	The objectives of Essex Powerlines and its customers.

Status: Complete Settlement

Parties in Agreement: All

..

Parties Opposed:

None.

Evidence:

Exhibit 4

Interrogatories:

4-Staff-53 to 4-Staff-73; 9-Staff-92

4-SEC-28 to 4-SEC-37;

4-VECC-35 to 4-VECC-49:

Rationale:

The Parties agree that the 2018 OM&A budget of \$7,244,955 is appropriate. This amount includes an agreed reduction of \$465,320 from the applied for OM&A amount included in the pre-filed evidence and interrogatory responses, as well as a revised request of 9-Staff-92 that reflects the appropriate classification of the balance in account 1525.

The parties agree that the revised OM&A budget is appropriate and better reflects a reasonable increase from both bridge year actuals and the last approved Board approved amounts. For illustrative purposes, EPLC has allocated the reduction across the categories of OM&A spending as summarized in Table 3 below, but the Parties acknowledge that EPLC is at liberty to manage the reduction as it sees fit, given the actual cost pressures faced by the company. EPLC does not believe that the proposed reductions will materially impact the service quality or reliability of its distribution system.

Table 3. Summary of OM&A

		Application August 28th, 2017)		IRR (March 2nd, 2018)		Variance Over Original Application			ettlement Proposal April 13th, 2018)	Variance Over IRs	
Operations	\$	1,518,208	\$1,	518,208	\$		-	\$	1,353,708	\$(:	164,500)
Maintenance	\$	1,548,463	\$1,	548,463	\$		-	\$	1,518,463	\$	(30,000)
Billing & Collecting	\$	1,550,150	\$1,	550,150	\$		-	\$	1,520,150	\$	(30,000)
Community Relations	\$	23,396	\$	23,396	\$		-	\$	22,423	\$	(973)
Admin & General + LEA	\$	3,070,058	\$3,	.070,058	\$		-	\$	2,830,211	\$(2	239,847)
Total	\$	7,710,275	\$7,	710,275	\$		-	\$	7,244,955	\$(4	465,320)

2. REVENUE REQUIREMENT

2.1 Are all elements of the Revenue Requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 1; section 1.6;

Exhibit 6; Attachment 6-A;

Interrogatories: 1-Staff-2;

2-Staff-14;

Rationale:

The parties agree that the methodology used by EPLC to calculate the Revenue Requirement is appropriate.

A summary of the adjusted Revenue Requirement reflecting adjustments and settled issues in accordance with the above is presented in Table 4 below.

Table 4. Summary of Changes in Revenue Requirement

	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
OM&A Expenses	\$ 7,710,275	\$ 7,710,275	\$ -	\$ 7,244,955	\$ (465,320)
Amortization/Depreciation	\$ 1,848,004	\$ 2,122,219	\$ 274,215	\$ 2,122,219	\$ -
Property Taxes	\$ 42,538	\$ 42,538	\$ -	\$ 42,538	\$ -
Capital Taxes	\$ -	\$ -	\$ -	\$ -	\$ -
Income Taxes (Grossed Up)	\$ 227,249	\$ 235,735	\$ 8,486	\$ 221,683	\$ (14,052)
Other Expenses	\$ -	\$ -	\$ -	\$ -	\$ -
Deemed Interest Expense	\$ 1,230,186	\$ 1,431,318	\$ 201,132	\$ 1,252,363	\$ (178,955)
Return on Deemed Equity	\$ 2,104,644	\$ 2,128,178	\$ 23,534	\$ 2,089,206	\$ (38,972)
Service Revenue Requirement (before Revenu	\$ 13,162,895	\$13,670,263	\$ 507,368	\$ 12,972,964	\$ (697,299)
Revenue Offsets	\$ 691,821	\$ 691,821	\$ -	\$ 621,821	\$ (70,000)
Base Revenue Requirement	\$ 12,471,074	\$12,978,442	\$ 507,368	\$ 12,351,143	\$ (627,299)
Revenue Deficiency/Sufficiency	\$ 381,081	\$ 698,294	\$ 317,213	\$ 220,139	\$ (478,155)

An updated Revenue Requirement Work Form model has been filed though the OEB's efiling service.

2.1.1 Cost of Capital

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 5;

Interrogatories: 5-SEC-38, 5-SEC-40;

5-VECC-50; 5-VECC-51; 5-VECC-52; 5-VECC-53;

5-Staff-74

Rationale:

The Parties agree Cost of Capital is appropriate. EPLC has a series of long-term debt instruments, two of which are with shareholders while the remainder are with third-party financial institutions. EPLC is forecasting replacement of a swap agreement and 1 additional long-term debt instrument in the test-year. The long-term debt rate of 3.69% is the forecasted average cost of long-term debt as set out in the amended Appendix 2-OB which is attached as Appendix C.

In accordance with OEB's policy, EPLC has used the most recent short-term debt and return on equity provided by the OEB in its letter dated November 23rd, 2017.

Table 5. Summary of Cost of Capital

	Application (August 28th, 2017)	Application (August 28th, 2017)	IRR (March 2nd, 2018)	R (March nd, 2018)	Variance Over Original Application		Settlement Proposal (April 13th, 2018)	Settlement Proposal (April 13th, 2018)	/ariance Over IRs
Debt									
Long-Term Debt	3.54%	\$1,187,997	4.16%	\$ 1,377,168	\$	189,171	3.69%	\$1,199,204	\$ (177,964)
Short-Term Debt	1.76%	\$ 42,189	2.29%	\$ 54,150	\$	11,961	2.29%	\$ 53,159	\$ (991)
Total Debt	3.42%	\$1,230,186	4.04%	\$ 1,431,318	\$	201,132	3.60%	\$1,252,363	\$ (178,955)
Equity									
Common Equity	8.78%	\$2,104,644	9.00%	\$ 2,128,178	\$	23,534	9.00%	\$2,089,206	\$ (38,972)
Preferred Equity	0.00%	\$ -	0.00%	\$ -	\$	-	0.00%	\$ -	\$ -
Total Equity	8.78%	\$2,104,644	9.00%	\$ 2,128,178	\$	23,534	9.00%	\$2,089,206	\$ (38,972)
Total	5.56%	\$3,334,830	6.02%	\$ 3,559,496	\$	224,666	5.76%	\$3,341,569	\$ (217,927)

2.1.2 Rate Base

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 1; section 1.6.1;

Exhibit 2; Attachments 2-A, 2-B;

Interrogatories: 1-Staff-11; 9-Staff-123 and 9-Staff-124;

Rationale:

The Parties accept the evidence of EPLC that the rate base calculations, after making the adjustment to the working capital and the in-service additions for 2018, as detailed in this Settlement Proposal, are reasonable and have been appropriately determined in accordance with OEB policies and practices. Table 6 below outlines EPLC's Rate Base calculation.

The parties agree the change to Gross Fixed Assets is appropriate to be consistent with APH 510. EPLC did not adjust the depreciation expense originally recorded, which was based upon the cost of distribution assets net of accumulated contributions as at January 1, 2014. In order to correct, the understatement of depreciation expense and amortization in the RRR for 2015 and 2016 a single correcting entry in 2017 will be recorded. Also, the balance in Account 1576 has been decreased consistent with the changes above.

Table 6. Summary of Rate Base Changes

-	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
Gross Fixed Assets (Avg.)	\$ 84,365,384	\$ 84,348,341	\$ (17,043)	\$ 85,884,454	\$ 1,536,113
Accumulated Depreciation (Avg.)	\$ (30,969,160)	\$ (30,938,185)	\$ 30,975	\$ (33,460,578)	\$ (2,522,393)
Net Fixed Assets (Avg.)	\$ 53,396,224	\$ 53,410,156	\$ 13,932	\$ 52,423,876	\$ (986,280)
Allowance for Working Capital	\$ 5,705,908	\$ 5,705,908	\$ -	\$ 5,609,635	\$ (96,273)
Total Rate Base	\$ 59,102,132	\$ 59,116,064	\$ 13,932	\$ 58,033,511	\$ (1,082,553)
Controllable Expenses	\$ 7,752,813	\$ 7,752,813	\$ -	\$ 7,287,493	\$ (465,320)
Cost of Power	\$ 68,325,958	\$ 68,325,958	\$ -	\$ 67,507,639	\$ (818,319)
Working Capital Base	\$ 76,078,771	\$ 76,078,771	\$ -	\$ 74,795,132	\$ (1,283,639)
Working Capital Rate %	7.50%	7.50%	0.00%	7.50%	0.00%
Working Capital Allowance	\$ 5,705,908	\$ 5,705,908	\$ -	\$ 5,609,635	\$ (96,273)

2.1.3 Working Capital Allowance

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 1, section 1.6.1, Figure 15

Exhibit 2, section 2.4

Interrogatories: None.

Rationale:

The Parties agree that the Working Capital Allowance has been appropriately calculated using the Board established rate of 7.5% and including adjustments in relation to OMA reductions and to the Cost of Power in relation to changes to the commodity prices as of July 1, 2017 and to the Global Adjustment as a result of the province's Fair Hydro Plan, as published in the Regulated Price Plan Prices and the Global Adjustment Modifier for the Period July 1, 2017 to April 30, 2018 issued on June 22, 2017. The derivation of the Cost of Power is presented at Table 7 below.

Table 7. Summary of Changes in WCA

	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Pro	ettlement oposal (April 13th, 2018)	Variance Over IRs	
Controllable Expenses	\$ 7,752,813	\$ 7,752,813	\$ -	\$	7,287,493	\$	(465,320)
Cost of Power	\$68,325,958	\$68,325,958	\$ -	\$	67,507,639	\$	(818,319)
Working Capital Base	\$76,078,771	\$76,078,771	\$ -	\$	74,795,132	\$(:	1,283,639)
Working Capital Base %	7.50%	7.50%	0.00%		7.50%		0.00%
			•				
Working Capital Allowance	\$ 5,705,908	\$ 5,705,908	\$ -	\$	5,609,635	\$	(96,273)

2.1.4 Depreciation

Status: Complete Settlement.

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 2, Section 2.1.1, Figure 1; section 2.2;

Attachments 2-A and 2-F

Interrogatories: 2-Staff-13 and 9-Staff-98

Rationale:

The Parties agree that the rates of depreciation and asset continuity schedules are appropriately calculated.

EPLC did not adjust the depreciation expense originally recorded, which was based upon the cost of distribution assets net of accumulated contributions as at January 1, 2014. In order to correct, the understatement of depreciation expense and amortization in the RRR for 2015 and 2016 a single correcting entry in 2017 will be recorded. Also, the balance in Account 1576 has been decreased consistent with the changes above.

Table 8. Summary of Changes in Depreciation

	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
Depreciation	\$ 1,848,004	\$ 1,848,00	4 \$ -	\$ 2,122,219	\$ 274,215

2.1.5 Taxes

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 4, section 4.12; Attachment 4-O;

Interrogatories: 2-Staff-14; 9-Staff-95;

4-VECC-47; Attachment 1-K;

Rationale:

The Parties accept the evidence of EPLC that its forecast taxes, as adjusted, have been correctly determined in accordance with OEB accounting policies and practices. A summary of the updated taxes is presented in Table 9 below. An updated Tax Model has been submitted in Live Excel format as part of this Settlement Proposal.

Table 9. Summary of Changes in Taxes

	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Or	nce Over iginal lication	P	ttlement roposal pril 13th, 2018)	Variance Over IRs
Income Taxes (Grossed Up)	\$ 227,249	\$ 235,735	\$	8,486	\$	221,683	\$ (14,052)

2.1.6 Other Revenue

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 3, Section 3.4;

Interrogatories: 3-Staff-52;

3-VECC-34;

Rationale:

The Parties have agreed to reduce the Other Revenues by \$70,000 as summarized in Table 10 below to better reflect changes in test year forecast since the filing of the application and consistent with 2017 actuals. The Parties agree EPLC's Other Revenues, as amended, are appropriate.

Table 10. Summary of Other Revenue

	(,	Application (August 28th, 2017)		IRR (March 2nd, 2018)		Variance Over Original Application		Settlement Proposal (April 13th, 2018)		nce IRs
Specific Payment Charges	\$	166,480	\$	166,480	\$		\$	131,480	\$ (35,	000)
Late Payment Charges	\$	260,400	\$	260,400	\$	-	\$	225,400	\$ (35,	(000
Other Distribution Revenues	\$	225,155	\$	225,155	\$	-	\$	225,155	\$	-
Other Income & Deductions	\$	39,786	\$	39,786	\$	-	\$	39,786	\$	-
Total	\$	691,821	\$	691,821	\$	-	\$	621,821	\$ (70,	000)

EB-2017-0039 Filed: April 13, 2018

Page 16 of 42

2.2 Has the revenue requirement been accurately determined based on these elements?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 6, incl. Attachment 6-A Revenue Requirement Work Form

Interrogatories:

Rationale:

The Parties agree EPLC's calculation of the revenue requirement is appropriate.

3. LOAD FORECAST, COST ALLOCATION AND RATE DESIGN

3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of Essex Powerlines' customers?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 3; section 3.2 and 3.3;

Attachment 3-A EPLC Load Forecast

Attachment 3-B Load Forecast CDM Adjustment Work Form

Interrogatories: 3-Staff-49; 3-Staff-50; 3-Staff-51;

3-VECC-24; 3-VECC-26; 3-VECC-27; 3-VECC-28; 3-VECC-29;

3-VECC-30; 3-VECC-31; 3-VECC-33; 7-VECC-58;

Rationale:

The Parties agree, subject to the following adjustments, the revised the load forecast, customer forecast, loss factors and CDM adjustments, are appropriate.

Update the customer forecast to incorporate the 2017 actual customer additions.
 Update the 2015 and 2016 CDM savings based on IESO 2016 verified results,
 Update 2017 and 2018 to use savings from CDM plan 2015-2020.

Update the allocation of manual adjustment for Load Forecast to use verified results for 2016 and the CDM Plan for 2017-2018.

Update the 2018 forecast for the "Employment" variable.

The resulting billing determinants are presented in Table 11 - 2018 Test Year Billing Determinants (for Cost Allocation and Rate Design) below.

Table 11. Summary of Billing Determinant Changes

Rate Class	Billing Determinant	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
Residential	kWh	245,374,118	245,374,118	-	234,935,416	(10,438,702)
General Service < 50 kW	kWh	62,707,450	62,707,450	-	64,810,159	2,102,709
General Service 50-4,999 kV	kWh	176,280,306	176,280,306	-	177,155,358	875,052
Embedded Distributor	kWh	29,865,554	29,865,554	-	29,865,554	-
Unmetered Scattered Load	kWh	1,554,368	1,554,368	-	1,554,368	-
Sentinel Lighting	kWh	335,758	335,758	-	335,758	-
Street Lighting	kWh	2,799,882	2,799,882	-	2,492,464	(307,418)
Total		518,917,436	518,917,436	-	511,149,077	(7,768,359)
Residential	kW	-	-	-	-	-
General Service < 50 kW	kW	-	-	-	-	-
General Service 50-4,999 kV	kW	446,253	446,253	-	448,468	2,215
Embedded Distributor	kW	80,869	80,869	-	80,869	-
Unmetered Scattered Load	kW	-	-	-	-	-
Sentinel Lighting	kW	2,080	2,080	-	2,080	-
Street Lighting	kW	8,848	8,848	-	7,877	(971)
Total		538,050	538,050	-	539,294	1,244

3.1.1 Customer/Connection Forecast

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 3, sections 3.1 and 3.2

Attachment 3-D Customer, Connections, Load Forecast and

Revenues Data and Analysis

Interrogatories: 3-VECC-24

Rationale:

The Parties agree that the updated customer connection forecast, as revised, is appropriate. The forecast was updated to reflect the actual connections that occurred in 2017.

Table 12. Summary of Customer Connection Forecast

Rate Class	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
Residential	27,484	27,484	-	27,784	300
General Service < 50 kW	1,977	1,977	-	1,997	20
General Service 50-4,999 kV	219	219	-	217	(2)
Embedded Distributor	3	3	-	3	-
Unmetered Scattered Load	140	140	-	141	1
Sentinel Lighting	173	173	-	173	-
Street Lighting	2,740	2,740	-	2,758	18
Total	32,736	32,736	-	33,073	337

3.1.2 Loss Factors

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 8, section 8.10

Interrogatories: 1-SEC-4; 1-SEC-9

8-Staff-79; 9-Staff-88

Rationale:

The Parties agree the proposed loss factors as shown in Table 13 below are appropriate.

Table 13. Loss Factors

	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Variance Over Original Application	Settlement Proposal (April 13th, 2018)	Variance Over IRs
Loss Factor in Distributor's System = C / F	1.0318	1.0318	0	1.0318	0
Losses Upstream of Distributor's System					
Supply Facilities Loss Factor	1.0035	1.0035	0	1.0035	0
Total Losses					
Total Loss Factor = G x H	1.0355	1.0355	0	1.0355	0

3.1.3 LRAMVA

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit

Interrogatories: 4-VECC-48 and 4-VECC-49;

4-Staff-51 and 4-Staff-69 to 4-Staff-73

Rationale:

The parties have agreed to LRAMVA thresholds as set out in Table 15 - 2018 LRAMVA Baseline kWhs and kWs below.

Table 14. LRAMVA

Year		CDM A	djustment	LRAMV	A Target
	Forecast CDM	Weight Amount		Weight	Amount
2010	7,078,022	0.5	3,539,011	1	7,078,022
2017	4,707,723	1	4,707,723	1	4,707,723
2018	4,707,723	0.5	2,353,862	1	4,707,723
Total			10,600,596		16,493,468

Rate Rider	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Settlement Proposal (April 13th, 2018)
LRAM (Account 1568)			
Residential	0.0005	0.0005	0.0005
General Service < 50 kW	0.0014	0.0014	0.0013
General Service 50-4,999 kW	0.0881	0.0881	0.0869
Embedded Distributor	-	-	-
Unmetered Scattered Load	-	-	-
Sentinel Lighting	-	-	-
Street Lighting	0.5070	0.5070	0.4998

3.2 Is the proposed cost allocation methodology, and are the allocations and revenue-to-cost ratios, appropriate?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 7

Interrogatories: 4-Staff-60; 4-Staff-62;

7-VECC-57

Rationale:

The Parties agree the cost allocation methodology and the allocations and revenue to cost ratio reflect OEB policies and are appropriate for purposes of settlement. However, in terms of the load profiles used, while Parties agree to accept the demand allocators proposed by EPLC for purposes of settlement as they are reasonable, there is no agreement that the methodology used to derive the values is appropriate. The R/C ratio for both GS classes decrease, due to rounding, even though they are in the Board's policy range.

An updated cost allocation model has been filed on the OEB's RESS system as part of this Settlement Proposal which incorporates the changes agreed to herein.

Table 15. Revenue to Cost Ratios

Class	Test Year	2019	2020	Board Range
Residential	96.50%	96.50%	96.50%	85-115
GS<50kW	114.75%	114.75%	114.75%	80-120
GS>50kW	103.55%	103.55%	103.55%	80-120
Street Lights	120.00%	120.00%	120.00%	80-120
Unmetered	120.00%	120.00%	120.00%	80-120
Sentinel	120.00%	120.00%	120.00%	80-120
Embedded	120.00%	120.00%	120.00%	80-120

3.3 Are Essex Powerlines' proposals for rate design appropriate?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 8

Interrogatories: 7-Staff-77; 9-Staff-97;

7-VECC-57;

Rationale:

The Parties accept the evidence of EPLC that all elements of the rate design have been correctly determined in accordance with OEB policies and practices. The parties agree that the embedded distributor rate class is appropriate. The fixed charge for the GS>50kW has been held at the current rate rather than increasing beyond the maximum permitted in the model.

The Embedded Distributor monthly service charge was chosen as the mid-point between EPLC's current approved intermediate fixed rate and the GS<50 class.

Table 16. Distribution Rate Changes

RATE CLASSES / CATEGORIES				Total						
(eg: Residential TOU,	Units	Δ		Е	3	С		Bill		
Residential Retailer)		\$	\$ % \$ %			\$	%	\$	%	
Residential - RPP	kWh	\$ 0.49	1.8%	\$ (0.21)	-0.7%	\$ (0.67)	-1.9%	\$ (0.84)	-0.7%	
GS<50 - RPP	kWh	\$ 0.81	1.4%	\$ (1.08)	-1.6%	\$ (2.05)	-2.5%	\$ (2.54)	-0.8%	
GS 50-4,999 - Non-RPP	kW	\$ 5.92	1.3%	\$(276.74)	-35.0%	\$ (339.62)	-2.5%	\$ (388.13)	-5.9%	
Embedded Distributor - Non-RPP	kW	\$(178.94)	-13.4%	\$(951.90)	-59.8%	\$ (951.90)	-59.8%	\$ (1,097.41)	-2.2%	
USL - RPP	kWh	\$ (2.19)	-7.3%	\$ (8.43)	-23.2%	\$ (8.77)	-21.1%	\$ (9.99)	-7.2%	
Sentinel Lights - Non-RPP	kW	\$ (0.36)	-8.1%	\$ (0.60)	-12.8%	\$ (0.61)	-12.5%	\$ (0.70)	-6.8%	
Street Lights - Non-RPP	kW	\$ (0.03)	-0.8%	\$ (0.26)	-5.9%	\$ (0.28)	-5.9%	\$ (0.32)	-3.2%	
Residential 10th Percentile - RPP	kWh	\$ 2.37	10.3%	\$ 1.16	4.9%	\$ 1.00	3.9%	\$ 1.11	1.9%	

Table 17. Fixed Variable Splits

I abio III I IAGa V	ariabio opiito	
Class	Fixed	Variable
Residential	89.35%	10.65%
GS<50kW	51.98%	48.02%
GS>50kW	39.20%	60.80%
Street Lights	60.80%	39.20%
Unmetered	25.89%	74.11%
Sentinel	25.79%	74.21%
Embedded	16.74%	83.26%

3.3.1 Residential Rate Design

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 8, section 8.1.4; Attachment 8-A

Interrogatories: None

Rationale:

The Parties agree that EPLC's proposal for the phase in of the fixed charge for the residential rate class is consistent with the Board's policy "A New Distribution Rate Design for Residential Electricity Customers".

3.3.2 Embedded Distributor

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 8

Interrogatories: 7-Staff-77; 9-Staff-97

7-VECC-57

Rationale:

The Parties agree the proposal for the Embedded Distributor rate is appropriate. Currently, Hydro One is the only Embedded Distributor. The monthly service charge of \$550 was derived as the midpoint between EPLC's currently approved intermediate fixed rate and the GS>50kW class. The demand charge is \$1.2176/kW.

3.4 Are the proposed Retail Transmission Service Rates and Low Voltage service rates appropriate?

3.4.1 Retail Transmission Service Rates

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 8

Interrogatories: 2-Staff-18; 9-Staff-97

Rationale:

The Parties agree to the RTSRs presented in Table 18 below. An updated copy of the OEB's RTSR model has been submitted in live Excel format as part of this Settlement Proposal.

Table 18. RTSR

Rate Class	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Settlement Proposal (April 13th, 2018)
Transmission - Network			
Residential	0.0046	0.0046	0.0046
General Service < 50 kW	0.0039	0.0039	0.0039
General Service 50-4,999 kW	1.6326	1.6326	1.6326
General Service 50-4,999 kW - Interva	2.0111	2.0111	2.0111
Embedded Distributor	-	-	-
Unmetered Scattered Load	0.0039	0.0039	0.0039
Sentinel Lighting	0.8817	0.8817	1.2569

3.4.2 Low Voltage

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 8, section 8.3;

Interrogatories: 8-VECC-62;

9-Staff-81

Rationale:

The Parties agree that the Low Voltage Service rates have been appropriately determined.

Table 19 Low Voltage

	2018 Test									
Rate Class	Load Forecast	Loss Factor	or Billing Determinant		Rate		Amount			
Low Voltage Charges										
Residential	234,935,416	1.0000	234,935,416	\$	0.0035	\$	822,926			
General Service Less Than 50 kW	64,810,159	1.0000	64,810,159	\$	0.0034	\$	219,448			
General Service 50 to 4,999 kW	448,468	1.0000	448,468	\$	1.4462	\$	648,580			
Unmetered Scattered Load	1,554,368	1.0000	1,554,368	\$	0.0034	\$	5,263

Embedded Distributor	80,869	1.0000	80,869	\$	-	\$	-			
Total						\$	1,706,066			

4. ACCOUNTING

4.1 Have all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 1, sections 1.6.1 and 1.6.2;

Interrogatories: 1-Staff-9

3-SEC-27

Rationale:

Subject to the issue discussed in Section 4.2 herein, the Parties accept the evidence of EPLC that all impacts of changes to accounting standards, policies, estimates, and adjustments have been properly identified and recorded in accordance with the OEB's policies and properly reflected in rates.

An updated EDDVAR Continuity Schedule is provided in working Excel format reflecting this Settlement Proposal and includes the calculation of the various riders discussed above.

4.2 Are Essex Powerlines' proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts and the continuation of existing accounts, appropriate?

4.2.1 Group 1 Accounts

Status: Partial Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 9; section 9.

Interrogatories: 9-SEC-42;

9-Staff-80;

Rationale:

The OEB ordered an audit in its Decision and Order in EB-2014-0072 in respect of the balances in the Group 1 balances in respect of 2013, 2014 and 2015; and Group 2 balances (excluding smart meter accounts 1555 and 1556) from the most recent date of disposition or date of the last regulatory audit to December 31, 2015. Disposition of amounts for those years was made on an interim basis.

Except for the unresolved issue, the Parties agree on the balances for final disposition of the Group 1 accounts. The unresolved issue pertains to the interim recovery of a net amount of \$1.8 million from customers identified in the Board Staff audit (*Audit of Group 1 and Group 2 Deferral and Variance Accounts* report, dated March 2017) at section 10.1.

The Parties suggest that the process to resolve the unsettled issue should include, a) an opportunity for EPLC to provide a written summary of the chronological events regarding the unsettled issue including references to past decision, and evidentiary records, b) Intervenors and Board Staff should have the opportunity to make information requests of EPLC on the unsettled issue, and c) written submissions should be filed by all parties (i.e. EPLC argument-inchief, responding submissions by Intervenors and Board Staff, and reply submissions of EPLC).

The balances in the reconstructed DVA continuity schedules, included in Appendix G hereto, include Accounts 1550, 1580, 1584, 1586, 1588 and 1589.

The Parties also agree that EPLC will, during each year in any IRM application prior to the next cost of service application or Custom IR application, in which it seeks to dispose of any deferral and variance accounts, it will file with its application an updated table (See Appendix F) providing the status of the Management Action Plan that was provided in the OEB Staff audit of Regulatory Accounting Procedures, Controls, and Oversight over Deferral and Variance Accounts report, dated April 2016.

Table 20. Group 1 Accounts

Group 1 - Account Number		oplication (August 3th, 2017)		RR (March nd, 2018)	(/ariance Over Original oplication	Settlement Proposal (April 13th, 2018)		Variance	
1550	\$	2,735,047	\$	2,735,047	\$	-	\$	2,735,047	\$	-
1551	\$	(39,925)	\$	(39,925)	\$	-	\$	(39,925)	\$	-

4.2.2 Group 2 Accounts

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 9; section 9.5

Interrogatories: 9-Staff-80; 9-Staff-82; 9-Staff-92; 9-Staff-93; 9-Staff-94; 9-Staff-96;

9-Staff-97; 9-VECC-66;

Rationale:

The OEB ordered an audit in its Decision and Order in EB-2014-0072 in respect of the balances in the Group 1 balances in respect of 2013, 2014 and 2015; and Group 2 balances (excluding smart meter accounts 1555 and 1556) from the most recent date of disposition or date of the last regulatory audit to December 31, 2015. Disposition of amounts for those years was made on an interim basis.

The Parties agree the revised Group 2 balances summarized below are appropriate for final disposition and agree the resulting rate riders summarized below as appropriate. The disposition includes amounts related to stranded meters (account 1555).

The Parties agree that the Account 1572, damage related to a tornado in 2010, and Account 1518, costs related to retailer consolidated billing will not be recovered.

The Parties also agree that EPLC will, during each year in any IRM application prior to the next cost of service application or Custom IR application, in which it seeks to dispose of any deferral and variance accounts (See AppendixF), it will file with its application an updated table providing the status of the Management Action Plan that was provided in the OEB Staff audit of Regulatory Accounting Procedures, Controls, and Oversight over Deferral and Variance Accounts report, dated April 2016.

4.2.3 Stranded Meters

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None

Evidence: Exhibit 9; section 9.5.8

Interrogatories: 9-Staff-98;

2-VECC-17; 2-VECC-19;

Rationale:

The parties agree with the disposition of \$1,095,650 in respect of the Net Book Value of stranded meter assets. This consistent with the Board's *Guideline G-2011-0001*, *Smart Meter Funding and Cost Recovery – Final Disposition* (December 15th, 2011).

4.2.4 LRAMVA Rate Riders

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 9; Attachment 1-Q

Interrogatories: 3-Staff-51; 4-Staff-69; 4-Staff-70; 4-Staff-71; 4-Staff-72; 4-Staff-73

4-VECC-48; 4-VECC-49

Rationale:

The Parties agree that the LRAMVA balances and rate riders as summarized in Table <> below are appropriate.

Table 23. LRAMVA Rate Riders

Rate Rider	Application (August 28th, 2017)	IRR (March 2nd, 2018)	Settlement Proposal (April 13th, 2018)

5. FINANCING

5.1 Are the risks associated with Essex Powerlines' financing arrangements appropriate?

Status: Complete Settlement

Parties in Agreement: All

Parties Opposed: None.

Evidence: Exhibit 5

Interrogatories: 5-SEC-39

Rationale:

The Parties agree EPLC's financing arrangements are appropriate. In its Decision and Order in EB-2014-0072, the OEB expressed concern regarding the existing financing arrangements. At that time, EPLC had indicated that it could not absorb a loss greater than \$380,000 without being at risk of being offside of its financial covenants.

In Exhibit 5, EPLC confirmed that it had entered into new loans with financial institutions with similar conditions and no adverse change in financial covenants. EPLC has provided a supplemental response to 5-SEC-39 indicating that the value provided in EB-2004-0072 was premised upon conditions at that specific time, including the prospect of a capital contribution being required for the SECTR project in excess of \$10 million, which are different than current conditions. Based upon the same methodology that produced the result of \$380,000 would now be in excess of \$2 million.

Appendix "A" – Revenue Requirement Work Form

Version 7.02

Utility Name	Essex Powerlines Corporation	
Service Territory	Amherstburg, Lasalle, Leamington, Tecumseh	
Assigned EB Number	EB-2017-0039	
Name and Title	Kristopher Taylor, Director of Corporate Strategy	
Phone Number	519-946-2000 x219	
Email Address	ktaylor@essexpower.ca	

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

Notes:

General

Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- (3) Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- (6) Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- (8) 4.0% unless an Applicant has proposed or been approved for another amount.
- The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

Percentage Change Relative to Initial Application

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

Stage in Process:

Per Board Decision

Customer Class		Initial Application	
Input the name of each customer class.	Customer / Connections Test Year average	kWh Annual	kW/kVA (1)
	or mid-year	71111001	71111001
Residential	27,484	245,374,118

Notes:

⁽h) Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Per Board Decision

A) Allocated Costs

Name of Customer Class (3)		Allocated from	%		llocated Class nue Requirement	%
From Sheet 10. Load Forecast					(1) (7A)	
1 Residential 2 General Service < 50 kW 3 General Service > 50 kW 4 Intermediate Use 5 Street Lights 6 Unmetered Scattered Load 7 Sentinel Lights 8 Embedded Distributor 9 1 1 2 3 4 5 6 6	6 6 6 6 6 6 6 6	8,442,067 1,585,605 1,457,177 58,824 351,854 23,468 58,914	70.48% 13.24% 12.17% 0.49% 2.94% 0.20% 0.49%	\$ \$ \$ \$ \$ \$ \$ \$	9,625,174 1,467,052 1,555,011 - 155,290 50,024 21,704 98,708	74.19% 11.31% 11.99% 1.20% 0.39% 0.17% 0.76%
7 3 9 9 0 Total	\$	11,977,910	100.00% Service Revenue Requirement (from Sheet 9)	\$	12,972,963 12,972,964.58	100.00%

⁽¹⁾ Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 - Low Voltage (LV) Costs are also excluded.

⁽²⁾ Host Distributors - Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.

⁽³⁾ Customer Classes - If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

Name of Customer Class	e of Customer Class Load Forecast (LF) X current approved rates				LF >	(Proposed Rates	Miscellaneous Revenues			
		(7B)		(7C)		(7D)		(7E)		
1 Residential	\$	8,530,897	\$	8,685,705	\$	8,787,753	\$	468,009		
2 General Service < 50 kW	\$	1,611,146	\$	1,640,383	\$	1,638,595	\$	75,233		
3 General Service > 50 kW	\$	1,533,302	\$	1,561,126	\$	1,545,657	\$	66,845		
4 Intermediate Use	\$	-	\$	-	\$	-	\$	-		
5 Street Lights	\$	178,930	\$	182,177	\$	178,160	\$	8,188		
6 Unmetered Scattered Load	\$	62,175	\$	63,303	\$	57,552	\$	2,477		
7 Sentinel Lights	\$	27,447	\$	27,945	\$	25,162	\$	883		
8 Embedded Distributor	\$	187,106	\$	190,502	\$	118,265	\$	185

0										
1										
2										
3										
4										
5										
6										
7										
8										
9										
o l										
			_				_			
Total	\$	12,131,003	\$	12,351,142	\$	12,351,142	\$	621,821		

⁽⁴⁾ In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

⁽⁵⁾ Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

⁽⁶⁾ Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

⁽⁷⁾ Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2010			
	%	%	%	%
Residential	100.23%	95.10%	96.16%	85 - 115
General Service < 50 kW	49.56%	116.94%	116.82%	80 - 120
General Service > 50 kW	159.99%	104.69%	103.70%	80 - 120
Intermediate Use	336.93%	#DIV/0!	#DIV/0!	80 - 120
Street Lights	32.36%	122.59%	120.00%	80 - 120
Unmetered Scattered Load	132.66%	131.50%	120.00%	80 - 120
Sentinel Lights	38.09%	132.82%	120.00%	80 - 120
Embedded Distributor	N/A	193.18%	120.00%	80 - 120

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

⁽¹⁰⁾ Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

(D) Proposed Revenue-to-Cost Ratios (11)

Name of Customer Class	Propos	Proposed Revenue-to-Cost Ratio											
	Test Year	Price Cap IR I	Period	, ,									
	2018	2019	2020										
Residential	96.16%	96.16%	96.16%	85 - 115									
General Service < 50 kW	116.82%	116.82%	116.82%	80 - 120

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2018 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2019 and 2020 Price Cap IR models, as necessary. For 2019 and 2020, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2017 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

New Rate Design Policy For Residential Customers

Variable	10.65%	\$ 935,814.72	\$ 0.0040	\$ 939,741.66
TOTAL	-	\$ 8,787,752.50	-	\$ 8,791,500.06

Checks ³	
Change in Fixed Rate	\$ 2.81
Difference Between Revenues @ Proposed Rates	\$3,747.56
and Class Specific Revenue Requirement	0.04%

Notes:

- 1 The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. A distributor transitioning to fully fixed rates over a four year period and began the transition in 2016 would input the number "3" into cell D40. A distributor transitioning over a five-year period would input the number "4". Where the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, a distributor may propose an additional transition year.
- 3 Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluentric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/Pil.s, etc.

Notes: 1 Transformer Ownership Allowance is	entered as a positive a	amount, and only for	those classes to wh	nich it applies.																Difference % Difference		\$	891.20 0.007%

¹ Transformer Ownership Allowance is entered as a positive amount, and only for those classes to which it applies.

The Fixed/Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) and/or Item Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

Notes:

- 1 Tables in the format outlined above covering all fixed asset accounts should be submitted for the Test Year, Bridge Year and all relevant historical years. At a minimum, the applicant must provide data for the earlier of: 1) all historical years back to its last rebasing; or 2) at least three years of historical actuals, in addition to Bridge Year and Test Year forecasts.
- 2 The "CCA Class" for fixed assets should agree with the CCA Class used for tax purposes in Tax Returns. Fixed Assets sub-components may be used where the underlying asset components are classified under multiple CCA Classes for tax purposes. If an applicant uses any different classes from those shown in the table, an explanation should be provided. (also see note 3).
- The table may need to be customized for a utility's asset categories or for any new asset accounts announced or authorized by the Board.
- 4 The additions in column (E) must not include construction work in progress (CWIP).
- 5 Effective on the date of IFRS adoption, customer contributions will no longer be recorded in Account 1995 Contributions & Grants, but will be recorded in Account 2440, Deferred Revenues.
- 6 The applicant must ensure that all asset disposals have been clearly identified in the Chapter 2 Appendices for all historic, bridge and test years. Where a distributor for general financial reporting purposes under IFRS has accounted for the amount of gain or loss on the retrement of assets in a pool of like assets as a charge or credit to income, for reporting and rate application filings, the distributor shall reclassify such gains and losses as depreciation expense, and disclose the amount separately.

Appendix "F" - Status of Management Action Plan

AMENDED APPENDIX F

Finding No.	Finding Description	Management Action Plan	Immediate and Short Term Items Completed	Future Action Items
	Section 1 – Application of the	APH, FAQ's and Ot	ther OEB Regulatory Guidelines	
1	J Lack of documented management review and/or reconciliation regarding DVA	1.1.5	Reviewed DVA Chart of Accounts Improved Standard Operation Procedures - new and improvement of existing, including month end journal checklist Internalized IESO settlement responsibilities Changed management hierarchy/reporting structure	 Complete Chart of Accounts in order to ensure conformity with APH, FAQ and other Board issued guidelines Formalize process to review any change or modifications to DVA Chart of Accounts in order to ensure on-going compliance Finalize any "draft" SOP's and determine if any further key regulatory functions still require SOP's Regularly monitor and maintain SOP's for accuracy
2	Historical non-compliance with APH	1.2.5	 Immediately corrected non-compliant accounts identified during the audit Created a "draft" formal policy with respect to adding/removing general ledger accounts in order to ensure compliance with APH, FAQ and other Board issued guidelines 	 Finalize formal policy with respect to adding/removing general ledger accounts in order to ensure compliance with APH, FAQ and other Board issued guidelines Use formal policy in conjunction with Communication Plan (committed was part of another finding below) that will ensure information related to APH, FAQ and other Board issued guidelines flows to the correct departments and people in a timely manner
3	J Late filing of 2 RRR filings	1.3.5	 Calendar of filing deadlines created in order to ensure timeliness of filings No quarterly filing submitted late since Audit Additional management review added per Finding one (1) above Created "draft" SOP's related to key regulatory functions associated with quarterly/annual RRR filings 	 Formalize lead up process to filing date to ensure that future quarterly/annual filings are consistently made on time Finalize any key regulatory SOP's and determine if any further key regulatory functions associated with quarterly/annual RRR filings still require SOP's

Finding No.	Finding Description	Management Action Plan	Immediate and Short Term Items Completed	Future Action Items
	Section 2 – Management Over	sight and Governa	nce Regarding DVA's	
1	Need to strengthen Management oversight and control over regulatory activities for regulatory accounting	2.1.5	 Personnel realignment and reorganization Maintained and expanded scope of industry peer group involvement Staff undertook additional training, with a focus on regulatory accounting Retained services of 3rd party (KPMG) in order to support Phase 1 and 2 of OEB Audit Created Regulatory Staff Training Tracker with detailed listing of all training course undertaken and future courses to be attended Completed transition of duties and responsibilities relating to IESO 1598 away from 3rd party currently undertaking same to our own internal regulatory department Engaged industry experts to review COS application as needed 	 Continue work with external 3rd parties in order to review key organizational processes and controls when drafted and finalized Make staff training an integral part of development of internal regulatory expertise – ongoing Individual management documentation of their review of any regulatory filings – on going and as required Finalize and implement Financial System Access Policy regarding financial system access permissions and ensure each existing employee is reviewed to ensure proper controlled access to regulatory books of accounts and general ledgers
2	 Need to have specific audit procedures on regulatory information and accounts including DVA's by external auditors Need to error proof all data sources and inputs to RSVA accounts 	2.2.5	 Immediately directed external auditors to enhance scope of work in order to include RSVA review to ensure that testing of regulatory accounts was included Commenced identification and error-proofing all data sources and systems 	 Improve RFP for audit services to ensure proper and competent RSVA scope of review and audit of regulatory accounts Develop automated RSVA software system that will limit manual data entry, help reduce errors and create efficiencies with respect to RSVA data sources and inputs to RSVA accounts
3	Need to improve communication within EPLC regarding regulatory requirements	2.3.5	Developed draft Communication Plan that details information flow within organization	Evaluate Communication Plan and improve as necessary Ensure implementation, integration and finalization of Communication Plan
4	Formalize management and approval process for regulatory accounting activities and regulatory books of accounts	2.4.5	 Ensured account compliance detailed in Section 1 - Finding two (2) above Developed draft Adding/Removing general ledger regulatory accounts policy Developed Communication Plan 	Finalize and implement change management and approval process policies

Finding No.	Finding Description	Management Action Plan	Immediate and Short Term Items Completed	Future Action Items
5	Cross training/back up for regulatory accounting activities	2.5.5	Personnel realignment and reorganization	Make staff training an integral part of development of internal regulatory expertise – ongoing
6	Control access and segregation of duties of various staff relating to regulatory books/general ledger	2.6.5	 Terminated system access for certain personnel Developed draft Financial System Access policy for formal management review and authorization of financial system access 	J Finalize and implement Financial System Access Policy regarding financial system access permissions and ensure each existing employee is reviewed to ensure proper controlled access to regulatory books of accounts and general ledgers
7) Staff risk assessment	2.7.5	Personnel realignment and reorganization	J N/A
8	Appropriateness of spread sheeting checks used to create DVA balances	2.8.5	Hard coded cells were immediately removed Commenced review of entire process leading up to and including RSVA calculation which includes detailed review of presently existing controls and enhancing and securing present visual validation checks within spreadsheets	Automating the process to reduce potential errors
9	Insufficient safeguards or processes in place to prevent unauthorized users to access excel spreadsheets used for regulatory activities	2.9.5	Access limited to RSVA files within the finance drive to only Regulatory personnel) N/A
	Section 3 – Staff Competencie	s and Training Reg	arding Regulatory Accounting	
1	 Enhancing key regulatory personnel experience and knowledge 	3.1.5	 Strategic use of third party service providers to assist while internal expertise is being properly developed Engaged industry experts throughout 2018 COS application 	Engage 3 rd party service providers to review finalized key organizational process and controls

Finding No.	Finding Description	Management Action Plan	Immediate and Short Term Items Completed	Future Action Items
2	J Improve regulatory accounting training;	3.2.5	 Staff undertook additional training, with a focus on regulatory accounting Staff involved in in industry peer groups 	Make staff training an integral part of development of internal regulatory expertise – ongoing
3	J Internalize functions/preparation of IESO Form 1598	3.3.5	 Drafted detailed IESO 1598 Filing Instructions SOP Internalized IESO settlement responsibilities 	J N/A
4	Reduce dependency on consultants and third parties to meet regulatory needs	3.4.5	Completed. Internalized regulatory accounting and reporting inhouse	J Identify any other regulatory accounting tasks being undertaken by third parties and determine a plan to potentially internalize
	Section 4 - Lack of Docum	nentation for Regul	atory Accounting Systems, Process, Procedures, Controls, and C	Oversight for DVA's
1	Lack of Standard Operating Procedures for key regulatory activities	J 4.1.5	J Improved Standard Operation Procedures - new and improvement of existing, including month end journal checklist	
2	Need to improve documentation that quarterly/annual RRR's to pivot table and general ledger reconciliation had been performed or reviewed	J 4.2.5	 Created Historical RRR filing workbook to help staff at all levels trend and better understand RRR data Established RRR departmental focus groups to review, explain and detail the regulatory reporting obligations of each department 	for majority of RRR sections

Appendix "G" - DVA Continuity Schedules

Utility Name	Essex Powerlines Corporation	
Service Territory	Amherstburg, LaSalle, Leamington, Tecumseh	
Assigned EB Number	EB-2017-0039	
Name of Contact and Title	Kristopher Taylor, Director of Corporate Strategy	
Phone Number	519-946-2000	
Email Address	ktaylor@essexpower.ca	

General Notes

<u>Notes</u>
Pale green cells represent input cells.
Pale blue cells represent drop-down lists. The applicant should select the appropriate item from the drop-down list.
White cells contain fixed values, automatically generated values or formulae.

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of preparing your rate application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

Instructions for Tabs 2 to 7

Tab	Tab Details	Step	Instructions
		1	Complete the DVA continuity schedule.
2 - Continuity Schedule	This tab is the continuity schedule that shows all the accounts and the accumulation of the balances a utility has.	2a 2b	For all accounts, except for Account 1595, start inputting data from the year in which the GL balance was last disposed. For example, if in the 2017 rate application, DVA balances as at December 31, 2015 were approved for disposition, start the continuity schedule from 2015 by entering the closing 2014 balances in the Adjustments column under 2014. For all Account 1595 sub-accounts, complete the DVA continuity schedule for each Account 1595 vintage year that has a GL balance as at December 31, 2016 regardless of whether the account is being requested for disposition in the current application. For each Account 1595 sub-account, start inputting data from the year the sub-account started to accumulate a balance (i.e. the vintage year). For example, Account 1595 (2014) would have information starting in 2014, when the relevant balances approved for disposition were first transferred into Account 1595 (2014). The DVA continuity schedule currently starts from 2011, if a utility has an Account 1595 with a vintage year prior to 2011, then a separate schedule should be provided starting from the vintage year. If you had any Class A customers at any point during the period that the Account 1599 GA balance accumulated (e.g. last disposition was for 2014 balances in the 2016 rate application, current balance requested for disposition accumulated from 2015 to 2016), check off the checkbox in checkbox in checked off, then proceed to tabs 4 to 7 and complete the tabs accordingly. If the checkbox is not checked off, the representation of the checkbox in step 2a is checked off, another checkbox will pop up to the right of the checkbox. If you had any Class A customers at any point during the period that the Account 1590, who account CRR Class B balance accumulated (i.e. 2015 and 2016 or 2016), check off the checkbox will pop up to the right of the checkbox in step 2a is checked off, then the balance in the Account 1590, who are controlled off the checkbox or the province of the province of the province of the checkbox or th
		3	general DVA rate rider. If the checkbox is checked off, then tab 5.3 will be generated. This tab will calculate the billing determinants applicable to Account 1580 sub-account CBR Class B, using information inputted in tab 5.1. See step 12 below for further details. The CBR Class B balance will be allocated in tab 5 and the rate rider will be calculated in tab 6. Enter the number of utility specific 1508 sub-accounts that are approved for the utility in the textbox in cell B50. The DVA continuity schedule will generate the number of utility specific 1508 sub-accounts starting in row 51. Input the name and the balances of the sub-account(s) starting in row 51. If a utility does not have utility specific 1508 sub-accounts. The prefer 1508 sub-account of the sub-a
Appendix A	This tab shows the year end balance variances between the continuity schedule and that reported in the RRR.	4	Provide an explanation for the variances identified.
4 - Billing Determinant	This tab shows the billing determinants that will be used to allocate account balances and calculate rate riders.	5	Complete the billing determinant table. Note that columns O and P are generated when a utility indicates they have Class A customers in tab 2. Information in these columns are populated based on data from tab 5.1.
5 - Allocating Def- Var Balances	This tab allocates the DVA balance (except for CBR Class B if Class A customers exist).	6	Review the allocated balances to ensure the allocation is appropriate. Note that the allocations for Account 1589, Account 1580, sub-account CBR Class B will be determined after tabs 5.1 to 5.3a have been completed.
5.1 - Class A Data Consumption	This is a new tab that is to be completed if there were any Class A customers at any point during the period the GA balance accumulated. The tab also considers Class AB transition customers. The data on this tab is used for the purposes of determining the GA rate rider, CBR Class B rate rider (if applicable), as well as customer specific GA and CBR Class B charges for transition customers (if applicable).	7 8 9	This tab is generated when the utility checks in tab 2 that they have Class A customers during the period that the GA balance accumulated. Under #7, ear, the year the Account 1589 GA balance was last dispose. Under #8, and the Page Tab County 1589 GA balance was last dispose. Under #82a, indicate whether you had any customers that transitioned between Class A and B during the period the Account 1589 GA balance accumulated. If no, proceed to #3b in step 10. If yes, #2b and tab 5 2 will be generated. Proceed to #2b. Under #82a, indicate whether you had any customers that transitioned between Class A and B during the period the Account 1580, sub-account CBR Class B balance accumulated. If no, proceed to #3a in step 9. If yes, #2b and table generated. Proceed to #3a in step 9. Under #3a, enter the number of transition customers during the period the Account 1589 GA balance accumulated. A table will be generated based on the number of customers. Complete the table accordingly for each transition customer during the period the Account 1589 GA balance accumulated. A table will be generated based on the number of customers. Complete the table accordingly for each transition customer identified (i.e. XWh/kW for half year periods, and the customer class during the half year). This data will automatically be used in the GA balance and CBR Class B balance allocation to transition customers in table 5.2 and 5.3a, respectively. Each transition customer identified in table 5.1 and 5.3b, and a customer number of which and the customers of the final transition customer identified in table 5.1 and 5.3b, and the customer identified in table 5.1 and 5.3b, and the customer identified in table 5.1 and 5.3b, an
5.2 - GA Allocation	This tab has been revised. It allocates the GA balance to each transition customer for the period in which these customers were Class B customers and contributed to the GA balance (i.e. former Class B customers who contributed to the GA balance but are now Class A customers and former Class A customers who are now Class B customers contributing to the GA balance).	11	This tab is generated when the utility indicates that they have transition customers in tab 5.1, #2a during the period where the GA balance accumulated. In row 20, enter the total Class B consumption which equals to Non-RPP consumption less WMP consumption and consumption for Class A customers (who were Class A for partial and full year). The rest of the information in this tab will be auto-populated and will calculate the customer specific allocation of the GA balance to transition customers in the bottom table. All transition customers who are allocated a specific GA amount are not to be charged the general Non-RPP Class B GA rate rider as calculated in tab 6.
5.3 - CBR	This is a new tab that calculates the CBR Class B rate rider if there were Class A customers at any point during the period that the CBR Class B balance accumulated.	12	This tab is generated when the utility checks in tab 2 that they have Class A customers during the period that Account 1580, sub-account CBR Class B balance accumulated. Select one of two options pertaining to the years in which the CBR Class B balance accumulated, either 2015 and 2016, or 2016 only in cell B13. The rest of the information in the tab is auto-populated and will be used in the calculation of the CBR Class B rate rider calculated in tab 6.
5.3a - CBR_B Allocation	This is a new tab that allocates the CBR Class B talance to each transition customer for the period in which these customers were Class B customers to the CBR Class B talance to the Care Class A customers and former Class A customers who are now Class B contributing to the balance).	13	This tab is generated when the utility indicates that they have transition customers in tab 5.1, #2b during the period where the CBR Class B balance accumulated. In row 20, enter the total Class B consumption which equals to total consumption less WMP consumption and consumption for Class A customers (who were Class A for partial and full year). The rest of the information in this tab will be auto-populated and will calculate the customer specific allocation of the CBR Class B balance to transition customers in the bottom table. Note that the transition customers for the CA may be different than the transition customers for CBR Class B as this would depend on the period in which the GA and CBR Class B balances accumulated. All transition customers who are allocated a specific CBR Class B amount is not to be charged the general CBR Class B rate rider.
6 - Calculation of Def-Var RR	This tab calculates all the applicable DVA ate riders.	14	Enter the proposed rate rider recovery period if different than the default 12 month period. For each rate class of each rate rider, select whether the rate rider is to be calculated on a kWhkW or number of customers basis. The rest of the information in the tab is auto-populated and the rate riders are calculated accordingly.
7 + 7.a GA Analysis	This is a new GA Analysis Workform that is to be completed.	15	Complete tab 7.a according to the instructions in tab 7.

This continuity schedule must be completed for each account and sub-account that the utilit from the year in which the GL balance was last disposed. For example, if the text 2017 rate app Adjustment column under 2014, For each Account 1955 sub-account, start injusting data for balances approved for disposition was first transferred into Account 1955 (2014). The DVA c viltigapy sur. For any new accounts that have never been disposed, start injusting data from the Account 1955 (2014). The DVA c viltigapy sur. For any new accounts that have never been disposed, start injusting data from the Account 1955 (2014).

For all OEB-Approved dispositions, please ensure that the disposition amount has the same sign (if figure and credit balance are to have a negative figure) as per the related OEB decision. For RSVA accounts only, report the net variance to the account during the year. For all other accounts, record the train this column.

Please provide explanations for the nature of the adjustments. If the adjustment relatives to previously CEE Approved c As per the January 6, 2011 Latter from the OEE regarding the implementation of the Ontario Clean Energy Benefit: "By vary of exception... The Board does are includes that loarness distribution that carent adopt that invoices as of Jan.

Deferral accounts related to Smart Melar deployment are not to be recovered vehanded through the Deferral and Varia Guideline: Smart Melar Disposition and Cost Recovery (C-2011-0001)

The OSES requires that disposition of Account 1575 and Account 1575 and require the use of separate rate riders. In 1 Account 1575 and 1575 rate rider accludation from the applicable Chapter 2-8 appends from "Amount included in Defe

Depending on the disposition period, balances may exist in Account 1575 and Account 1576 even if the accounts have if this is the case and leave the checkbox "Check to Dispose of Account" in the Total Claims column unchecked. Fifth LDCs rate yet begins on January 1, 2018, the projected interest is recorded from January 1, 2017 to Decembe 2017 rate decision. If the LDCs rate year begins on May 1, 2018, the projected interest is recorded from January 1, 2018 to Dispose John Collis in a 2017 task decision.

by the CEB in the 2017 rate decision.

The individual sub-accounts as well as the total for all Account 1505 sub-accounts are to agree to the RRR data. Diff For each Account 1505 sub-account, the transfer of the balance approved for disposition into Account 1505 is to be ne column. The two are not to be netted together and recorded in one column in the first year.

The audide balance is the account is only to be disposed a year after the encovery/refund period has been complete. Coccumit 1925 is only to be disposed more on a first balance. No further disposition of these account any generally exp Claims column if the account is requested for disposition. As only the complete is required to the complete of the complete is not account any generally exp App or the Filing Requirements for 2015 state applications, request for rate protection on eligible investments are subject.

Benefits proton of Account 1531 is should be transferred to rate base. The Direct Benefits proton of Account 1522 is included for Ferniers only.
