Subject: RE: EB-2017-0062 Newmarket-Tay Power Distribution Ltd. - Decision and Rate Order

Hi Marc,

NT Power has reviewed the Tariff of Rates and Charges in the subject decision. There is an inaccuracy within the General Service 50 to 4,999KW Service Classification. NT Power has Thermal Demand Meter and Interval Meter classes that have different Distribution Volumetric Rates. The draft rate order currently has both meter classes at \$/KW 4.8078. In the 2017 Rate Order (EB-2016-0275), the Distribution Volumetric Rate difference between the meter classes was \$/KW 0.1336.
