Subject: HPE CM: Letter of Comment Hydro One Application EB-2017-0049 - Pre-Paid Metering
Date: Thursday, May 24, 2018 1:11:03 PM

Reference number EB-2017-0049 (Hydro One Application)

Ontario Energy Board
P.O. Box 2319
2300 Yonge Street, 27th Floor
Toronto ON M4P 1E4
boardsec@oeb.ca

Attn: Ms. Kirsten Walli, Board Secretary,

Pre-Paid meters!, that's the last straw. Hydro One can't even get there current meters to work properly or,
fairly, manipulating ratio/CT, drawing extra cash for itself whenever it needs it.

We as Ontarians have had enough of the frauds committed against us, which continually harms our families
by the financial fleecing and fraudulent billing and meter reading regime which the Ontario Energy Board,
the Premier of Ontario and the Minister of Energy has fostered by willful ignorance.

Public Office cannot be used as a means for direct and/or indirect enrichment.

The only remedy at this point is to pursue a **Class Action Private Criminal Prosecution(s) Proceeding**

like in British Columbia, against all the parties whom have so recklessly allowed circumstance for the peoples
(human beings) of Ontario to suffer so long and has become so profoundly unbearable.

The mere suggestion that a human being can survive without power to heat our dwellings in mid October
to November 15 in Canada shows an ideology and culture of blatant disregard and negligence for human life.

The original purpose of public investment into our power distribution system was to provide continuous

reliable and affordable power to Ontario to hedge against geographic realities and climate and procure human survival needs.

It was not intended to be usurped for private revenue streams and hold the peoples of Ontario hostage and using our inherent need for survival as tool for unjust current and future windfall enrichment.

That's what criminals do.

The power distribution system paid for by the public was never meant to be a for-profit organization or, a revenue stream for Governments.

It was designed, built and paid for by the public to service only the peoples of Ontario.

When a CEO makes 4.6 million complaining about aging infrastructure at the same time, that's just nonsense and pompous reckless arrogance.

If the OEB, despite having ample resources, cannot rationalize that the slightest increase has a macro economic effect on everything we buy, even insurance and brokerage fees increase because of it, the current actors should never be allowed to make decision that affect the public.

Breach of trust by public officer

122 Every official who, in connection with the duties of his/her office, commits fraud or a breach of trust is guilty of an indictable offence and liable to imprisonment for a term not exceeding five years, whether or not the fraud or breach of trust would be an offence if it were committed in relation to a private person.

- R.S., c. C-34, s. 111.

As you know, the Crown can no longer dismiss the charges, and a hearing must take place.
The Appeals
Court of Ontario unanimously upheld Justice Marchall's ruling and the public's right to
proceed outside the
Crown for the purpose of public protections and the inherent human right to seek justice,
when justice or
enforcement is willfully absent.

We do know what the new crimes in Canada look like today. The end result is the same,
deprivation procured
by deceit. There is a difference between policy decisions and unjust market enrichment. The
OEB has decidedly
chosen to foster the latter.

Ontarians cannot continue to suffer the liability and allow those whom have infiltrated our
commissions and
legislature to occupy a position to "*not to do a thing*" for the public, and act with such utter
contempt for
the peoples of Ontario to be allowed to continue making decisions on our behalf.

There will be no more of, Hydro One or any other industry submitting applications,
manipulating the process
for increases and then later informing customers, "***we have to charge you more, it's the
law***".

So, since the OEB is arms-length from the public and the Government of Ontario provides
no oversight, we can
infer that the OEB works for the industry but, pretends to service and is paid for by the
public, as an ongoing
subterfuge until redirected.

For the Premier, Ministers, this means any election "***promises***" this time around will not
have to be honored,
and the public will remedy the deceit of "***Bait & Switch***" to gain office in our own way,
especially if your
successful.

Nothing in this email is asking you to do anything differently, continue doing what you have
demonstrated
in past elections and regulate the public to be compliant to a few favorite corporations
wishes, continue to
serving the industry pretending your serving the interests of the public.

Regards,

Frank Jakubowski
Dundalk, Ontario
