RE: EB-2017-0319 Enbridge RNG Enabling & Geothermal Services Programs

We are writing on behalf of Federation of Rental-housing Providers of Ontario (“FRPO”) in response to the Board’s Procedural Order No.3 in the above subject proceeding.

After assessing the Enbridge IRR’s and eliminating any inquiry regarding Geothermal services¹, we estimate our inquiry to be 30-45 minutes. We will be focusing on the technical aspects of Renewable Natural Gas from Wastewater Treatment Plants (FRPO.5), Enbridge reliance on the Long Term Energy Plan and interpretation of Board’s view (EP.2) and Enbridge’s role in the Enabling Services (Staff.1). We are also interested in Enbridge’s sharing of risk with delivery customers and system supply customers for RNG. Lastly, we make seek technical clarification on other matters that are discussed with other parties.

We trust the above meets the request of the Board and assists staff and the company with planning.

Respectfully Submitted on Behalf of FRPO,

Dwayne R. Quinn
Principal
DR QUINN & ASSOCIATES LTD.
