Whitby Hydro Electric Corporation

September 13, 2018

BY RESS/COURIER

Ms. Kirsten Walli
Board Secretary
Ontario Energy Board
P.O. Box 2319
2300 Yonge Street, 27th Floor
Toronto, ON
M4P 1E4

Dear Ms. Walli,

RE: Whitby Hydro Electric Corporation
2019 Annual IR Distribution Rate Application (EB- 2018-0079)

Please find attached Whitby Hydro Electric Corporation's 2019 Annual IR Distribution Rate Application. The application includes:

An electronic filing through the Board's web portal (RESS) which is comprised of:

- Complete copy of the application in PDF form
- Excel version of the 2019 IRM Rate Generator model
- Excel version of the GA Analysis Work Form
- Excel version of the Account 1595 Analysis Work Form
- Excel version of the LRAMVA Work Form
    - 2015-2015 LDC CDM Program Persistence Results
    - 2017 Final Verified Annual LDC CDM Program Results
- Selected Chapter 2 Appendices to support 1576 Disposition Application

Two (2) paper copies of the complete application will be sent via courier.

This application is respectfully submitted in accordance with the prescribed filing guidelines as outlined by the Board. Please contact me if you have any questions.

Regards,

Susan Reffle
Vice President

WHITBY HYDRO ELECTRIC CORPORATION

2019
ANNUAL IR INDEX
DISTRIBUTION
RATE APPLICATION

EB-2018-0079

September 13, 2018

IN THE MATTER OF the Ontario Energy Board Act, 1998, being Schedule B to the Energy Competition Act, 1998, S.O. 1998, c.15;

AND IN THE MATTER OF an Application by Whitby Hydro Electric Corporation to the Ontario Energy Board for an Order or Orders approving or fixing just and reasonable rates and other service charges for the distribution of electricity as of January 1, 2019.

Title of Proceeding:	An application by Whitby Hydro Electric Corporation for an Order or Orders approving or fixing just and reasonable distribution rates and other charges, effective January 1, 2019.
Applicant's Name:	Whitby Hydro Electric Corporation
Applicant's Address for Service:	100 Taunton Road East Whitby, Ontario L1N 5R8 Attention: Susan Reffle
	Telephone: (905) 444-1983 Fax: (905) 668-9379 E-mail: sreffle@whitbyhydro.on.ca

Application Overview

1. Introduction

(a) The Applicant is Whitby Hydro Electric Corp. (referred to in this Application as the "Applicant" or "Whitby Hydro"). The Applicant is a corporation incorporated pursuant to the Ontario Business Corporations Act with its head office in the Town of Whitby. The Applicant carries on the business of distributing electricity within the Town of Whitby.

(b) Whitby Hydro hereby applies to the Ontario Energy Board (the "OEB" or the "Board") pursuant to Section 78 of the Ontario Energy Board Act, 1998 (the "OEB Act") for approval of its proposed distribution rates and other charges, effective January 1, 2019, pursuant to the Board's Annual Incentive Rate Index rate-setting methodology ("Annual IR Index")

(c) Unless otherwise identified in the Application, Whitby Hydro followed Chapter 3 of the OEB's Filing Requirements for Electricity Distribution Rate Applications dated July 12, 2018 (the "Filing Requirements") in order to prepare this application.

(d) Whitby Hydro has used the following Board issued models:

- 2019 IRM Rate Generator Model ("2019 Rate Model") modified by OEB staff to incorporate Base Distribution Rates at December 31, 2018 as outlined in this application
- GA Analysis Work Form
- Account 1595 Analysis Work Form
- LRAMVA Work Form
- Chapter 2 Appendices – select tabs to support the proposed final disposition of Account 1576 balances

2. Proposed Distribution Rates and Other Charges

The Schedule of 2019 Rates and Charges proposed in this Application is identified in Appendix D.

3. Proposed Effective Date of Rate Order

Whitby Hydro requests that the OEB make its Rate Order effective January 1, 2019.

Whitby Hydro requests that the existing rates be made interim commencing January 1, 2019 in the event that there is insufficient time for:

- The Board to issue a draft rate order
- The Applicant to review and comment on the draft rate order
- The Board to issue a final Decision and Order in this application for the implementation of the proposed rates and charges as of January 1, 2019.

Whitby Hydro also requests to be permitted to recover the incremental revenue from the effective date to the implementation date if the dates are not aligned.

4. Form of Hearing Requested

Whitby Hydro respectfully requests that this application be decided by way of a written hearing.

5. Relief Sought

Whitby Hydro hereby applies for an Order or Orders approving the proposed distribution rates for all rate classes updated and adjusted in accordance with Chapter 3 of the Filing Requirements dated July 12, 2018 including the following:

(a) An adjustment to the approved Retail Transmission Service Rates ("RTSRs") as provided in the Guideline G-2008-0001 – Electricity Distribution Retail Transmission Service Rates (dated October 22, 2008) and subsequent revisions and updates to the Uniform Transmission Rates ("UTRs") and as supported by the completion of the related sections of the Board issued 2019 Rate Generator Model.

(b) The continuation of currently approved rates for:

- Smart Metering Entity Charge until December 31, 2022;
- Rate Rider for Recovery of Stranded Meter Assets until December 31, 2019
- Low Voltage Service Rates

(c) The transfer of a credit amount of $50,174 to subaccount 1595. This amount is associated with the 50/50 sharing of the impact of currently known legislated tax changes as per the Filing Requirements and as calculated in the 2019 Rate Generator Model;

(d) Rate riders to address the disposition of LRAMVA account 1568 for $346,347. In this application Whitby Hydro is proposing to dispose of the impact of 2016 CDM Programs in 2016 and the persistence of 2011 to 2015 CDM Programs in 2016.

(e) An approval for the disposition of the following item related to Class A customers:

- Global Adjustment Variance – the calculated amounts allocated to Class B customers who transitioned to Class A during 2017.

In addition, Whitby Hydro is seeking approval for:

(f) Final disposition of Account 1576 balances including :

- The establishment of rate riders to address the disposition of Account 1576 balances forecasted for 2018 including a calculated rate of return

- An adjustment to 2018 Base Distribution Rates for December 31, 2018 to address the accounting changes for capitalization and depreciation policies required for regulatory and International Financial Reporting Standards ("IFRS").

- The discontinuation of Account 1576

(g) Approval to use of Account 1575 going forward to track:

- The impact of gains & losses on retirement and disposition of assets until such time as these items are addressed under a cost of service or other application.

- Other accounting changes to Property, Plant and Equipment ("PP&E") subsequent to adoption of Revised GAAP ("RCGAAP") or modified IFRS ("MIFRS"). This includes impacts of annual review requirements under International Accounting Standards ("IAS") 16.

- Whitby Hydro is requesting this approval to utilize account 1575 going forward notwithstanding that Whitby Hydro has not rebased under RCGAAP or MIFRS. Whitby Hydro believes there are substantial benefits of aligning rates in a manner more consistent with the method Veridian used in its last rebasing. Veridian last rebased under RGAAP and subsequently began tracking values for gain/losses on asset dispositions to Account 1575. Given Whitby Hydro and Veridian have recently filed a merger, amalgamation, acquisition and divestiture ("MAAD") application with the OEB, it is understood that under the proposed merge there would be benefits and administrative efficiencies achieved in moving towards base distribution rates that are designed using similar underlying accounting policies (ie RCGAAP). This will provide for more consistent processes and practices for accounting under the proposed new merged LDC. On this basis, Whitby Hydro proposes to continue recording gains and losses on asset dispositions but to begin using Account 1575 similar to Veridian.

6. Contact Information

The primary contacts for the application are

Susan Reffle

Whitby Hydro's application and related documents will be made available on the website: www.whitbyhydro.on.ca

7. Conclusion

Copies of the current and proposed tariff sheets and customer bill impacts are included in this Application (Appendices C, D and E respectively).

All Whitby Hydro customers will be affected by this application. The total bill impacts by customer class are:

2019 Bill Impact Summary

Customer Class	kWh (1)	kW	RPP Price (2)	Distribution Charges-A excl. pass-through (3a)		Distribution Charges-B incl. pass-through (3b)		Delivery Charges (4)		Total Bill (5)	
				$ Change	%Change	$ Change	%Change	$ Change	%Change	$ Change	%Change
Residential	750		RPP TOU	$ (1.46)	-4.36%	$ 0.49	1.39%	$ 0.73	1.56%	$ 0.77	0.65%
Residential - 10th percentile	357		RPP TOU	$ (0.16)	-0.50%	$ 0.77	2.32%	$ 0.88	2.29%	$ 0.93	1.27%
GS<50 kW	2,000		RPP TOU	$ (4.13)	-5.65%	$ 1.07	1.38%	$ 1.70	1.62%	$ 1.78	0.61%
GS>50 kW	40,000	100	Non-RPP	$ (83.61)	-12.60%	$ (29.27)	-3.48%	$ (18.82)	-1.39%	$ (21.27)	-0.32%
Unmetered Scattered Load	500		RPP Tier	$ (1.72)	-6.41%	$ (0.27)	-0.98%	$ (0.11)	-0.33%	$ (0.12)	-0.15%
Sentinel Lights	150	1	RPP Tier	$ 0.12	0.58%	$ 1.09	5.26%	$ 1.17	4.76%	$ 1.32	3.16%
Street Lighting	368,000	795	Non-RPP	$ 1,720.70	6.26%	$ 2,038.65	6.98%	$ 2,102.49	6.52%	$ 2,375.81	2.72%

Notes:
(1) The residential standard used for illustrative purposes is 750 kWh per EB-2016-0153
(2) RPP Pricing for May 1, 2018 to April 30, 2019
Non-RPP assumes a weighted average price including Class B Global Adjustment (IESO's Monthly Market Report for May 2017, pg 22)
RPP TOU assumes average consumption of Off-peak (65%), Mid-peak (17%) and On-peak (18%) per OEB.
(3a) Distribution Charges-A includes Distribution Monthly Service Charge, Volumetric Charges,disposition of 1576 and LRAMVA
(3b) Distribution Charges-B includes those described in note 3(a) plus pass-through charges such as low voltage as well as Line Losses and the Smart Meter Entity Charge
(4) Delivery Charges include all Distribution Charges (per notes 3a and 3b), plus Transmission Service Charges
(5) Total Bill includes all Delivery Charges noted above plus commodity cost, regulatory costs (ie. wholesale market service, CBR, rural rate protection and standard supply service) and HST and the 8% Ontario Rebate for Electricity Consumers

DATED at Whitby, Ontario, this 13th day of September, 2018

All of which is respectfully submitted,

Susan Reffle,
Vice President
WHITBY HYDRO ELECTRIC CORPORATION

Manager's Summary: Elements of the Annual IR Index Plan

Whitby Hydro was established in 1903 as a Public Utilities Commission providing water and electricity distribution to consumers in the Town of Whitby. In 1974, responsibility for water distribution services was transferred to the Region of Durham. Today, Whitby Hydro Electric Corporation (the "Applicant" or "Whitby Hydro") services the Town of Whitby, Village of Brooklin, hamlets of Ashburn and Myrtle by distributing electricity to over 42,800 residential and commercial customers (including general service, unmetered scattered loads, sentinel light and street light customer classes) within its regulated service area.

On July 12, 2018, the Ontario Energy Board (the "OEB" or the "Board") issued a letter to all electricity distributors outlining the filing requirements for incentive regulation distribution rate adjustments and provided an update to Chapter 3 of the Filing Requirements for Electricity Distribution Rate Applications (the "Filing Requirements"). Accordingly, Whitby Hydro submits its 2019 Distribution Rate Application consistent with the filing guidelines issued by the Board under the Annual IR Index rate setting option.

Whitby Hydro's most recent cost of service application was filed with the Board for 2010, however the rate process eventually concluded with a complete settlement agreement which reset rates on a calendar based rate year, beginning January 1st, 2011. On this basis, the 2019 Rate Model indicates 2011 as the last cost of service year.

Whitby Hydro advises that Sheet 2 of the 2019 Rate Model reflects proposed 2018 Base Distribution Rates (December 31, 2018) which are comprised of its current 2018 Board approved distribution rates (EB-2017-0085/EB-2017-0292 issued December 20, 2017) adjusted for the proposed final disposition of Account 1576 and related adjustments as outlined in Appendix B of this application. This modification to the 2019 Rate Model was discussed with OEB staff prior to the filing of Whitby Hydro's application. Board staff assisted in making the necessary changes to Whitby Hydro's 2019 Rate Model as the 2018 distribution rates are otherwise auto-populated with the most recently approved distribution rates and locked to users. As Board staff controlled the changes, the integrity of formulas and general security of Whitby Hydro's 2019 Rate Model remains intact. A reconciliation of the proposed 2018 Base Distribution Rates (December 31, 2018) to Whitby Hydro's 2018 Board approved distribution rates is provided in Appendix C-1 of this application. A PDF copy of the 2018 Board approved Tariff of Rates and Charges has also been included as Appendix C of the application.

For the pre-populated sheet (Sheet 4) of the 2019 Rate Model, Whitby Hydro confirms the accuracy of the billing determinants.

The following details of Whitby Hydro's rate application are noted below:

Annual Adjustment Mechanism

Whitby Hydro has reviewed the Filing Requirements which indicate that the 2019 Rate Model will be populated with the 2018 rate-setting parameters as a placeholder until the stretch factor assignment and inflation factor for 2019 are issued by the Board. Whitby Hydro has chosen the Board's Annual IR Index rate-setting methodology and has therefore adjusted the 2019 Rate Model to apply the highest stretch factor as per the Filing Requirements.

Revenue-to-Cost Ratio Adjustments

Whitby Hydro has completed all requirements from a previous Board decision (EB-2009-0274) to phase in any revenue-to-cost ratio adjustments. As a result, there are no further requirements for adjustments in the 2019 rate application.

Rate Design for Residential Customers

Whitby Hydro has incorporated the final phase of the transition to a fully fixed monthly distribution service charge in its 2019 rate application. The phase-in was implemented over a four year period which began in 2016. The resulting increase to Whitby Hydro's monthly service charge is calculated to be $3.00, which is within the threshold identified in the Filing Requirements. Whitby Hydro has also reviewed residential customers at the 10th consumption percentile to ensure that the new rate design along with other rate changes included in this application are not causing a total bill impact of 10% or greater. As a result, no mitigation plan is necessary to address the new rate design transition for residential customers at this time.

In order to determine the 10th consumption percentile, Whitby Hydro used the following steps:

1. Extracted residential billing data by customer account from the customer information system (CIS). The data included consumption information for residential customers billed between January 1, 2017 and December 31, 2017.

2. Sorted and summarized consumption data by customer account and removed any accounts where there was no consumption value or where the residential account was identified as having multiple units. Accounts that did not represent 12 months of billing during the period were also excluded.

3. Counted the number of residential accounts that remained and calculated 10% of the count number.

4. Sorted the accounts and related data by consumption amount from lowest to highest and assigned each a number (starting with the lowest consumption as number 1).

5. Selected the customer account identified with the number derived from step 3 and took the consumption number divided by 12 months to arrive at the consumption level to be used in calculating monthly bill impacts for residential customers at the 10th consumption percentile. In Whitby Hydro's case, this amount was 357 kWh.

Retail Transmission Service Rates (RTSRs)

The Board's last Revision to Guideline G-2008-0001 – Electricity Distribution Retail Transmission Service Rates (the "RTSR Guideline") was issued on June 28, 2012. The Board communicated that it will no longer update the RTSR Guideline unless significant changes are made to the methodology used to calculate the RTSRs. The RTSR Guideline requires distributors to adjust their proposed RTSRs based on a comparison of historical transmission costs adjusted for the new Ontario Uniform Transmission Rates ("UTR") and revenue generated under existing RTSRs. Board Staff has included RTSR worksheets within the 2019 Rate Model and included the most current rates. The most recent RTSR Guideline indicates that once new UTRs or Hydro One Networks Inc ("Hydro One") sub-transmission rates are determined, Board Staff will adjust each distributor's IRM rate application to incorporate any change. As there have been no specific RTSR Guideline updates, it is expected that this process will continue for 2019 IRM rate applications.

Whitby Hydro has populated the model with the required historical data and requests that the Board update Whitby Hydro's 2019 rate application to incorporate approved 2019 UTRs and sub-transmission rates if they become available (or the most current draft data available/requested for 2019 should they not be approved at the time of Whitby Hydro's Decision).

Deferral and Variance Account Dispositions

Whitby Hydro has completed the continuity schedule in the 2019 Rate Model related to Group 1 Deferral and Variance Accounts (DVA) and confirms the accuracy of the pre-populated billing determinants. Whitby Hydro's last disposition of Group 1 account balances was in the 2018 IRM application which was based on 2016 balances. In keeping with the model instructions, the continuity starts with the balances as per the date for which approval was last received (ie. 2016

opening balances). No adjustments have been made to any deferral and variance account balances previously approved by the OEB on a final basis.

Columns BM and BN on tab 3. – Continuity Schedule were used to record the amount that was approved for disposition by the OEB. In these columns, Whitby Hydro has also made the following adjustments:

	Principal Disposition during 2018 - instructed by OEB	Interest Disposition during 2018 - instructed by OEB
RSVA - Global Adjustment	29,120	
LRAM Variance Account	244,027	1,318
Write off of Carrying Charges		(1,697)
	273,147	(379)
	Col BM	Col BN

The RSVA-Global Adjustment and LRAMVA adjustments will be discussed later in the application under the applicable sections. The write off of carrying charges represents the difference between the carrying charges that were approved for disposition in the 2018 rate application and the actual carrying charges incurred on the balances. This difference was due to a change in the prescribed rates. As the write-off of the difference was not posted until 2018, it is necessary to adjust the balance in the continuity so that it is not included in the amount being reviewed for possible disposition.

The Group 1 Total Claim (2017 ending balances plus any identified adjustments) does not exceed the threshold test. As a result, this application does not include a disposition request for the Total Group 1 DVA balance.

Whitby Hydro has reviewed the Board's letter dated July 20, 2018 regarding the *OEB's Plan to Standardize Processes to Improve Accuracy of Commodity Pass-Through Variance Accounts,* which indicates that the OEB will not be approving Group 1 rate riders on a final basis pending the development of further guidance. While Whitby Hydro has not requested a disposition of its Total Group 1 DVA balance in this application, it has included a proposal for disposition of the portion of global adjustment variance (Account 1589) specifically related to transitioning Class A customers. Further information has been provided in the Global Adjustment section below.

1595 Analysis Work Form

Whitby Hydro selected 1595 (2016) to be included in the Total Claim for the purposes of the threshold test. Whitby Hydro is not requesting a Group 1 disposition but has completed the 1595 Analysis Workform for 1595 (2016) and included it as Appendix H. Step 1 of the Workform is below.

Components of the 1595 Account Balances:	Principal Balance Approved for Disposition	Carrying Charges Balance Approved for Disposition	Total Balances Approved for Disposition	Rate Rider Amounts Collected/ Returned	Residual Balances Pertaining to Principal and Carrying Charges Approved for Disposition	Carrying Charges Recorded on Net Principal Account Balances	Total Residual Balances	Collections/ Returns Variance (%)
Total Group 1 Balances excluding GA	-$58,452	-$34,531	-$92,983	-$68,251	-$24,732	-$131	**-$24,863**	**26.6%**
Account 1589 - Global Adjustment	$1,938,016	$44,864	$1,982,880	$1,971,174	$11,706	$9,032	**$20,738**	**0.6%**
Total Group 1 and Group 2 Balances	$1,879,563	$10,333	$1,889,896	$1,902,923	-$13,026	$8,901	**-$4,125**	**-0.7%**

Overall, the variance in the 1595 (2016) DV account is very low (0.7) %. While the Group 1 balance (excluding GA) shows a variance of 26.6%, it is made up of two allocated DV amounts: one for all customers and the other for non-WMP only. When these two components are analyzed independently, the residual balance of each is well below the 10% variance threshold that would require further analysis and explanation. A chart has been provided below.

Components of the 1595 Account Balances:	Principal Balance Approved for Disposition	Carrying Charges Balance Approved for Disposition	Total Balances Approved for Disposition	Rate Rider Amounts Collected/Returned	Residual Balances Pertaining to Principal and Carrying Charges Approved for Disposition	Carrying Charges Recorded on Net Principal Account Balances	Total Residual Balances	Collections /Returns Variance (%)
Group 1 Balances excluding GA	$646,328	-$23,015	$623,313	$640,147	-$16,833	-$131	-$16,964	-2.7%
Group 1 Balances excluding GA non -WMP	-$704,781	-$11,516	-$716,297	-$708,398	-$7,898	$0	-$7,898	1.1%
Total Group 1 Balances excluding GA	-$58,452	-$34,531	-$92,983	-$68,251	-$24,732	-$131	-$24,863	
Account 1589 - Global Adjustment	$1,938,016	$44,864	$1,982,880	$1,971,174	$11,706	$9,032	$20,738	0.6%
Total Group 1 and Group 2 Balances	$1,879,563	$10,333	$1,889,896	$1,902,923	-$13,026	$8,901	-$4,125	-0.7%

Wholesale Market Participants

Whitby Hydro has followed the approach identified in the Filing Requirements to address wholesale market participants (WMP) as applicable.

Global Adjustment

Class A specific DVA disposition – Global Adjustment Variance

During 2017, Whitby Hydro had eleven customers transition from Class B to Class A effective July 1, 2017. As of July 1, 2017, these customers no longer contributed to variances related to

Global Adjustment (GA). However, these customers did contribute to GA variances during January 1 – June 30, 2017.

Whitby Hydro is not requesting disposition of the Group 1 balances but is proposing that the GA variance allocated to the new Class A customers be disposed of on an interim basis in this application for the following reasons:

- Unlike the Total Group 1 variance balance, these amounts specifically relate to a small number of customers. As a result, it is imperative that the disposition be considered separately from other calculations and thresholds that are set to trigger the disposition requirements of the Total Group 1 variance balances which are spread out over a large customer base.

- The amount represents approximately 14% of the total GA variance amount for 2017. In Whitby Hydro's opinion, this amount is considered significant for the customers it affects.

- It is reasonable that any customer who transitions to Class A in 2017 should expect to have any customer specific financial implications related to a period prior to their transition identified and addressed in a timely manner. Given that the GA variance amount relates to January – June 2017 timeframe, Whitby Hydro feels it is not reasonable to delay the financial impact of the disposition beyond the 2019 rate year.

- This is consistent with the approach requested and approved by the OEB in Whitby Hydro's 2017 Rate proceeding (EB-2016-014)

Whitby Hydro has followed the allocation approach identified by the OEB in the 2019 Filing Requirements (Section 3.2.5.2) and the approach used in Tab 6.1a. of the 2019 Rate Generator Model and proposes $95,990 be approved for disposition in 2019. Whitby Hydro also proposes that the affected Class A customers be given the option of settling this through 12 equal adjustments to their bills consistent with EDDVAR or a one-time settlement. Whitby Hydro intends to communicate with these customers during the rate application process to provide them with information related to their allocated portion of the GA variance amount and obtain feedback and information related to their preferences for billing adjustment.

Global Adjustment - GA Analysis Workform

Whitby Hydro has completed the GA Analysis Workform ("GA Workform") to assist in assessing the reasonability of balances in account 1589 (see Appendix G). The data used in Note 4 of the GA Workform reflects actual consumption by calendar month and as a result, the total does not

reflect the sum of the billed plus unbilled consumption calculated for 2017 RRR. The approach taken by Whitby Hydro in the GA Workform is the same as that taken in the last application and is more retrospective in nature. Since Whitby Hydro already tracks the actual month consumption data for GA (for other internal processes including reasonability tests, true-up etc.), the data is available to include in the GA Workform for improved accuracy and to limit the reconciliation to the key elements.

The amount provided in the 2017 reconciliation (Note 5, item 1b) is consistent with the true-up adjustment of $29,120 included in Tab 3 (continuity) column BM in the 2019 Rate Generator Model.

The 2017 analysis tab provides a reconciliation which demonstrates that any unresolved differences are extremely small and well within a range of reasonability given the large dollar value transactions that flow through account 1589. Whitby Hydro notes that the calculated loss factor in the GA Workform is higher than Whitby Hydro's approved loss factor. This was due to a final billing adjustment for an interval customer that was not captured in the year end unbilled accrual. For interval metered customers who are billed based on calendar month reads, Whitby Hydro uses actual billing cycle data for the year end accrual. Very occasionally, a customer is removed from the regular billing cycle and billed separately which happened in this case. A modification to the unbilled process has since been put in place to ensure that such items are included in the future.

Settlement Process

As per the 2019 Filing Requirements, Whitby Hydro has included an overview of its settlement process with the IESO (see Appendix I).

Description of Accounting Methods and Transactions

Whitby Hydro uses accrual accounting.

Whitby Hydro is not requesting balances for disposition but has completed the GA Analysis Workform and the GA Methodology Description (Appendix A of the GA Analysis Work Form Instructions) to assist in describing the financial accounting practices as they relate to commodity accounts 1588 and 1589 (see Appendix G and G-1).

Commodity Accounts 1588 and 1589

Whitby Hydro has reviewed the guidance provided by the OEB on May 23, 2017 related to the disposition of accounts 1588 and 1589. Whitby Hydro is not requesting disposition of accounts

1588 and 1589 but has included an adjustment in column BM for the purposes of quantifying the claim amount. Whitby Hydro's 2017 balance in account 1588 has already been adjusted for true-up and as a result, an additional true-up adjustment is not required to the amount of the calculated claim. A true-up adjustment related to account 1589 has been reflected in Tab 3 of the 2019 Rate Generator Model and is further discussed in the Global Adjustment section of this application (above).

A Certification of Evidence has been included in Appendix J consistent with the certification requirements in Chapter 1 of the filing requirements.

CBR

Whitby Hydro will not be treating the CBR for transitioning Class A customers in the same manner as the GA due to the immateriality of the CBR balances.

LRAM Variance Account (LRAMVA) and Disposition

Whitby Hydro has included a request for the disposition of LRAMVA (1568) balances as part of this application. Whitby Hydro provides the following statements regarding the LRAMVA disposition request. The full LRAMVA application, including information detailing the LRAMVA claim and the supporting schedules, is included as Appendix A and A-1.

- Whitby Hydro is proposing to dispose of the impact of 2016 CDM Programs in 2016 and the persistence of 2011 to 2015 CDM Programs in 2016. The total principal claim amount is $336,627 plus projected interest to 2018 for a total claim amount of $346,347.

- Whitby Hydro confirms that LRAMVA was based on verified savings results that are supported by Whitby Hydro's Final CDM Annual Report and Persistence Savings Report issued by the IESO. The Excel spreadsheets have been submitted with this application via the OEB RESS portal.

- Whitby Hydro has relied on the most recent input assumptions available at the time of program evaluation

- There are no OEB approved programs included in the lost revenue calculations.

- There was no CDM adjustment in the approved load forecast in Whitby Hydro's last cost of service application (EB-2009-0274).

- In its calculations, Whitby Hydro has not applied for any LRAMVA associated with Demand Response Programs consistent with the OEB's Report of the OEB: Update Policy for the Lost Revenues Adjustment Mechanism calculation: Lost Revenues and Peak Demand Savings from Conservation and Demand Management Programs.

- Whitby Hydro has used the sector classification provided by the IESO as the basis for allocation to rate classes of CDM program results. The only exception is equipment replacement and retrofit programs in the new framework. For these programs Whitby Hydro estimated the split by rate class by drawing on participant-specific information.

- Whitby Hydro has included additional data to support the LRAMVA for the Town of Whitby Street Lighting project's demand savings which are not included in the Final CDM Annual Report

The continuity schedule of the 2019 Rate Model (Sheet 3) has been updated to include LRAMVA amounts and the requested disposition claim amount of $346,347.

Whitby Hydro has used the OEB's LRAMVA Workform to support the claim for the identified Account 1568 disposition. The excel version of the workform has been included with this application and a PDF version has been included as Appendix A-1.

A summary table showing the principal and carrying charge amounts by rate class and the resultant rate riders for each rate class is below. The period of rate recovery is one year.

LRAMVA Disposition Summary

	2011-2015 Program Persistence			2016 Programs			2016 LRAMVA		
Customer Class	**Principal**	**Interest**	**Total**	**Principal**	**Interest**	**Total**	**Principal**	**Interest**	**Total**
Residential	74,333	3,252	77,585	80,036	1,205	81,241	154,369	4,457	158,826
GS<50 kW	30,306	680	30,985	1,960	252	2,212	32,266	932	33,198
GS 50-4,999 kW	90,648	2,221	92,869	14,795	823	15,618	105,443	3,045	108,487
Streetlighting	26,167	939	27,105	18,382	348	18,730	44,549	1,286	45,836
Total LRAM Amounts	**221,453**	**7,092**	**228,545**	**115,174**	**2,628**	**117,802**	**336,627**	**9,720**	**346,347**

Proposed LRAMVA Rate Rider – Disposition of 2016 LRAMVA

1	year

Customer Class	2011-2015 Program Persistence	2016 Programs	2016 LRAMVA	Annual Recovery	Volume	Rate Rider	per
Residential	77,585	81,241	158,826	158,826	339,777,737	$ 0.0005	kWh
GS<50 kW	30,985	2,212	33,198	33,198	86,378,930	$ 0.0004	kWh
GS 50-4,999 kW	92,869	15,618	108,487	108,487	917,925	$ 0.1182	kW
Streetlighting	27,105	18,730	45,836	45,836	12,797	$ 3.5818	kW
	228,545	**117,802**	**346,347**	**346,347**			

Tax Changes

Whitby Hydro has completed the 2019 tax sharing information in the 2019 Rate Model. The incremental tax savings calculated in the model is a credit of $100,348, of which half (-$50,174) is to be shared with Whitby Hydro customers. Whitby Hydro has relied on the OEB's model to derive appropriate tax rates for 2019 (the underlying tax tables are embedded within the model and are not visible to the user). The resulting volumetric rate riders calculated by the model indicate amounts with low levels of materiality for several of the customer classes. While rate riders are generated, upon further review, it appears that when the low dollar amount of the disposition by customer class is converted to a kWh/kW rate rider (rounded to four decimal places), the result can produce a relatively significant discrepancy between the calculated disposition (ie. annual kWh or kW multiplied by the tax change rate rider from sheet 9 of the 2019 Rate Model) and the intended tax savings (Tab 9, column E).

For clarity, a summary of the comparison by customer class has been provided below:

2019 Tax Sharing - Analysis of Tax Sharing to Distribute vs Projected Savings Generated By Rate Riders

	Billed kWh (A)	Billed kW (B)	# Customers (C)	Tax Chg Rate Rider per kWh/kW/ Customer (D)	Calculated Amount (E=D*(A, B or C) as applicable)	Allocation of Tax Savings by Rate Class *	Diff $ (G=E-F)	Diff% (G/F)
Residential	339,777,737		39,890	(0.07)	($33,508)	($32,012)	($1,496)	5%
GS<50 kW	86,378,930			(0.0001)	($8,638)	($4,864)	($3,774)	78%
GS>50 kW	390,654,149	917,925		(0.0133)	($12,208)	($12,175)	($33)	0%
USL	1,744,019			(0.0002)	($349)	($302)	($46)	15%
Sent. Lights	31,852	88		(0.0901)	($8)	($8)	$0	0%
Streetlights	4,772,412	12,797		(0.0634)	($811)	($812)	$1	0%
	823,359,099	930,810			($55,522)	($50,174)	($5,348)	11%

* as per OEB's 2019 Rate Generator Model

The overall difference between the intended shared savings and the calculated disposition is 11%. The calculated disposition for most rate classes produces reasonable results; however the General Service < 50kW class shows a significant variance of 78% between the calculated disposition and the intended shared savings. On a smaller scale, the USL class shows a difference of 15% and the difference for Residential is 5%.

Given that implementation of the calculated rate riders would not produce the intended results for all rate classes due to the low materiality level of the disposition amounts by customer classes combined with the rounding aspect of the rate riders, Whitby Hydro proposes that it be allowed to record the total amount to be refunded in account 1595. This approach is consistent with Whitby Hydro's recommendations and the Board's approvals in Whitby Hydro's 2013 - 2018 rate applications. The Filing Requirements also suggest support of this approach in Appendix B, *Treatment of Negligible Rate adders and Rate riders,* where it is indicated that rate riders that do not produce the intended results, can be addressed through alternative approaches.

Further, this approach will help to ensure that customers more fully receive the appropriate share of the tax savings as the amount will be disposed of in a future rate setting process, at a time when sufficient balances have accumulated to ensure that the intended disposition results are more closely achieved.

Z-Factor Claims

Whitby Hydro has not included a Z-Factor claim in this application.

Advanced Capital Module (ACM) and Incremental Capital Module (ICM)

Whitby Hydro has not requested rate relief through an ACM or ICM in this application.

Treatment of Costs for "Eligible Investments"

Whitby Hydro is not requesting any funding adders for renewable generation or smart grid.

Whitby Hydro and Veridian Connections Inc. currently have a MADDs application before the OEB. As outlined in the application, during the transition and initial operation of LDC Mergeco, efforts will be undertaken to develop a consolidated asset planning and prioritization process with the intention to file a consolidated DSP within 18 to 24 months of the Proposed Transaction closing date.

Conservation and Demand Management Costs for Distributors

Whitby Hydro has no OEB-approved CDM programs.

Off- Ramps

Whitby Hydro's earnings for 2017 are not in excess of the dead band of +/- 300 basis points from the OEB-approved return on equity (ROE).

The Board indicated in a letter (EB-2015-0113) dated July 16, 2015, that it had performed a review of Whitby Hydro's ROE for 2013 and 2014 and confirmed that the earnings were materially affected by the treatment of deferral and variance accounts for the purpose of payments in lieu of taxes (PILs). Without this effect the ROE would have been within 300 basis points of the OEB approved ROE in these years.

Specific Exclusions from the Annual IR Index Application

Whitby Hydro has not included any of the identified examples of specific issues identified for exclusion from a Price Cap IR with one exception.

Whitby Hydro has previously identified a desire to address Account 1576 balances to advance the return of credits to customers prior to a cost of service application and has done so through two interim dispositions. During 2018, Whitby Hydro continued to be engaged in merger discussions with Veridian Connections Inc. ("Veridian") and on July 30, 2018 a MAADs application was filed with the Board. As part of the 2019 IRM survey and its August 13, 2018 letter, Whitby Hydro provided notice of its intent to request a final disposition of Account 1576 for 2019. Whitby Hydro also engaged Board staff in informal discussions which were of assistance in formulating an approach to address this item.

While Whitby Hydro understands that the IRM application is intended to be mechanistic in nature and that a separate stand-alone application is generally expected to address the review and disposition of Group 2 Deferral and Variance accounts, the Board has previously provided some flexibility in this regard particularly when dual processes may be viewed as less efficient and more confusing to customers' understanding of bill impacts. On this basis, Whitby Hydro is proposing that the Board considers addressing the final disposition for Account 1576 as part of a single 2019 IRM application. Additional support for this approach is outlined in Whitby Hydro's August 13th, 2018 letter as well as in Appendix B of this application. If the Board determines that a stand-alone application is required, Whitby Hydro requests that Board provide further direction to assist in expediting the application process in a timely manner to support distribution rate approval effective January 1, 2019.

Final Account 1576 Disposition

Whitby Hydro's last cost of service rebasing was for 2011 rates.

In March 2012, the Canadian Accounting Standards Board's ("AcSB") provided an optional deferral until January 1, 2013 to rate-regulated entities for their mandatory changeover from Canadian GAAP ("CGAAP") to International Financial Reporting Standards ("IFRS"). By way of a letter on July 17, 2012, the OEB provided electricity distributors electing to remain on CGAAP in 2012 the option of implementing regulatory accounting changes for depreciation and capitalization policies effective on January 1, 2012. This letter also specified that the implementation of these changes is mandatory effective on January 1, 2013. The Board established Account 1576, Accounting Changes Under CGAAP, for distributors to record the financial differences arising from these accounting changes.

Since the issuance of the July 17, 2012 accounting direction however, the AcSB provided rate-regulated entities two further deferrals for their IFRS changeover which shifted the mandatory changeover date to January 1, 2015.

On July 25, 2013, the OEB issued a direction indicating that:

> "Since most distributors are generally expected to remain on CGAAP for financial reporting until December 31, 2014, the result will be more distributors using Account 1576 instead of Account 1575 for a longer period of time than anticipated. Account 1576 was intended only as a short-term measure to address the interim deferral of IFRS in 2012 with the expectation of a changeover to IFRS in 2013. In addition, modified IFRS was expected to be the accounting basis used and approved for the 2013 cost of service

rate applications and thus the use of Account 1575 would have applied rather than Account 1576."

Whitby Hydro transitioned to IFRS on January 1, 2015.

On July 30, 2018, Whitby Hydro and Veridian Connections Inc. (Veridian) filed a MAADs application with the OEB. If approved, Whitby Hydro would be entitled to defer cost of service rebasing by 10 years.

In this context, Whitby Hydro is proposing in this application to dispose of the 2018 projected balance in Account 1576 plus a calculated return on rate base. The amount of the disposition is a credit of $751,564 ($702,135 + $49,429 return). Whitby Hydro is seeking to dispose of its Account 1576 balance on a final basis as part of this application.

To facilitate a final disposition, Whitby Hydro also proposes a corresponding adjustment to 2018 Base Distribution Rates (December 31, 2018) to reflect the impact of changes in capitalization and depreciation required for regulatory accounting purposes. The proposed amount is a reduction to revenue requirement (related to Account 1576) of $571,640.

Consideration of the proposed 1576 final disposition and the resulting credit to all of Whitby Hydro's customers is important and assists in tempering any upward pressures from other rate increases and new rate riders such as the proposed LRAMVA disposition.

Details and supporting calculations and schedules for the proposed 1576 final disposition and related adjustments can be found in Appendix B and B-1.

Bill Impacts

While there have been significant improvements to the 2019 Rate Model (sheet 20) for bill impacts over the past couple of years, Whitby Hydro notes that it does not fully accommodate a few specific scenarios accurately to assess bill impacts. These include:

- Use of TOU rates when RPP tiered should be used for unmetered customer classes (ie. USL, Sentinel Lights)

- Inability to remove the Shared Tax Savings (STS) rate rider to align with Whitby Hydro's proposal in this application to transfer this balance to a 1595 sub-account.

- Unmetered Scattered Load does not account for the OREC

Whitby Hydro has identified these items to Board staff. In addition, Whitby Hydro has requested a modification to the 2019 Rate Model to adjust approved 2018 distribution rates for the proposed changes related to the Account 1576 final disposition methodology. As a result, bill impacts in the 2019 Rate Model will not include a fulsome comparison of proposed 2019 rates against currently approved 2018 rates.

In order to address these areas and provide more accurate and complete bill impacts, Whitby Hydro prepared a separate Excel model (outside of the 2019 Rate Model) to review bill impacts and as such, did not rely on the bill impact templates generated in the Board issued model (sheet 20).

The total bill impacts proposed range from -0.32% to 3.16% for average customers in each class.

Key impacts to the overall bill are summarized as:

- Distribution charges reflect a ~2.75% average reduction to Base Distribution Rates as a result of the proposed Account 1576 final disposition methodology. A minor offsetting inflationary increase for the annual price cap index of 0.6% was also applied.
- Total Transmission rates increased by ~2.2% for all customer classes.
- Deferral and Variance Account Rate Riders (net credit) expire at the end of 2018. These are pass-through charges only, however, the drop off in 2019 results in an increase to bill impacts.
- Newly proposed disposition rate riders for lost revenue (LRAMVA) associated with provincial conservation and demand management programs. With the exception of the Street Lighting class, these are more than offset by the disposition request for Account 1576 balances which represent a return (credit) to customers.

Copies of the current and proposed tariff sheets and Whitby Hydro's calculated customer bill impacts are included in this Application (Appendices C, D and E respectively). The proposed tariffs sheet reflects rates calculated in the 2019 Rate Model with the exception of the Shared Tax Savings rate riders which have been removed (reflecting the proposed transfer to Account 1595).

2019 Bill Impact Summary

Customer Class	kWh (1)	kW	RPP Price (2)	Distribution Charges-A excl. pass-through (3a)		Distribution Charges-B incl. pass-through (3b)		Delivery Charges (4)		Total Bill (5)	
				$ Change	%Change	$ Change	%Change	$ Change	%Change	$ Change	%Change
Residential	750		RPP TOU	$ (1.46)	-4.36%	$ 0.49	1.39%	$ 0.73	1.56%	$ 0.77	0.65%
Residential - 10th percentile	357		RPP TOU	$ (0.16)	-0.50%	$ 0.77	2.32%	$ 0.88	2.29%	$ 0.93	1.27%
GS<50 kW	2,000		RPP TOU	$ (4.13)	-5.65%	$ 1.07	1.38%	$ 1.70	1.62%	$ 1.78	0.61%
GS>50 kW	40,000	100	Non-RPP	$ (83.61)	-12.60%	$ (29.27)	-3.48%	$ (18.82)	-1.39%	$ (21.27)	-0.32%
Unmetered Scattered Load	500		RPP Tier	$ (1.72)	-6.41%	$ (0.27)	-0.98%	$ (0.11)	-0.33%	$ (0.12)	-0.15%
Sentinel Lights	150	1	RPP Tier	$ 0.12	0.58%	$ 1.09	5.26%	$ 1.17	4.76%	$ 1.32	3.16%
Street Lighting	368,000	795	Non-RPP	$ 1,720.70	6.26%	$ 2,038.65	6.98%	$ 2,102.49	6.52%	$ 2,375.81	2.72%

Notes:

(1) The residential standard used for illustrative purposes is 750 kWh per EB-2016-0153

(2) RPP Pricing for May 1, 2018 to April 30, 2019
Non-RPP assumes a weighted average price including Class B Global Adjustment (IESO's Monthly Market Report for May 2017, pg 22)
RPP TOU assumes average consumption of Off-peak (65%), Mid-peak (17%) and On-peak (18%) per OEB.

(3a) Distribution Charges-A includes Distribution Monthly Service Charge, Volumetric Charges,disposition of 1576 and LRAMVA

(3b) Distribution Charges-B includes those described in note 3(a) plus pass-through charges such as low voltage as well as Line Losses and the Smart Meter Entity Charge

(4) Delivery Charges include all Distribution Charges (per notes 3a and 3b), plus Transmission Service Charges

(5) Total Bill includes all Delivery Charges noted above plus commodity cost, regulatory costs (ie. wholesale market service, CBR, rural rate protection and standard supply service) and HST and the 8% Ontario Rebate for Electricity Consumers

APPENDIX A:

LOST REVENUE ADJUSTMENT MECHANISM VARIANCE (LRAMVA) DISPOSITION

LOST REVENUE ADJUSTMENT MECHANISM VARIANCE (LRAMVA)

BACKGROUND:

The Conservation and Demand Management Code ("CDM code") was first established to provide electricity distributors with the obligations and requirements to which they must comply in relation to the established CDM targets. The CDM code applied to the four year period from January 1, 2011 to December 31, 2014. Subsequently, the Board issued on April 26, 2012, the *"Guidelines for Electricity Distributors Conservation and Demand Management" (EB-2012-0003)* ("2012 CDM guidelines"), which provided further guidance on certain provisions in the CDM code and details on the Lost Revenue adjustment mechanism ("LRAM") related to recovery of lost revenue arising from successful implementation of CDM programs under the CDM code. The CDM code and related 2012 CDM Guidelines remain applicable for all activities related to the 2011 to 2014 CDM Framework.

To complement the 2015 to 2020 CDM Framework, the Board issued the "*Requirement Guidelines for Electricity Distributors Conservation and Demand Management" (EB-2014-0278)* ("2015 CDM Guidelines). The 2015 CDM Guidelines are applicable to CDM programs beginning January 1, 2015. As per the 2015 CDM Guidelines, distributors should continue the current LRAM mechanism for approved CDM programs between 2015 and 2020.

In the 2012 CDM guidelines, the Board established account 1568 LRAMVA to capture, at the customer class level, the difference between: the results of actual verified impacts of authorized CDM activities for Board approved and IESO-contracted Province-Wide CDM programs in relation to activities undertaken by the distributors and the level of CDM activities in the distributors load forecast (ie. the level embedded in rates). The OEB stated that distributors are generally expected to include CDM as part of their load forecast to ensure that ratepayers are realizing the true benefits of conservation at the earliest times possible and to mitigate the variance between forecasted and actual revenue losses.

When a distributor includes a CDM load reduction in its distribution rates, the amount of the forecast that was adjusted for would be compared to the actual CDM results verified by an independent third party (for Board-approved programs) for each year of the CDM program, evaluated according to the IESO's EM&V protocols as directed in the CDM code. As per the Filing Requirements, a separate third party review for IESO-Contracted Province-Wide CDM programs is not required.

The calculated LRAMVA amount is to be recorded in account 1568 and is subject to carrying charges. Distributors are expected to apply for disposition of the LRAMVA in their cost of service application and may also request disposition as part of an IRM application if the balance is deemed to be significant to the distributor.

METHODOLOGY

Whitby Hydro has used the OEB's LRAMVA Work Form Version 2.0 to support the claim for the account 1568 disposition. The excel version of the work form has been included with this application and a PDF version has been included in Appendix A-1.

An overview of specific tabs in the LRAMVA Work Form has been provided to assist in providing additional details and explanations.

LRAMVA Summary (Tab 1)

Whitby Hydro has been active in offering and promoting CDM programs to its customers since the early 2005 programs began. Efforts have continued throughout the years up to and including the programs offered to support 2011–2014 targets through IESO funded programs and Whitby Hydro's CDM activity within the 2015–2020 timeframe under the new Conservation First Framework (CFF).

Whitby Hydro's CDM efforts have resulted in considerable energy and demand savings for customers however this has contributed to distribution revenue losses as a result of the associated decreases in kilowatt hour (kWh) consumption and kilowatt (kW) demand.

Whitby Hydro submitted a claim for lost revenues in the 2017 IRM Rate Application (EB-2016-0114) for CDM programs offered in 2011 to 2015 and the persistence of those programs through 2015. In this application Whitby Hydro is proposing to dispose of the impact of 2016 CDM Programs in 2016 and the persistence of 2011 to 2015 CDM Programs in 2016. The total principal claim amount is $336,627 plus projected interest to 2018 for a total claim amount of $346,347. A summary of the LRAMVA disposition request by customer class including projected carrying charges is as follows:

Table 1: LRAMVA Disposition Summary

	2011-2015 Program Persistence			2016 Programs			2016 LRAMVA		
Customer Class	**Principal**	**Interest**	**Total**	**Principal**	**Interest**	**Total**	**Principal**	**Interest**	**Total**
Residential	74,333	3,252	77,585	80,036	1,205	81,241	154,369	4,457	158,826
GS<50 kW	30,306	680	30,985	1,960	252	2,212	32,266	932	33,198
GS 50-4,999 kW	90,648	2,221	92,869	14,795	823	15,618	105,443	3,045	108,487
Streetlighting	26,167	939	27,105	18,382	348	18,730	44,549	1,286	45,836
Total LRAM Amounts	**221,453**	**7,092**	**228,545**	**115,174**	**2,628**	**117,802**	**336,627**	**9,720**	**346,347**

A reconciliation of the reported balances (2017 RRR 2.1.7 trial balance) at the end of December 31, 2017 for account 1568 and the claim amount has been provided in Table 2.

Table 2: LRAMVA Reconciliation of 2017 RRR to Disposition Claim

Reconciling Item	$
2017 RRR Balance	586,076
2015 LRAMVA	(5,372)
2016 LRAMVA	49,197
2017 LRAMVA	(287,852)
Adjusted Carrying Charges	(1,318)
Projected 2018 Carrying Charges	5,616
Claim	346,347

The reconciling items include:

1. The removal of 2015 LRAMVA amount (-$5,372)
   An excerpt from the Chapter 3 filing requirements is included below.

   In December 2016, the OEB indicated in various decisions that changes to an approved LRAMVA amount were not permitted. This policy affects the treatment of verified savings adjustments that can be claimed by distributors. If an LRAMVA amount was approved, the persistence of the savings adjustment(s) can only be claimed on a go-forward basis. Distributors cannot seek recovery of LRAMVA amounts related to savings adjustments for a year in which the corresponding LRAMVA amount has been approved by the OEB. For example, if a distributor has received approval of its 2016 LRAMVA balance, excluding 2016 savings adjustments, the distributor must forgo any LRAMVA amounts related to the 2016 savings adjustments as the 2016 LRAMVA balance was approved by the OEB on a final basis.

   Whitby Hydro's previous application and interrogatory responses (EB-2016-0114) identified its intent to include prior year adjustments in future LRAMVA dispositions and the OEB's Decision did not indicate that this would not be permitted. However, given the low materiality of the LRAMVA impact and subsequent decisions, guidance and filing requirements provided by the OEB, Whitby Hydro is foregoing the 2015 savings adjustments that were identified subsequent to the approval of the 2015 LRAMVA balance.

2. A true up of the 2016 program results (+$49,197)
   Whitby Hydro has included a true up for the 2016 program results based on the 2016 program adjustments that were identified in the *2017 Final Verified Annual LDC CDM Program Results Report* issued June 29 2018.

3. The removal of 2017 LRAMVA amount (-$287,852)

Based on information provided in the OEB's Chapter 3 filing requirement noted above, Whitby Hydro is not requesting disposition of the 2017 LRAMVA balance at this time and will do so as part of a future claim. Given the OEB's filing guidelines, Whitby Hydro must delay the disposition request of 2017 LRAMVA in order to reduce any financial risk for lost revenue that it would otherwise be required to forego if a material adjustment was included in a future report issued by the IESO. As a result, a claim for the LRAMVA amount of over $287K related to 2017 and any additional LRMAVA amounts that were available based on the IESO's final reporting of 2017 CDM results will be delayed.

LRAMVA Threshold (Tab 2)

Whitby Hydro prepared its last cost of service application prior to the issuance of the CDM guidelines and the introduction of LRAMVA. Prior to the LRAMVA, there was no specific requirement to address a CDM adjustment in the load forecast. As a result, Whitby Hydro's Settlement Agreement, upon which the 2011 rates were based, was not determinative on the point of whether CDM was or was not included in the accepted load forecast for 2011. In order to provide clarity and regulatory certainty, Whitby Hydro, in its 2012 and 2013 IRM rate application requested that the Board consider providing a decision on the matter of whether its load forecast for 2011 included a CDM adjustment and if an adjustment did exist, the value or process to determine the value by customer class. Whitby Hydro took the position that its load forecast did not include a CDM adjustment. With regards to the matter of CDM impacts on its 2011 load forecast, The Board in its 2013 Decision (EB-2012-0177) stated:

> *The Board finds that the 2011 forecast did not include CDM impacts related to Whitby's 2011-2014 CDM programs and therefore, Whitby Hydro is eligible to apply for a disposition of a LRAM Variance account for 2011.*

The 2013 IRM decision provided certainty on this issue in the absence of being specifically addressed in the last cost of service application and settlement agreement. On this basis, the full amount of the LRAM associated with the 2011-2016 IESO CDM program impacts on 2016 has been included in the disposition request. Tab 2 has therefore been left blank in the LRAMVA Work Form.

Distribution Rates & Rate Class Allocations (Tab 3)

The lost revenue impact to Whitby Hydro was calculated by using the applicable distribution volumetric rates per rate class. No relevant rate riders were approved for 2016 that might have otherwise been considered for inclusion.

Please refer to tab 3a of the LRAMVA Work Form for a mapping of the rate class allocations for CDM savings. Whitby Hydro has used the sector classification provided by the IESO as the basis for allocation to rate classes of CDM program results. The only exception is equipment replacement and retrofit programs in the new framework. For these programs Whitby Hydro estimated the split by rate class by

drawing on participant-specific information from the IESO (post retrofit report) and the assigned rate class categories by participant as per the customer information system (CIS).

On review of the program activity, it was determined that there are no LRAM impacts to either of the Unmetered Scattered Load or Sentinel Light customer classes.

Carrying Charges (Tab 6)

Whitby Hydro has added tab 6-b to the LRAMVA Work Form to provide detailed calculations of the carrying charges requested for disposition. Tab 6 links to the details provided in tab 6-b. Whitby Hydro has modified the LRAMVA Work Form to incorporate actual carrying charges as calculated based on the month end general ledger (GL) balance rather than the assumption that lost revenue has been applied evenly throughout the year. The month end GL balance is affected by the timing of true ups and other adjustments and the cumulative balance in column B of tab 6-b ties to the principal claim in this application.

Program Savings and Persistence (Tab 7)

Whitby Hydro has prepared its LRAMVA calculations in accordance with the CDM Guidelines and has relied on the most recent input assumptions available at the time of program evaluation. Whitby Hydro participated in IESO funded programs throughout 2011–2016 and does not have any Board–approved programs. As a result, the LRAMVA is based on verified savings results that are supported by the following reports issued by the IESO (the "*Results Reports*"):

- 2011-2015 LDC CDM Program Persistence Results Report _WHEC
- 2017 Final Verified Annual LDC CDM Program Results Report _WHEC

Both of these reports have been filed with the application in Excel format.

In its calculations, Whitby Hydro has not applied for any LRAMVA associated with Demand Response Programs consistent with the OEB's *Report of the OEB: Update Policy for the Lost Revenues Adjustment Mechanism calculation: Lost Revenues and Peak Demand Savings from Conservation and Demand Management Programs.*

Whitby Hydro confirms it has not made any adjustments to previously claimed LRAMVA amounts. Since Whitby Hydro's 2015 LRAMVA claim has been previously approved, we are not including any new amounts for 2015 lost revenue that would have resulted from the 2015 program adjustments included in the IESO's 2016 or 2017 annual reports issued after our last application.

Street Lighting (Tab 8)

Starting in 2015, the Town of Whitby undertook a project under the IESO funded Retrofit Program to change street lights to a more energy efficient light emitting diode (LED) technology. The retrofitting has been phased in over the course of the project timeline (2015 – 2018). Whitby Hydro has worked closely with the Town of Whitby to calculate the reduction (savings) in load relating to the street lighting retrofits.

The IESO included the calculated kilowatt hours (kWh) of energy savings from the street lighting project in Whitby Hydro's 2015 and 2016 results but no corresponding kW savings. Since the LRAMVA workform only allows for one set of rate allocation %'s, the estimated kWh savings for street lighting needed to be removed in order to produce the correct allocations for all customers classes to be used in the LRAMVA calculations. The following kWh of net savings has been manually removed from the persistence results (Tab 5 in the LRAMVA Work Form).

Table 3: Street lighting net kWh savings removed from persistence reports

Year	Net savings (kWh)
2015	1,694,954
2016	2,462,253

In order to calculate the actual lost revenue, kW demand savings from the street lighting project had to be determined since it occurs during 'off peak' times. Whitby Hydro reviews data provided by the Town of Whitby and a master list is generated that itemizes every light that has been retrofitted, the month it was changed, the old wattage and the converted wattage. Using this information, Whitby Hydro calculates the gross kW reduction (savings) per month. Based on program year, the net-to-gross assumptions (per the IESO annual reports) were applied to determine the net kW reduction (savings) per month. The lost revenue is calculated by multiplying the net kW savings by the applicable distribution rate. The calculations reflect the impact of the kW savings on billing in the month following the retrofit. Whitby Hydro uses the OEB-approved standard load profiles for street light billing.

Whitby Hydro determined that this methodology was a reasonable and accurate way to calculate the demand savings and subsequent lost revenue. Whitby Hydro did not want to rely simply on the change in demand on the monthly invoice since there have been other factors in play since the retrofit project began (ie new street lighting installations related to new subdivisions and 407/412 work).

Proposed Rate Riders

Whitby Hydro proposes a recovery of lost revenue variance totaling $346,347 through a volumetric rate rider over a one year period expiring December 31, 2019. Consistent with section 3.2.3 of the Filing Requirements, the LRAMVA Rate Rider for Residential customers has been calculated on the basis of kWh rather than a fixed monthly charge.

Table 4: Proposed LRAMVA Rate Rider- Disposition of 2016 LRAMVA

1	year

Customer Class	2011-2015 Program Persistence	2016 Programs	2016 LRAMVA	Annual Recovery	Volume	Rate Rider	per
Residential	77,585	81,241	158,826	158,826	339,777,737	$ 0.0005	kWh
GS<50 kW	30,985	2,212	33,198	33,198	86,378,930	$ 0.0004	kWh
GS 50-4,999 kW	92,869	15,618	108,487	108,487	917,925	$ 0.1182	kW
Streetlighting	27,105	18,730	45,836	45,836	12,797	$ 3.5818	kW
	228,545	**117,802**	**346,347**	**346,347**			

APPENDIX A-1:

LRAMVA WORK FORM

Ontario Energy Board

Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) Work Form

Version 2.0 (2017)

Generic LRAMVA Work Forms

Worksheet Name	Description
1. LRAMVA Summary	**Tables 1-a and 1-b** provide a summary of the LRAMVA balances and carrying charges associated with the LRAMVA disposition. The balances are populated from entries into other tabs throughout this work form.
1-a. Summary of Changes	**Tables A-1 and A-2** include a template for LDCs to summarize changes to the LRAMVA work form.
2. LRAMVA Threshold	**Tables 2-a, 2-b and 2-c** include the LRAMVA thresholds and allocations by rate class.
3. Distribution Rates	**Tables 3-a and 3-b** include the distribution rates that are used to calculate lost revenues.
3-a. Rate Class Allocations	A blank spreadsheet is provided to allow LDCs to populate distributor specific rate class percentages to allocate actual CDM savings to different customer classes.
4. 2011-2014 LRAM	**Tables 4-a, 4-b, 4-c and 4-d** include the template 2011-2014 LRAMVA work forms.
5. 2015-2020 LRAM	**Tables 5-a, 5-b, 5-c and 5-d** include the template 2015-2020 LRAMVA work forms.
6. Carrying Charges	**Table 6-b** includes the variance on carrying charges related to the LRAMVA disposition.
7. Persistence Report	A blank spreadsheet is provided to allow LDCs to populate with CDM savings persistence data provided by the IESO.
8. Streetlighting	A blank spreadsheet is provided to allow LDCs to populate data on streetlighting projects whose savings were not provided by the IESO in the CDM Final Results Report (i.e., streetlighting projects).

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

Ontario Energy Board

LRAMVA Work Form: Checklist and Schematic

Version 2.0 (2017)

General Note on the LRAMVA Model

The LRAMVA work form has been created in a generic manner that should allow for use by all LDCs. There are some elements that are not applicable at this time (i.e., 2017, 2018, 2019 and 2020 related components). These have been included (but hidden in the work form) in an effort to avoid major updates in the future. This LRAMVA work form consolidates information that LDCs are already required to file with the OEB. The model has been created to provide LDCs with a consistent format to display CDM impacts, the forecast savings component and, ultimately, any variance between actual CDM savings and forecast CDM savings. The majority of the information required in the LRAMVA work form will be provided to LDCs from the IESO as part of the Final CDM Results each year. Please contact the IESO for any reports that may be required to complete this LRAMVA work form.

The LRAMVA work form is unlocked to enable LDCs to tailor it to their own unique circumstances.

LRAMVA ($) = (Actual Net CDM Savings - Forecast CDM Savings) x Distribution Volumetric Rate + Carrying Charges from LRAMVA balance

Important Checklist

Yes	o Highlight changes to this work form made by the LDC, if any, and provide rationale for the change in Tab 1-a
Not Applicable	o Include any necessary assumptions the LDC has to make in its LRAMVA work form in the "Notes" section of the work form
Not Applicable	o Provide documentation on the LRAMVA threshold by providing the reference and source material from the LDC's cost of service proceeding where its most recent load forecast was approved
Yes	o Include a copy of initiative-level persistence savings information that was verified by the IESO in Tab 7. Persistence information is available upon request from the IESO
Yes	o Apply the IESO verified savings adjustments to the year it relates to.
Yes	o Provide documentation or data substantiating savings from projects that were not provided in the IESO's verified results reports, inserted in Tab 8 (i.e., streetlighting projects), as applicable
Yes	o Provide documentation or analysis on how rate class allocations were determined by customer class and program each year, inserted in Tab 3-a

Table 1-a. LRAMVA Totals by Rate Class

Please input the customer rate classes applicable to the LDC and associated billing units (kWh or kW) in Table 1-a below. This will update all tables throughout the workform.

The LRAMVA total by rate class in Table 1-a should be used to inform the determination of rate riders in the Deferral and Variance Account Work Form or IRM Rate Generator Model. Please also ensure that the principal amounts in column E of Table 1-a capture the appropriate years and amounts for the LRAMVA claim.

NOTE: If the LDC has more than 14 customer classes in which CDM savings was allocated, LDCs must contact OEB staff to make adjustments to the workform.

Customer Class	Billing Unit	Principal ($)	Carrying Charges ($)	Total LRAMVA ($)
Residential	kWh	$154,369	$4,457	$158,826
GS<50 kW	kWh	$32,266	$932	$33,198
GS>50 kW	KW	$105,443	$3,045	$108,487
Streetlighting	kW	$44,549	$1,286	$45,836
		$0	$0	$0

		$0	$0	$0
		$0	$0	$0
		$0	$0	$0
		$0	$0	$0
		$0	$0	$0
		$0	$0	$0
		$0	$0	$0
Total		**$336,627**	**$9,720**	**$346,347**

Table 1-b. Annual LRAMVA Breakdown by Year and Rate Class

In column C of Table 1-b below, please insert a 'check mark' to indicate the years in which LRAMVA has been claimed. If you inserted a check-mark for a particular year, please delete the amounts associated with the actual and forecast lost revenues for all rate classes for that year, up to and including the total. Any LRAMVA from a prior year that has already been claimed cannot be included in the current LRAMVA disposition, with the exception of the case noted below.

If LDCs are seeking to claim true-up amounts that were previously approved by the OEB, please note that the "Amount Cleared" rows are applicable to the LDC and should be filled out. This may relate to claiming the difference in LRAM approved before the May 19, 2016 Peak Demand Consultation, and the lost revenues that would have been incurred after that consultation, as approved by the OEB. If this is the case, reference to the decision must be noted in the rate application. If this is not the case, LDCs are requested to leave those rows blank.

Depending on the period of LRAMVA to be claimed, LDCs are expected to adjust the totals for carrying charges in row 82 of Table 1-b and the years included in the LRAMVA balance in row 83, as appropriate.

Table A-1. Changes to Generic Assumptions in LRAMVA Work Form

Please document any changes in assumptions made to the generic inputs of the LRAMVA work form. This may include, but are not limited to, the use of different monthly multipliers to claim demand savings from energy efficiency programs; use of different rate allocations between current year savings and prior year savings adjustments; inclusion of additional adjustments affecting distribution rates; use of a different LRAMVA threshold; etc. All important changes should be highlighted in the work form as well.

No.	Tab	Cell Reference	Description	Rationale
1	5. 2015-2020 LRAM	Table 5-a: cells D57-E58 & D121-E122	Removed Streetlight (ST) savings	The IESO included the calculated kilowatt hours (kWh) of energy savings from the street lighting project in Whitby Hydro's 2015 and 2016 results but no corresponding kW savings. Since the LRAMVA workform only allows for one set of rate allocation %'s, the estimated kWh savings for street lighting needed to be removed in order to produce the correct allocations for all customers classes to be used in the LRAMVA calculations.
2	5. 2015-2020 LRAM	Table 5-b: cells D304 & D305	Removed Streetlight (ST) savings	as above
3	6. Carrying Charges	Rows 90-132	Changed reference to Carrying Charges tab 6-b to capture actual amounts	Whitby Hydro has modifed the carrying charges tab to reflect the fact that the carrying charges are based on the month end GL balance and not necessarily applied evenly throughout the year. The GL balance is impacted by the timing of true ups and adjustments. See tab 6b

Ontario Energy Board

LRAMVA Work Form: Distribution Rates

Version 2.0 (2017)

Table 3. Inputs for Distribution Rates and Adjustments by Rate Class

Please complete Table 3 with the rate class specific distribution rates that pertain to the years of the LRAMVA disposition. Any adjustments that affect distribution rates can be incorporated in the calculation by expanding the "plus" button at the left hand bar. Table 3 will convert the distribution rates to a calendar year rate (January to December) based on the number of months entered in row 16 of each rate year starting from January to the start of the LDC's rate year. Please enter 0 in row 16, if the rate year begins on January 1. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas in Table 3-a accordingly.

Note: LDC to make note of adjustments made to Table 3 to accommodate the LDC's specific circumstances

Table 3-a. Distribution Rates by Rate Class

Table 3-a below autopopulates the average distribution rates from Table 3. Please ensure that the distribution rates relevant to the years of the LRAMVA disposition are used. As such, please clear the rates related to the year(s) that are not part of the LRAMVA claim. The distribution rates that remain in Table 3-a will be used in Tabs 4 and 5 of the work form to calculate actual and forecast lost revenues. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas from Table 3-a, as well as the distribution rate links in Tabs 4 and 5.

Year	Residential	GS<50 kW	GS>50 kW	Streetlighting										
	kWh	kWh	KW	kW	0	0	0	0	0	0	0	0	0	0

Ontario Energy Board

LRAMVA Work Form:
2011 - 2014 Lost Revenues Work Form

Version 2.0 (2017)

Legend

User Inputs (Green)
Auto Populated Cells (White)
Instructions (Grey)

Instructions

1. LDCs can apply for disposition of LRAMVA amounts at any time, but at a minimum, must do so as part of a cost of service (COS) application. The following LRAMVA work forms apply to LDCs that need to recover lost revenues from the 2011-2014 period. Please input or manually link the savings, adjustments and program savings persistence data in these tables from the LDC's Persistence Reports provided by the IESO (in Tab 7). As noted earlier, persistence data is available upon request from the IESO. Please also be advised that the same rate classes (of up to 14) are carried over from the Summary Tab 1.

2. Please ensure that the IESO verified savings adjustments apply back to the program year it relates to. For example, savings adjustments related to 2012 programs that were reported by the IESO in 2013 should be included in the 2012 program savings table. In order for persisting savings to be claimed in future years, past year's initiative level savings results need to be filled out in the tables below. If the IESO adjustments were made available to the LDC after the LRAMVA was approved, the persistence of those savings adjustments in the future can be claimed as approved LRAMVA amounts are considered to be final.

3. The work forms below include the monthly multipliers for most programs in order to claim demand savings from energy efficiency programs, consistent with the monthly multipliers indicated in the OEB's updated LRAM policy related to peak demand savings in EB-2016-0182. Demand Response (DR3) savings should generally not be included with the LRAMVA calculation, unless suported by empirical evidence. LDCs are requested to confirm the monthly multipliers for all programs each year as placeholder values are provided. If a different monthly multiplier is used, please include rationale in Tab 1-a and highlight the new multiplier that has been used.

4. LDC are requested to input the applicable rate class allocation percentages to allocate actual savings to the rate classes. The generic template currently includes the same allocation percentage for program savings and its savings adjustments. If a different allocation is proposed for savings adjustments, LDCs must provide supporting rationale in Tab 1-a and highlight the change.

5. The persistence of future savings is expected to be included in the distributor's load forecast after re-basing. LDCs are requested to delete the applicable savings persistence rows (auto-calculated after the LRAMVA totals for the year) if future year's persistence of savings is already captured in the updated load forecast. Please also provide assumptions about the years in which persistence is captured in the load forecast calculation in the "Notes" section below each table.

Tables

LRAMVA Work Form:
2015 - 2020 Lost Revenues Work Form

Version 2.0 (2017)

Legend

User Inputs (Green)
Auto Populated Cells (White)
Instructions (Grey)

Instructions

1. LDCs can apply for disposition of LRAMVA amounts at any time, but at a minimum, must do so as part of a cost of service (COS) application. The following LRAMVA work forms apply to LDCs that need to recover lost revenues from the 2015-2020 period. Please input or manually link the savings, adjustments and program savings persistence data in these tables from the LDC's Persistence Reports provided by the IESO (in Tab 7). As noted earlier, persistence data is available upon request from the IESO. Please also be advised that the same rate classes (of up to 14) are carried over from the Summary Tab 1.

2. Please ensure that the IESO verified savings adjustments apply back to the program year it relates to. For example, savings adjustments related to 2016 programs that were reported by the IESO in 2017 should be included in the 2016 program savings table. In order for persisting savings to be claimed in future years, past year's initiative level savings results need to be filled out in the tables below. If the IESO adjustments were made available to the LDC after the LRAMVA was approved, the persistence of those savings adjustments in the future can be claimed as approved LRAMVA amounts are considered to be final.

3. The work forms below include the monthly multipliers for most programs in order to claim demand savings from energy efficiency programs, consistent with the monthly multipliers indicated in the OEB's updated LRAM policy related to peak demand savings in EB-2016-0182. Demand Response (DR3) savings should generally not be included with the LRAMVA calculation, unless suported by empirical evidence. LDCs are requested to confirm the monthly multipliers for all programs each year as placeholder values are provided. If a different monthly multiplier is used, please include rationale in Tab 1-a and highlight the new multiplier that has been used.

4. LDC are requested to input the applicable rate class allocation percentages to allocate actual savings to the rate classes. The generic template currently includes the same allocation percentage for program savings and its savings adjustments. If a different allocation is proposed for savings adjustments, LDCs must provide supporting rationale in Tab 1-a and highlight the change.

5. The persistence of future savings is expected to be included in the distributor's load forecast after re-basing. LDCs are requested to delete the applicable savings persistence rows (auto-calculated after the LRAMVA totals for the year) if future year's persistence of savings is already captured in the updated load forecast. Please also provide assumptions about the years in which persistence is captured in the load forecast calculation in the "Notes" section below each table.

Tables

Table 5-a. 2015 Lost Revenues Work Form

	Program	Results Status	Net Energy Savings (kWh)	Net Energy Savings Persistence (kWh)									Monthly Multiplier	Net Demand Savings (kW)	Net Peak Demand Savings Persistence (kW)									Rate Allocations for LRAMVA											Total

LRAMVA Work Form:
Carrying Charges by Rate Class

Version 2.0 (2017)

Legend

User Inputs (Green)
Auto Populated Cells (White)
Instructions (Grey)

Instructions

1. Please update Table 6 as new approved prescribed interest rates for deferral and variance accounts become available. Monthly interest rates are used to calculate the variance on the carrying charges for LRAMVA. Starting from column I, the principal will auto-populate as monthly variances in Table 6-a, and are multiplied by the interest rate from column H to determine the monthly variances on carrying charges for each rate class by year.

2. The annual carrying charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what should have been collected based on actual CDM savings. As the amounts calculated in Table 6-a are cumulative, LDCs are requested to enter any collected interest amounts into the "Amounts Cleared" row in order to clear the balance and calculate outstanding variances on carrying charges.

Ontario Energy Board

Supporting Documentation:
LDC Persistence Savings Results from IESO

Version 3.0 (10/17)

Legend

User Inputs (Green)
Drop Down List (Blue)
Instructions (Grey)

Instructions (Steps)

1. Columns B to H of this tab have been structured in a way to match the formatting of the persistence report provided by the IESO. Please copy and paste the program information by initiative in Columns B to H and the corresponding demand and energy savings data by initiative in Columns L to BT of this work form.
2. Please identify the source of the report via the dropdown list in Column I.
3. To facilitate the identification of adjustments that may be available in a prospective year's results report, it will be easier to sort all the savings by implementation year (Column H). This can be done by clicking on the filter button at cell H25 (highlighted in orange). Before you sort values, please ensure that all table columns have filters.
4. Please identify what the savings value represents (i.e., current year savings for the year or an adjustment to a prior year) via the dropdown list in Column J. Current year savings would be identified with an implementation year that matches the year of the persistence report. A savings adjustment would be identified with a prior year implementation in the future year's results report.
5. Please manually input or link the applicable savings and adjustments (Columns L to BT) for all applicable initiatives in Tabs 4 and 5 of this work form.

NOTE: The Net Verified Peak Demand Savings table and Net Verified Energy Savings table below are in the reverse order to the accompanying tables in Tab 4 and Tab 5. The tables below match those provided by the IESO.

User Inputs (Green)
Drop Down List (Blue)
Instructions (Grey)

Instructions
(Steps)

1. Columns B to H of this tab have been structured in a way to match the formatting of the persistence report provided by the IESO. Please copy and paste the program information by initiative in Columns B to H and the c
2. Please identify the source of the report via the dropdown list in Column I.
3. To faciliate the identification of adjustments that may be available in a prospective year's results report, it will be easier to sort all the savings by implementation year (Column H). This can be done by clicking on the filte
4. Please identify what the savings value represents (i.e., current year savings for the year or an adjustment to a prior year) via the dropdown list in Column J. Current year savings would be identified with an implementati
5. Please manually input or link the applicable savings and adjustments (Columns L to BT) for all applicable initiatives in Tabs 4 and 5 of this work form.
NOTE: The Net Verified Peak Demand Savings table and Net Verified Energy Savings table below are in the reverse order to the accompanying tables in Tab 4 and Tab 5. The tables below match those prov

Table 7. 2011-2020 Verified Program Results and Persistence into Future Years

Step:	#1					#3	#2	#4	#1

LRAMVA Work Form:
Documentation for Streetlighting Projects

Version 2.0 (2017)

Instructions

Please provide documentation and/or data to substantiate program savings that were not provided in the IESO's verified results reports (i.e., streetlighting projects).

APPENDIX B
ACCOUNT 1576
FINAL DISPOSITION
METHODOLOGY

BACKGROUND:

Whitby Hydro Electric Corporation ("Whitby Hydro") last rebased through a cost of service ("COS") application for 2010 rates which resulted in settlement approved for 2011 rates.

In March 2012, the Canadian Accounting Standards Board's ("AcSB") provided an optional deferral until January 1, 2013 to rate-regulated entities for their mandatory changeover from Canadian GAAP ("CGAAP") to International Financial Reporting Standards ("IFRS"). By way of a letter on July 17, 2012, the OEB provided electricity distributors electing to remain on CGAAP in 2012 the option of implementing regulatory accounting changes for depreciation and capitalization policies effective on January 1, 2012. This letter also specified that the implementation of these changes is mandatory effective on January 1, 2013. The Board established Account 1576, Accounting Changes Under CGAAP, for distributors to record the financial differences arising from these accounting changes.

Following the issuance of the July 17, 2012 accounting direction however, the AcSB provided rate-regulated entities two further deferrals for their IFRS changeover which shifted the mandatory changeover date to January 1, 2015.

On July 25, 2013, the OEB issued a direction indicating that (**emphasis added**):

> "Since most distributors are generally expected to remain on CGAAP for financial reporting until December 31, 2014, the result will be more distributors using Account 1576 instead of Account 1575 for a longer period of time than anticipated. **Account 1576 was intended only as a short-term measure to address the interim deferral of IFRS in 2012 with the expectation of a changeover to IFRS in 2013.** In addition, modified IFRS was expected to be the accounting basis used and approved for the 2013 cost of service rate applications and thus the use of Account 1575 would have applied rather than Account 1576."

Whitby Hydro transitioned to IFRS on January 1, 2015.

Since this time, Whitby Hydro has advanced the return of funds to customers related to credit balances in Account 1576 through approved interim dispositions as follows:

- EB-2015-0113/0251 (2016 rates) - Two separate applications (IRM and 1576 disposition on an interim basis) were submitted. The OEB determined these applications were more efficiently managed through one consolidated hearing process.
- EB-2016-0114 (2017 rates) - in keeping with the precedent set in the previous year and based on OEB staff discussions, Whitby Hydro submitted one consolidated application which addressed both an IRM adjustments to rates and disposition of Account 1576 balances on an interim basis.

Whitby Hydro has been involved with potential merger discussions for a period of time and recently executed a merger participation agreement on July 10, 2018 and along with Veridian Connections Inc. ("Veridian") filed a merger, amalgamation, acquisition and divestiture ("MAAD") application with the OEB on July 30, 2018. The MAADs application proposed that the merged company would defer a COS rate application for a period of ten years.

As outlined in its letter to the OEB on August 13, 2018. Whitby Hydro identified that given these circumstances, it would be prudent to address a final disposition of Account 1576 balances prior to the proposed merger and before the next COS which may not occur for a period of ten years.

A final disposition will provide customers with a more timely disposition and proposes to further incorporate the impact of accounting changes into rates going forward on a more consistent basis with other LDCs in Ontario, including Veridian. Further benefits also include a reduction of administrative burdens and inefficiencies related to maintaining separate information and tracking post-merge which may be further complicated in light of additional accounting policy changes that would occur as a result the expected transition to common accounting policies under a merged company.

The August 13th letter also advised the OEB of Whitby Hydro's intent to file a single cohesive application which included those items identified in the OEB's Filing Requirements for Chapter 3 – Incentive Regulation as well as a final disposition of Account 1576 and outlined some of the benefits of this approach which include:

- Providing a more efficient single stream-lined process
- Providing a clearer picture of January 1, 2019 rate impacts for customers and key stakeholders
- Consistency with combined rate application processes permitted and directed by the Board in the previous applications outlined above. In addition, the Board determined that Whitby Hydro's 2018 rate applications (EB-2017-0085/0292) should follow a combined process to include IRM related items along with other rate related items (stranded meters, smart meter revenue requirement, unbundling of low voltage recoveries etc.) in order to allow for a more efficient process and greater clarity for customer rate impacts.

While Whitby Hydro has proposed addressing the final disposition of Account 1576 together with its IRM application, Whitby Hydro ultimately defers to the Board to determine whether it is more appropriate to proceed with a single combined application (as filed) and approval process or to separate the current application into two individual processes for IRM related items and final disposition of Account 1576 related items.

OVERVIEW:

This application has some similarities to the previous two interim dispositions of Account 1576 balances, however, it is necessary to cover off additional elements in order to more fully address Account 1576 and the related transactions and distribution rate impacts on a final basis. These elements are summarized as follows:

1. Establishment of an Account 1576 disposition rate rider to provide a refund to customers of balances which includes audited 2017 actuals plus forecasted amounts for 2018. The proposed approach is similar in nature to that which would apply during a cost of service, whereby the balance for disposition would include audited actuals plus a forecasted bridge year. The forecast for 2018 relies on 2018 opening balances plus actual PP&E activity to the end of August with projections for the remainder of the year. The disposition rate rider will ensure that credits are provided to customers on their bills prior to Whitby Hydro's next cost of service. As Whitby Hydro has previously received approval for interim dispositions, Account 1576 has been used to track both the 1576 transactions as well as the impact of previous interim disposition rate riders (excluding the rate of return on rate base component).

2. The development of an Account 1576 adjustment to Base Distribution Rates for 2018. The concept of an adjustment to Base Distribution Rates was introduced in the settlement agreement for Whitby Hydro's 2018 rate application (EB-2017-0085/0292). The settlement agreement provided for a final disposition of stranded meters which included an adjustment to Base Distribution Rates to remove the stranded conventional meters and subsequently included a further adjustment for an approved smart meter incremental revenue requirement. In addition, the Base Distribution Rates were adjusted to unbundle the Low Voltage recoveries which were previously included in distribution rates. In this application, the proposed 1576 adjustment to Base Distribution Rates is driven off of the development of a 1576 related revenue requirement proxy adjustment for the capital and depreciation changes required for regulatory requirements. The adjustment to Base Distribution Rates would be made as of December 31, 2018 and incorporated into the 2019 Rate Model. Further details of the approach are outlined separately in this Appendix under the section Adjustment to Base Distribution Rates – Account 1576.

The Account 1576 final disposition rate rider calculation represents a return of $751,564 to Whitby Hydro's customers over a one year period and is based on 2017 audited information and forecasted net activity for 2018. The refund includes a weighted average cost of capital ("WACC") component of $49,429. Whitby Hydro confirms that no carrying charges have been applied to the balance in the account.

In considering the disposition period of this rate rider, Whitby Hydro weighed the financial impact of the refund on the business as well as bill impact considerations for customers and is proposing a disposition period of one year. The refund will provide customers some measure of financial relief which offsets the proposed LRAMVA disposition requested.

The proxy adjustment to 2018 Base Distribution Rates for Account 1576 is based on a revenue requirement of $571,640, which has been further allocated by customer class as outlined in Table 7.

For the purpose of this application, Whitby Hydro has largely followed the requirements for disposition of Account 1576 as outlined in the OEB's Chapter 2 – Cost of Service Rate Applications Based on a Forward Test Year (the "COS Filing Requirements"). As the 2019 COS Filing Requirements no longer address Account 1576, the 2018 filing requirements and prior year's Appendix 2 Excel schedules have been relied on to identify appropriate evidence to be included in this application for final disposition. These include:

- Fixed Asset Continuity Schedules (Appendix 2-BA) from 2013 to 2018 for both CGAAP and Revised CGAAP or Modified IFRS
- A breakdown of the balance in Account 1576 (Appendix 2- EC)
- A breakdown of the drivers of the change in closing net PP&E
- A separate volumetric rate rider for the clearance of Account 1576 plus a rate of return component

In addition to those specifically outlined section 2.9.3 in the 2018 COS Filing Requirements, Whitby Hydro has also provided the following:

- Depreciation and Amortization Expense (Appendix 2-C) for the years from 2013 - 2018
- Service Life Comparison (Appendix 2-BB)
- Additional supplementary tables

FINAL DISPOSITION FOR 1576 ACCOUNTING CHANGES UNDER CGAAP – BALANCE + WAAC COMPONENT

Whitby Hydro transitioned to IFRS on January 1, 2015. Account 1576 captured accounting changes relating to capitalization and depreciation as mandated by the Board. Whitby Hydro recognizes that it is somewhat unique in that it has not rebased under either Revised CGAAP ("RCGAAP") or modified IFRS ("MIFRS") and as a result believes that it is appropriate that all accounting changes related to capitalization and depreciation should be tracked in Account 1576 however, if during the review of this

application the Board determines otherwise, Whitby Hydro requests that updates to the accounts used for tracking purposes be permitted and that the final disposition be revised to include or combine such other accounts as may be required. Whitby Hydro notes that under IAS 16, annual reviews are required which may result in further changes to depreciation. 2019 Filing Requirements appear to acknowledge these as appropriate to record under Account 1575 (or alternately interpreted as Account 1576 for electricity distributors who have not yet rebased under RCGAAP). This appears to be reinforced in the 2019 Filing Requirements section 2.9.1. Whitby Hydro is not aware of other Board policy that currently addresses an alternate mechanism or account to record such impacts.

There are three main drivers of the change in net closing PP&E as a result of the shift to RCGAAP and MIFRS: componentization and change in asset useful lives; change in capitalization of overheads, direct labour allocations and other costs; and gains or losses on asset disposals.

KPMG assisted with the following items as part of the planned conversion to RCGAAP (and IFRS)

1. *Determining the level of PP&E componentization required under IFRS and establishing updated useful lives based on the Kinetrics report*

   A significant amount of analysis was done with the assistance of KPMG with regards to asset componentization and the related impacts on depreciation. The analysis assisted in preparation for the conversion and to establish a revised January 1st opening value for the transition year. The opening balance was broken out to incorporate all material components of historical costs, adjusted the service lives to reflect typical useful life in line with the Kinetrics report and provided an assessment of remaining service lives for which to calculate depreciation expense for 2013 forward. Table 1 – Appendix 2-BB Service Life Comparison has been provided below. Whitby Hydro's depreciation expense continued to be based on a straight line basis. Whitby Hydro utilized the commonly used ½ rule for the calculation of depreciation on capital assets based on the year that the asset is deemed in-service for the purpose of regulatory reporting and adopted this approach in 2015 for financial statement reporting. Under this rule, capital assets are assumed to be put into service equally throughout the year, therefore, on average depreciation starts at the midpoint of the acquisition or in-service year.

2. Examining whether any changes to overhead capitalization, direct labour allocations and other costs were required.

KPMG assisted Whitby Hydro in determining which overheads and other costs were eligible or not eligible for capitalization. KPMG also provided direction with respect to the capitalization of direct labour. Each year from 2013 to 2017, the overhead accounts, direct labour costs and administration were examined in detail. Whitby Hydro traced all appropriate labour or equipment hours, as well as material, that previously would have had overheads attached to them and determined the amount that was incremental to OM&A due to overhead policy change

A summary is provided in Table 2 which includes audited actuals and forecasted amounts for 2018. A "test year" amount has also been provided for use in developing the proxy revenue requirement that is proposed and outlined in this Appendix under the section Adjustment to Base Distribution Rates – Account 1576.

As a result of the changes to depreciation, Whitby Hydro has recorded a significantly lower depreciation expense. Over the course of the timeframe for this application, the following decline in depreciation was experienced:

2013	-36%
2014	-30%
2015	-38%
2016	-21%
2017	-27%
2018F	-34%

Appendix B-1 of Whitby Hydro's application contains OEB's Appendix 2-C Depreciation Expense schedule for the years 2013-2018 as well as 2-BA Fixed Asset Continuity Schedule. The difference between the depreciation calculated with the prior service lives and the amount recognized in the income statement for the fiscal periods 2013 - 2017 has been recorded in Account 1576. Table 3 below summarizes these amounts as well as those forecasted for 2018.

3. Treatment of gains and losses on asset disposition

As a result of the required accounting changes, Whitby Hydro has also included amounts in Account 1576 for gains and losses on asset disposition. The OEB provided guidance (APH Article 410 and APH Guidance – March 2015) which identifies that PP&E differences arise as a result of accounting policy changes caused by the transition from previous CGAAP to IFRS. IFRS requires that parts or components of an asset that are significant in relation to the total cost of an asset be depreciated separately. This may result in derecognition gains or losses to be recognized under IFRS that may not have been recognized under CGAAP. Previously, gains or losses on asset retirement or derecognition were included as part of accumulated amortization in Account 2105. The OEB's 2019 Filing Requirements further identifies that these gains or losses are to be included in Account 1575, IFRS-CGAAP Transitional PP&E amounts. Since Whitby Hydro has not rebased under RCGAAP or MIFRS, there was some question as to whether it was more appropriate to include these impacts under Account 1575. For the purpose of this application and consistent with 2017 previously filed regulatory reporting (RRR); Whitby Hydro has included these amounts in Account 1576 for the OEB's consideration. Going forward, Whitby Hydro is requesting OEB approval to include these amounts in Account 1575 as part of this Application.

Overall, Whitby Hydro's PP&E has increased by $3,134,228 as of December 31, 2017 and is forecasted to be $3,907,321 by the end of 2018 as a result of these changes which are summarize in Table 3 below. As Whitby Hydro has already had two interim dispositions approved, Table 3 also reflects an adjustment to Account 1576 balance to remove previously approved amounts (excluding the approved return on rate base). As previous approvals were on an interim basis, any differences between the approved amount and the total amount returned to customers is also recorded in Account 1576.

Whitby Hydro notes that the balances of Account 1576 reflect minimal net changes in 2016 and 2017. This was due to a restatement in both years to incorporate the impact of some corrections or "catch-up" items that had not previously been addressed in the changes in PP&E for Account 1576. These were identified as a result of internal review/analysis of Account 1576. Whitby Hydro had these changes specifically reviewed by its auditor KPMG. The items can be summarized as formula calculation corrections (2016); inclusion of smart meters (2017); and inclusion of gains/losses on asset disposition (2017).

Effect on Deferral and Variance Account Rate Riders			
Closing balance in Account 1576	-702,134	**WACC**	7.04%
Return on Rate Base Associated with Account 1576 balance at WACC - Note 2	-49,430	**# of years of rate rider disposition**	1
Amount included in Deferral and Variance Account Rate Rider Calculation	-751,564		

Notes:

1 For an applicant that made the capitalization and depreciation expense accounting policy changes on January 1, 2013, the PP&E values as of January 1, 2013 under both former CGAAP and revised CGAAP should be the same.

2 Return on rate base associated with Account 1576 balance is calculated as:

the variance account opening balance as of 2015 rebasing year x WACC X # of years of rate rider disposition period

* Please note that the calculation should be adjusted once WACC is updated and finalized in the rate application.

3 Account 1576 is cleared by including the total balance in the deferral and variance account rate rider calculation.

4 Net additions are additions net of disposals; Net depreciation is additions to depreciation net of disposals.

The application of the accounting policies change began in 2013, the year in which the accounting change occurred. This is evident in the above table as the opening balances in 2013 are the same under CGAAP and RCGAAP.

Appendix B-1 contains the Fixed Asset Continuity Schedules for CGAAP and RCGAAP/MIFRS for 2013 - 2018. These schedules are consistent with OEB's Appendix 2-BA schedule and are aligned with summarized data provided in Table 3.

Whitby Hydro is seeking an Account 1576 rate rider for the final disposition of Account 1576 balances. This will continue to advance and finalize the return of credits on customer bills associated with Account 1576 activity prior to Whitby Hydro's next cost of service. The rate rider calculation represents a return of $751,564 to Whitby Hydro customers over a one year period. As mandated by the Board in its letter of June 25, 2013, this balance includes a WACC component. Whitby Hydro has used its current Board-approved WACC of 7.04%, for the purposes of determining the final disposition amount proposed.

Method of allocation and calculation of 1576 rate rider

The balances in Account 1576 reflect actual decreases in depreciation expense for 2013 – 2017 plus an amount forecasted for 2018 due to changes in estimates for PP&E useful lives. Since this balance is related to capital costs, it is appropriate that customers receive credit based on their proportion of system utilization. Whitby Hydro submits that kWh is an appropriate allocator for Account 1576 and the allocation for the disposition of 2018 credit balance ($751,564) has been done on the basis of kWh energy consumption by customer class using the 2017 RRR data.

Table 4 – Allocation of 1576 by Customer Class

	Amount	Allocator	Residential	General Service less than 50 kW	General Service 50-4,999 kW	Unmetered Scattered Load	Sentinel Lighting	Street Lighting
1576	(751,564)	kWh	(310,170)	(78,839)	(356,617)	(1,578)	0	(4,359)
Total Metered kWh*			339,777,738	86,378,928	390,654,149	1,744,019	31,852	4,772,412
Allocated %			41.27%	10.49%	47.45%	0.21%	0.00%	0.58%

* as reported in 2017 RRR

For all rate classes (excluding Residential), the allocated portion of the Account 1576 disposition is calculated as a variable rate rider based on either kWh or kW using the 2017 RRR data. However, for Residential customers, the proposed calculation of the Account 1576 disposition rate rider has been anchored on the requirement to consider a fixed rate rider as per the Board Policy: *A New Distribution Rate Design for Residential Electricity Customers (EB-2014-0210).* As outlined in section 2.8.2 of the Chapter 2 Filing Requirements for Electricity Distribution Rate Applications dated July 12, 2018, distributors must propose a fully fixed rate design for charges applicable to the residential class provided that those charges are specifically related to the distribution of electricity. Examples of distribution-specific

charges include: Group 2 Deferral and Variance Accounts including balances in Accounts 1575/1576, ACM and ICM rate riders.

Table 5 below summarizes the proposed rate rider by class that results from the clearance of forecasted 2018 balances for Account 1576 Accounting Changes under CGAAP. The balances incorporate the impacts of previously approved interim dispositions which are identified separately in Table 3.

Table 5 – Rate Rider Calculation for Account 1576

Rate Adder Recovery Period **1** **year**

Rate Class (Enter Rate Classes in cells below)	Units	kW / kWh / # of Customers	Balance of Accounts 1575 and 1576	Rate Rider for Accounts 1576	
Residential	#customers	39,890	-$ 310,170	**-0.65**	**$/customer**
General Service less than 50 kW	kWh	86,378,928	-$ 78,839	**- 0.0009**	**/kWh**

Street Lighting	kW	12,797	-$ 4,359	**- 0.3406**	**/kW**
Total			**-$ 751,564**		

ADJUSTMENT TO BASE DISTRIBUTION RATES - ACCOUNT 1576

Whitby Hydro is proposing an adjustment to 2018 Base Distribution Rates effective on December 31, 2018 to capture the rate impacts associated with changes in accounting policies that would normally be captured each year in Account 1576 for disposition at a future date. By isolating the impacts and incorporating them into distribution rates, customers will receive more timely benefits in the form of a reduced distribution rate on their bills. Whitby Hydro's distribution rates will also be more reflective of current accounting policies which will provide improved alignment with other electricity distributors ("LDC") who have already re-based under RCGAAP or MIFRS. In the absence of this application, this alignment is not expected to take place until the next cost of service application which is contemplated to occur after a ten year deferral period under Whitby Hydro and Veridian's current MAADs application. The proposed adjustment also provides an opportunity to align Whitby Hydro more closely with the accounting policies that underpin Veridian's distribution rates. This alignment will be helpful to facilitate the evolution of common practices and tracking that will be necessary under the proposed new merged LDC. Other benefits include eliminating the on-going effort required to maintain dual accounting information and tracking of differences under both CGAAP and MIFRS.

The approach to the 1576 adjustment to Base Distribution Rates is similar in nature to that outlined in the settlement agreement approved in Whitby Hydro's 2018 rate application (EB-2017-0085/0292). The proposed adjusted 2018 Base Distribution Rates will form the starting point for approved rate inputs which will be used to develop 2019 distribution rates in the 2019 IRM Rate Model. To facilitate this process, Whitby Hydro provided OEB staff with a preliminary 2019 IRM Rate Model along with the proposed adjusted 2018 Base Rates (see Table 8). OEB staff made the necessary modifications to the 2019 Rate Model for Whitby Hydro to use for this application.

The proposed adjustment to Base Distribution Rates has been done using the best information available to calculate a proxy "test year" revenue requirement related to the 2018 impact of changes in accounting policies (in line with those currently tracked by Whitby Hydro under Account 1576). The underlying assumptions used to develop the 1576 revenue requirement adjustment are summarized as follows:

- The forecasted difference in closing net PP&E between CGAAP and RCGAAP/MIFRS (as outlined in Table 3) for both the opening and closing of 2018 is averaged to form the starting point to quantify the proxy "Rate Base" impact
- The proxy "test year" Rate Base impact amount is net of gains/losses on asset dispositions
- The 2011 cost of capital parameters are used to determine the deemed interest and equity (net income)
- The PILs revenue requirement has been based on a tax rate of 26.5%
- The proxy 2018 depreciation expense impact is taken from the Fixed Asset Continuity Schedule (per OEB's Appendix 2-BA) which is provided in Appendix B-1 of this application
- The 2018 proxy "test year" impact to OM&A expenses is based on the changes in capitalization from overhead expense, direct labour and other expenses as outlined in Table 2

Whitby Hydro's is proposing not to adjust its proxy 2018 depreciation expense for net gains and losses on asset disposals (i.e. proxy losses related to asset disposals have not been added back to depreciation expense for the purpose of calculating the proxy revenue requirement). The OEB's APH, Article 410 (page 15) states that the gain or loss should be reclassified into USoA Account 5705 (amortization expense) under a separate sub-account. In this application, Whitby Hydro is instead proposing to track gains and losses in Account 1575 going forward based on the following rationale:

- Benefit of aligning rates in a manner more consistent with the method Veridian used in its last rebasing. Veridian last rebased under RGAAP and subsequently began tracking values for gain/losses on asset dispositions to Account 1575. Given Whitby Hydro and Veridian have recently filed a MAADs application with the OEB, it is understood that under the proposed merge there would be benefits and administrative efficiencies achieved in moving towards base distribution rates that are designed using similar underlying accounting policies (i.e. RCGAAP).

This will provide for more consistent processes and practices for accounting under the proposed new merged LDC. On this basis, Whitby Hydro proposes to continue recording gains and losses on asset dispositions but to begin using Account 1575 similar to Veridian until such time as the proposed new merged LDC files a cost of service.

- Gains and losses tend to be more variable and may fluctuate from year to year. Future tracking of these under Account 1575 is not overly cumbersome administratively and is seen to provide more accurate impacts for customers.

The following tables outline the calculation for the 2018 proxy "test year" revenue requirement impact of Account 1576.

Table 6 – 1576 REVENUE REQUIREMENT

Table 6 - Determination of 2018 Proxy Revenue Requirement for 1576

B. Gross up of Income Taxes				13,566	
Income tax expense (A+B)				51,192	

Allocation and Rate Design

Whitby Hydro proposes it is reasonable to allocate the 1576 revenue requirement proxy by customer class on the same basis as that approved in the last cost of service in 2011. This approach is consistent with that used to address shared tax savings (see Tab 9 of the 2019 Rate Model).

The proposed rate design by customer class is outlined as follows:

- Residential – Assumes a fully fixed rate design for the 1576 adjustment to 2018 Base Distribution Rates which is in line with the shift to fixed distribution rate design (per OEB requirements) for residential customers.
- All Other Customer Classes – Consistent with the proportions used for 2011 rate design (follows OEB's methodology to apportion the shared tax savings in the 2019 Rate Model - Tab 9).

The resulting calculations are provided in the tables below along with the calculation of the proposed 1576 adjustment to 2018 Base Distribution Rates.

Table 7 - Customer Class Allocation and Design of Rates

1576 Revenue Requirement Allocation by Rate Class and Rate Design (Fixed/Variable split)

Rate Class		Revenue Requirement	Fixed		Variable	
Residential	63.8%	$ (364,811)	100.0%	$ (364,811)	0.0%	$ -
GS<50 kW	9.7%	$ (55,417)	23.7%	$ (13,150)	76.3%	$ (42,267)

Adjustments to Account 1576 Balance for Interim Dispositions:

EB-2015-0113/0251									
Actual amount refunded to customers through rate riders (cumulative)							2,133,491	2,165,280	2,165,280
less approved return on rate based							-142,036	-142,036	-142,036
EB-2016-0114									
Actual amount refunded to customers through rate riders (cumulative)								1,248,233	1,266,478
less approved return on rate based								-84,536	-84,536
Account 1576 Balance				-1,241,348	-2,017,564	-3,218,374	-1,241,021	52,714	-702,134

Effect on Deferral and Variance Account Rate Riders

Closing balance in Account 1576	-702,134
Return on Rate Base Associated with Account 1576 balance at WACC - Note 2	-49,430
Amount included in Deferral and Variance Account Rate Rider Calculation	-751,564

WACC	7.04%
# of years of rate rider disposition period	1

Notes:

1 For an applicant that made the capitalization and depreciation expense accounting policy changes on January 1, 2013, the PP&E values as of January 1, 2013 under both former CGAAP and revised CGAAP should be the same.

2 Return on rate base associated with Account 1576 balance is calculated as:

the variance account opening balance as of 2015 rebasing year x WACC X # of years of rate rider disposition period

* Please note that the calculation should be adjusted once WACC is updated and finalized in the rate application.

3 Account 1576 is cleared by including the total balance in the deferral and variance account rate rider calculation.

4 Net additions are additions net of disposals; Net depreciation is additions to depreciation net of disposals.

APPENDIX C:

2018 APPROVED CURRENT TARIFF OF RATES AND CHARGES

Whitby Hydro Electric Corporation

TARIFF OF RATES AND CHARGES

Effective and Implementation Date January 1, 2018

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2017-0085/EB-2017-0292

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to detached, semi-detached or freehold townhouse dwelling units. Energy is supplied to residential customers as single phase, three wire, 60 Hertz, having a normal voltage of 120/240 Volts up to a maximum of 200 Amps per dwelling unit. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

EB-2017-0085/EB-2017-0292

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW, shall include small apartment buildings and smaller commercial, industrial, and institutional developments. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2017-0085/EB-2017-0292

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW and includes apartment buildings, and commercial, industrial, and institutional developments. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of WMS - Sub-account CBR is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied in for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, decorative lighting, bill boards, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

EB-2017-0085/EB-2017-0292

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	$	100.00
Monthly fixed charge, per retailer	$	20.00
Monthly variable charge, per customer, per retailer	$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	$	0.25
Processing fee, per request, applied to the requesting party	$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	$	no charge
More than twice a year, per request (plus incremental delivery costs)	$	2.00

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0454
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0349

APPENDIX C-1:

2018 PROPOSED BASE DISTRIBUTION RATES

2018 Proposed Base Distribution Rates (December 31, 2018)

		Proposed 2018 Base Distribution Rate (1)			
		Monthly Service Charge		Volumetric	
Residential	2018 Approved Distribution Rates	$ 29.18	$	0.0038	
	Proposed Account 1576 Adjustment	$ (0.76)	$	-	
	2018 Base Distribution Rate (Dec 31, 2018)	**$ 28.42**	**$**	**0.0038**	**/kWh**
GS<50 kW	2018 Approved Distribution Rates	$ 26.87	$	0.0201

	2018 Base Distribution Rate (Dec 31, 2018)	**$ 9.79**	**$**	**0.0312**	**/kWh**
Sentinel	2018 Approved Distribution Rates	$ 5.73	$	15.4050	
Lighting	Proposed Account 1576 Adjustment	$ -	$	-	
	2018 Base Distribution Rate (Dec 31, 2018)	**$ 5.73**	**$**	**15.4050**	**/kW**
Street	2018 Approved Distribution Rates	$ 1.80	$	7.0858	
Lighting	Proposed Account 1576 Adjustment	$ (0.04)	$	(0.2984)	
	2018 Base Distribution Rate (Dec 31, 2018)	**$ 1.76**	**$**	**6.7874**	**/kW**

1) 2018 Base Distribution Rates - Proposed adjustment of 2018 approved base distribution rates to address the impact of Account 1576 for changes in capitalization and depreciation related to Revised CGAAP and MIFRS requirements. The adjustment would take effect as at December 31, 2018. The December 31, 2018 Base Distribution Rates would then be used to apply mechanistic adjustments as per the 2019 IRM Rate Generator Model.

APPENDIX D:

2019 PROPOSED TARIFF OF RATES AND CHARGES

Whitby Hydro Electric Corporation

TARIFF OF RATES AND CHARGES

Effective and Implementation Date January 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0079

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to detached, semi-detached or freehold townhouse dwelling units. Energy is supplied to residential customers as single phase, three wire, 60 Hertz, having a normal voltage of 120/240 Volts up to a maximum of 200 Amps per dwelling unit. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	$	31.61
Rate Rider for Disposition of Account 1576 - effective until December 31,2019	$	(0.65)
Rate Rider for Recovery of Stranded Meter Assets - effective until December 31, 2019	$	0.60
Smart Metering Entity Charge - effective until December 31, 2022	$	0.57
Low Voltage Service Rate	$/kWh	0.0010
Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2019) - effective until December 31, 2019	$/kWh	0.0005

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0079

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW, shall include small apartment buildings and smaller commercial, industrial, and institutional developments. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Service Charge	$	26.54
Rate Rider for Recovery of Stranded Meter Assets - effective until December 31, 2019	$	4.02
Smart Metering Entity Charge - effective until December 31, 2022	$	0.57
Distribution Volumetric Rate	$/kWh	0.0197
Low Voltage Service Rate	$/kWh	0.0009
Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2019) - effective until December 31, 2019	$/kWh	0.0004

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0079

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification applies to a non residential account whose average monthly maximum demand used for billing purposes is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW and includes apartment buildings, and commercial, industrial, and institutional developments. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of WMS - Sub-account CBR is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied in for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification applies to an account whose average monthly maximum demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, decorative lighting, bill boards, etc. The level of the consumption will be agreed to by the distributor and the customer, based on detailed manufacturer information/documentation with regard to electrical consumption of the unmetered load or periodic monitoring of actual consumption. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

STREET LIGHTING SERVICE CLASSIFICATION

This classification relates to the supply of power for street lighting installations. Street lighting design and installations shall be in accordance with the requirements of Whitby Hydro, Town of Whitby specifications and ESA. The Town of Whitby retains ownership of the street lighting system on municipal roadways. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	$	100.00
Monthly fixed charge, per retailer	$	20.00
Monthly variable charge, per customer, per retailer	$/cust.	0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	$/cust.	0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	$/cust.	(0.30)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	$	0.25
Processing fee, per request, applied to the requesting party	$	0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail Settlement Code directly to retailers and customers, if not delivered electronically through the Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	$	no charge
More than twice a year, per request (plus incremental delivery costs)	$	2.00

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0454
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0349

APPENDIX E:

CUSTOMER BILL IMPACTS

Notes:

(1) The residential standard used for illustrative purposes is 750 kWh per EB-2016-0153

(2) RPP Pricing for May 1, 2018 to April 30, 2019
Non-RPP assumes a weighted average price including Class B Global Adjustment (IESO's Monthly Market Report for May 2017, pg 22)
RPP TOU assumes average consumption of Off-peak (65%), Mid-peak (17%) and On-peak (18%) per OEB.

(3a) Distribution Charges-A includes Distribution Monthly Service Charge, Volumetric Charges,disposition of 1576 and LRAMVA

(3b) Distribution Charges-B includes those described in note 3(a) plus pass-through charges such as low voltage as well as Line Losses and the Smart Meter Entity Charge

(4) Delivery Charges include all Distribution Charges (per notes 3a and 3b), plus Transmission Service Charges

(5) Total Bill includes all Delivery Charges noted above plus commodity cost, regulatory costs (ie. wholesale market service, CBR, rural rate protection and standard supply service) and HST and the 8% Ontario Rebate for Electricity Consumers

IRM RATE GENERATOR MODEL

Ontario Energy Board

Incentive Regulation Model for 2019 Filers

Quick Link

Ontario Energy Board's 2019 Electricity Distribution Rates Webpage

Version 1.0

Utility Name	Whitby Hydro Electric Corporation
Assigned EB Number	EB-2018-0079
Name of Contact and Title	Susan Reffle
Phone Number	905-444-1983
Email Address	sreffle@whitbyhydro.on.ca
We are applying for rates effective	Tuesday, January 01, 2019
Rate-Setting Method	**Annual IR Index**
Please indicate in which Rate Year the Group 1 accounts were last cleared[1]	**2018**
Please indicate the last Cost of Service Re-Basing Year	**2011**

Legend

- Pale green cells represent input cells.
- Pale blue cells represent drop-down lists. The applicant should select the appropriate item from the drop-down list.
- Pale grey cell represent auto-populated RRR data
- White cells contain fixed values, automatically generated values or formulae.

Note:
1. Rate year of application

Ontario Energy Board

Incentive Regulation Model for 2019 Filers

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter information into green cells only. Column BU has been prepopulated from the latest 2.1.7 RRR filing.

For all Group 1 Accounts, except for Account 1595, start inputting data from the year in which the GL balance was last disposed. For example, if in the 2018 rate application, DVA balances as at December 31, 2016 were approved for disposition, start the continuity schedule from 2016 by entering the 2015 closing balance in the Adjustment column under 2015. For all Account 1595 sub-accounts, complete the DVA continuity schedule for each Account 1595 vintage year that has a GL balance as at December 31, 2017 regardless of whether the account is being requested for disposition in the current application. For each Account 1595 sub-account, start inputting data from the year the sub-account started to accumulate a balance (i.e. the vintage year). For example, for Account 1595 (2015),data should be inputted starting in 2015 when the relevant balances approved for disposition was first transferred into Account 1595 (2015).

Please refer to the footnotes for further instructions.

Incentive Regulation Model for 2019 Filers

Please complete the following continuity schedule for the following Deferral/Variance Accounts. Enter information into green cells only. Column BU has been prepopulated from the latest 2.1.7 RRR filing.

For all Group 1 Accounts, except for Account 1595, start inputting data from the year in which the GL balance was last disposed. For example, if in the 2018 rate application, DVA balances as at December 31, 2016 were approved for disposition, start the continuity schedule from 2016 by entering the 2015 closing balance in the Adjustment column under 2015. For all Account 1595 sub-accounts, complete the DVA continuity schedule for each Account 1595 vintage year that has a GL balance as at December 31, 2017 regardless of whether the account is being requested for disposition in the current application. For each Account 1595 sub-account, start inputting data from the year the sub-account started to accumulate a balance (i.e. the vintage year). For example, for Account 1595 (2015),data should be inputted starting in 2015 when the relevant balances approved for disposition was first transferred into Account 1595 (2015).

Please refer to the footnotes for further instructions.

Please refer to the footnotes for further instructions.

s A customers at any point during the period that the alance accumulated (i.e. from the year the balance was 7), check off the checkbox. ☑

ustomer(s) during this period, Tab 6 will be generated t complete the information pertaining to Class A

If you had any customers classified as Class A at any point during the period where Account 1580, sub-account CBR Class B balance accumulated (i.e. 2017 or 2017 to 2016 or 2015 to 2017), check off the checkbox. ☑

If you had Class A customer(s) during this period, Tab 6.2 will be generated. Account 1580, sub-account CBR Class B will be disposed through a separate rate rider calculated in Tab 6.2.

If you only had Class B customers during this period, the balance in 1580 sub-account CBR Class B will be allocated and disposed with Account 1580 WMS.

Data on this worksheet has been populated using your most recent RRR filing.

Click on the checkbox to confirm the accuracy of the data below:

If you have identified any issues, please contact the OEB.

If a distributor uses the actual GA price to bill non-RPP Class B customers for an enti class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refun the general GA rate rider as they did not contribute to the GA balance.

Please contact the OEB to make adjustments to the IRM rate generator for this situat

Threshold Test

Total Claim (including Account 1568)	$554,924	
Total Claim for Threshold Test (All Group 1 Accounts)	$208,577	
Threshold Test (Total claim per kWh) [2]	$0.0003	**Claim does not meet the threshold test.**

1568 Account Balance from Continuity Schedule	**346,347**
Total Balance of Account 1568 in Column S matches the amount entered on the Continuity Schedule	

As per Section 3.2.5 of the 2019 Filing Requirements for Electricity Distribution Rate Applications, an applicant may elect to dispose of the Group 1 account balances below the threshold. If doing so, please select YES from the adjacent drop-down cell and also indicate so in the Manager's Summary. If not, please select NO.

NO

[1] Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

[2] The Threshold Test does not include the amount in 1568.

[3] The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

Ontario Energy Board

Incentive Regulation Model for 2019 Filers

No input required. This workshseet allocates the deferral/variance account balances (Group 1 and 1568) to the appropriate classes as per EDDVAR dated July 31, 2009

Allocation of Group 1 Accounts (including Account 1568)

Rate Class	% of Total kWh	% of Customer Numbers **	% of Total kWh adjusted for WMP	1550	1551	1580 (allocated based on Total less WMP)	1584	1586	1588 (allocated based on Total less WMP)	1595_(2016)	1568
RESIDENTIAL SERVICE CLASSIFICATION	41.3%	94.7%	41.5%								158,826

[1] When calculating the revenue reconciliation for distributors with Class A customers, the balances of sub-account 1580-CBR Class B will not be taken into consideration if there are Class A customers since the rate riders, if any, are calculated separately.
[2] Only for rate classes with WMP customers are the Deferral/Variance Account Rate Riders for Non-WMP (column H and J) calculated separately. For all rate classes without WMP customers, balances in account 1580 and 1588 are included in column G and disposed through a combined Deferral/Variance Account and Rate Rider.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.
If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

		13,925,131						13,922,956

[1] These are the residential rates to which the Price Cap Index will be applied to. Wheeling Service Rate will be adjusted for PCI on Sheet 19.

Ontario Energy Board

Incentive Regulation Model for 2019 Filers

Update the following rates if an OEB Decision has been issued at the time of completing this application

Regulatory Charges		**Proposed**
Wholesale Market Service Rate (WMS) - not including CBR	$/kWh	0.0032
Capacity Based Recovery (CBR) - Applicable for Class B Customers	$/kWh	0.0004
Rural or Remote Electricity Rate Protection Charge (RRRP)	$/kWh	0.0003
Standard Supply Service - Administrative Charge (if applicable)	$	0.25

Time-of-Use RPP Prices

As of		May 1, 2018
Off-Peak	$/kWh	0.0650
Mid-Peak	$/kWh	0.0940
On-Peak	$/kWh	0.1320

Debt Retirement Charge (DRC)

Debt Retirement Charge (DRC)	$/kWh	0.0000

Smart Meter Entity Charge (SME)

Smart Meter Entity Charge (SME)	$	0.57

Ontario Energy Board

Incentive Regulation Model for 2019 Filers

In the Green Cells below, enter any proposed rate riders that are not already included in this model (e.g.: proposed ICM rate riders). Please note that existing SMIRR and SM Entity Charge do not need to be included below.
In column A, the rate rider descriptions must begin with "Rate Rider for".
In column B, choose the associated unit from the drop-down menu.
In column C, enter the rate. All rate riders with a "$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.
In column E, enter the expiry date (e.g. April 30, 2020) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).
In column G, choose the sub-total as applicable in the bill impact calculation from the drop-down menu.

Net Change in Expected GA Balance in the Year Per Analysis	$	459,784
Unresolved Difference	-$	38
Unresolved Difference as % of Expected GA Payments to IESO		0.0%

APPENDIX G-1:

GA METHODOLOGY DESCRIPTION

Appendix A
GA Methodology Description
Questions on Accounts 1588 & 1589[1]

1. In booking expense journal entries for Charge Type (CT) 1142 and CT 148 from the IESO invoice, please confirm which of the following approaches is used:
   a. CT 1142 is booked into Account 1588. CT 148 is pro-rated based on RPP/non-RPP consumption and then booked into Account 1588 and 1589 respectively.
   b. CT 148 is booked into Account 1589. The portion of CT 1142 equaling RPP minus HOEP for RPP consumption is booked into Account 1588. The portion of CT 1142 equaling GA RPP is credited into Account 1589.
   c. If another approach is used, please explain in detail.

Whitby Hydro uses a slightly different approach:

CT 1142 is made up of two components which are handled as follows:

1) The portion of CT 1142 equaling the difference of RPP minus market price (ie. HOEP)
   a. The actual difference between RPP minus market price is posted to Account 1588
   b. Any variance between the actual difference (in a.) and the estimated difference claimed in CT 1142 is posted to a balance sheet clearing account (for IESO receivable/payable). This difference is based on billed/unbilled information which is analyzed after the form is filed (previously form 1598).

This ensures that a "trued-up" amount of CT 1142 is posted to Account 1588. Any residual differences between the actual and the estimated amount in CT1142 are held in the balance sheet clearing account for future settlement with the IESO,

2) The portion of CT 1142 equaling GA RPP is posted to the balance sheet clearing account

[1] In all references in the questions relating to amounts booked to accounts 1588 and 1589, amounts are not booked directly to accounts USoA 1588 and 1589 relating to power purchase transactions, but are rather booked to the cost of power USoA 4705 Power Purchased, and 4707, Charges – Global Adjustment, respectively. However, accounts 1588 and 1589 are impacted the same way as account 4705 and 4707 are for cost of power transactions.

CT 148 is split as follows:

- **The estimated portion related to GA RPP is posted to the balance sheet clearing account**
- **The estimated portion related to GA non-RPP is posted to Account 1589**

As the amounts related to the GA RPP in both CT 1142 and CT 148 are both posted to the balance sheet clearing account, any future true-ups required to the split of CT 148 will only impact the balance sheet clearing account (which is settled with the IESO) and Account 1589.

While this approach is a slight variation of those outlined in the question, Whitby Hydro has reviewed the OEB example in APH Article 490 and believes the approach provides the intended results and also ensures Account 1588 does not hold the temporary differences between actuals and estimates that will eventually be settled with the IESO.

2. Questions on CT 1142
    a. Please describe how the initial RPP related GA is determined for settlement forms submitted by day 4 after the month-end (resulting in CT 1142 on the IESO invoice).

The GA rate (2nd estimate) is applied to the estimated RPP consumption in order to arrive at the estimated RPP portion of GA costs which are included for settlement with the IESO. The estimated RPP consumption is derived by taking the actual wholesale consumption for the month less the monthly billing consumption for non-RPP customers.

    b. Please describe the process for truing up CT 1142 to actual RPP kWh, including which data is used for each TOU/Tier 1&2 prices, as well as the timing of the true up.

The current process outlined in Q1 ensures that no true-up is required for Account 1588 related to item #1. Item #2 is dealt with as part of the CT 148 true up between account 1589 and the clearing account for IESO settlement once the actual split of GA billed to non-RPP customers is known.

    c. Has CT 1142 been trued up for with the IESO for all of 2017?

As per process outlined in Q1, this is N/A for Account 1588. True-ups are done through the balance sheet clearing account which is settled with the IESO.

d. Which months from 2017 were trued up in 2018?

As per process outlined in Q1, this is N/A for Account 1588.

e. Have all of the 2017 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?

As per process outlined in Q1, this is N/A as CT 1142 true-ups only impact the balance sheet clearing account which is settled with the IESO.

f. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

As per process outlined in Q1, this is N/A

3. Questions on CT 148
   a. Please describe the process for the initial recording of CT 148 in the accounts (i.e. 1588 and 1589).

As per the process outlined in Q1 the amount in CT 148 is split between:

- **Account 1589 for the estimated non-RPP customer portion**
- **Clearing account (IESO settlement) for the estimated portion related to RPP customers (this offsets the amount outlined for CT 1142 – item #2).**

b. Please describe the process for true up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.

There is no true up required to Account 1588 based on the current process outlined.

The billing system setups are maintained to allow the billing transactions to be analyzed by calendar month (using effective dates attached to GA rates). This provides the billing statistic information (kWh) for non-RPP customers by calendar month which is used to multiply against the actual GA rate. This generates the actual GA costs in CT148 associated with non-RPP customers. Any difference versus the original estimate is posted (offsetting entry is to the balance sheet clearing account for IESO settlements).

c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as expense in Account 1589 for initial recording of the GA expense?

The estimated RPP consumption is derived by taking the actual wholesale consumption for the month less the monthly billing consumption for non-RPP customers.

d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated proportions to actuals based on actual consumption proportions for RPP and non-RPP?

Yes – however, the true-up only affects Account 1589 (not Account 1588). See response to b).

e. Please indicate which months from 2017 were trued up in 2018 for CT 148 proportions between RPP and non-RPP.

November and December 2017 were trued up in 2018

f. Are all true-ups for 2017 consumption reflected in the DVA Continuity Schedule under 2017.

Yes.

g. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

Dollar amount of GA true up for the two months (Nov/Dec 2017) is $29,120 and has been included in column BM.

4. Questions regarding principal adjustments and reversals on the DVA Continuity Schedule:

<u>Questions on Principal Adjustments - Accounts 1588 and 1589</u>

a. Did the applicant have principal adjustments in its 2018 rate proceeding which were approved for disposition?

Yes.

b. Please provide a break-down of the total amount of principal adjustments that were approved (e.g. true-up of unbilled (for 1589 only), true up of CT 1142, true up of CT 148 etc.).

True up of CT 148: $18,358.91

c. Has the applicant reversed the adjustment approved in 2018 in its current proposed amount for disposition?

Yes, by virtue of including the amount in the disposition amount in column BM

d. Please provide a breakdown of the amounts shown under principal adjustments in the DVA Continuity Schedule filed in the current proceeding, including the reversals and the new true up amounts regarding 2017 true ups.

Amounts included in column BM relating to the GA work form are as follows:

$29,120 True up of GA charges based on actual non RPP.

e. Do the amount calculated in part d. above reconcile to the applicant's principal adjustments shown in the DVA Continuity Schedule for the current proceeding? If not, please provide an explanation.

Yes

f. Please confirm that the principal adjustments shown on the DVA Continuity Schedule are reflected in the GL transactions. As an example, the unbilled to actual true-up for 1589 would already be reflected in the applicant's GL in the normal course of business. However, if a principal adjustment related to proportions between 1588 and 1589 was made, applicant must ensure that the GL reflects the movement between the two accounts.

The principal disposition entries identified in column BM have been recorded in the GL in 2018.

SUMMARY	
Total Calculated Account Balance	$12,376
Total Account Residual Balance per Step 1 above	($13,026)
Unreconciled Differences**	$25,402

****Any unreconciled difference between amounts reported in the residual balances section in Step 1 and amounts calculated for the total of all applicable riders in Step 3 must be explained.

Additional Notes and Comments

The Group 1 balance (excluding GA) is made up of two allocated DV amounts: one for all customers and the other for non-WMP only. When these two components are analysed independently, the residual balance of each is not considered material (falls below the variance level of 10% that would require further analysis and explanation). As a result, no additional analysis is required. Please see the Manager Summary for more detail.

APPENDIX I:

SETTLEMENT PROCESS WITH IESO

WHITBY HYDRO ELECTRIC CORPORATION
IESO SETTLEMENT PROCESS AND PROCEDURE OVERVIEW

Timeline

IESO monthly settlement – submitted by the 4th business day after the calendar month end for the month prior (ie January settlement is submitted by the 4th business day in February).

Global Adjustment (GA)

Whitby Hydro uses the 1st estimate for billing customers for all rate classes. Timely billing and cash flow is the main driver for selecting 1st estimate. 1st estimate is also used for unbilled calculations for all rate classes.

Consumption Estimates

Whitby Hydro uses a spreadsheet model which incorporates wholesale consumption as well as customer billing stat consumption to estimate monthly splits for RPP and non-RPP categories. A summary of the approach is as follows:

Estimated RPP kWh consumption =

Wholesale kWh consumption (including embedded generation)
Less: Non-RPP kWh – Spot price customers (using monthly billing stats)
Non-RPP kWh – Retailer customers (using monthly billing stats)

Estimated Non-RPP consumption = Wholesale kWh less estimated RPP kWh

IESO settlement of RPP – market price

The estimated RPP kWhs are split between RPP categories (ie. ON/OFF/MID and tier 1 and tier 2 blocks) using the most current month RPP billing stats split as a proxy. For each RPP category the associated RPP pricing less a monthly weighted average price is used to develop RPP settlement amounts with the IESO.

IESO Settlement of RPP GA

GA rates (2nd estimate) are also applied to estimated RPP consumption to estimate the RPP portion of GA cost which are included for settlement with the IESO.

True-Up Process

The billing system setups are maintained to allow the billing transactions to be analyzed by calendar month (using effective dates attached to specific rates ie RPP, GA, spot etc.). This provides the billing stat information required by calendar month to compare against the estimates. Any difference is incorporated into the settlement process and general ledger accounts as required.

Embedded Generation

The settlement with the IESO relating to embedded generation (FIT, MicroFit) is done based on the contract price vs market price on a monthly basis.

WHITBY HYDRO ELECTRIC CORPORATION
IESO SETTLEMENT PROCESS AND PROCEDURE OVERVIEW

Internal Control Tests

Before the claim is submitted; a control checklist is completed to ensure that all steps in the process have been followed; a reasonability test is done on the claim amount and the claim is reviewed by a Manager.

Account reconciliations are done monthly to monitor account balances and to track estimated claim amounts versus actuals. This review also allows for an assessment of whether estimates are reasonable and current true-ups are adequately managing the balances or whether an interim true-up is necessary in advance of the regular timeline.

APPENDIX J:

CERTIFICATION OF EVIDENCE

Certification of Evidence

Attestation

With respect to Whitby Hydro's 2019 Annual IR Index Application,
I, Ramona Abi-Rashed, Treasurer of Whitby Hydro Electric Corporation,
hereby certify that the evidence filed is accurate, consistent and complete to the best of my knowledge.
