Re: EB-2018-0191
Application for Leave to Construct
IAMGOLD Corporation

We are counsel to IAMGOLD Corporation in this matter.

On September 7, 2018, the Board issued the Notice of Application and Letter of Direction for the above-noted proceeding. As directed by the Board, enclosed please find the Affidavit of Service which has been filed through the Board's Regulatory Electronic Submission System.

If there are any questions, please contact the undersigned at your earliest opportunity.

Yours truly,

AIRD & BERLIS LLP

Per: 
Scott Stoll

ONTARIO ENERGY BOARD

IN THE MATTER of the *Ontario Energy Board Act, 1998*, S.O. 1998, c.15, Schedule B;

AND IN THE MATTER of an Application by IAMGOLD Corporation for an Order or Orders granting Leave to Construct new Transmission Facilities in the District of Sudbury between the proposed Côté Gold Mine in the Geographic Townships of Chester and Yeo, and the existing Hydro One Shining Tree Junction in the Geographic Township of Garibaldi and traversing the Geographic Townships of Garibaldi, Miramichi, Londonderry, Champagne, Benneweis and Chester;

AFFIDAVIT OF SERVICE

I, Alison Reynolds, of the City of Burlington, in the Regional Municipality of Halton, MAKE OATH AND SAY as follows:

1. I am an Assistant with the law firm of Aird & Berlis LLP, lawyers for the Applicant and, as such, have knowledge of the following matters.
2. Pursuant to the September 7, 2018 Letter of Direction from the Ontario Energy Board (the "Board"), I caused to be served by registered mail a copy of the Notice of Application ("Notice"), IAMGOLD's Application and Evidence to all of the following:
 - (a) Hydro One Networks Inc.;
 - (b) CN Rail;
 - (c) All Indigenous Communities with any interest in the lands affected by the transmission line and related facilities, including Indigenous Communities that were identified by the Ontario Ministry of Energy, Northern Development and Mines, the Ontario Ministry of Indigenous Affairs and Crown-Indigenous Relations and Northern Affairs Canada;

(d) The Chiefs of Ontario Toronto Administration Office;

(e) All affected provincial government ministries and agencies listed in the Letter of Direction;

(f) The following federal government departments;

i. Environment Canada

ii. Fisheries and Oceans Canada

iii. Transport Canada

iv. Crown-Indigenous Relations and Northern Affairs Canada.

3. Pursuant to the Letter of Direction I am informed that the title searches were updated by Andre Dufresne following the issuance of the Direction and that entire line, except for rail and road crossing whose owners were served, is on Crown lands and the only interest holders other than the Crown are the Applicant and Applicant related persons. I am informed the search included review of the following government database: Mining Lands Administration System (MLAS).
4. I have been informed by Hydro One Networks Inc. that there are no electricity distributors or transmission customers in the areas of the proposed transmission line.
5. I accessed the IAMGold website, see link below, on September 21, 2018 and was able to access the Notices, the Application and evidence. The link is:
 - <http://www.iamgold.com/English/home/default.aspx>;
 - <http://www.iamgold.com/English/operations/development-projects/cote-gold-project-ontario/default.aspx#tab6>.
6. Attached hereto and marked as Exhibit "A" , "B" and "C" are true copies of the aforesaid dated Notice, IAMGOLD's Application and Amendments respectively.

7. Attached hereto and marked as Exhibit "D" is proof in the form of registered mail receipts that the Notice, Application and Evidence were served via registered mail (hard copy) on those parties as directed by the Ontario Energy Board in the Letter of Direction.

SWORN BEFORE ME at the City of Toronto,
in the Province of Ontario on September 21,
2018

Commissioner for Taking Affidavits
(or as may be)

Dillon Collett

ALISON REYNOLDS

IAMGOLD Corporation has applied to the Ontario Energy Board to build a transmission line.

Learn more.

IAMGOLD Corporation is asking the Ontario Energy Board (OEB) for permission to construct approximately 44 kilometres of 115 kilovolt electricity transmission line. The transmission line will connect the Côté Gold Mine which is located approximately 20 km southwest of Gogama, Ontario to Hydro One Network Inc.'s transmission system at Shining Tree Junction.

IAMGOLD Corporation is also asking the OEB to approve the form of agreement it offers to landowners to use their land for routing or construction of the proposed line.

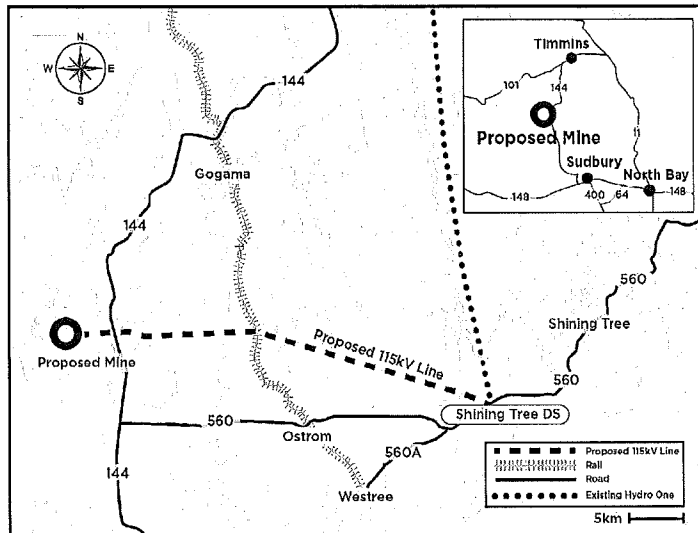

A map of the proposed route for the transmission line is printed below.

The OEB is an independent and impartial public agency. It will hold a public hearing to consider IAMGOLD Corporation's requests. During this hearing, the OEB will consider evidence and arguments by **IAMGOLD Corporation** and by individuals, municipalities and others whose interests would be affected.

The OEB hearing will consider specific issues determined by law. The *Ontario Energy Board Act, 1998* specifies the issues the OEB is to consider in making its decision. If you wish to participate in the OEB hearing, it is important for you to understand what these issues are.

As required by the *Ontario Energy Board Act* the OEB will consider three issues:

- The interests of consumers with respect to prices and the reliability and quality of electricity service;
- The promotion of the use of renewable energy sources in a manner consistent with the policies of the Government of Ontario; and
- The form of agreement that **IAMGOLD Corporation** offers to landowners affected by the transmission line.

The OEB hearing is not the only approval process required before a line is built. For example, most transmission lines are subject to the Ministry of the Environment, Conservation and Parks' environmental assessment process. The OEB's review will only address the three factors outlined above and will not address other factors, such as, environmental, health, aesthetics or property value impacts.

BE INFORMED

You have the right to information regarding **IAMGOLD Corporation's** application. You can read **IAMGOLD Corporation's** application on the OEB's website (See below under "Learn More").

HAVE YOUR SAY

If you would be affected by the proposed transmission line and associated facilities, you may want to take a more active role in the hearing.

- You can send the OEB a letter with your comments, which will be considered during the hearing; or
- You can ask the OEB for permission to be an active participant in the hearing (an intervenor). Intervenors can provide evidence, argue their positions and submit relevant questions to be answered by **IAMGOLD Corporation** (interrogatories). To be an intervenor, a party must be affected by the transmission line in a way that relates directly to the issues the OEB will consider. If you wish to be an intervenor, the OEB must receive your request by **October 1, 2018**.

LEARN MORE

To learn more about this hearing, find instructions on how to file letters or become an intervenor, or to read the documents related to this case, please select the file no. **EB-2018-0191** from the list on the OEB website: www.oeb.ca/noticeltr. You can also phone Michael Lesychyn at 1-888-632-6273, extension (632).

ORAL VS. WRITTEN HEARINGS

There are two types of OEB hearings – oral and written. **IAMGOLD Corporation** has applied for a written hearing. The OEB is considering this request. If you think an oral hearing is needed, you can write to the OEB to explain why by **October 1, 2018**.

PRIVACY

If you write a letter with your comments, your name and the content of your letter will be put on the OEB's public record and the OEB website. However, your personal telephone number, address and email address will be removed. If you are a business, all your information will be public. If you apply to become an intervenor, all your information will be public.

This application was filed under sections 92, 97 and 101 of the Ontario Energy Board Act, 1998 S.O. 1998, c.15, Schedule B.

EB-2018-0191
July 6, 2018
Exhibit B
Tab 1
Schedule 1
Page 1 of 6

IN THE MATTER of the *Ontario Energy Board Act, 1998*,
S.O. 1998, c.15, Schedule B;

AND IN THE MATTER of an Application by IAMGOLD Corporation for an Order or Orders granting Leave to Construct new Transmission Facilities in the District of Sudbury between the proposed Côté Gold Mine in the Geographic Townships of Chester and Yeo, and the existing Hydro One Shining Tree Junction in the Geographic Township of Garibaldi and traversing the Geographic Townships of Garibaldi, Miramichi, Londonderry, Champagne, Benneweis and Chester;

CÔTÉ GOLD PROJECT LEAVE TO CONSTRUCT

APPLICATION

- 1) IAMGOLD Corporation (the “**IAMGOLD**” or “**Applicant**”) is a corporation with its head office located in Toronto, Ontario. IAMGOLD carries on the business of developing and operating mines in Africa, North and South America. IAMGOLD owns an approximately 64.75% majority interest in the Côté Gold Project (the “**Mine**”), a new gold mine, located approximately 20 km southwest of Gogama, Ontario. Sumitomo Metal Mining Canada Ltd., is the Canadian subsidiary of Sumitomo Metal Mining Co., Ltd. (together referred to as “**Sumitomo**”), a publicly traded Japanese company which owns an approximately 30% interest in the Mine; having acquired the interest in June 2017 for USD\$195million. IAMGOLD is a publically traded company on the Toronto Stock Exchange with the symbol IMG and is traded on the NYSE with symbol IAG.
- 2) IAMGOLD is the majority interest holder and the lead in the development of the Mine, including the proposed transmission facilities. The two most recently filed Annual Financial

Statements for IAMGOLD are provided at Exhibit B, Tab 2, Schedule 1, Attachments 1 and 2 and further public information is provided on the SEDAR website.¹

- 3) Information regarding the minority interest holder, Sumitomo Metal Mining Co., Ltd., may be found at the company's website.²
- 4) IAMGOLD hereby applies to the Ontario Energy Board (the "**Board**"):
 - a) Pursuant to Section 92 of the *Ontario Energy Board Act, 1998*, S.O. 1998, C. 15 Sched. B (the "**OEB Act**") for an order or orders granting leave to construct:
 - i) approximately 44 kilometers of 115kV transmission line (the "**Transmission Line**");
 - ii) connection facilities at Hydro One Networks Inc.'s Shining Tree Junction ("**Shining Tree JCT**"); and
 - iii) Facilities at the Mine (collectively (i), (ii) and (iii) the "**Project**");
 - b) Pursuant to Section 97 of the OEB Act, for approval of the form of easement agreement found in Exhibit E, Tab 1, Schedule 2, Attachment 1;
 - c) Pursuant to Section 101 of the OEB Act, for authority to construct works upon, over or under a highway, utility line or ditch;
 - d) Order(s) for the publication, notice and conduct of this matter as the Board determines appropriate; and
 - e) Such other relief as the Applicant may request and the Board determines is in the public interest.
- 5) The proposed approximately 44km 115kV transmission line is to be constructed almost exclusively in an existing, but abandoned, right-of-way from Hydro One Networks Inc.'s

¹ <https://www.sedar.com/DisplayProfile.do?lang=EN&issuerType=03&issuerNo=00009025> .

² http://www.smm.co.jp/E/corp_info/

existing Shining Tree JCT to the proposed Mine. A small segment of the transmission line west of Highway 144, entering the Mine, will be in a new corridor. An overview map of the route is shown in Exhibit B, Tab 1, Schedule 1, Attachment 1. More detailed maps are found at Exhibit C, Tab 1, Schedule 1, Attachments 1, 1(a) and 2.

- 6) For facilities at the Mine, IAMGOLD will install two 115/13.8 kV step-down transformers with a motorized disconnect switch and a circuit breaker at the high-voltage side of each transformer. The low-voltage side of each transformer will be connected to separate 13.8 kV buses. Load of approximately 72 MW will evenly split between the 13.8 kV buses. IAMGOLD is also proposing to install a total of approximately 60 Mvars of SVC(s) connected to 13.8 kV buses to support voltage at the Mine.
- 7) The Project also requires re-conductoring of approximately 118 km of Hydro One's 115 kV T2R circuit from Timmins TS to Shining Tree JCT and modifications for additional system protection are required at the Timmins TS (together the **"Hydro One Project"**). Costs incurred for the Hydro One Project will be paid by IAMGOLD pursuant to a connection cost recovery agreement to be entered into as required by the Board's approved connection process and the Transmission System Code. Hydro One will be submitting a separate companion leave to construct application to the Board in respect of the Hydro One Project. The Applicant requests that the Board, when it receives the Hydro One's application, consider and implement the most expeditious process for considering both applications. Information regarding the impact on the transmitter may be found at Exhibit B, Tab 2, Schedule 4.
- 8) The Mine will require electricity for development and construction and operation. The Mine will have an operating load of approximately 72 MW. There are no electricity transmission or distribution facilities located nearer the Mine with sufficient capacity to meet the requirements of the Mine. The Project and the Hydro One Project are the result of numerous studies and consultation by the Applicant that determined the proposed facilities are the best option to serve the Mine.
- 9) The Mine is located approximately 20km southwest of Gogama, 130km southwest of Timmins and 200km northwest of Sudbury. The Project is located in several unorganized

territories or geographic townships between the Shining Tree JCT and the Mine including: Garibaldi, Miramichi, Londonderry, Champagne, Benneweis and Chester.

- 10) The list of interested parties includes Hydro One, the Independent Electricity System Operation (the "**IESO**"), certain Indigenous communities, landowners (the "**Crown**") and rights holders in close proximity to the proposed Project. IAMGOLD has been communicating with the Matagami First Nation, Flying Post First Nation and Metis Nation of Ontario in respect of the Mine, including the Project. A list of interested parties is provided in Exhibit B, Tab 1, Schedule 2. The Project is located almost exclusively on Crown land for which a land use permit will be required from the Ministry of Natural Resources and Forestry ("**MNR**").
- 11) The Applicant has completed a System Impact Assessment ("**Final SIA**") with the IESO. A copy of the IESO Notice of Conditional Approval of Connection Proposal and the Final SIA may be found at Exhibit F, Tab 1, Schedule 1, Attachments 1 and 2, respectively. The IESO has concluded that the Project does not pose any anticipated adverse impacts to the transmission or distribution system. A customer impact assessment ("**CIA**") is currently being completed by Hydro One which will show the impact, if any, to the reliability for other customers. It will be filed as soon as it is completed. IAMGOLD will adhere to the requirements of the CIA and SIA and the IESO's Market Rules.
- 12) An overview map of the proposed project is provided at Exhibit B, Tab 1, Schedule 1, Attachment 1. The path of the project follows a previously abandoned right-of-way between the Shining Tree JCT and the Mine.
- 13) A detailed construction schedule may be found at Exhibit B, Tab 2, Schedule 1, Attachment 3 with detailed design and equipment procurement commencing in early 2019. Right-of-way clearing and construction of the Project will begin in the summer of 2019. Commissioning is scheduled for 2020 and the Mine and Project are expected to be in operation by the first quarter 2021.
- 14) IAMGOLD will finance and construct the Project and required capital contribution for Hydro One using its own resources and, as such, the Project will have no adverse impact on other

ratepayers. It is anticipated that the addition of the load from the Mine, once operational, will have a beneficial impact for the other ratepayers. At this time, IAMGOLD intends to retain ownership of the Project and be an unlicensed transmitter.

- 15) A wholesale license for participation in the IESO market will be submitted to the Board separately. An application to the IESO will also be made as required for market participation. IAMGOLD will obtain the other necessary permits and approvals to construct the Project.
- 16) The Application is supported by written evidence which is pre-filed and may be amended and updated from time to time prior to the Board's final decision on this Application.
- 17) IAMGOLD requests the Board issue a decision in this matter at its earliest opportunity, but no later than December 31, 2018 in order that IAMGOLD may continue to meet the proposed schedule and its in-service date.
- 18) At this point in time, IAMGOLD submits that a written proceeding will be sufficient to consider the anticipated issues.
- 19) IAMGOLD requests that correspondence in this proceeding be conducted in English and that all correspondence should be directed to:

a)	The Applicant: Address:	IAMGOLD Corporation 401 Bay Street, #3200, Toronto, ON M5H 2Y4

Re: EB-2018-0191
Application for Leave to Construct
IAMGOLD Corporation

We are counsel to IAMGOLD Corporation in this matter.

Since the Application was filed on July 6, 2018 there have been two developments that require an update to the Pre-filed evidence. The first development is the completion of the Customer Impact Assessment. The second development is the acquisition by IAMGOLD of the remainder of third party mineral rights holders along the proposed transmission line corridor. An electronic copy of the updated portions of the Pre-filed evidence was filed on the Board's RESS system.

As a result of the second development, there is no need for the updated evidence which was previously redacted to continue to be redacted. Further, the evidence originally filed in confidence should retain its confidential nature as previously requested but it is no longer relevant. We have filed clean and blackline versions of the publicly filed exhibits.

If there are any questions, please contact the undersigned at your earliest opportunity.

Yours truly,

AIRD & BERLIS LLP

Scott Stoll

Individual Mining Claim Holder 32899534-132899534.2	Redacted

LAND MATTERS

The land area required for the proposed Transmission Facilities includes lands needed for: (a) connection to Hydro One's Shining Tree JCT; (b) the approximately 44 km of 115 kV transmission line; and (c) customer facilities located within the Mine. It is not anticipated that Hydro One will require any additional land for the Hydro One Project. However, Hydro One land requirements regarding any upstream work by Hydro One in respect of the T2R line will be detailed in a separate leave to construct application by Hydro One.

Aside from where the proposed Transmission Line crosses roadways or railways it is expected that the Transmission Facilities will be located entirely on Crown Lands. A landowner list, including third party holders of mining claims, is included at Exhibit E, Tab 1, Schedule 2. IAMGOLD has included a draft form of Transmission Easement, Exhibit E, Tab 1, Schedule 1 Attachment 1. In the event the Transmission Facilities are not located within Crown Land, then the form of agreement provided in Attachment 1 to this Schedule would be offered to any private landowner. The draft form of agreement includes provisions as required by the OEB's *Filing Requirements for Electricity Transmission Applications Chapter 4 – Applications under Section 92 of the Ontario Energy Board Act* (July 31, 2014). IAMGOLD has in the Application, requested approval of the form of agreement as required by Section 95 of the OEB Act.

The Côté Gold Project is located in the District of Sudbury, outside of any lower tier municipality boundary. The proposed Transmission line will intersect with the Geographic Townships of: Miramichi, Garibaldi, Londonderry, Champagne, Benneweis and Chester. The closest local non-Aboriginal communities to the Project site are Gogama, Timmins and Sudbury.

Crown Land

The Ministry of Natural Resources and Forestry ("MNRF") administers Crown land pursuant to the *Public Lands Act*. IAMGOLD has been working with MNRF to obtain the necessary land rights for the Transmission Facilities. According to policies issued by the MNRF electrical transmission lines will require a Multi-Site Land Use Permit, easements and potentially Crown grant in the area

1 of the stations. IAMGOLD is not aware of any impediment that will prevent it from securing the
2 necessary land rights to construct and operate the Transmission Facilities.

3 It is anticipated that IAMGOLD will secure a right of way with an approximate width of 40 to 50
4 metres over the entire length.

5 **Mining Claim Holders**

6 There are no mining rights claim holders not related to IAMGOLD Corporation along the proposed
7 44 km 115 kV transmission line. IAMGOLD has secured claims along the entire length of the
8 transmission corridor and on either side of the corridor. Maps showing the easements are included
9 at Exhibit E, Tab 1, Schedule 1, Attachment 1.

10 **Road and Utility Crossings**

11 The proposed route for the Transmission Facilities will cross roads, including Highway 144, and
12 a railway. The Applicant has and will continue to work with the owners of these facilities to secure
13 the necessary land rights to complete the crossings. In respect of the roadways, the Applicant
14 has included in the Application request for approval pursuant to section 101 of the OEB Act to
15 cross highways, utility lines and ditches as necessary.

16

17 32899582.2

LAND MATTERS

The land area required for the proposed Transmission Facilities includes lands needed for: (a) connection to Hydro One's Shining Tree JCT; (b) the approximately 44 km of 115 kV transmission line; and (c) customer facilities located within the Mine. Overview Customer Impact Assessment

be adversely impacted by the connection of the Cote Lake Mine.”

32728831.3

Overview Customer Impact Assessment

The Customer Impact Assessment ("CIA") is underway and is anticipated to be complete before the end of July 2018. A copy of the CIA will be filed in this Application when it becomes available. IAMGOLD is not expecting any adverse impact to other customers of Hydro One or to the Mine and Project resulting from the CIA included at Exhibit G, Tab 1, Schedule 1, Attachment 1. The CIA, at page 5, concludes that the "Hydro One system and customers will not be adversely impacted by the connection of the Cote Lake Mine."
