CERTIFICATION OF EVIDENCE

As President & CEO of Fort Frances Power Corporation, I certify that, to the best of my knowledge,

the evidence filed in Fort Frances Power Corporation's 2019 IRM application is accurate,

consistent and complete. The filing is consistent with the requirements from Chapter 3 of the

Ontario Energy Board's Filing Requirements For Electricity Distribution Rate Applications revised

on July 12, 2018.

Fort Frances Power Corporation has assessed internal controls and processes, and to the best of

my knowledge, has sufficient controls in place to ensure accuracy, consistency and completeness

in the preparation, review, verification and oversight of any account balances requested for

disposal, including regular monthly/quarterly reviews and annual third party auditor reviews.

MANAGER'S SUMMARY

Introduction

Fort Frances Power Corporation ("FFPC") owns and operates the electricity distribution system

located within the municipal boundaries of the Town of Fort Frances.

FFPC filed a complete cost of service application EB-2013-0130 with the Ontario Energy Board

(the "Board") on February 14, 2014 under section 78 of the Ontario Energy Board Act, 1998, S.O.

1998, c. 15, (Schedule B), seeking approval for changes to the rates that FFPC charges for

electricity distribution, to be effective May 1, 2014. On August 14, 2014, the Board issued its

Decision and Order ("the Decision") in regards to FFPC's 2014 cost of service rate application.

This application is FFPC's fifth Electricity Distribution Rate application under the Board's 4th

Generation Incentive Rate-setting Methodology, now named 'Price Cap IR'. FFPC is applying for

an Order or Orders approving the proposed distribution rates as set out in Appendix B of this

Application and believes the rates and charges to be just and reasonable pursuant to Section 78

of the OEB Act.

FFPC has relied on Chapter 3 of the Ontario Energy Board Filing Requirements for Electricity

Distribution Rate Applications dated July 12, 2018, Handbook for Utility Rate Applications date

October 13, 2016, The Report of the Board on Electricity Distributors' Deferral and Variance

Account Review Initiative ("the EDDVAR Report") issued July 31, 2009, the Electricity Distribution

Retail Transmission Service Rates Guideline G-2008-001, Revision 4.0, issued June 28, 2012 ("RTSR

Guidelines") the "Guidance on Wholesale Market Service Accounting for Capacity Based Demand

Response (CBDR) and new IESO Charge Type 9920", issued March 29, 2016 and the "Guidance on

the Disposition of Accounts 1588 and 1589", issued May 23, 2017 in order to prepare this

application.

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 6 of 16

September 24, 2018

In the event that the Board is unable to provide a Decision and Order in this Application for

implementation by the Applicant as of May 1, 2019, FFPC requests that the Board issue an Interim

Rate Order declaring the current Distribution Rates and Specific Service Charges as interim until

the decided implementation date of the approved 2019 distribution rates.

The Applicant requests that this 4th Generation Price-Cap IR Application be disposed of by way of

a written hearing.

In the preparation of this application, FFPC used the Board's 2019 rate model, which consists of

the following Excel-based files:

• 2019 IRM Rate Generator (Version 2.0) – updated July 24, 2018

Account 1595 Analysis Work Form – updated July 18, 2018

• GA Analysis Work Form

The rates and other adjustments being applied for and as calculated through the use of the above

models include the following:

• An Annual Price Cap Index Adjustment in accordance with Chapter 3 of the Ontario Energy

Board Filing Requirements for Electricity Distribution Rate Applications, issued July 12, 2018.

• An adjustment of Retail Transmission Service Rates established in accordance with Board

Guideline G-2008-001 – Electricity Distribution Retail Transmission Service Rates, issued October

22, 2008 and with revisions up to June 28, 2012 (Revision 4.0), along with updates to the Uniform

Transmission Rates (January 18, 2011, January 1, 2012, January 1, 2013, January 1, 2014 January

1, 2015, January 1, 2016, January 1, 2017, September 28, 2017 and February 1, 2018).

• Deferral and Variance Account Balances Group 1 Recovery Rate Riders in accordance with

Chapter 3 of the Ontario Energy Board Filing Requirements for Electricity Distribution Rate

Applications, issued July 20, 2017 and The EDDVAR Report issued July 31, 2009. FFPC is not

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 7 of 16

September 24, 2018

requesting disposition of Deferral and Variance Account Balances Group 1 as the threshold was

not met. FFPC only requests the continuation of rates previously approved by the Board in the

rate order EB-2013-0130 issued on September 1, 2014, that have not reached their sunset date

as of May 1, 2019, the proposed effective date of this application. These rates include:

• The continuation of the rate rider for the disposition of Account 1576.

2. Distributor's Profile

Fort Frances Power Corporation (FFPC) is a not-for-profit local distribution company whose sole

shareholder is the Corporation of the Town of Fort Frances. FFPC operates under a rate

minimization philosophy that balances necessary distribution system maintenance and re-

investment, to provide its customers with safe and reliable service at the lowest possible rates.

FFPC currently has no debt and operates at a zero percent rate-of-return, in the best interest of

its consumers.

FFPC is unique as its customers, precisely the residents and small businesses of the Town of Fort

Frances, are beneficiaries of a historic 1905 Agreement entered into between the Town and the

local pulp and paper mill. The 1905 Agreement obligates the mill owner, or more precisely today,

the owner of the generation assets on the Rainy River (currently H2O Power LP ("H2O"), to

provide to the Town of Fort Frances, in perpetuity, 4,000 horsepower (2.984 Megawatts) at \$14

per horsepower per annum (0.21416 cents per kilowatt hour) "for municipal purposes and for

public utilities" [Fort Frances v Boise Cascade Canada Ltd., [1983] 1 SCR 171 at 184].

The 1905 Agreement is filed as a physical bilateral contract with the IESO and represents a

financial obligation of H2O. Essentially, for 2.984 Megawatts, which represents approximately

25% of the power purchases of FFPC, H2O pays to the IESO the additional costs of power above

0.21416 cents per kilowatt hour, and the IESO credits FFPC for that amount. FFPC in turn credits

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 8 of 16

September 24, 2018

its customers who, in effect, pay a blended commodity rate reflecting the benefit of the 1905

Agreement. The amount of the benefit currently exceeds \$2.2 million annually.

The information regarding the historic 1905 agreement is provided to describe FFPC's operating

philosophy and should further information be required; please consult FFPC's 2014 Cost of

Service rate application EB-2013-0130, Exhibit 1, Executive Summary.

3. Publication Notice

FFPC is proposing that notices related to this Application appear in the Fort Frances Times

publication. The Fort Frances Times has approximately 2,800 paid newspaper subscriptions

throughout FFPC's licensed service territory.

An on-line publication is also available online at http://www.fftimes.com/.

4. Annual Adjustment Mechanism

As per Board policy (Chapter 3), distribution rates are to be adjusted according to the Annual

Price Cap Adjustment Mechanism as presented through the Board's Rate Generator model. The

calculation would be based on the annual percentage change in the inflation factor (currently set

at 1.20%) less an X-Factor comprised of a productivity factor (currently set at 0.0%) and the

stretch factor placement of FFPC within the Group Three (currently set at 0.30%). The Price Cap

Adjustment is therefore set by default in the model to 0.9%.

FFPC understands that as the Board will be establishing the final inflation factor, productivity

factor and stretch factor, that Board staff will update each distributor's Rate Generator model

with the final parameters during the application review process.

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 9 of 16 September 24, 2018

While the price factor adjustment under this application would apply to fixed and volumetric distribution rates for FFPC, the following rates will not be affected:

- Rate Adders
- Rate Riders
- Low Voltage Service Charges
- Retail Transmission Service Rates
- Wholesale Market Service Rate
- Rural Rate Protection Charge
- Standard Supply Service Administrative Charge
- microFIT Service Charge
- Specific Service Charges
- Transformation and Primary Metering Allowances
- Smart Meter Entity Charge

5. Revenue to Cost Ratio Adjustments

As a result of FFPC's recent 2014 Cost of Service Rate Application (EB-2013-0130), there are no changes requested to the current revenue-to-cost ratios.

6. Rate Design for Residential Electricity Customers

On April 2, 2015, the OEB released its Board Policy: *A New Distribution Rate Design for Residential Electricity Customers* (EB-2014-0210) which stated that electricity distributors will transition to a fully fixed monthly distribution service charge for residential customers. This will be implemented over a period of four years, beginning in 2016. Distributors were expected to propose changes to residential rates consistent with this policy, while also taking into account matters such as

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application

> Page 10 of 16 September 24, 2018

mitigating bill impacts for customers. As per this directive, FFPC has followed the approach set

out in sheet 16 of the rate generator model, continuing to transition to a fully-fixed monthly

service charge. In addition, FFPC has analyzed its Residential class of consumers to determine

the 10th percentile and the effect that continuing the transition to the new rate design will have

on them.

FFPC was able to compile a listing of all active 2017 residential customer locations (meter

locations) through a billing system export, containing monthly consumption totals and annual

consumption totals for each customer location. This listing captured consumption data for the

entire 2017 calendar year, representing 100% of FFPC's 2017 Active Residential customer base.

FFPC feels that all customers are fairly represented and that a prudent 10th percentile was

established with the approach of utilizing data from 100% of its Residential customer base over

an entire consumption year.

FFPC notes that the raw data set contained 3,624 active customer locations, with 288 being

duplicates due to customers moving to and from various locations. In other words, more than

one customer occupied a customer location over the course of the calendar year resulting in the

annual consumption being split across various customers. For these 288 duplicates, FFPC

summed the monthly consumptions of the various customers that occupied any particular

customer location to compute the total annual consumption. At the time of the billing system

export, FFPC had a total of 3,273 unique active customer locations (meters), which compares to

an approved billing determinant of 3,290 residential customers from FFPC's 2014 Cost of Service

application. The customer counts are almost identical.

FFPC calculated the average monthly kWh consumption by dividing the total annual consumption

for each unique customer location by the number of months over which the consumption was

accrued.

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 11 of 16 September 24, 2018

Utilizing this approach FFPC established the 10th percentile to be 325kWh with a corresponding total bill impact of 4.51% at this usage level which is below the 10% bill impact threshold as set by the OEB. As a result, FFPC requests to continue and finalize the implementation with year 4 of the rate design change to fixed residential distribution rates.

Table 1: Rate Design Transition – Year 4 (Final) Proposal

7. Retail Transmission Service Rates (RTSR)

In reference to Board Guideline G-2008-001 – *Electricity Distribution Retail Transmission Service Rates,* issued October 22, 2008 and with revisions up to June 28, 2012 (Revision 4.0), FFPC is applying for an adjustment of its Retail Transmission Service Rates based on a comparison of historical transmission costs adjusted for new UTR levels and revenues generated from existing RTSRs. This approach is expected to minimize variances in USoA Accounts 1584 and 1586.

FFPC used the 2019 RTSR Adjustment Worksheet within the 2019 IRM Rate Generator model to determine the proposed adjustments to the current Retail Transmission Service Rates approved in FFPC's 2018 IRM4 rate application EB-2017-0041.

FFPC understands that the worksheet reflects the most current UTRs approved by the Board (EB-2017-0359, issued on February 1, 2018, and effective January 1, 2018). FFPC further understands that Board staff will update each distributor's 2019 RTSR worksheet within the Rate Generator to incorporate UTR adjustments approved for 2019.

FFPC used the most recent non-loss adjusted billing determinants from the 2017 RRR filing data. Table 2 below features the RTSR billing determinants used in the model.

Table 2: RRR 2.1.5 – Performance Based Regulation (Table 3) for 2017 annual consumption

8. Review and Disposition of Group 1 Deferral/Variance Accts

Chapter 3 of the Board's Filing Requirements and the EDDVAR Report, provide direction that under 4th Generation IR, the distributor's Group 1 audited account balances are to be reviewed and disposed if the preset disposition threshold of \$0.001 per kWh (debit or credit) is exceeded. As of December 31, 2016 Distributors must file Group 1 balances in their application to determine if the threshold has been met.

FFPC completed Board Staff's 2019 IRM Rate Generator — Tab 3: 'Continuity Schedule', the threshold test resulted in a regulatory refund of -\$0.0004 per kWh; FFPC's DVA balances do not meet the disposition threshold, as such, FFPC is not requesting to dispose of its Group 1 DVA balances. FFPC is also writing off the residual balances Account 1595 Disposition and Recovery/Refund of Regulatory Balances interest balances for 2014 and 2015, -\$582 and -\$83 respectively. FFPC also completed the 1595 Analysis Work Form in live Microsoft Excel Format as per Appendix A of the "Filing Requirements for Electricity Distribution Rate Applications — Chapter 3 Incentive Rate-Setting Applications". FFPC has also included the completed 1595 Analysis Work Form in Appendix E.

9. Global Adjustment

Section 3.2.5.2 of Chapter 3 of the Board's Filing Requirements for Electricity Distribution Rate

Applications – 2017 Edition for 2018 Rate Applications states "a distributor must support their GA

claims with a description of their settlement process with the IESO or host distributor. This

description is only required to be submitted if an aspect of the description has changed since

previously filed or has not been previously filed in an application". FFPC notes that no GA

settlement process changes were made to those described in its previous IRM Application EB-

2016-0071 or IRM Application EB-2017-0041.

Section 3.2.5.2 also describes the GA Analysis Work Form, "Starting for 2018 rate applications,

all distributors must complete the GA Analysis Work Form. The new work form will help the OEB

assess if the annual balance in Account 1589 is reasonable." FFPC has completed and included

the GA Analysis Work Form in Appendix F.

10. LRAM Variance Account

FFPC disposed of its LRAM variance account as part of its 2014 Cost of Service Application (EB-

2013-0130). FFPC will not be applying for disposition of LRAMVA in this application and the

balance has not been included in the Continuity Schedule. FFPC expects to include the 1568

LRAMVA account for disposition in a future IR application upon the accrual of a material balance.

Fort Frances Power Corporation EB-2018-0033 IRM4 Rate Application Page 15 of 16

September 24, 2018

11. Shared Tax Savings

As part of FFPC's 2014 Cost of Service rate rebasing process, the Board approved FFPC's

Corporate Tax Rate to be 0%, in order to recognize its unique "not-for-profit" operating model.

Accordingly, FFPC does not have a Corporate Tax Expense included as part of its rate base.

As the Sharing of Tax Amount (50%) does not apply to FFPC, the "STS - Tax Change" and "Shared

Tax - Rate Ride" tabs of the rate generator were not completed, as they do not apply to this

application.

12. Incremental Capital Module

FFPC is not applying for incremental capital relief during the IRM term within this application.

13. Z-Factor Claims

FFPC is not applying for Z-Factor cost claims within this application.

14. Specific Service Charge, Allowances and Loss Factors

FFPC is requesting the continuation of current Specific Service Charges, Allowances, and Loss

Factors as approved by the Board (EB-2013-0130).

15. MicroFIT Generator Service Charge

FFPC is requesting the continuation of the current monthly service charge of \$5.40 as previously

approved by the Board (EB-2013-0130).

16. Current Tariff Sheets

FFPC's current tariff sheets are provided in Appendix A of this application.

17. Proposed Tariff Sheets

FFPC's proposed tariff sheets are provided in Appendix B of this application. FFPC has also submitted an Excel version of Proposed Tariff Sheets along with this submission.

18. Bill Impact Summary

FFPC's Bill Impact calculations are provided in Appendix C.

Table 7: Bill Impacts on Proposed May 1, 2019 rates

Rate Class	Bill Impact	Quantity	Bill Calculation Total		Differe	nce
	kWh	kW	Current	Proposed	\$	%
Residential	750		\$112.02	\$113.89	\$1.87	1.67%
Residential - 10th percentile	327		\$67.15	\$70.18	\$3.03	4.51%
GS<50 kW	2,000		\$273.22	\$276.15	\$2.93	1.07%
GS 50 to 4,999 kW	31,800	100	\$5,095.50	\$5,150.35	\$54.85	1.08%
Unmetered Scattered Load	800		\$394.57	\$397.27	\$2.70	0.69%
Street Lighting	28,100	96	\$6,627.79	\$6,648.96	\$21.18	0.32%

The proposed rates will result in a slight rate increase of 1.67% to Residential customers, 1.07% to General Service Less than 50 kW customers, 1.08% to General Service 50 to 4,999 kW customers, 0.69% to Unmetered Scattered Load customers, 0.32% to Street Lighting customers and an increase of 4.51% for Residential in the 10th Percentile. Rate impacts for FFPC customers are essentially due to Price Cap Index calculation and the final year of the Rate Design Transition for Residential Customers as FFPC is not applying to dispose of Group 1 balances.

RESIDENTIAL SERVICE CLASSIFICATION

This section governs all services intended to supply electrical energy to buildings or sections of building devoted to living quarters such as houses, living accommodations at the rear of stores, self-contained and individually metered suites. These services are commonly referred to as Residential or Domestic Services. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of Ontario Energy Board, and amendments thereto as approved by Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments, or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

APPENDIX C

Bill Impacts

Incentive Regulation Model for 2019 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filling Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2017 of \$0.1101/kWh (IESO's Monthly Market Report for May 2017, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

If you have identified any issues, please contact the OEB.

If a distributor uses the actual GA price to bill non-RPP Class B customers for an entire rate class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refunded the general GA rate rider as they did not contribute to the GA balance.

Please contact the OEB to make adjustments to the IRM rate generator for this situation.

Threshold Test

Total Claim (including Account 1568)

Total Claim for Threshold Test (All Group 1 Accounts)

Threshold Test (Total claim per kWh) ²

As per Section 3.2.5 of the 2019 Filing Requirements for Electricity Distribution Rate Applications, an applicant may elect to dispose of the Group 1 account balances below the threshold. If doing so, please select YES from the adjacent drop-down cell and also indicate so in the Manager's Summary. If not, please select NO.

(\$26,451) (\$26,451)

(\$0.0004) Claim does not meet the threshold test.

¹ Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

1568 Account Balance from Continuity Schedule 0
Total Balance of Account 1568 in Column S matches the amount entered on the Continuity Schedule

² The Threshold Test does not include the amount in 1568.

³ The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

No input required. This workshseet allocates the deferral/variance account balances (Group 1 and 1568) to the appropriate classes as per EDDVAR dated July 31, 2009

^{**} Used to allocate Account 1551 as this account records the variances arising from the Smart Metering Entity Charges to Residential and GS<50 customers.

Input required at cells C13 and C14. This worksheet calculates rate riders related to the Deferral/Variance Account Disposition (if applicable) and rate riders for Account 1568. Rate Riders will not be generated for the microFIT class.

¹ When calculating the revenue reconciliation for distributors with Class A customers, the balances of sub-account 1580-CBR Class B will not be taken into consideration if there are Class A customers since the rate riders, if any, are calculated separately.

² Only for rate classes with WMP customers are the Deferral/Variance Account Rate Riders for Non-WMP (column H and J) calculated separately. For all rate classes without WMP customers, balances in account 1580 and 1588 are included in column G and disposed through a combined Deferral/Variance Account and Rate Rider.

Columns E and F have been populated with data from the most recent RRR filing. Rate classes that have more than one Network or Connection charge will notice that the cells are highlighted in green and unlocked. If the data needs to be modified, please make the necessary adjustments and note the changes in your manager's summary. As well, the Loss Factor has been imported from Tab 2.

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed.

If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, plead couble check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

In the Green Cells below, enter any proposed rate riders that are not already included in this model (e.g.: proposed ICM rate riders). Please note that existing SMIRR and SM Entity Charge do not need to be included below.

In column A, the rate rider descriptions must begin with "Rate Rider for".

In column B, choose the associated unit from the drop-down menu.

In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.

In column C, enter the expiry date (e.g. April 30, 2020) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).

In column G, choose the sub-total as applicable in the bill impact calculation from the drop-down menu.

***Data to agree with RRR filings, as applicable. Please refer to RRR Filing 2.1.5.4 to populate data.

Note that RRR data is used in this workform as a reasonability check to benchmark against billed consumption over the recovery period. There may be differences due to unbilled revenue accruals, recovery period dates, or other factors. However, any substantial deviations between billed consumption that the rider was applied against and billed consumption reported in RRR can be an indicator of rider misallocations or errors in the data used in the workform.
