I support Hydro One building the new power line east of Thunder Bay (the Lake Superior Link). They propose to build it much cheaper than Nextbridge and their environmental footprint will be less. They have a solid track record in Ontario and are partly owned by the people of Ontario, including indigenous people who received a ton of shares in Hydro One. I am not concerned about the additional time involved and do not believe that indigenous people should get any priority for jobs on this project. Hiring and contracts should be merit based; not race based.
