

Northern Ontario Wires Inc. 153 Sixth Avenue Cochrane, ON POL 1C0

October 24, 2018

Ms. Kirsten Walli Board Secretary Ontario Energy Board P.O. Box 2319 2300 Yonge Street, 27th Floor Toronto, ON M4P 1E4

Re: 2019 IRM Application EB-2018-0058

Dear Ms. Walli:

Northern Ontario Wires Inc. hereby submits 2019 IRM Application for rates effective May 1, 2019.

An electronic copy has been submitted to the Board through the RESS system, and two hard copies will be delivered to the OEB office.

This document is being filed pursuant to the Board's e-Filing Services.

Yours Truly,

#### NORTHERN ONTARIO WIRES INC.

Geoffrey Sutton, CPA, CA Chief Financial Officer

#### **Legal Application**

#### ONTARIO ENERGY BOARD

IN THE MATTER OF the Ontario Energy Board Act, 1998, S.O.1998, c.15 (Sched. B)

 AND IN THE MATTER OF an Application by Northern Ontario Wires Inc. for an Order or Orders pursuant to section 78 of the *Ontario Energy Board Act, 1998* for 2019 distribution rates and related matters.

The Applicant is Northern Ontario Wires Inc. ("NOW Inc."). NOW Inc. is a licensed electricity distributor operating pursuant to license <u>ED-2003-0018</u>. NOW Inc. distributes electricity to approximately 6,000 customers in the Town of Cochrane, Town of Iroquois Falls and Town of Kapuskasing and charges Board-authorized rates (EB-2017-0066) for the distribution service it provides.

  NOW Inc. hereby applies to the Ontario Energy Board (the "Board") for an order or orders made pursuant to Section 78 of the Ontario Energy Board Act, 1998, as amended, (the "OEB Act") approving just and reasonable rates for the distribution of electricity based on a 2019 4<sup>th</sup> Generation Incentive Rate-setting ("4GIR") application, effective May 1, 2019.

3. Specifically, NOW Inc. hereby applies for an order or orders granting distribution rates updated and adjusted in accordance with Chapter 3 of the Filing Requirements for Transmission and Distribution Applications updated July 12, 2018 ("Filing Requirements"), including the following:

 a. an adjustment to the retail transmission service rates as provided in Guideline (G-2008-0001) on Retail Transmission Service Rates – October 22, 2008 (Revision 4.0 June 28,2012);

 b. The continuation of all other Specific Service Charges, Retail Service Charges and Loss Factors as approved in the 2017 Cost of Service Application EB-2016-0096.

4. This Application is supported by written evidence that may be amended from time to time, prior to the Board's final decision on this Application.

File Number: EB-2018-0058 Exhibit: Tab: 1 Schedule: 2 2 of 2 Page:

October 24, 2018

Date Filed:

5. In the event that the Board is unable to provide a Decision and Order in this Application for implementation by the Applicant as of May 1, 2019, NOW Inc. requests that the Board issue an Interim Rate Order declaring the current Distribution Rates and Specific Service Charges as interim until the decided implementation date of the approved 2019 distribution rates.

5 6 7

8

9

1

2

3

4

6. In the event that the effective date does not coincide with the Board's decided implementation date for 2019 distribution rates and charges, NOW Inc. requests permission to recover the incremental revenue from the effective date to the implementation date.

10 11 12

7. The Applicant requests that, pursuant to Section 34.01 of the Board's Rules of Practice and Procedure, this proceeding be conducted by way of written hearing.

13 14 15

8. The Applicant requests that a copy of all documents filed with the Board in this proceeding be served on the Applicant as follows:

#### Manager's Summary

2

1

3 Northern Ontario Wires Inc. ("NOW Inc.") hereby submits a complete application for the 4 approval of distribution rates proposed to be effective May 1, 2019 under the 2019 4th 5 Generation Incentive Rate-setting mechanism ("4GIR").

6 7

For purposes of the 2019 4GIR application, NOW Inc. has relied upon the following OEB issued documents and guidelines:

8 9

10

11

12

13

14

15

- Chapter 3 of the Filing Requirements for Transmission and Distribution Applications updated on July 12, 2018 ("Filing Requirements")
- Guideline (G-2008-0001) on Retail Transmission Service Rates October 22, 2008 (Revision 4.0, June 28, 2012) known as ("RSTR Guidelines")
  - Guidelines for Electricity Distributor Conservation And Management EB-2016-0182, dated May 19, 2016

16 17

Listed below are the specific items to be addressed in the Manager's Summary and reflected in the 4GIR models:

18 19

20

21

- 1. Overview
- 2. Shared Tax Savings
- 22 3. Retail Transmission Service Charges
- 4. Price Cap Adjustment 23
- LRAM Variance Account ("LRAMVA") 24
- 6. Global Adjustment 25
- 7. Proposed Deferral and Variance Account Balance Disposition 26
- 8. Proposed Rates and Bill Impacts 27

 File Number:
 EB-2018-0058

October 24, 2018

Date Filed:

1

2

#### 1. Overview

3 NOW Inc.'s last Cost of Service application was filed under application number EB-2016-0096

- 4 for rates effective May 1, 2017. A full settlement was reached by all parties and the OEB issued
- 5 a Decision and Rate Order on March 23, 2017. NOW Inc.'s last IRM application was filed under
- 6 application EB-2017-0066 for rates effective May 1, 2018. The OEB issued a Decision and
- 7 Rate Order on March 22, 2018.

8

Below is a list of the key items related to NOW Inc.'s 2017 rate application and NOW Inc.'s 2018 4GIR which form the basis for the 2019 4GIR.

10 11

12

13

16

17

18

- NOW Inc. is following the International Financial Reporting Standards (IFRS) since January 1, 2015.
- The revenue-to-cost ratios require no further adjustments through the 4GIR period.
  - NOW Inc. disposed of Group 1 Deferral/Variance accounts in the 2018 IRM application. For the 2019 IRM application, NOW Inc. is proposing to dispose of Group 1 Deferral/Variance accounts.

19 20

There are no outstanding Board Orders affecting this current application.

2122

The billing determinants that were pre-populated in the models have been verified and are accurate.

2425

26

27

23

NOW Inc.'s transition to fully fixed distribution revenue charge for residential customers will be completed in this application. There is no mitigation required, as the change is within the \$4 impact threshold and bill impacts for the 10<sup>th</sup> percentile customer is below 10% bill impact.

 File Number:
 EB-2018-0058

 Exhibit:
 1

 Tab:
 1

 Schedule:
 5

 Page:
 3 of 9

Date Filed: October 24, 2018

- 1 This Application will affect all ratepayers in NOW Inc.'s service territory. The total bill impacts
- 2 are proposed to be less than 0.67% for all rate classes with the exception of the Residential
- 3 customers at the 10th percentile which will have an impact of approximately 2.88%.

#### 2. Tax Change

- 5 NOW Inc.'s corporate tax rate included in its 2017 Cost of Service Application is 15.0%. The
- 6 rate effective in 2019 is anticipated to be 12.5%.

7

4

- 8 The OEB has determined that under a 4GIR plan, a 50/50 sharing of the impact of currently
- 9 known legislated tax changes as applied to the tax level reflected in the Board approved base
- 10 rates for a distributor applies.

11

- 12 Currently, there is a variance between the current corporate tax rate of 12.5% and the 15%
- 13 embedded in NOW Inc.'s base rates. NOW Inc. has completed the Board's 2018 Tax Sharing
- 14 Model included in the Rate Generator Model attached as Appendix 2. The allocated tax sharing
- amount does not produce a rate rider, as such NOW Inc. will transfer the \$4,087 credit balance
- to the 1595 account for disposition at a later date if approved.

17

18

#### 3. Retail Transmission Service Rates

- 19 NOW Inc. is charged retail transmission service rates by both the Independent Electricity
- 20 System Operator ("IESO"), and by Hydro One Networks, and in turn has established approved
- 21 rates to charge customers in order to recover those expenses.

22

- 23 The OEB provided IRM model compares the current retail transmission costs and retail
- 24 transmission revenues to the projected transmission costs. NOW Inc. has completed the model
- 25 utilizing the best available information; NOW Inc. acknowledges that the rates are expected to
- 26 be updated with potential changes to one, or both, of the IESO or Hydro One transmission
- 27 service rates.

 Tab:
 1

 Schedule:
 5

 Page:
 4 of 9

October 24, 2018

Date Filed:

1 Those updates will be incorporated into this application prior to a final decision by the Board.

2 The billing determinants used for calculation of the RTSR rates are the most recent billing

determinants as reported in 2.1.5 of the RRR fillings for the year end December 31, 2017. The

loss factor of 1.0694 is used in Tab 20 of the IRM model as this is the approved loss factor

applicable in Now Inc.'s recent 2017 Cost of Service application. NOW Inc. applied this loss

factor as it will be the loss factor applied to customer billing in 2019.

For purposes of this application NOW Inc. proposes to use the following rates as generated by

9 the 2019 IRM OEB model as filed with this application.

Rate Class	Rate Description	Unit	Proposed Retail
			Transmission
			Rate
RESIDENTIAL	Retail Transmission Rate - Network Service Rate	\$/kWh	0.0061
RESIDENTIAL	Retail Transmission Rate - Line and	\$/kWh	0.0032
	Transformation Connection Service Rate		
GENERAL SERVICE LESS	Retail Transmission Rate - Network Service Rate	\$/kWh	0.0058
THAN 50 KW			
GENERAL SERVICE LESS	Retail Transmission Rate - Line and	\$/kWh	0.0030
THAN 50 KW	Transformation Connection Service Rate		
GENERAL SERVICE 50 TO	Retail Transmission Rate - Network Service Rate	\$/kW	2.3358
4,999 KW			
GENERAL SERVICE 50 TO	Retail Transmission Rate - Line and	\$/kW	1.1749
4,999 KW	Transformation Connection Service Rate		
UNMETERED SCATTERED	Retail Transmission Rate - Network Service Rate	\$/kWh	0.0058
LOAD			
UNMETERED SCATTERED	Retail Transmission Rate - Line and	\$/kWh	0.0030
LOAD	Transformation Connection Service Rate		
STREET LIGHTING	Retail Transmission Rate - Network Service Rate	\$/kW	1.7618
STREET LIGHTING	Retail Transmission Rate - Line and	\$/kW	0.9082
	Transformation Connection Service Rate		

#### 4. Price Cap Adjustment

Based on the current price cap parameters, the Rate Generator model reflects an adjustment of 1.2% to base distribution rates. That calculation is based on a price escalator of 1.2%, less a productivity factor of 0.0%, and less a stretch factor of 0.0%. NOW Inc. acknowledges that these

 Exhibit:
 1

 Tab:
 1

 Schedule:
 5

 Page:
 5 of 9

Date Filed: October 24, 2018

parameters will be adjusted by the Board in its final decision to reflect the updated price escalator, productivity factor and stretch factor.

3

4

#### 5. LRAM Variance Account

- 5 NOW Inc. is not proposing recovery of LRAMVA pertaining to CDM program activities. NOW
- 6 Inc. believes that the balance is insignificant at this time.

7

- 8 NOW Inc.'s 2017 Cost of Service application concluded the claim for LRAM for 2012, 2013 and
- 9 2014 programs with persistence to 2014.

10

11

#### 6. Global Adjustment

- 12 NOW Inc. uses the first estimate to bill customers and is applicable to all rate classes. The
- 13 monthly settlements are completed within four business days after month end. This entails
- 14 settling the difference between RPP Pricing and Spot rate. This is done with both Time of Use
- 15 (TOU) and conventional meters.

16

- 17 TOU Meters are read at month end based on the calendar month. There is no estimate for
- these meters as actual consumption is provided. The data is separated by off-peak, mid-peak,
- and on-peak. The amounts billed to customers are compared against the actual consumption at
- 20 the market rate and the difference is reported and settled with the IESO.

21

- 22 Conventional meters are read on the first of the month so no estimation is required. The
- 23 consumption is allocated to the two tiers. The amount charged at fixed rates is then compared
- 24 against the market rate and settled with the IESO.

- 26 NOW Inc. allocates the Class B Global Adjustment line from the IESO invoice based on the
- 27 percentage of billed RPP consumption in comparison to the total billed consumption. The RPP
- 28 portion is allocated to account 4705 Power and the remaining portion which relates to non-
- 29 RPP customers is allocated to account 4707 Global Adjustment.

 File Number:
 EB-2018-0058

 Exhibit:
 1

 Tab:
 1

 Schedule:
 5

 Page:
 6 of 9

 Date Filed:
 October 24, 2018

NOW Inc.'s first Class A customer transitioned in 2017. The Class A consumption has been excluded from the allocation methodology.

As part of the RPP settlement process, NOW Inc. provides estimates to the IESO based on historical consumption and true up the consumption monthly as a part of its settlement true up process as described below. The actual data is available in the subsequent month's billing batches.

NOW Inc.'s true up process is completed monthly. This entails aligning the consumption months to the proper rate months and calculating the variance using the actual GA rate versus what was originally submitted. The true ups are then recorded when submitted to the IESO. NOW Inc. acknowledges the guidance on disposition in the OEB letter dated May 23, 2017, *Guidance on the Disposition of Accounts 1588 and 1589* and has incorporated the guidance into operations.

 NOW Inc.'s internal controls into validating consumption figures is to review the reconciliation and true up workbooks compared to actual data. The GA Analysis workbook is used to evaluate potential discrepancies. Additionally, a variance reconciliation spreadsheet for accruals is completed and recorded to ensure accuracy of ledger accounts.

NOW Inc. has completed the GA Analysis workform to help assess the annual balance in Account 1589. The workform contains the explanations of the reconciling items. The main reconciling items include the variance calculated resulting from the RPP/Non-RPP consumption split which has been adjusted in the DVA through and adjustment for 2017 balances for (\$252,264). This split adjustment removes the Class A consumption from the split calculation for NOW Inc.'s first Class A customer. Manual adjustments to the GA charged on the IESO invoice were also included as a reconciling item for \$37,875 which offsets (\$39,660) item that is awaiting correction from the IESO for an identified GA variance for December 2017. The Unresolved difference of \$2,543 is not material as it is 0.0% of the expected GA Payments

to the IESO.

 File Number:
 EB-2018-0058

 Exhibit:
 1

 Tab:
 1

 Schedule:
 5

 Page:
 7 of 9

Date Filed: October 24, 2018

#### 7. Proposed Deferral and Variance Accounts

2 NOW Inc. is proposing to dispose of Group 1 audited balances as of December 31, 2017. The

3 balance in the Group 1 accounts (Accounts 1550, 1551, 1580, 1584, 1586, 1588, 1589, and

1595) is a credit of \$107,734 to be disposed over one year.

5

7

9

10

4

1

6 Although the balance in the Group 1 accounts does not meet the threshold test, NOW Inc. is

electing to dispose of the 2017 balances in order to simplify the impact for transitioning Class A

8 customers. NOW Inc. proposes to refund the transitional portion of the Class B GA and CBDR

to the Class A customer on a one-time invoice rather than monthly. The GA allocation would be

\$3,826 for the year or \$319 per month. The CBR Allocation would be \$109 for the year or \$9 per

11 month.

1213

No adjustments were made to any deferral and variance account balances previously approved

14 by the OEB on a final basis.

15

16 There are three variances of note in Tab 3 Continuity Schedule in the Rate Generator Model.

17 The first is a known variance in BV23 as noted in OEB Slides in the 2018 IRM Process Updates

20170726 presentation relating to Wholesale Market Service Charge included in CBR Class B

sub-account. The amount of this variance is -\$8,616.

192021

22

24

18

The second variance results from and adjustment made to amend the RPP/Non-RPP split for

GA expenses. The adjustment represents a debit of \$252,264 to account 1588 with the

23 offsetting credit to 1589. The adjustment represents the allocation update for removing Class A

consumption from the RPP split calculation. The adjustment has been identified as a reconciling

25 item in the GA Analysis model.

26

29

27 The third variance results from an issue discovered with the IESO bill for December 2017. The

28 result was NOW Inc. being overbilled by 82,113 for Charge Type 148 Class B Global

Adjustment. This correction amount was split according to the December RPP split calculation

30 which results in a \$42,452 credit to 1588 and a \$39,661 credit to 1589.

 1

 Tab:
 1

 Schedule:
 5

 Page:
 8 of 9

October 24, 2018

Date Filed:

1

2 The net adjustment of \$82,114 is a result of the third variance.

- 4 The residual balance of account 1595 (2016) is being requested for disposition. The 1595
- 5 Analysis workform has been completed, the results of which determine that the residual balance
- 6 is not material. (Appendix 4)

File Number: EB-2018-0058
Exhibit: 1
Tab: 1

 1 Schedule:
 5

 Page:

Date Filed: October 24, 2018

The proposed rate riders for disposition are provided in the IRM model filed with this application, and summarized in the table below:

Rate Class	Unit	Deferral/Variance Account Rate Rider	Global Adjustment Rate Rider (kWh)
RESIDENTIAL	\$/kWh	(0.0005)	(0.0007)
GENERAL SERVICE LESS THAN 50 KW	\$/kWh	(0.0005)	(0.0007)
GENERAL SERVICE 50 TO 4,999 KW	\$/kW	(0.2130)	(0.0007)
UNMETERED SCATTERED LOAD	\$/kWh	(0.0007)	(0.0007)
STREET LIGHTING	\$/kW	0.0716	(0.0007)
microFIT			
Total			

4 NOW Inc.'s General Manager certifies that NOW Inc. has robust processes and internal controls

in place for preparation, review, verification and oversight of the account balances being

6 disposed.

#### 8. Bill Impacts

The rates proposed in this application are found at Appendix 2 – Rate Generator Model, and the detailed bill impacts by rate class are found at Appendix 5 – Bill Impacts.

9

11

12

13 14

15

16

17

18 19

3

5

7

8

Analyzing residential bill impacts by examining the impact on a bill on the 10<sup>th</sup> percentile of consumption, it was determined that the 10<sup>th</sup> percentile figure is 204 kWh. In order to derive the 10<sup>th</sup> consumption percentile, NOW Inc. utilized consumption data for all residential customers for the period of January 1, 2018 to September 30, 2018. The monthly consumption for individual accounts were averaged to obtain a monthly average consumption per account. The accounts were sorted from highest consumption to lowest. Utilizing NOW Inc.'s residential customer count, the 10<sup>th</sup> percentile was determined by isolating the top 90<sup>th</sup> percentile of accounts which resulted in the consumption level for the lower 10<sup>th</sup> percentile. The results using the most recent 2018 data was then compared to 2017 data and found to be reasonable.

Appendix 1 - Decision and Order EB-2017-0066

## Ontario Energy Board Commission de l'énergie de l'Ontario

#### **DECISION AND RATE ORDER**

EB-2017-0066

#### NORTHERN ONTARIO WIRES INC.

Application for rates and other charges to be effective May 1, 2018

By Delegation, Before: Pascale Duguay

March 22, 2018

#### 1 INTRODUCTION AND SUMMARY

Through this Decision and Order, the Ontario Energy Board (OEB) approves the incentive rate-setting mechanism (IRM) application filed by Northern Ontario Wires Inc. (Northern Ontario Wires) on November 2, 2017, as amended during the course of the proceeding.

Northern Ontario Wires serves about 6,100 mostly residential and commercial electricity customers in the Town of Cochrane, Town of Iroquois Falls and Town of Kapuskasing. The company is seeking the OEB's approval for the rates it charges to distribute electricity to its customers, as is required of licenced and rate-regulated distributors in Ontario.

A distributor may choose one of three rate-setting methodologies approved by the OEB. Each of these is explained in the OEB's <u>Chapter 3 Filing Requirements for Incentive</u>
<u>Rate-Setting Applications</u> (the Filing Requirements).

Northern Ontario Wires' application is based on a Price Cap Incentive Rate-setting option (Price Cap IR) with a five-year term. The Price Cap IR option involves the setting of rates through a cost of service (COS or rebasing) application in the first year. Mechanistic price cap adjustments, based on inflation and the OEB's assessment of the distributor's efficiency, are then approved through IRM applications in each of the ensuing four (adjustment) years.

As a result of the OEB's findings in this Decision, there will be a monthly bill increase of \$0.19 for a residential customer consuming 750 kWh, effective May 1, 2018.

Northern Ontario Wires has also applied to change the composition of its distribution service rates. Residential distribution service rates currently include a fixed monthly charge and a variable usage charge. In 2015, the OEB issued a policy to transition these rates to a fully fixed structure over a four-year period beginning in 2016. Accordingly, the fixed monthly charge for 2018 has once again been adjusted upward in this Decision by more than the mechanistic price cap adjustment alone. The variable usage rate is commensurately lower. This policy change does not affect the total revenue that distributors collect from residential customers.

#### 2 THE PROCESS

<sup>&</sup>lt;sup>1</sup> OEB Policy – "A New Distribution Rate Design for Residential Electricity Customers." EB-2012-0410, April 2, 2015.

This Decision is being issued by delegated authority, without a hearing, under section 6 of the *Ontario Energy Board Act*, 1998 (the OEB Act).

The OEB follows a standardized and streamlined process for IRM applications filed under Price Cap IR. In each adjustment year of a Price Cap IR term, the OEB prepares a Rate Generator Model that includes information from the distributor's past proceedings and annual reporting requirements. A distributor will then review and complete the Rate Generator Model and include it with its application. During the course of the proceeding, the Rate Generator Model will also be updated or corrected, as required.

The Rate Generator Model updates base rates, retail transmission service rates and, if applicable, shared tax saving adjustments. It also calculates rate riders for the disposition of deferral and variance account balances.

Northern Ontario Wires filed its application on November 2, 2017, under section 78 of the OEB Act and in accordance with the Filing Requirements. Northern Ontario Wires supported its application with written evidence and a completed rate model. Questions were asked of, and answers were provided by, Northern Ontario Wires through emails and phone calls with the OEB. Based on this information, a draft decision was prepared and provided to Northern Ontario Wires on February 27, 2018. Northern Ontario Wires was given the opportunity to provide its comments on the draft for consideration prior to the OEB issuing this Decision.

#### 3 ORGANIZATION OF THE DECISION

In this Decision, the OEB addresses the following issues, and provides reasons for approving or denying Northern Ontario Wires' proposals relating to each of them:

- Price Cap Adjustment
- Retail Transmission Service Rates
- Group 1 Deferral and Variance Accounts
- Residential Rate Design
- Other Matters

In the final section, the OEB addresses the steps to implement the final rates that flow from this Decision.

#### 4 PRICE CAP ADJUSTMENT

Northern Ontario Wires seeks to increase its rates, effective May 1, 2018, based on a

mechanistic rate adjustment using the OEB-approved inflation minus X-factor formula applicable to Price Cap IR applications.

The components of the Price Cap IR formula applicable to Northern Ontario Wires are set out in Table 4.1, below. Inserting these components into the formula results in a 1.20% increase to Northern Ontario Wires' rates: 1.20% = 1.20% - (0.00% + 0.00%).

**Table 4.1: Price Cap IR Adjustment Formula** 

	Components	Amount
Inflation Factor <sup>2</sup>		1.20%
V Footor	Productivity <sup>3</sup>	0.00%
X-Factor	Stretch (0.00% - 0.60%)4	0.00%

The inflation factor of 1.20% applies to all Price Cap IR applications for the 2018 rate year.

The X-factor is the sum of the productivity factor and the stretch factor. It is a productivity offset that will vary among different groupings of distributors. Subtracting the X-factor from inflation ensures that rates decline in real, constant-dollar terms, providing distributors with a tangible incentive to improve efficiency or else experience declining net income.

The productivity component of the X-factor is based on industry conditions over a historical study period and applies to all Price Cap IR applications for the 2018 rate year.

The stretch factor component of the X-factor is distributor specific. The OEB has established five stretch factor groupings, each within a range from 0.00% to 0.60%. The stretch factor assigned to any particular distributor is based on the distributor's total cost performance as benchmarked against other distributors in Ontario. The most efficient distributor would be assigned the lowest stretch factor of 0.00%. Conversely, a higher

<sup>&</sup>lt;sup>2</sup> Report of the OEB – "Rate Setting Parameters and Benchmarking under the Renewed Regulatory Framework for Ontario's Electricity Distributors." EB-2010-0379, December 4, 2013.

<sup>&</sup>lt;sup>3</sup> Ibid.

<sup>&</sup>lt;sup>4</sup> The stretch factor groupings are based on the Report to the Ontario Energy Board – "Empirical Research in Support of Incentive Rate-Setting: 2016 Benchmarking Update", prepared by Pacific Economics Group LLC., July 2017.

stretch factor would be applied to a less efficient distributor (in accordance with its cost performance relative to expected levels) to reflect the incremental productivity gains that the distributor is expected to achieve. The stretch factor assigned to Northern Ontario Wires is 0.00%.

#### **Findings**

The OEB finds that Northern Ontario Wires' request for a 1.20% Price Cap IR adjustment is in accordance with the annually updated parameters set by the OEB. The adjustment is approved, and Northern Ontario Wires' new rates shall be effective May 1, 2018.

The adjustment applies to distribution rates (fixed and variable charges) uniformly across all customer classes.<sup>5</sup>

#### 5 RETAIL TRANSMISSION SERVICE RATES

Distributors charge retail transmission service rates (RTSRs) to their customers to recover the amounts they pay to a transmitter, a host distributor or both for transmission services. All transmitters charge Uniform Transmission Rates (UTRs) approved by the OEB to distributors connected to the transmission system. Host distributors charge host-RTSRs to distributors embedded within the host's distribution system.

Northern Ontario Wires is partially embedded within Hydro One Network Inc.'s distribution system and is requesting approval to adjust the RTSRs that it charges its customers to reflect the rates that it pays for transmission services included in Table 5.1, and Table 5.2.

Table 5.1: UTRs<sup>6</sup>

**Current Approved UTRs (2018)** 

per kWh

<sup>&</sup>lt;sup>5</sup> Price Cap IR and Annual IR Index adjustments do not apply to the following rates and charges: rate riders, rate adders, low voltage service charges, retail transmission service rates, wholesale market service rate, rural or remote electricity rate protection charge, standard supply service – administrative charge, transformation and primary metering allowances, loss factors, specific service charges, microFIT charge, and retail service charges.

<sup>&</sup>lt;sup>6</sup> Decision and Rate Order, EB-2017-0359, February 1, 2018.

Network Service Rate	\$3.61
Connection Service Rates	
Line Connection Service Rate	\$0.95
Transformation Connection Service Rate	\$2.34

Table 5.2: Hydro One Networks Inc. Sub-Transmission Host-RTSRs<sup>7</sup>

Current Approved Sub-Transmission RTSRs (2017)	per kWh
Network Service Rate	\$3.19
Connection Service Rates	
Line Connection Service Rate	\$0.77
Transformation Connection Service Rate	\$1.75

#### **Findings**

Northern Ontario Wires' proposed adjustment to its RTSRs is approved. The RTSRs were adjusted based on the current host-RTSRs and the UTRs current at the time of the filing. The OEB finds that the new 2018 UTRs are to be incorporated into the rate model to adjust the RTSRs that Northern Ontario Wires will charge its customers accordingly.

The differences resulting from the approval of new 2018 RTSRs will be captured in Accounts 1584 and 1586 for future disposition.

#### **6 GROUP 1 DEFERRAL AND VARIANCE ACCOUNTS**

In each year of an IRM term, the OEB will review a distributor's Group 1 deferral and variance accounts in order to determine whether their total balance should be disposed. OEB policy requires that Group 1 accounts be disposed if they exceed (as a debit or credit) a pre-set disposition threshold of \$0.001 per kWh, unless a distributor

<sup>&</sup>lt;sup>7</sup> Decision and Rate Order, EB-2016-0081, December 21, 2016.

<sup>&</sup>lt;sup>8</sup> Group 1 accounts track the differences between the costs that a distributor is billed for certain IESO and host distributor services (including the cost of power) and the associated revenues that the distributor receives from its customers for these services. The total net difference between these costs and revenues is disposed to customers through a temporary charge or credit known as a rate rider.

justifies why balances should not be disposed. If the balance does not exceed the threshold, a distributor may elect to request disposition.

The 2016 actual year-end total balance for Northern Ontario Wires' Group 1 accounts including interest projected to April 30, 2018 is a credit of \$242,384. This amount represents a total credit claim of \$0.0020 per kWh, which exceeds the disposition threshold. Northern Ontario Wires proposes the disposition of this credit amount over a two-year period in order to mitigate bill impacts to customers as the amounts returned to customers will smooth rates over two-years.

Included in the balance of the Group 1 accounts is the Global Adjustment (GA) credit account balance of \$130,545. A customer's costs for the commodity portion of its electricity service reflects the sum of two charges: the price of electricity established by the operation of the Independent Electricity System Operator (IESO) administered wholesale market, and the GA.<sup>10</sup>

The GA is paid by consumers in several different ways:

- For Regulated Price Plan (RPP) customers, the GA is incorporated into the standard commodity rates, therefore there is no variance account for the GA.
- Customers who participate in the Ontario Industrial Conservation Initiative
  program are referred to as "Class A" customers. These customers are assessed
  GA costs through a peak demand factor that is based on the percentage their
  demand contributes to the top five Ontario system peaks. This factor determines
  a Class A customer's allocation for a year-long billing period that starts in July
  every year. As distributors settle with Class A customers based on the actual GA
  costs there is no resulting variance.
- "Class B" non-RPP customers pay the GA charge based on the amount of electricity they consume in a month (kWh). Class B non-RPP customers are billed GA based on the IESO published GA price. For Class B non-RPP customers, distributors track any difference between the billed amounts and actual costs in the GA Variance Account for disposal, once audited.

<sup>&</sup>lt;sup>9</sup> Report of the OEB – "Electricity Distributors' Deferral and Variance Account Review Initiative (EDDVAR)." EB-2008-0046, July 31, 2009.

<sup>&</sup>lt;sup>10</sup> The GA is established monthly, by the IESO, and varies in accordance with market conditions. It is the difference between the market price and the sum of the rates paid to regulated and contracted generators and conservation and demand management (demand response) program costs.

Northern Ontario Wires proposes the refund of its GA variance credit account balance of \$130,545 as at December 31, 2016, including interest to April 30, 2018, in accordance with the following table.

**Table 6.1: Recovery of GA Variance** 

Proposed Amounts	Proposed Method for Recovery
\$130,545 refunded to customers who were Class B for the entire period from January 2016 to December 2016	per kWh rate rider

The balance of the Group 1 accounts includes \$6,443 for the refund of Capacity Based Recovery (CBR) charges for Class B customers related to the IESO's wholesale energy market Demand Response 3 program. Distributors paid CBR charges to the IESO in 2016 and recorded these to a dedicated sub-account. The disposition of this sub-account is impacted by whether or not a distributor had any customers who were part of Class A during the period from January 2016 to December 2016.

Northern Ontario Wires had no Class A customers during the period from January 2016 to December 2016 so it applied to have the balance of this account disposed along with Account 1580 - Wholesale Market Service Charge through the general Deferral and Variance Account rate rider.

The remaining Group 1 accounts being sought for disposition, through the general Deferral and Variance Account rate rider, include the following flow through variance accounts: Low Voltage Charges, Smart Meter Entity Charges, Wholesale Market Service Charges, Retail Transmission Service Charges, Commodity Power Charges, and Account 1595 residual balances. These Group 1 accounts have a total credit balance of \$111,839, which results in a refund to customers.

The balances proposed for disposition reconcile with the amounts reported as part of the OEB's *Electricity Reporting and Record-Keeping Requirements*<sup>11</sup>, except where explained.

#### **Findings**

The OEB approves the disposition of a credit balance of \$242,384 as of December 31, 2016, including interest projected to April 30, 2018 for Group 1 accounts.

<sup>&</sup>lt;sup>11</sup> Electricity Reporting and Record Keeping Requirements, Version dated May 3, 2016.

The following table identifies the principal and interest amounts which the OEB approves for disposition.

**Table 6.2: Group 1 Deferral and Variance Account Balances** 

Account Name	Account Number	Principal Balance (\$) A	Interest Balance (\$) B	Total Claim (\$) C=A+B
LV Variance Account	1550	23,418	552	23,970
Smart Meter Entity Variance Charge	1551	125	3	128
RSVA - Wholesale Market Service Charge	1580	(135,673)	(3,367)	(139,040)
Variance WMS - Sub- account CBR Class B	1580	(6,309)	(134)	(6,443)
RSVA - Retail Transmission Network Charge	1584	91,228	2,179	93,407
RSVA - Retail Transmission Connection Charge	1586	50,063	1,237	51,300
RSVA – Power	1588	(131,921)	(2,769)	(134,690)
RSVA - Global Adjustment	1589	(128,095)	(2,451)	(130,545)
Disposition and Recovery of Regulatory Balances (2015)	1595	482	(953)	(471)
Totals for all Group 1 a	ccounts	(236,682)	(5,702)	(242,384)

The balance of each of the Group 1 accounts approved for disposition shall be transferred to the applicable principal and interest carrying charge sub-accounts of Account 1595. Such transfer shall be pursuant to the requirements specified in Article 220, Account Descriptions, of the *Accounting Procedures Handbook for Electricity Distributors*. <sup>12</sup> The date of the transfer must be the same as the effective date for the associated rates, which is, generally, the start of the rate year. Northern Ontario Wires

<sup>&</sup>lt;sup>12</sup> Accounting Procedures Handbook for Electricity Distributors, effective January 1, 2012.

shall ensure these adjustments are included in the reporting period ending June 30, 2018 (Quarter 2).

The OEB approves these balances to be disposed through rate riders, as calculated in the Rate Generator Model. The rate riders will be in effect over a two-year period from May 1, 2018 to April 30, 2020.<sup>13</sup>

#### 7 RESIDENTIAL RATE DESIGN

All residential distribution rates currently include a fixed monthly charge and a variable usage charge. The OEB's residential rate design policy stipulates that distributors will transition residential customers to a fully fixed monthly distribution service charge over a four-year period, beginning in 2016. The OEB requires that distributors filing IRM applications affecting 2018 rates continue with this transition by once again adjusting their distribution rates to increase the fixed monthly service charge and decrease the variable charge consistent with the policy.

The OEB expects an applicant to apply two tests to evaluate whether mitigation of bill impacts for customers is required during the transition period. Mitigation usually takes the form of a lengthening of the transition period. The first test is to calculate the change in the monthly fixed charge, and to consider mitigation if it exceeds \$4. The second is to calculate the total bill impact of the proposals in the application for low volume residential customers (defined as those residential RPP customers whose consumption is at the 10<sup>th</sup> percentile for the class). Mitigation may be required if the bill impact related to the application exceeds 10% for these customers.

Northern Ontario Wire notes that the implementation of the transition results in an increase to the fixed charge prior to the price cap adjustment of \$3.06. The bill impacts arising from the proposals in this application, including the fixed rate change, are below 10% for low volume residential customers.

#### **Findings**

The OEB finds that the proposed 2018 increase to the monthly fixed charge is calculated in accordance with the OEB's residential rate design policy. The results of the monthly fixed charge, and total bill impact for low consumption residential consumers

<sup>&</sup>lt;sup>13</sup> 2018 IRM Rate Generator Model Tab 6.1 GA, Tab 6.1a "GA Allocation", Tab 6.2 "CBR B", Tab 6.2a "CBR Allocation" and Tab 7 "Calculation of Def-Var RR".

<sup>&</sup>lt;sup>14</sup> As outlined in the Policy cited at footnote 1 above.

show that no mitigation is required. The OEB approves the increase as proposed by the applicant and calculated in the final Rate Generator Model.

#### 8 OTHER MATTERS

In addition to the matters discussed previously, Northern Ontario Wires sought approval for the following rates and charges<sup>15</sup> in its application:

 Continuance of the Specific Services charges, Retail Service Charges and Loss Factors as approved in Northern Ontario Wires' 2017 Cost of Service Application (EB-2016-0096)

These rate and charges were approved by the OEB in a previous proceeding. No further approval is required in this Decision to include these on Northern Ontario Wires' Tariff of Rates and Charges.

#### 9 IMPLEMENTATION AND ORDER

This Decision is accompanied by a Rate Generator Model, applicable supporting models, and a Tariff of Rates and Charges (Schedule A).

Model entries were reviewed in order to ensure that they are in accordance with Northern Ontario Wires' last COS decision, the 2017 OEB-approved Tariff of Rates and Charges, as well as to ensure that the cost, revenue and consumption results from 2016, are as reported by Northern Ontario Wires to the OEB.

The Rate Generator Model was adjusted, where applicable, to correct any discrepancies. The Rate Generator Model incorporates the rates set out in the following table.

**Table 9.1: Regulatory Charges** 

Rate	per kWh
Rural or Remote Electricity Rate Protection (RRRP)	\$0.0003
Wholesale Market Service (WMS) billed to Class A and B Customers	\$0.0032

<sup>&</sup>lt;sup>15</sup> Northern Ontario Wires' 2018 IRM Application, EB-2017-0066, November 2, 2017, Exhibit 1, Tab 1, Schedule 2, Page 1.

Capacity Based Recovery (CBR) billed to Class B Customers	\$0.0004
---	----------

Each of these rates is a component of the "Regulatory Charge" on a customer's bill, established annually by the OEB through a separate, generic order. The RRRP, WMS and CBR rates were set by the OEB on December 20, 2017.<sup>16</sup>

The Smart Metering Entity Charge is a component of the "Distribution Charge" on a customer's bill, established by the OEB through a separate order. The Smart Metering Entity Charge was set at \$0.57 by the OEB on March 1, 2018, effective January 1, 2018 to December 31, 2022.<sup>17</sup> The Rate Generator Model has been adjusted to incorporate this rate.

#### THE ONTARIO ENERGY BOARD ORDERS THAT

 The Tariff of Rates and Charges set out in Schedule A of this Decision and Rate Order is approved effective May 1, 2018 for electricity consumed or estimated to have been consumed on and after such date. Northern Ontario Wires Inc. shall notify its customers of the rate changes no later than the delivery of the first bill reflecting the new rates.

DATED at Toronto, March 22, 2018

#### RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartments building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### **MONTHLY RATES AND CHARGES - Delivery Component**

#### **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification refers to a non residential account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### MONTHLY RATES AND CHARGES - Delivery Component

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2017-0066

#### **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participant (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

EB-2017-0066

### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

### RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartments building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participant (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

## microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Service Charge	\$	5.40
ALLOWANCES		
Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for Transformer Losses - applied to measured demand & energy	%	(1.00)

## SPECIFIC SERVICE CHARGES

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

If you have identified any issues, please contact the

If a distributor uses the actual GA price to bill non-RPP Class B customers for an entire rate class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refunded the general GA rate rider as they did not contribute to the GA balance.

Please contact the OEB to make adjustments to the IRM rate generator for this situation.

#### Threshold Test

Total Claim (including Account 1568)

Total Claim for Threshold Test (All Group 1 Accounts)

Threshold Test (Total claim per kWh) <sup>2</sup>

As per Section 3.2.5 or the 2019 Filling Requirements for Electricity Distribution Rate Applications, an applicant may elect to dispose of the Group 1 account balances below the threshold. If doing so, please select YES from the adjacent drop-down cell and also indicate so in the Manager's Summary. If not, please select NO.

(\$107,734) (\$107,734)

(\$0.0009) Claim does not meet the threshold test.

<sup>&</sup>lt;sup>1</sup> Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

1568 Account Balance from Continuity Schedule 0

Total Balance of Account 1568 in Column S matches the amount entered on the Continuity Schedule

<sup>&</sup>lt;sup>2</sup> The Threshold Test does not include the amount in 1568.

<sup>&</sup>lt;sup>3</sup> The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

No input required. This worksheet allocates the deferral/variance account balances (Group 1 and 1568) to the appropriate classes as per EDDVAR dated July 31, 2009

Class A Customers - Billing Determinants by Customer

**Rate Class** 

Customer

2017

This tab allocates the GA balance to transition customers (i.e Class A customers who were former Class B customers and Class B customers who were former Class A customers) who contributed to the current GA balance. The tables below calculate specific amounts for each customer who made the change. The general GA rate rider to non-RPP customers is not to be charged to the transition customers that are allocated amounts in the table below. Consistent with prior decisions, distributors are generally expected to settle the amount through 12 equal adjustments to bills.

Year the Account 1589 GA Balance Last Disposed 2016

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformation connection may are completed in the Control of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, please double check the billing data entered in "Units Billied" and "Amount" columns. The highlighted rates do not master high Hydro One Sub-transmission rates (column E, I and M) are highlighted in orange, please double check the billing data entered in "Units Billied" and "Amount" columns. The highlighted rates do not master high Hydro One Sub-transmission rates anomyed for that time parted if that has been entered correctly please provide available for the discreasory. In rates

### **Incentive Regulation Model for 2019 Filers**

In the Green Cells below, enter any proposed rate riders that are not already included in this model (e.g.: proposed ICM rate riders). Please note that existing SMIRR and SM Entity Charge do not need to be included below.

In column A, the rate rider devescriptions must begin with "Rate Rider for".

In column B, choose the associated unit from the drop-down menu.

In column C, enter the rate. All rate riders with a "S" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.

In column C, enter the expiry date (e.g. April 30, 2020) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).

In column G, choose the sub-total as applicable in the bill impact calculation from the drop-down menu.

#### Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0058

#### RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively in a separately metered living accommodation. Customers shall be residing in single-dwelling units that consist of a detached house or one unit of a semi-detached, duplex, triplex or quadruplex house, with a residential zoning. Separately metered dwellings within a town house complex or apartments building also qualify as residential customers. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to a non residential account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0058

#### **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

The rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participant (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates. Charges and Loss Factors

EB-2018-0058

#### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0058

#### STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

#### **Effective and Implementation Date May 1, 2019**

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0058

#### **RETAIL SERVICE CHARGES (if applicable)**

#### **APPLICATION**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Debt Retirement Charge, the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$ 100.00
Monthly Fixed Charge, per retailer	\$ 20.00
Monthly Variable Charge, per customer, per retailer	\$ 0.50
Distributor-consolidated billing monthly charge, per customer, per retailer	\$ 0.30
Retailer-consolidated billing monthly credit, per customer, per retailer	\$ (0.30)
Service Transaction Requests (STR)	
Request fee, per request, applied to the requesting party	\$ 0.25
Processing fee, per request, applied to the requesting party	\$ 0.50
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail	
Settlement Code directly to retailers and customers, if not delivered electronically through the	
Electronic Business Transaction (EBT) system, applied to the requesting party	
Up to twice a year	\$ no charge
More than twice a year, per request (plus incremental delivery costs)	\$ 2.00

#### LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW	1.0694
Total Loss Factor - Primary Metered Customer < 5,000 kW	1.0587

## **Incentive Regulation Model for 2019 Filers**

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

#### Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2017 of \$0.1101/kWh (IESO's Monthly Market Report for May 2017, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

  Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Drop down cells		
	Utility Name	NORTHERN ONTARIO WIRES INC.
Year(s) Requested for Disposition		□ 2014
		□ 2015
		□ 2016
		E 2047

#### Note 7 Summary of GA (if multiple years requested for disposition)

							Unresolved
							Difference as %
		Net Change in	Reconciling Items	Adjusted Net Change in		\$ Consumption at	of Expected GA
	Annual Net Change in Expected GA Balance from GA Analysis	Principal Balance in	(sum of cells C63	Principal Balance in the	Unresolved	Actual Rate Paid	Payments to
Year	(cell K51)	the GL (cell C62)	to C75)	GL (cell C76)	Difference	(cell J51)	IESO
2014	-	\$	\$ -	\$ -	\$ -	\$ -	0.0%
2015	-	\$	\$ -	\$ -	\$ -	\$ -	0.0%
2016	-	\$	\$ -	\$ -	\$ -	\$ -	0.0%
2017	\$ 71,086	\$ 327,677	-\$ 254,049	\$ 73,628	\$ 2,543	\$ 6,244,470	0.0%
Cumulative Balance	\$ 71,086	\$ 327,677	-\$ 254,049	\$ 73,628	\$ 2,543	\$ 6,244,470	N/A

Year		2017		
Total Metered excluding WMP	C = A+B	115,940,780	kWh	100%
RPP	A	51,609,507	kWh	44.5%
Non RPP	B = D+E	64,331,273	kWh	55.5%
Non-RPP Class A	D	5,163,181	kWh	4.5%
Non-RPP Class B*	E	59,168,092	kWh	51.0%

Non-RPP Class B consumption reported in this table is not expected to directly agree with the Non-RPP Class B including Loss Adjusted Billed Consumption in the GA Analysis of Expected Balance table below. The difference should be equal to the loss factor.

#### Note 3 GA Billing Rate

GA is billed on the 1st Estimate

Please confirm that the GA Rate used for unbilled revenue is the same as the one used for billed revenue in any paticular month

#### Note 4 Analysis of Expected GA Amount

## Appendix 5 of 6

Appendix 5 – Bill Impacts

## **Incentive Regulation Model for 2019 Filers**

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution Rate Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

#### Note:

- 1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2017 of \$0.1101/kWh (IESO's Monthly Market Report for May 2017, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.
- 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

  Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

## Appendix 6 of 6

# Appendix 6 – OEB Appendix A GA Methodology

# Appendix A GA Methodology Description Questions on Accounts 1588 & 1589<sup>1</sup>

- 1. In booking expense journal entries for Charge Type (CT) 1142 and CT 148 from the IESO invoice, please confirm which of the following approaches is used:
  - a. CT 1142 is booked into Account 1588. CT 148 is pro-rated based on RPP/non-RPP consumption and then booked into Account 1588 and 1589 respectively.

NOW Inc. uses method a). Charge Type 1142 is booked through Account 1588. Charge Type 148 is booked to Account 1588 and 1589 based on RPP/non-RPP consumption.

b. CT 148 is booked into Account 1589. The portion of CT 1142 equaling RPP minus HOEP for RPP consumption is booked into Account 1588. The portion of CT 1142 equaling GA RPP is credited into Account 1589.

#### N/A

c. If another approach is used, please explain in detail.N/A

#### 2. Questions on CT 1142

 a. Please describe how the initial RPP related GA is determined for settlement forms submitted by day 4 after the month-end (resulting in CT 1142 on the IESO invoice).

NOW Inc. uses the first estimate to bill customers and is applicable to all rate classes. The monthly settlements are completed within four business days after month end. This entails settling the difference between RPP Pricing and Spot rate. This is done with both Time of Use (TOU) and conventional meters.

TOU Meters are read at month end based on the calendar month. There is no estimate for these meters as actual consumption is provided. The data is separated by off-peak, mid-peak, and on-peak. The amounts billed to

<sup>&</sup>lt;sup>1</sup>In all references in the questions relating to amounts booked to accounts 1588 and 1589, amounts are not booked directly to accounts USoA 1588 and 1589 relating to power purchase transactions, but are rather booked to the cost of power USoA 4705 Power Purchased, and 4707, Charges – Global Adjustment, respectively. However, accounts 1588 and 1589 are impacted the same way as account 4705 and 4707 are for cost of power transactions.

customers are compared against the actual consumption at the market rate and the difference is reported and settled with the IESO.

Conventional meters are read on the first of the month so no estimation is required. The consumption is allocated to the two tiers. The amount charged at fixed rates is then compared against the market rate and settled with the IESO.

b. Please describe the process for truing up CT 1142 to actual RPP kWh, including which data is used for each TOU/Tier 1&2 prices, as well as the timing of the true up.

NOW Inc.'s true up process is completed monthly (The June true up is reported in July). This entails aligning the consumption months to the proper rate months and calculating the variance using the actual GA and HOEP rates versus what was originally submitted. The true ups are initially recorded when submitted to the IESO. The RPP settlement true ups are then recorded on the accrual basis so that the true up is reflected in the proper month in the general ledger. NOW Inc. acknowledges the guidance on disposition in the OEB letter dated May 23, 2017, *Guidance on the Disposition of Accounts 1588 and 1589* and has incorporated the guidance into operations.

- c. Has CT 1142 been trued up for with the IESO for all of 2017? Yes, CT 1142 has been trued up with the IESO for all of 2017.
- d. Which months from 2017 were trued up in 2018?

  December 2017 was trued up in 2018, the true up amount was accrued in the 2017 General Ledger.
  - e. Have all of the 2017 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?
     Yes.

f. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

The closing principal balance for December 2017 in Column BG for 1589 is -\$170,122. The net change in the account is in column BD \$327,678 for 1589 which corresponds to the GA Analysis workform. The adjustments are included in column BF and can be seen reconciled in 4d) below. The closing principal balance for 1588 is -\$130,860 in column BG.

#### 3. Questions on CT 148

a. Please describe the process for the initial recording of CT 148 in the accounts (i.e. 1588 and 1589).

NOW Inc. downloads the monthly usage from the CIS Northstar and allocates the Class B Global Adjustment line from the IESO invoice (CT 148) based on the percentage of billed RPP consumption in comparison to the total billed consumption for class B customers.

The RPP percentage split is calculated using those figures and are prorated against the monthly CT 148 Class B Global Adjustment amount. This ensures that the amounts reflected in 1588 and 1589 relate to RPP and non-RPP respectively.

b. Please describe the process for true up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.

There is no true up required relating to Class B Global Adjustment reflected in 1588 and 1589 as the monthly allocation are based on actual consumption for the month which corresponds to the actual costs incurred.

c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as expense in Account 1589 for initial recording of the GA expense?

NOW Inc. retrieves and compiles stat reports from the CIS in order to separate RPP and Non-RPP consumption for all Class B customers monthly. The RPP and Non-RPP consumption proportions are applied to the CT 148 Class B Global Adjustment amount. The initial recording

splits the RPP GA amount to account 1588 with the Non-RPP amount to account 1589.

d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated proportions to actuals based on actual consumption proportions for RPP and non-RPP?

NOW Inc. does not true up the initial recording of CT148 in account 1588 and 1589 as the allocations are based on actual consumption proportions for RPP and Non-RPP consumption.

e. Please indicate which months from 2017 were trued up in 2018 for CT 148 proportions between RPP and non-RPP.

See d) above. No true ups were required.

f. Are all true-ups for 2017 consumption reflected in the DVA Continuity Schedule under 2017.

No true ups were recorded with the exception of the 2017 adjustments shown in 4d) below which are reflected in the DVA Continuity Schedule for 2017.

g. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

The closing principal balance for December 2017 in Column BG for 1589 is -\$170,122. The net change in the account is in column BD \$327,678 for 1589 which corresponds to the GA Analysis workform. The adjustments are included in column BF and can be seen reconciled in 4d) below. The closing principal balance for 1588 is -\$130,860 in column BG.

 Questions regarding principal adjustments and reversals on the DVA Continuity Schedule:

#### Questions on Principal Adjustments - Accounts 1588 and 1589

a. Did the applicant have principal adjustments in its 2018 rate proceeding which were approved for disposition?

Yes.

b. Please provide a break-down of the total amount of principal adjustments that were approved (e.g. true-up of unbilled (for 1589 only), true up of CT 1142, true up of CT 148 etc.).

# CR 1588 and DR 1589 \$77,780 for RPP Split adjustment DR 1588 \$53,556 for RPP settlement claim for the 2016 fiscal year

c. Has the applicant reversed the adjustment approved in 2018 in its current proposed amount for disposition?

Yes.

d. Please provide a breakdown of the amounts shown under principal adjustments in the DVA Continuity Schedule filed in the current proceeding, including the reversals and the new true up amounts regarding 2017 true ups.

See *E01T01S05* pages 7 and 8 for explanation on 2017 adjustments.

		Account 1588	Account 1589	Total
2016 Reversals	RPP Split reversal	\$ 77,780.00	-\$ 77,780.00	\$ -
	RPP True Up reversal	-\$ 53,556.00		-\$ 53,556.00
2017 Adjustments	RPP Split Adjustment	\$252,264.00	-\$252,264.00	\$ -
	GA adjustment accrual	-\$ 42,452.00	-\$ 39,661.00	-\$ 82,113.00
		\$234,036.00	-\$369,705.00	-\$135,669.00

e. Do the amount calculated in part d. above reconcile to the applicant's principal adjustments shown in the DVA Continuity Schedule for the current proceeding? If not, please provide an explanation.

Yes.

f. Please confirm that the principal adjustments shown on the DVA Continuity Schedule are reflected in the GL transactions. As an example, the unbilled to actual true-up for 1589 would already be reflected in the applicant's GL in the normal course of business. However, if a principal adjustment related to proportions between 1588 and 1589 was made, applicant must ensure that the GL reflects the movement between the two accounts.

The principal adjustments for the 2017 year are recorded in the General Ledger and accrued in the DVA workbook to reflect the proper period for disposition.
