Subject: EB-2018-0020 Brantford Power Inc. - VECC follow-up questions regarding interrogatory responses
Date: Monday, October 29, 2018 1:33:48 PM

VECC seeks further clarification regarding the erroneous data related to the ODS issue.

In response to interrogatories, BPI indicates it is withdrawing its request to make the proposed 2015 adjustment to the 1588 and 1589 balances and associated interest related to the 2015 ODS issue.

In response to Staff IR 1, BPI indicates that if the OEB concurs with this approach, BPI will return the total of (\$279,884) to the IESO, plus associated interest. SEC IR-3 indicates RPP customers will only be affected by changes in account 1588.

BPI discovered a data error in the Smart Metering data provided by its third party Operational Data Store provider. In response to SEC IR 2, BPI identified that some months contained a limited number of entries in the source data that had abnormally and unexpectedly large consumption values for individual meters.

VECC seeks further clarification on how customers were impacted by the anomalous entries in 2015 and 2016.

- Were RPP customers billed for this unexpected large consumption?
- Were RPP customers billed for more than they consumed?
- How many individually metered customers are impacted?

Please explain.

Thanks
Shelley
