#### 7.2 COST ALLOCATION STUDY REQUIREMENTS

#### 7.2.1 OVERVIEW OF COST ALLOCATION

- 3 CPUC has prepared and is filing a cost allocation informational filing consistent with its
- 4 understanding of the Directions and Policies in the Board's Reports of November 28, 2007
- 5 Application of Cost Allocation for Electricity Distributors, and March 31, 2011 Review of
- 6 Electricity Distribution Cost Allocation Policy (EB-2010-0219) (the "Cost Allocation Reports") and
- 7 all subsequent updates.

1

2

18

- 8 The main objectives of the original informational filing in 2006 were to provide information on
- 9 any apparent cross-subsidization among a distributor's rate classifications and to support future
- 10 rate applications. This information is updated to reflect new parameters and inputs and then
- 11 used to adjust any cross-subsidization in the proposed rates.

#### 12 Previously Approved Cost Allocation Study (2012)

- 13 The Previously Board Approved ratios are presented as a point of reference to the proposed
- 14 2019 ratios. As part of its last Cost of Service Rate Application, CPUC updated the cost allocation
- 15 revenue to cost ratios with 2014 base revenue requirement information. The revenue to cost
- 16 ratios from the 2014 application are presented below. CPUC notes that there have been no
- 17 changes in its class composition since 2014. 1

**Table 1 - Previously Approved Ratios (2012 COS)** 

**Customer Class Name** 2012 Approved **Revenue to Cost** Ratio Residential 97.47 General Service < 50 kW 104.28 General Service > 50 to 4999 kW 120.00 USL 118.20 Sentinel Lights 81.52 Street Lighting 81.52

<sup>&</sup>lt;sup>1</sup> MFR - New customer class or eliminated customer class - rationale and restatement of revenue requirement from previous CoS

#### Proposed Cost Allocation Study (2019)

- 2 The Cost Allocation Study for 2019 allocates the 2019 test year costs (i.e., the 2019 forecast
- 3 revenue requirement) to the various customer classes using allocators that are based on the
- 4 forecast class loads (kW and kWh) by class, customer counts, etc.
- 5 CPUC has used the most up to date (2018) OEB-approved Cost Allocation Model and followed
- the instructions and guidelines issued by the OEB to enter the 2019 data into this model.<sup>2</sup>
- 7 CPUC populated the information on Sheet I3, Trial Balance Data with the 2019 forecasted data,
- 8 Target Net Income, PILs, interest on long term debt, and the targeted Revenue Requirement and
- 9 Rate Base.
- 10 On Sheet I4, Break-out of Assets, CPUC updated the allocation of the accounts based on 2019
- 11 values.

1

- 12 In Sheet I5.1, Miscellaneous data, CPUC updated the deemed equity component of rate base,
- 13 kilometer of roads in the service area, working capital allowance, the proportion of pole rental
- 14 revenue from secondary poles, and the monthly service charges.
- 15 As instructed by the Board, in Sheet I5.2, Weighting Factors, CPUC has used LDC specific factors
- 16 rather than continue to use OEB approved default factors. The utility has applied service and
- 17 billing & collecting weightings for each customer classification.
- 18 These weightings are based on a review of time and costs incurred in servicing its customer
- 19 classes; they are discussed further below:

5

#### Table 2 - Weighting Factors

	1	2	3	7	8	9	
	Residential	GS <50	GS > 50 to 4999 kW	Street Light	Sentinel	Unmetered Scattered Load	
;	1.0	1.0	1.0	1.0	1.0	1.0	
	=	='	='	='	='	-	
	1.0	1.0	1.2	0.6	0.6	0.6	

Insert Weighting Factor for Services Account 1855
Insert Weighting Factor for Billing and
Collecting

- 2 CPUC notes that it does not carry any balances in account 1855 therefore the effects of the
- 3 weighting factors are irrelevant.

## 4 Proposed Billing and Collecting Weighting Factors<sup>3</sup>

- Residential: weighted for services and for billing and collecting as "1" per Cost
   Allocation instruction sheet
- General Service less than 50 kW: weighted "1" for billing & collecting. CPUC feels that no more time, attention and costs are spent on these customers as the residential class. The weighting factor for services requires more planning and monitoring for general service class than the residential class.
- The Weighted factor for the General Service greater than 50 kW also resulted in 1.2 for billing and collecting: The breakdown of the weighting factor is shown at table 3 below.
- A Weighting factor of 0.6 is also used for the billing and collecting of the Sentinel, Streetlights and Unmetered Scattered Load class as it requires less costs and effort to bill these classes than the residential class.
- 17 A derivation of the billing and collecting weighting factors are shown in the table below.

<sup>&</sup>lt;sup>3</sup> MFR - Description of weighting factors, and rationale for use of default values (if applicable)

## Table 3 – Breakdown of Weighting Factors

#### 2017

1

Accounts 5305 - 5340						
	Residential	GS < 50	GS > 50	Unmetered Scattered Load	Sentinel	Street Lighting
# of Connections	1065.00	156.00	16.00	4.00	23.00	328.00
Harris Computer Corporation	1725.35	252.73	0.00	0.00	0.00	0.00
Sensus Canada Inc.	33389.30	4890.83	0.00	0.00	0.00	0.00
Payroll related meter reads			769.08			
Bad Debt	5127.71	558.36	81.34	0.00	0.00	0.00
5315 - Customer Billing	53785.92	7878.50	808.05	202.01	1161.57	16565.05
Total	94028.28	13580.42	1658.47	202.01	1161.57	16565.05
Cost Per Connection	88.29	87.05	103.65	50.50	50.50	50.50
Weighting (Residential set as standard)	1.00	0.99	1.17	0.57	0.57	0.57

- 3 Sheet I6.2 has been updated with the required Bad Debt and Late Payment revenue data as well
- 4 as the number of customer/connection.
- 5 CPUC updated the capital cost per meter information on Sheet I7.1 and the meter reading
- 6 information on I7.2 to reflect its completed deployment of smart meters.
- 7 In normal circumstances, a utility should update its demand data (and sheet I8) to reflect the
- 8 findings of the 2004 hour by hour load data being scaled to be consistent with the 2019 load
- 9 forecast and the inspection of the scaled data to identify the system peaks and class specific
- 10 peaks.
- 11 To update the demand data, the utility would normally use the original demand data study
- 12 calculated and provided by HONI by the OEB in 2004 in advance of the 2006 EDR process.
- 13 Unfortunately, CPUC has been unable to locate the file dating back to 2006 in order to update it
- 14 with the proposed 2019 load forecast therefore CPUC has opted to use the same demand data
- as did in tis 2012 Cost of Service application.

- 1 CPUC has reached out to the OEB, the retired manager, Hydro One and the retired consultant
- who worked on the 2012 application and has been unable to successfully locate the file. <sup>4</sup> In
- 3 support of its decision to use the demand data from 2012, CPUC believes that its customer
- 4 count and load has not changed dramatically enough to warrant an update of the demand data
- 5 in the absence of the core file needed to do so.
- 6 The 2012 and proposed demand data is presented at the next page.
- 7 CPUC has completed its cost allocation study using the OEB's methodology. A live Excel version
- 8 of 2019 cost allocation model has been filed along with this application. CPUC confirms that it
- 9 has also populated sheets 11 and 12 of the Revenue Requirement Work Form. CPUC confirms
- 10 that the inputs to the model are consistent with the test year load forecast, changes to customer
- 11 classes and load profiles. <sup>5</sup>

<sup>4</sup> MFR - Explanation provided if a distributor is unable to update its load profiles and confirm that it intends to put plans in place to update its load profiles the next time a cost allocation model is filed

<sup>&</sup>lt;sup>5</sup> MFR – Completed cost allocation study using the OEB-approved methodology or a comparable model must be filed reflecting future loads and costs and be supported by appropriate explanations and live Excel spreadsheets. Sheets 11 and 12 of the RRWF must also be completed. Live Excel version of 2017 cost allocation model will be filed (updated load profiles or scaled version of HONI CAIF). Model must be consistent with test year load forecast, changes to customer classes and load profiles.

#### Table 12 - Revenue Offset Allocation as per Cost Allocation Study

	Revenue Offsets				
Customer Class Name	%	\$			
Residential	65.25%	33,102			
General Service < 50 kW	18.16%	9,211			
General Service > 50 to 4999 kW	11.90%	6,034			
Unmetered Scattered Load	0.04%	19			
Sentinel Lighting	0.46%	233			
Street Lighting	4.20%	2,129			
TOTAL	100.00%	50,729			

- 5 Table 13 shows the allocation of the service revenue requirement under the same three
- 6 scenarios.

**Table 13 - Service Revenue Requirement Under 3 Scenarios** 

Service Revenue Requirement \$

Customer Class Name	Existing Rates	Cost Allocation	Rate Application
Residential	663,604	710,630	663,731
General Service < 50 kW	201,613	167,956	201,610
General Service > 50 to 4999 kW	139,051	131,093	139,046
Unmetered Scattered Load	1,782	473	1,184
Sentinel Lighting	4,549	4,982	5,028
Street Lighting	44,950	40,414	44,950
TOTAL	1,055,548	1,055,548	1,055,548

#### 7.4 REVENUE-TO-COST RATIOS

1

2

7

#### 7.4.1 COST ALLOCATION RESULTS AND ANALYSIS

- 3 Table 16 at the next page shows Appendix 2-P of the Board Appendices while Table 13 below
- 4 shows the utility's proposed ratios. The Appendix provides information on previously approved
- 5 ratios and proposed ratios. The section following Appendix 2-P addresses the method and logic
- 6 used to update the ratios from the Cost Allocation study to the proposed ratios.

#### **Table 14 – Proposed Revenue Allocation**

**Target Range** Calculated Proposed Variance Ceiling Floor **Customer Class Name R/C Ratio R/C Ratio** Residential 0.9338 0.9340 -0.00 0.85 1.15 1.2004 0.00 0.80 1.20 General Service < 50 kW 1.2004 General Service > 50 to 4999 kW 1.0607 1.0607 0.00 0.80 1.20 Unmetered Scattered Load 3.7661 2.5009 1.27 0.80 1.20 Sentinel Lighting 0.9130 1.0091 -0.10 0.80 1.20 Street Lighting 1.1122 1.1123 -0.00 0.80 1.20

- 8 In accordance with the minimum filing requirements, Table 14b below shows the revenue by
- 9 class that would apply if all rates were changed by a uniform percentage between classes that
- are eligible to move ratios. CPUC notes that applying the revenue change to classes above the
- 11 1.00 would result in them moving further away from 1.00.

#### Table 14b – Proposed Revenue Allocation at equal % (Res and Sentinel)

Customer Class Name	R/C at (equal split)	Proposed R/C Ratio	R/C Variance	Revenue (equal split)	Revenues at Proposed R/C Ratio	Variance
Residential	0.9343	0.9340	0.0003	663,905	663,731	174.00
General Service < 50 kW	1.2004	1.2004	0.00	201,610	201,610	0.00
General Service > 50 to 4999						
kW	1.0607	1.0607	0.00	139,046	139,046	0.00

Sentinel Lighting	0.9740	1.0091	0.04	4,853	5,028	175.00
Street Lighting	1.1123	1.1123	0.00	44,950	44,950	0.00
				1,055,548	1,055,548	

## Table 15 - OEB Appendix 2-P

A) Allocated Costs

1

Classes	Costs Allocated from Previous Study	%	Costs Allocated in Test Year Study (Column 7A)	%
Residential	\$513,150.00	64.23%	\$710,604.65	67.32%
General Service < 50 kW	\$156,531.00	19.59%	\$167,950.24	15.91%
General Service > 50 to 4999 kW	\$90,813.00	11.37%	\$131,088.31	12.42%
Unmetered Scattered Load	\$1,983.00	0.25%	\$473.26	0.04%
Sentinel	\$3,314.00	0.41%	\$4,982.22	0.47%
Street Lights	\$33,127.00	4.15%	\$40,412.18	3.83%
Total	\$798,918.00	100.00%	\$1,055,510.86	100.00%

#### **B) Calculated Class Revenues**

(from CA - O1 row 18)

	Column 7B	Column 7C	Column 7D	Column 7E
Classes (same as previous table)	Load Forecast (LF) X current approved rates	L.F. X current approved rates X (1 + d)	LF X proposed rates	Miscellaneous Revenue
Residential	\$491,667.00	\$630,501.80	\$630,628.67	\$33,101.98
General Service < 50 kW	\$150,035.00	\$192,401.52	\$192,398.88	\$9,211.01
General Service > 50 to 4999 kW	\$103,727.00	\$133,016.54	\$133,012.04	\$6,034.17
Unmetered Scattered Load	\$1,375.00	\$1,763.67	\$1,164.92	\$18.72
Sentinel	\$3,365.00	\$4,315.50	\$4,794.28	\$233.32
Street Lights	\$33,392.00	\$42,820.54	\$42,820.79	\$2,129.40
Total	\$783,561.00	\$1,004,819.58	\$1,004,819.58	\$50,728.60

C) Rebalancing Revenue-to-Cost (R/C) Ratios

Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year:	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	2012			
	%	%	%	%
Residential	97.47	93.39	93.40	85 - 115
General Service < 50 kW	104.28	120.04	120.04	80 - 120
General Service > 50 to 4999 kW	120.00	106.07	106.07	80 - 120
Unmetered Scattered Load	118.20	376.62	250.10	80 - 120
Sentinel	81.52	91.30	100.91	85 - 115
Street Lights	81.52	111.23	111.23	

#### D) Proposed Revenue-to-Cost Ratios

Class	Proposed Revenue-to-Cost Ratios			Policy Range
	2019	2020	2021	1
	%	%	%	%
Residential	93.40			85 - 115
General Service < 50 kW	120.04			80 - 120
General Service > 50 to 4999 kW	106.07			80 - 120
Unmetered Scattered Load	250.10	160	120	80 - 120
Sentinel	100.91			85 - 115

- 1 Table 16 below shows the utility's proposed Revenue to Cost reallocation based on an analysis
- 2 of the proposed results from the Cost Allocation Study vs. the Board imposed floor and ceiling
- 3 ranges.

#### 4 Table 16 – 2019 Allocation

**Target Range** 

				ıarg	et kange
Customer Class Name	Calculated R/C Ratio	Proposed R/C Ratio	Variance	Floor	Celiling
Residential	0.9338	0.9340	-0.00	0.85	1.15
General Service < 50 kW	1.2004	1.2004	0.00	0.80	1.20
General Service > 50 to 4999 kW	1.0607	1.0607	0.00	0.80	1.20
Unmetered Scattered Load	3.7661	2.5009	1.27	0.80	1.20
Sentinel Lighting	0.9130	1.0091	-0.10	0.80	1.20
Street Lighting	1.1122	1.1123	-0.00	0.80	1.20

5

6

- 7 The proposed Revenue to Cost ratio is adjusted by changing the allocation percentage for each
- 8 class. The utility reviews and assesses the bill impacts for each class before adjusting the
- 9 Revenue to Cost ratios. 10

10 CPUC proposes to maintain the residential class, the General Service <50kW, GS"50kW and the

- 11 Street Lighting class at their existing ratios 120%, 107% and 111% respectively. CPUC proposes
- 12 to decrease the ratio for the USL class from 371% to 246% and to increase the Sentinel Lighting
- from 90% to 100%. 11 The proposed cost re-allocation results in the shortfall allocation shown in
- 14 the table below.

<sup>\*</sup> Ratios highlighted in pink fell outside of the floor to ceiling range.

<sup>&</sup>lt;sup>10</sup> MFR - To support a proposal to rebalance rates, the distributor must provide information on the revenue by class that would apply if all rates were changed by a uniform percentage. Ratios must be compared with the ratios that will result from the rates being proposed by the distributor.

<sup>&</sup>lt;sup>11</sup> MFR - Confirmation of communication with unmetered load customers when proposing changes to the level of the rates and charges or the introduction of new rates and charges

	Shortfall		
Customer Class Name		Reconciliation	
Residential		-126.9	
General Service < 50 kW		2.6	
General Service > 50 to 4999 kW		4.5	
Unmetered Scattered Load		598.8	
Sentinel Lighting		-478.8	
Street Lighting		-0.3	
Total		-126.9	

- 2 For further details about the class specific bill impacts, please refer to Exhibit 8. CPUC confirms
- 3 that is has communicated its proposed rates and bill impacts to its Street Lighting and USL
- 4 customers and that it did not receive any comments and feedback on the issue. 1213
- 5 CPUC is not a Host Distributor therefore evidence of consultation with embedded distributors is
- 6 not applicable. The utility does not have unique circumstances which justify specific MicroFit
- 7 rates and the utility is not seeking Standby Rates in this application.  $^{14}$   $^{15}$   $^{16}$

<sup>&</sup>lt;sup>12</sup> MFR - If R:C ratios outside deadband based on model - distributors must include cost allocation proposal to bring them within the OEB-approved ranges. In making any such adjustments, distributors should address potential mitigation measures if the impact of the adjustments on the rates of any particular class or classes is significant.

<sup>&</sup>lt;sup>13</sup> MFR - Unmetered Loads (including Street Lighting) - Confirmation of communication with unmetered load customers when proposing changes to the level of the rates and charges or the introduction of new rates and charges

 $<sup>^{14}\ \</sup>text{MFR}$  - Host Distributor - evidence of consultation with embedded Dx

<sup>&</sup>lt;sup>15</sup>MFR - microFIT - if the applicant believes that it has unique circumstances which would justify a certain rate, appropriate documentation must be provided

<sup>&</sup>lt;sup>16</sup> MFR - Standby Rates - if seeking approval on final basis, provide evidence that affected customers have been advised. If seeking changes to standby charges, provide rationale and evidence that affected customer have been advised.
