-- Comments --

I am opposed to the sale of PDI to Hydro One for the following reasons:

1. I believe in public utilities - no profit to a for-profit company.
2. Hydro One does not have a good proven record of providing service to customers.
3. the future of energy supplies is based on local control - in the event of short supplies, Ontario One would prioritize far-flung areas first. We have the poles and wires now. Energy supply is working well in Peterborough and county. Let's not change it.
4. The sale would be a short term economic boost for long term uncertainty.
5. 93% of Peterborough residents were opposed to the sale, em included, during the last municipal term. We expect this Council to honour those 93%.
