I am a senior living in Brighton Ontario. This month my gas bill was \$151. I used approximately \$55. worth of gas. Union Gas has solicited all the people in my area to sign up for Natural Gas now that they have us they are putting up the rates. I would think that almost \$100. should be sufficient to deliver gas to customers. Perhaps they needed to do a better job of due diligence before they amalgamate with Union. The customer shouldn't have to suffer the burden of Enbridges poor management. The rate increases are for Union North, East and South but there is no indication which area the customer resides in and are significantly different. Why is that? There is also no indication of a meeting in my area.
I would appreciate a reply.
