## LETTER OF COMMENT

### Comments:

Right off the bat, the suggested format on this page re: the Case # does not accommodate the dashes in between EC-2018-0305. I glanced through the 38 pages of demands re: an application to become an "Intervenor"...clearly the average person would be deterred by all the legalise. I have only this to say: utility companies, cable companies, phone companies, all government via taxation are killing the Canadian public with death by 1,000 cuts. And by cuts I mean rate increases. Every extra \$10 here and \$20 there... are there increases in service or benefits? No. Are people getting wage increases to help with the ever-rising cost of living? No. Are all these agencies making millions of dollars in profit every year? Yes. \$10 or \$20 is nothing to a CEO who earns half a million dollars a year. To a fixed income pensioner, it can mean lack of food, medicine, rent money, etc. When will you all see that the bough will eventually break? Can you not put human well-being above greed?
