**Interrogatory #1**

Ref: Exhibit A Tab 4 Pages 3-4

Preamble: For in-franchise contract rate classes, Union is proposing to dispose of the net 2016 DSM-related deferral and variance account balances as a one-time adjustment with the first available QRAM after Board approval.

The disposition approach for general service and contract customers is consistent with how Union disposed of 2015 DSM deferral and variance account balances in the 2015 Disposition of DSM Deferral and Variance Accounts proceeding (EB-2017-0323).

- a) Please provide a table (or tables) that show the following information (for ease of reference a similar IR was asked and answered in EB-2017-0323 at Exhibit B.OGVG.1):
- i) the number of customers within each in-franchise contract class that Union forecasts it will charge a one-time adjustment relating to the 2014 LRAM, DSMVA and DSMIDA accounts if this application is approved;
  - ii) the number of customers within each in-franchise contract class that have not been a participant in a Union DSM program targeting those rate classes; If there are customers that had not been a participant in a Union DSM program targeting the in-franchise contract classes to the end of 2016 but who were participants in years subsequent to 2016 please include that information; please (separate from any table or tables provided) describe any efforts by Union going forward to specifically target and include customers that have yet to be included as participants in a Union DSM program as participants in Union DSM programs in the future;
  - iii) for each in-franchise contract class please provide the minimum, maximum, average, and median one-time adjustments Union forecasts it will charge if this application is approved on the basis Union's "Audit Adjusted" balances, along with the related % distribution and total bill impact for each representative charge (namely the % impact of the one time charge in relation to the annual distribution and total bill for the relevant customer);
  - iv) for each in-franchise contract class please provide the minimum, maximum, average, and median one-time adjustments Union forecasts it will charge if this application is approved on the basis of the "Audited" balances, i.e. the balances produced by the EC without Union's proposed adjustments, along with the related % distribution and total bill impact for each representative charge (namely the % impact of the one time charge in relation to the annual distribution and total bill for the relevant customer);

- b) Please confirm that in-franchise contract class customers continue to have the option of paying the approved one-time adjustment over time; if so confirmed please provide the process by which customers seeking to make their payment over time may arrange to do so, and explain how the maximum time period available to customers for such payments is determined. If not confirmed, please explain why this option is no longer available to in-franchise contract customers.
