As a consumer of natural gas, for heating, I will find it very difficult to pay more, and more later, I am sure. I have changed to natural gas some years ago, and specifically to Enbridge, because of the great difference between cost of the gas and oil. In the past years I saved money, but finding that raise in costs will be very difficult for me. I know that I am just one consumer, but I am sure there are hundreds of thousand in the same position. In my opinion, joining with another company should reduce expenses and not raise them. Why does not both, or all companies, reduce duplications in both or all companies and not raise prices. Clean house instead of just tax ordinary people more and more. Of course, we ordinary people cannot expect to be listened to, does not matter how many hearings there are. Us little people do not have the money or the knowledge to go up against these large corporations, because we are just individuals. It would be nice to hear, that most of the CEOs, COOs, higher ups in the chain, would give up part of their earnings to help us "the little people" to keep our money to give our children or our family a better life. In my case, and in the cases of many people her in Ontario, \$5+ does not seem much per year, but just multiply that with hundreds of thousands \$5+, and you see a staggering amount to go to the company. We are told of research, new equipment, etc,

that the money is going for, but where is the proof? I know that this tirade against the raise will not do any good, but I thought I just get it off my chest.

Thank you.
