Hi, I am a common home user. I have few question for Enbridge

- 1) Has Enbridge ever thought of decreasing the cost of gas supply and what measures they have taken to do so (action plan).
- 2) What kind of option study Enbridge has done to keep same or reducing the cost. Is their any way, Enbridge can eliminate the unnecessary expenditure they are making. As a sole distributor and servicing to the largest (most population) province in Canada and extremely low operating cost, Enbridge has the opportunity to reduce the cost rather than talking about increasing cost.
- 4) if Enbridge can't reduce the cost - it means they are very highly unorganized/mismanaged company.
- 5) Can Enbridge be audited by Auditor General of Canada to find out what kind of back door activities going on this company.
