### LETTER OF COMMENT

**Comments:**

Though some information has been made available -hence my submission here- it seems suspect that Enbridge is not making this change better known to its customers. Rising energy costs are a major concern to Ontario residents and the way in which this rate increase is being sought, in a somewhat duplicitous manner, does not bolster my faith in either Enbridge Gas or the Ontario Energy Board which is meant to serve the people of Ontario and "help consumers get value from their natural gas and electricity services." The notion that, once again, the full cost of an energy company's corporate decisions needs to be passed on to the consumer is galling to say the least. Hopefully through this process the OEB can act in its capacity as a voice for energy consumers in the province of Ontario and ensure that customer rates are protected.
