Cambridge, ON N1R 5X6

Re: Energy Plus Rate Application – Response to the Ontario Energy Board

Dear Sarah

Please convey our response below to the Ontario Energy Board

As we understand from the information provided by Energy+, the distribution costs (Distribution and Distribution Rate Riders) would increase significantly from the 2018 rates whether the TMMC JP Scenario or the Energy+ Proposal (VECC TCQ 76). Furthermore, we understand this rate structure is an ongoing increased cost to [CUSTOMER NAME REDACTED].

**[CUSTOMER NAME REDACTED]** should not be responsible for infrastructure costs put in to meet the needs of a big company like TMMC. When they choose to find alternate sources of power, it is unfair to burden other businesses with the costs, especially in a high electricity cost market. This action will prompt us to move business out of this plant to lower the impacts of costs long term, and move it to more business-friendly jurisdictions where we already have capacity to absorb more work.

This additional cost only increases this Cambridge plant's uncompetitive electricity rates versus its two other plants, and adds cost that our customers are unwilling to absorb.

**[CUSTOMER NAME REDACTED]"**

Yours very truly,

**BORDEN LADNER GERVAIS LLP**
