Hi, i believe that prices should not increase from April 2019 as this is just adding more pressure of bills on families. Enbridge gas is already making so much money from people in other charges in bills and instead of running company with better management, they want to just increase bills for people.

How about not increasing the salary of top management of company and put that money in paying overdues for Federal Greenhouse Gas Pollution. It is already so expensive to run a family's monthly expenses and now adding more on utility bills will make things worst for majority of people. Cost of daily needs are going up way more than the salary of people and it is stressing out people. We already paying so much taxes on earning and after paying monthly expenditure there is hardly any savings for families. I really feel the prices should not increase.
