Enbridge Gas Inc.

2019 Federal Carbon Pricing Program Application

**INTERROGATORIES OF
CANADIAN MANUFACTURERS & EXPORTERS (“CME”)
TO ENBRIDGE GAS INC. (“EGI”)**

CME # 1

Ref: Exhibit B, Tab 2, Schedule 4; Exhibit A, page 10 of 14.

At Exhibit A, page 10, EGI states that “The initial proposed OBS for the transmission of marketable natural gas is 80% of production-weighted national average emissions intensity.”

At Exhibit B, Tab 2, Schedule 4, EGI indicates that its 2019 forecast compressor emissions is 306,679 tCO_{2e}. The facilities limit provided is 207,796 tCO_{2e}, resulting in an overage of 98,882 tCO_{2e}.

- (a) Please further explain the calculation of the OBS for the transmissions of marketable natural gas, and include an example.
- (b) Please describe what efforts EGI (or its two predecessor companies) has undertaken to make its compressor operations more fuel efficient.
