DESCRIPTION OF PLOTS IN APPENDIX G

Each page that follows provides three plots of average participant loads on event days. Each page contains three plots:

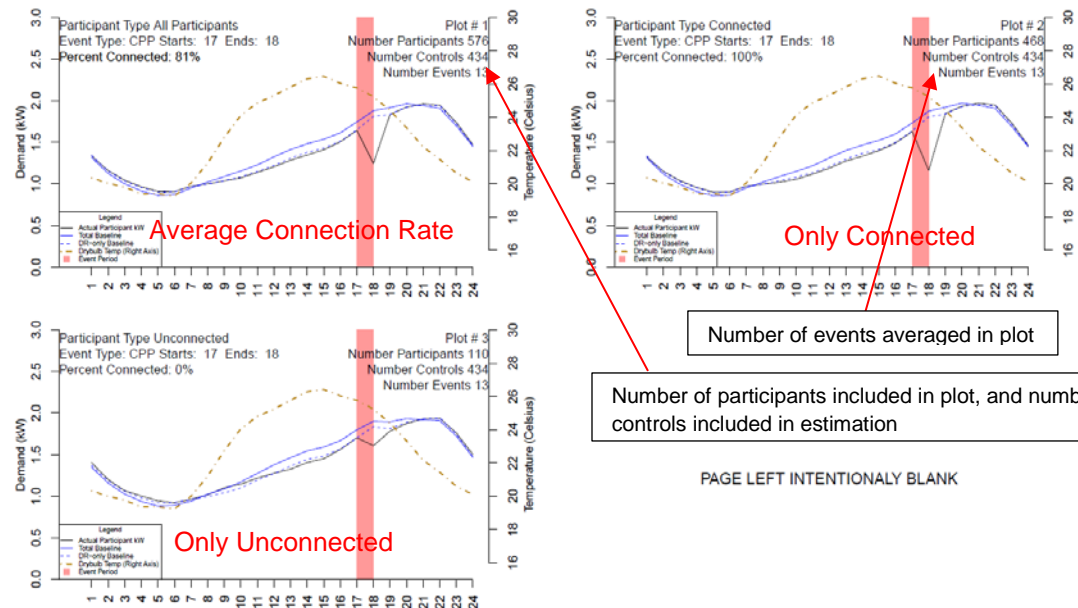

- Average load and baselines of all participants in group
- Average load and baselines of only connected participants
- Average load and baselines of only dis-connected participants

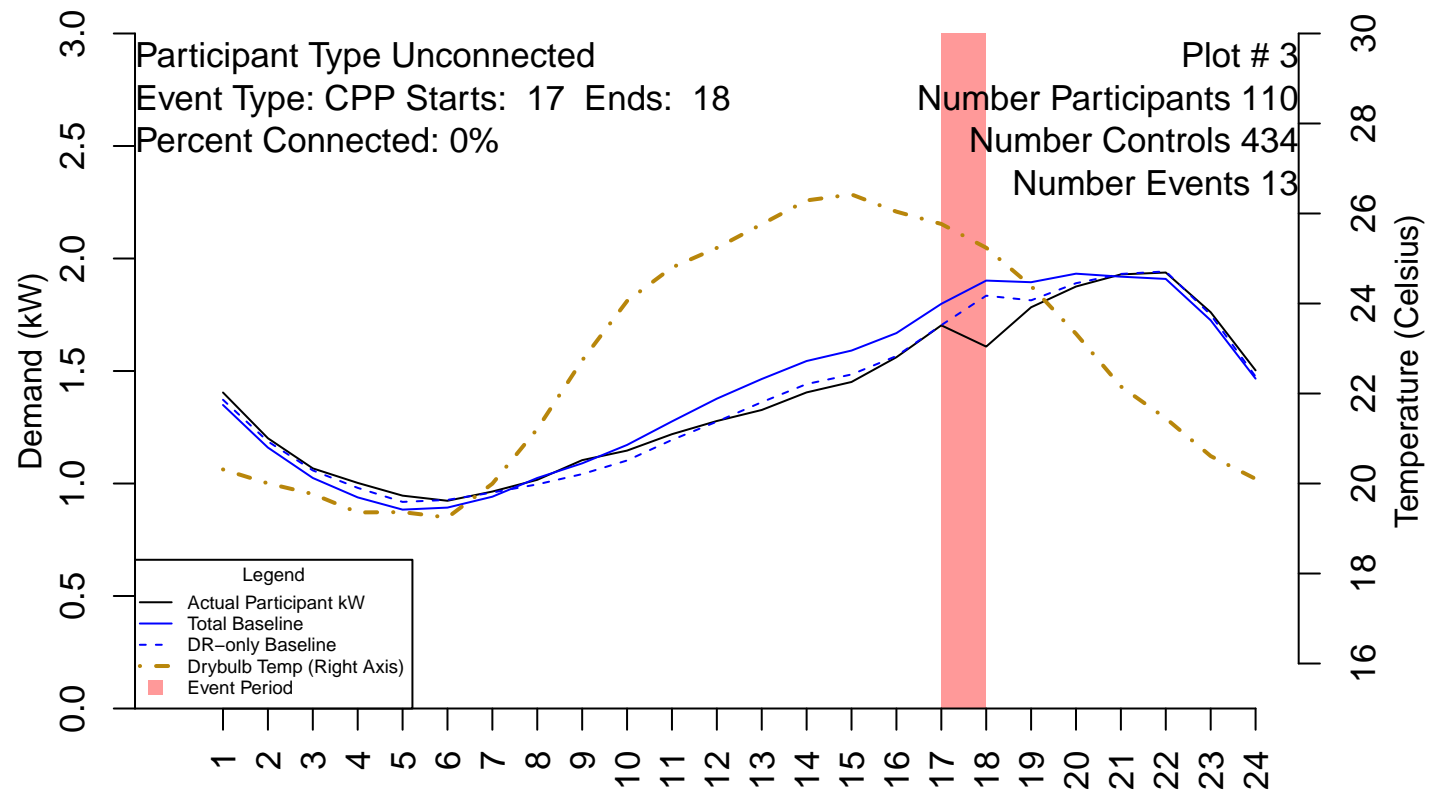

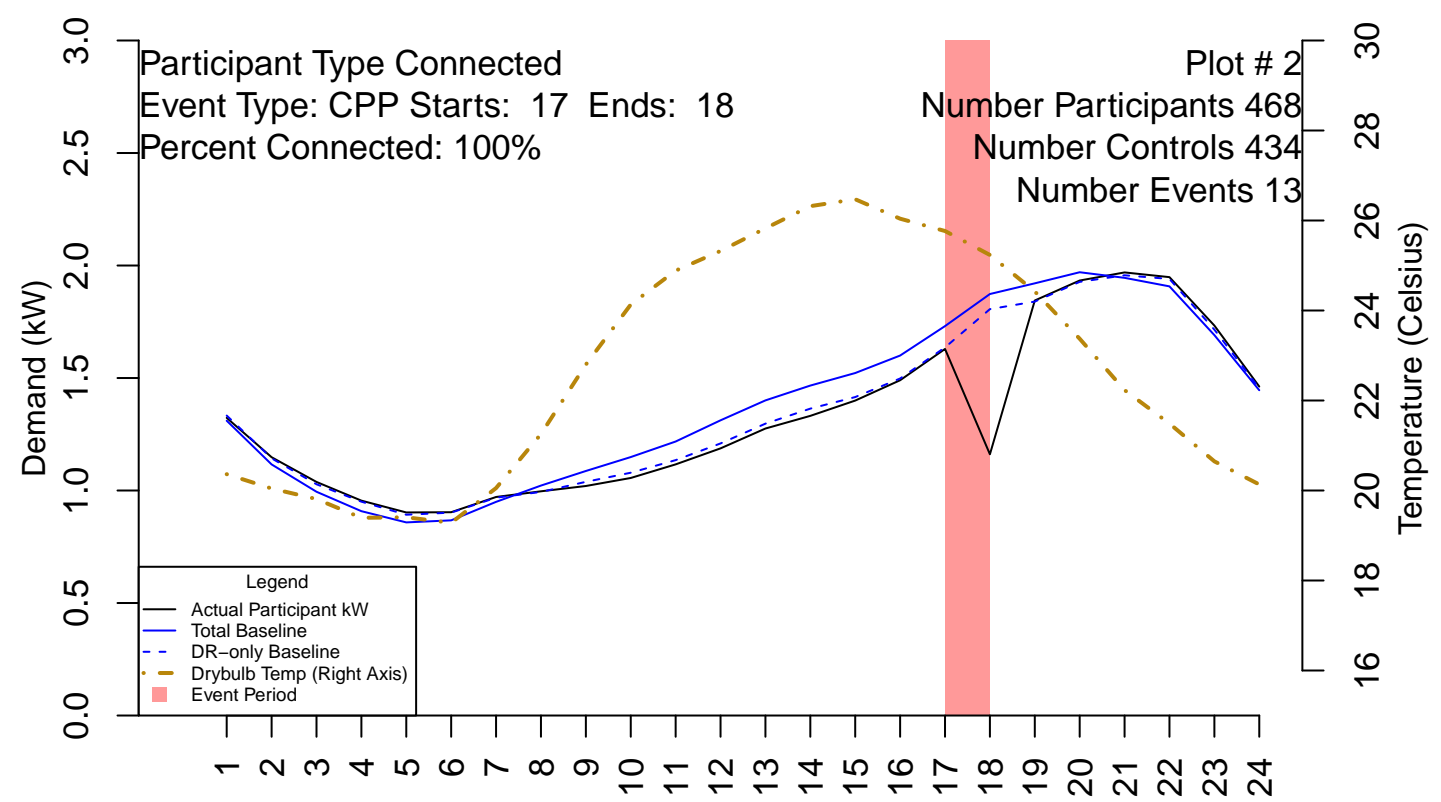

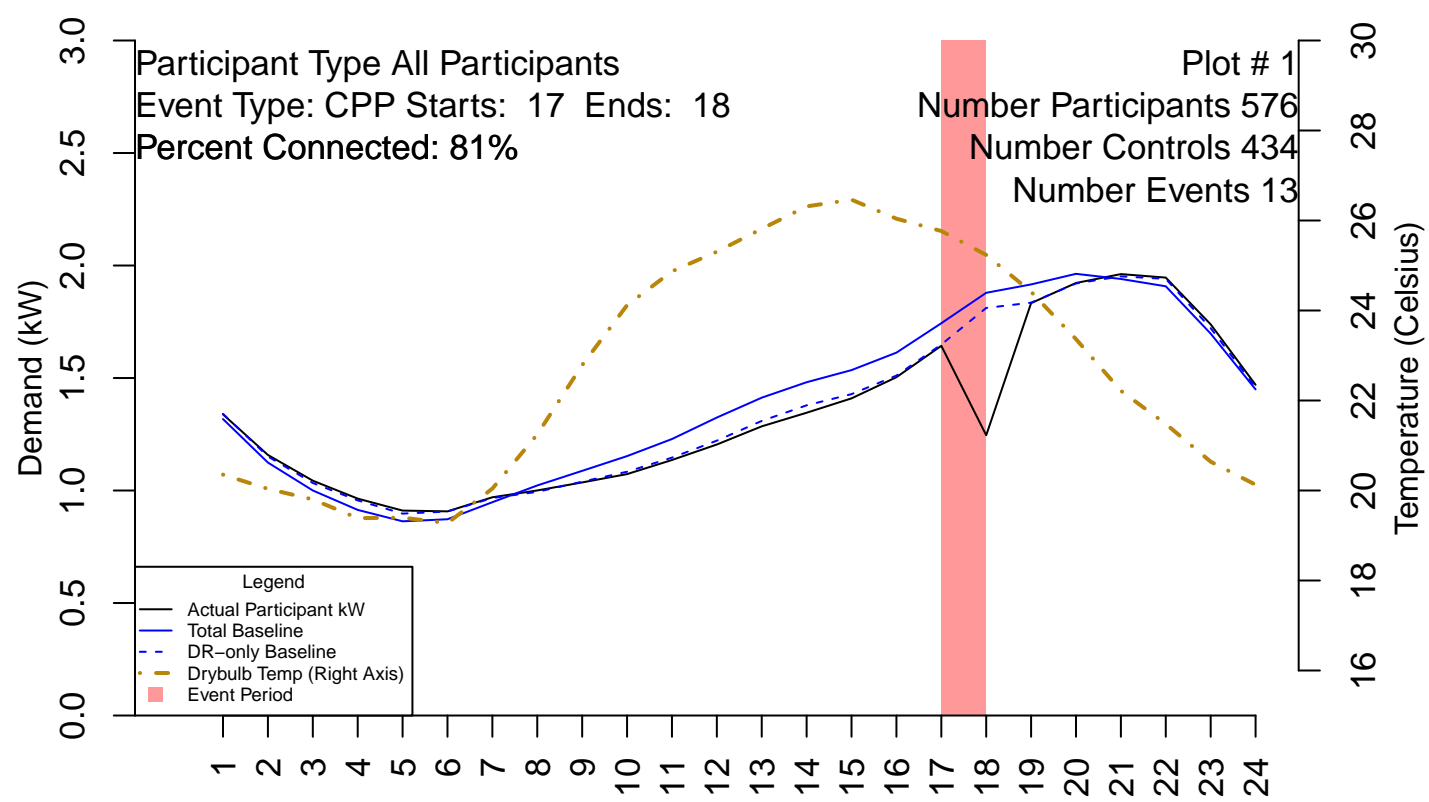

Each plot shows three series plotted on the left-hand axis:

- Average actual demand (black line)
- What average demand would have been without the program (blue line)
- What average demand would have been with the program, had the given day not been a CPP event day.

Two types of events are plotted:

- Those where the event happened between 5pm and 6pm
- Those where the event happened between 6pm and 7pm
