Dear Ms. Walli:

Re: Board File No: EB-2019-0134 Atlantic Power Corporation Motion: Kapuskasing Area Reinforcement Project - IESO Evidence

On April 30, 2019 the Ontario Energy Board (“OEB”) issued a Notice of Hearing and Procedural Order No. 1 in the above proceeding, directing the IESO to respond to the OEB’s letter of request dated April 8, 2019 and expanding the scope of the letter to also provide any additional evidence. The April 8 letter requested information from the IESO as to whether or not upgrading transmission circuit H9K between Carmichael Falls Junction and Spruce Falls Junction, and the installation of a capacitor bank reactor at Kapuskasing Transformer Station, remains the preferred solution. The OEB also requested information on if there is a cost at which the IESO would no longer support the Kapuskasing Project as the preferred solution.

Procedural Order No. 2 issued May 3, 2019 granted the IESO’s request for an extension of time to May 8 by when it must file the requested information.

Attached you will find the IESO’s response and additional evidence.

Yours truly,

Senior Manager, Regular Affairs
