RE: EB-2018-0305 EGI 2019 Rates – FRPO Submission

We are writing on behalf of the Federation of Rental-housing Providers of Ontario (“FRPO”) in regard to the outstanding issues in the Enbridge Gas Distribution.

FRPO participated in all aspects of the proceeding to this point including technical and settlement conferences. We collaborated with other intervenors and with the leadership on issues being distributed according to our respective expertise and background. As a result, with most of the remaining issues focusing on the novel application of ICM rules by the Applicant, we believed that others with more experience with ICM applications from electricity proceedings would be better able to assist the Board.

As such, we requested and received an advanced copy of the final argument of the School Energy Coalition (“SEC”). We respect SEC’s experience and their leadership on these issues at the Technical Conference and we shared similar concerns about the Applicant’s proposed extrapolation of the Board’s Merger Decision on the determination of the ICM threshold and its inclusion of the respective projects. Upon review of SEC’s draft submission, we recognize the submissions address FRPO’s concerns on the outstanding issues. Therefore, we support and adopt their submissions and will not invest further time to submit similar concerns, albeit, with a less effective authoring than the eloquent delivery of SEC.

Respectfully Submitted on Behalf of FRPO,

Dwayne R. Quinn
Principal
DR QUINN & ASSOCIATES LTD.
