Dear Ms. Walli:

**Re: Certificates of Public Convenience and Necessity
Norfolk County, the County of Elgin and the County of Middlesex
Ontario Energy Board File Number: EB-2017-0108**

Further to our request submitted June 21, 2019 for confirmation of CPCN rights within Norfolk County in order to allow for the attachment of additional field line customers supplied through the Metalore Resources system, Enbridge hereby submits a corrected map and revised request.

Enbridge and Metalore Resources are parties to a Gas Purchase Agreement and a Field Line Agreement through which Metalore transmits gas through its pipelines to Enbridge meters through which gas service is provided to approximately 150 Enbridge customers within Norfolk County. Further details about this arrangement were filed with the Board as part of proceeding EB-2019-0089.

After further review of applications, Enbridge can confirm that there are 22 potential new field line customer service locations for which requests have been made for service from Enbridge through the Metalore system which are all located within Enbridge's existing CPCN rights area (see attached map) and we would like to proceed to attach these customers.

As mentioned previously, these potential field line customers include families who have been constructing or renovating their homes in order to accommodate a new gas service as well as farm operations. Enbridge is willing to provide the requested service and would like to ensure that these people have gas service in place prior to the start of the next home heating season.

Enbridge therefore respectfully requests the Board's confirmation that these 22 potential field line customers can be attached as Enbridge customers within its existing CPCN authorizations on an expedited basis, by July 22, 2019, in order to allow Enbridge to commence service in a timely manner.

Should you have any questions on this submission or require further information, please do not hesitate to contact me.

Yours truly,
