LETTER OF COMMENT

Comments:

Having received notice today that Alectra Utilities is applying to increase its rates in 2020, it is not clear to me how such a unilateral procedure can be started by Alectra, without having proposed other viable alternatives, such as helping consumers use solar power or thermal power. To keep on increasing rates, on and on, is just an easy way out, with no imagination or effort to find creative solutions. Is there a way for me to participate in this debate?
