**Subject:** Seasonal Rate Class

Hello,

I own a small cottage up north and am just hearing about the plans to eliminate the seasonal rate class, specifically (and only) with Hydro One. The cottage is accessible 8 months a year and has the hydro turned off completely 6-8 months per year.

I strongly oppose this increase. I have a couple friends that have gone full solar with much more electricity use than me. I will be going that direction and cutting all service within 1 year of this increase taking place.

Very disappointed in this direction.

Tyler
