ONTARIO ENERGY BOARD

IN THE MATTER OF the Ontario Energy Board Act, 1998,
S.O. 1998, c. 15, (Schedule B) (the “Act”);

AND IN THE MATTER OF an Application by Enbridge
Gas Inc. for an order granting leave to construct and
replace 1.7 KM of the NPS 12 natural gas distribution
pipeline in the City of Ottawa under section 90 of the
Act.

LEAVE TO CONSTRUCT APPLICATION: ST. LAURENT REPLACEMENT

1. The Applicant, Enbridge Gas Inc. (“Enbridge Gas”) is an Ontario corporation with its head office in the City of Toronto. It carries on the business of selling, distributing, transmitting, and storing natural gas within Ontario.
2. The St. Laurent Replacement Project was identified to be replaced in Enbridge’s Utility System Plan as part of the EB-2018-0305 proceeding. The replacement of the pipeline will occur over multiple phases over multiple years. This specific application seeks the replacement of a section of the St. Laurent pipeline and the subsequent construction of 1.7 km of pipeline. The section to be replaced is part of the NPS 12 St. Laurent Pipeline that runs on St. Laurent Boulevard from Donald Street to Montreal Street (the “Project”).
3. The Project is necessary as there are integrity concerns along the length of the pipeline. Originally the Project was scheduled for construction in 2021; however, the Project must be completed in 2019 as the City of Ottawa has imposed a three year road moratorium in order to complete its road resurfacing work. The City of Ottawa road resurfacing will occur in 2020 and accordingly it has requested that Enbridge Gas complete its construction prior to the road work.
4. Enbridge hereby applies to the Ontario Energy Board (the “OEB”) for leave to construct approximately 1.7 km of pipeline in order to replace the section of pipeline on St. Laurent Boulevard between Montreal Road and Donald Street with NPS 6 polyethelene intermediate pressure pipe. The Project originates on St. Laurent Boulevard approximately 20m south of Donald Street where it will be tied into the

existing NPS 6 steel IP gas main on Donald Street. From there it travels north on St. Laurent Boulevard to approximately 20m north of Montreal Street where it will be tied into the existing NPS 6 steel IP gas main on Montreal Street. The Project will also be tied in to three other existing gas mains which are perpendicular to the planned running line on St. Laurent Boulevard.

5. There are no new customer additions associated with the Project and therefore no incremental new revenues. Existing customers will be moved off of the XHP system to the IP system. The Project will also require the cut off of existing services and the installation of new services. 66 services will be cut off from the XHP network and an equivalent amount of services will be installed on the new NPS 6 polyethelene IP gas main.
6. The route and location for the proposed facilities associated with the Project were selected by an independent environmental consultant through the process outlined in the Ontario Energy Board's "*Environmental Guidelines for the Location, Construction, and Operation of Hydrocarbon Pipelines and Facilities in Ontario*" (7th Edition, 2016) (the "Guidelines"). Input from the public was sought during the route selection process and was incorporated into the final route decision
7. Pursuant to the Guidelines, Enbridge requested that the Ministry of Energy, Northern Development and Mines ("MOENDM") determine if there is any Duty to Consult requirements for the Project. The MOENDM has delegated the procedural aspects of the Duty to Consult for the Project to Enbridge Gas. Enbridge Gas' correspondence with the MOENDM regarding the Duty to Consult process and outcomes can be found in the G series of Exhibits.
8. The proposed construction schedule will enable Enbridge Gas to replace the segment of the NPS 12 St. Laurent pipeline prior to the road moratorium being placed into effect. To meet the in-service date Enbridge Gas must commence construction by August 2019 and is respectfully requesting that the Board issue a decision for this Application no later than August 2019.
9. Enbridge Gas requests this Application proceed by way of written hearing in English.

Enbridge Gas requests the Board issue the following order:

- (i) pursuant to section 90 of the *Ontario Energy Board Act*, 1988, S.O., 1988, c-15, Schedule B, an Order granting leave to construct the pipelines.
10. Enbridge requests that copies of all documents filed with the Board in connection with this proceeding be served on it and on its counsel, as follows:
