**Subject:** Price increase re: Alectra Utilities / Horizons Utilities

Dear Sir/ Madam,

I want to object to the price increase request for the delivery of electricity to my house. Already the actual charges for the delivery of hydro to my house already exceeds the cost of the actual amount of electricity that we are using. These 5 or so utility companies merged or were bought out to form one larger company. This larger conglomerate needs to explore and find money saving measures rather simply increasing the rates for their clients. This company is there to serve its customer and needs to do its business NOT first of all for profit but more in line as a non-profit organization serving our province.

My highest regards to you and hope that you will regard my request as a desire that meets the need of many Canadians.

Yours truly,  
Peter and Eline Homan
