I have just been informed by Hydro One that I may be affected by the elimination of "seasonal rate class" for my property. Who do you people think you are? I strongly object to your decision. I pay over \$65.00 a month delivery charge for \$6.00 worth of electricity. My demands on Hydro One are zero. If you follow through with this decision you will lose me as a customer and i will generate my own electricity. I hope you are smart enough to realize that many more "seasonal" rate payers will probably follow suit.

Some customers paying part of the cost are better than none.
