Dear Ms. Dowling:

Re: EB-2019-0025 – Centre Wellington Hydro Ltd. -Application for 2020 Rates

A preliminary review of the application has identified that certain sections of the evidence supporting the application do not comply with the Ontario Energy Board's Filing Requirements¹ for incentive rate-setting applications and/or the associated spreadsheets, models and workforms. As a result, the Ontario Energy Board (OEB) is unable to process Centre Wellington Hydro Ltd.'s (Centre Wellington Hydro) application at this time. The OEB will commence processing the application after the noted information is filed.

The missing information includes:

Chapter 3 Filing Requirement Reference (page #)	Description
Page 15	Distributors must complete the Global Adjustment (GA) Analysis Workform for each applicable fiscal year subsequent to the most recent year in which Accounts 1588 and 1589 were approved for disposition on a final basis by the OEB.

¹ Chapter 3 of the *Filing Requirements for Electricity Distribution Applications Rate Applications*, dated July 12, 2018 and the Addendum to Filing Requirements For Electricity Distribution Rate Applications - 2020 Rate Applications, dated July 15, 2019

	<p>Although Centre Wellington Hydro has provided a GA Analysis Workform for 2018 balances, it also needs to provide a GA Analysis Workform for 2017 balances, including explanations of reconciling items. 2017 balances were approved on an interim basis in Centre Wellington Hydro's 2019 proceeding.² The most recent year in which Accounts 1588 and 1589 were approved for disposition on a final basis related to 2016 balances in Centre Wellington Hydro's 2018 proceeding.³</p> <p>The Deferral and Variance Account (DVA) Continuity Schedule, Tab 3, provided by Centre Wellington Hydro needs to be updated to reflect the opening DVA balances in this schedule as the closing December 31, 2016 balances, instead of the closing December 31, 2017 balances. This update needs to be done as the 2017 balances were cleared on an interim basis and will be reviewed in this proceeding. As a result, additional columns in Tab 3 will need to be populated.</p>
Addendum Pages 12-13	<p>On February 21, 2019, the OEB issued its letter entitled <i>Accounting Guidance related to Accounts 1588 Power, and 1589 RSVA Global Adjustment</i> as well as the related accounting guidance. The accounting guidance is effective January 1, 2019 and is to be implemented by August 31, 2019. Distributors are expected to consider the accounting guidance in the context of historical balances that have yet to be disposed on a final basis (including the 2018 balances that may be requested for disposition in this rate application). In their 2020 applications, distributors are to provide a status update on the implementation of the new accounting guidance, a review of historical balances, results of the review, and any adjustments made to account balances.</p> <p>The OEB set out its expectations for final disposition requests of commodity pass-through account balances as noted in the Addendum.</p> <p>In its pre-filed evidence,⁴ Centre Wellington Hydro stated that it is confident that after studying the new accounting guidance and reviewing historical balances, no adjustments are required to the balances. Centre Wellington Hydro also stated that the balances approved on an interim basis in its 2019 proceeding⁵ are accurate and complete and should be deemed final disposition.</p>

⁴ Application, Pages 16-18

⁵ EB-2018-0023

	Centre Wellington Hydro indicated that the results of its review yielded immaterial differences in Account 1588 and Account 1589 balances from using a reconciliation methodology which uses billing volume, instead of wholesale volume. However, Centre Wellington Hydro did not provide much detail regarding its overall process of reviewing the historical Account 1588 and Account 1589 balances. ⁶ Centre Wellington Hydro needs to provide more detail regarding its review process.

The OEB expects that Centre Wellington Hydro will file the above listed required information as soon as possible.
