Subject: Rate increase for seasonal customers

To whom it may concern,

Please note that if our hydro costs increase significantly as planned by the OEB, we will be switching to other energy sources. Our cottage is situated on Lake Duborne and is included in the town of Blind River. The cottage consumes electricity from mid June to mid August (8 weeks). We are already paying over 100\$ a week for hydro (lighting and appliances). We are of the opinion that these increases are unjustified and will prove counterproductive for your overall revenue in the future.

Jeanne Villeneuve and Maurice Berthelot
