SCHEDI	JLE A: SETTLEMENT PROPOSAL	. 8

1 INTRODUCTION AND SUMMARY

This is a decision of the Ontario Energy Board (OEB) on an application filed by Algoma Power Inc. (Algoma Power). Algoma Power filed an application with the OEB to change its electricity distribution rates effective January 1, 2020 (the Application). Under the *Ontario Energy Board Act, 1998*, distributors must apply to the OEB to change the rates they charge their customers.

Algoma Power serves approximately 12,110 customers over a 14,200 km² rural area. The area stretches approximately 93 km east and 255 km north of the City of Sault Ste. Marie and includes seven First Nation Reserves, 14 organized townships, and a large number of unorganized townships.

On April 4, 2019, the OEB approved Algoma Power's acquisition¹ of Dubreuil Lumber Inc.'s (Dubreuil) distribution assets (Acquisition Decision), following an OEB order authorizing Algoma Power to operate Dubreuil's distribution system as an interim operator in 2017.² Previously incurred costs, related to the operation of Dubreuil's distribution system, had been recorded in the Interim Licence Deferral Account (ILDA).³ The Acquisition Decision approved, on an interim basis, a partial disposition of balances in the ILDA that related to depreciation expense and the return on capital associated with the Dubreuil distribution system. Algoma Power proposed to add undepreciated capital cost for the Dubreuil distribution system to Algoma Power's 2020 rate base and to dispose of non-capital and one-time cost for the 2017-2018 period as part of its cost-of-service proceeding. Both matters are addressed in the settlement proposal (Settlement Proposal) filed in the current proceeding. The Acquisition Decision also established a new deferral account to record transaction and integration costs incurred by Algoma Power after September 24, 2018. The balances of these accounts are subject to this proceeding.

Algoma Power asked the OEB to approve its rates for five years using the Price Cap Incentive rate-setting option available with the "Renewed Regulatory Framework for Electricity Distributors: a Performance Based Approach". With this option, rates are approved for 2020, and then rates are adjusted mechanistically for the next four years through a price cap adjustment based on inflation and the OEB's assessment of Algoma Power's efficiency.

¹ EB-2018-0271, April 4, 2019

² EB-2017-0152, April 4, 2017

³ EB-2017-0152, *op. cit.* The Deferral account was established in item 1c. of the OEB's Order appointing Algoma as the interim operator of Dubreuil's distribution system.

Algoma Power's residential and general service (R1) and industrial (R2) customers (deemed residential customers under Ontario Regulation [O. Reg] 442/01), pay rates below the cost of providing distribution service. Rates for these customers are financially subsidized through the Distribution Rate Protection under O. Reg 198/17; a First Nations Delivery Credit under O. Reg. 197/17; and/or the Rural and Remote Electricity Rate Protection (RRRP) fund under O. Reg 442/01.

Algoma Power and the intervenors participated in a settlement conference and filed a settlement proposal with the OEB on September 24, 2019 (Settlement Proposal), addressing all issues.

As discussed below, the OEB approves the Settlement Proposal as filed.

2 THE PROCESS

The OEB's policy for rate setting is set out in the Renewed Regulatory Framework⁴ (RRF). The RRF provides the distributor with performance-based rate application options that support the cost-effective planning and efficient operation of a distribution network. This framework provides an appropriate alignment between a sustainable, financially viable electricity sector and the expectations of customers for reliable service at a reasonable price.

Algoma Power filed an application on May 31, 2019 for 2020 rates under the Price Cap Incentive rate-setting option of the RRF. The OEB issued a Notice of Application on June 7, 2019, inviting parties to apply for intervenor status. The School Energy Coalition (SEC) and the Vulnerable Energy Consumers Coalition (VECC) applied for, and were granted, intervenor status. OEB staff also participated in this proceeding.

The OEB issued Procedural Order No.1 on July 3, 2019. This order established, among other things, the timetable for a written interrogatory discovery process, the filing of a proposed issues list and a settlement conference. The OEB approved an issues list on August 23, 2019.

The settlement conference was held on August 27 and 28, 2019. Algoma Power, SEC and VECC (Parties) resolved all issues and filed the Settlement Proposal with the OEB on September 24, 2019 (attached as Schedule A). OEB staff observed the settlement conference and filed its submissions regarding the Settlement Proposal on October 1, 2019.

⁴ Report of the Board: Renewed Regulatory Framework for Electricity Distributors: A Performance-Based Approach, October 18, 2012

3 DECISIONS ON THE ISSUES

The Settlement Proposal filed by the parties addressed all elements of the OEB's approved issues list for this proceeding, and represented a full settlement of all the issues.

Findings

The OEB finds that the Settlement Proposal benefits consumers and produces outcomes that are consistent with the operational effectiveness and other performance objectives of the RRF.

The OEB approves the Settlement Proposal (attached as Schedule A).

4 IMPLEMENTATION

Algoma Power shall include the cost consequences of the approved settlement proposal in its calculation of its revenue requirement for recovery from customers. As per the settlement proposal, Algoma Power agreed to update the cost of capital parameters with 2020 values when they become available.

The OEB expects Algoma Power to file detailed supporting material showing the impact of this Decision and Order on the overall revenue requirement, the allocation of revenues between classes and the derivation of base rates and the amount to be recovered through the RRRP mechanism. The OEB expects an implementation date of January 1, 2020.

SEC and VECC are eligible for cost awards in this proceeding. The OEB has made provision in this Decision and Order for these intervenors to file their cost claims. The OEB will issue its cost awards decision after the following steps are completed.

5 ORDER

THE ONTARIO ENERGY BOARD ORDERS THAT:

- Algoma Power Inc. shall file with the OEB and forward to intervenors a draft rate order with a proposed Tariff of Rates and Charges attached that reflects the OEB's findings in this Decision and Order, no later than **November 7, 2019**.
 Algoma Power Inc. shall also include customer rate impacts and detailed information in support of the calculation of final rates in the draft rate order.
- 2. Intervenors and OEB staff shall file any comments on the draft rate order with the OEB, and forward them to Algoma Power Inc., no later than **November 21, 2019**.
- 3. Algoma Power Inc. shall file with the OEB, and forward to intervenors, responses to any comments on its draft Rate Order no later than **November 28, 2019**.
- 4. Intervenors shall submit their cost claims no later than **November 28, 2019**.
- 5. Algoma Power Inc. shall file with the OEB and forward to intervenors any objections to the claimed costs by **December 3, 2019**.
- 6. Intervenors shall file with the OEB and forward to Algoma Power Inc. any responses to any objections for cost claims no later than **December 6, 2019**.
- 7. Algoma Power Inc. shall pay the OEB's costs incidental to this proceeding upon receipt of the OEB's invoice.

All materials filed with the OEB must quote the proceeding number, EB-2019-0019, be made in a searchable/unrestricted PDF format and sent electronically through the OEB's web portal at https://pes.ontarioenergyboard.ca/eservice. Two paper copies must also be filed at the OEB's address provided below. Filings must clearly state the sender's name, postal address and telephone number, fax number and email address. Parties must use the document naming conventions and document submission standards outlined in the RESS Document Guideline found at https://www.oeb.ca/industry. If the web portal is not available parties may email their documents to the address below. Those who do not have internet access are required to submit all filings on a USB memory stick in PDF format, along with two paper copies. Those who do not have computer access are required to file seven paper copies.

All communications should be directed to the attention of the Board Secretary at the address below, and be received no later than 4:45 p.m. on the required date. With

respect to distribution lists for all electronic correspondence and materials related to this proceeding, parties must include the Case Manager, Birgit Armstrong at birgit.armstrong@oeb.ca and OEB Counsel, James Sidlofsky at james.sidlofsky@oeb.ca.

LIST OF ATTACHMENTS

- A. Revenue Requirement Work Form
- B. 2019 and 2020 Fixed Asset Continuity Schedule

Note:

Algoma Power Inc. has filed revised models as evidence to support this Settlement Proposal. The models have been filed through the OEB's e-filing service and include:

- a) 2020 Filing Requirements Chapter 2 Appendices
- b) 2020 Revenue Requirement Work Form
- c) 2020 Test Year Income Tax PILs Model
- d) 2020 Cost Allocation Model
- e) 2020 Load Forecast Model
- f) 2020 API Rate Design Model
- g) 2020 DVA Continuity Schedule
- h) 2020 RTSR Model
- i) 2020 LRAMVA Model
- j) 2020 Benchmarking Model
- k) 2020 Bill Impact Model
- I) 2019 and 2020 Fixed Assets and Depreciation Continuity Schedule
- m) 2020 Standalone Proposed Tariff Sheet

In populating the Revenue Requirement Work Form, the values in the "Interrogatory Responses" columns have been left unadjusted, and the "Per Board Decision" columns have been used to reflect this Settlement Proposal. This approach allows the totals and variances reflected in tables throughout this Settlement Proposal to be easily reconciled to the Revenue Requirement Work Form. At the Draft Rate Order stage, API will replace values in the "Interrogatory Responses" column with "Settlement Agreement" values and reflect any further adjustments in the "Per Board Decision column".

SETTLEMENT PROPOSAL

Algoma Power Inc. (the "Applicant" or "API") filed a Cost of Service application with the Ontario Energy Board (the "OEB") on May 17, 2019, under section 78 of the *Ontario Energy Board Act, 1998*, S.O. 1998, c. 15, (Schedule B) (the "Act"), seeking approval for changes to the rates that API charges for electricity distribution, to be effective January 1, 2020 (OEB file number EB-2019-0019) (the "Application"). The application was updated on June 3, 2019.

The OEB issued a Letter of Direction and Notice of Application on June 7, 2019. In Procedural Order No. 1, dated July 3, 2019, the OEB approved the Vulnerable Energy Consumers Coalition (VECC) and the School Energy Coalition (SEC) as intervenors and prescribed dates for the following: written interrogatories from OEB staff and intervenors; API's responses to interrogatories; a Settlement Conference; and various other elements in the proceeding.

Following the receipt of interrogatories, API filed its interrogatory responses with the OEB on August 14, 2019.

On August 20, 2019 OEB staff submitted a proposed issues list as agreed to by the parties. On August 23, 2019 the OEB issued its decision on the final issues list (the "Issues List").

On August 15, 2019 the OEB issued Procedural Order No. 2, which provided directions for the filing of submissions with respect to API's request for confidential treatment of certain information filed in the proceeding. On August 23, 2019 the OEB issued a decision allowing for certain information filed by API to be treated as confidential.

The settlement conference was convened on August 28 and 29, 2019 in accordance with the OEB's *Rules of Practice and Procedure* (the "Rules") and the OEB's Practice Direction. API, VECC, SEC and OEB staff participated in the Settlement Conference.

API, VECC, and SEC, collectively referred to below as the "Parties", reached a full, comprehensive settlement regarding API's 2020 cost of service application. The details and specific components of the settlement are detailed in the "Settlment Proposal".

OEB staff is not a party to this Settlment Proposal. Although OEB staff is not a party, once the Settlment Proposal is filed, OEB staff will file a submission commenting on two aspects of the settlement: namely, whether the settlement represents an acceptable outcome from a public interest perspective, and whether the accompanying explanation

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 7 of 63 Filed: September 24, 2019

and rationale is adequate to support the settlement. The role of OEB staff is set out on page 5 of the Practice Direction. OEB staff, while not a party to this Settlement Proposal, is bound by the same confidentiality and privilege rules that apply to the Parties to the proceeding.

This document is called a Settlement Proposal because it is a proposal by the Parties presented to the OEB to settle the issues in this proceeding. It is termed a proposal as between the Parties and the OEB. However, as between the Parties, and subject only to the OEB approval of this Settlement Proposal, this document is intended to be a legal agreement, creating mutual obligations, and binding and enforceable in accordance with its terms. As set forth later in this preamble, this Settlement Proposal is subject to a condition subsequent, that if it is not accepted by the OEB in its entirety, then unless amended by the Parties it is null and void and of no further effect. In entering into this Settlement Proposal, the Parties understand and agree that pursuant to the Act, the OEB has exclusive jurisdiction with respect to the interpretation and enforcement of the terms hereof.

These settlement proceedings are subject to the rules relating to confidentiality and privilege contained in the Practice Direction. The Parties acknowledge that this settlement proceeding is confidential in accordance with the OEB's Practice Direction on settlement conferences. The Parties understand that confidentiality in that context does not have the same meaning as confidentiality in the OEB's Practice Direction on Confidential Filings, and the rules of that latter document do not apply. Instead, in this Settlement Conference, and in this Settlement Proposal, the specific rules with respect to confidentiality and privilege are as set out in the Practice Direction, as amended on October 28, 2016. Parties have interpreted the revised Practice Direction to mean that the documents and other information provided during the course of the settlement proceeding, the discussion of each issue, the offers and counter-offers, and the negotiations leading to the settlement – or not – of each issue during the Settlement Conference are strictly privileged and without prejudice. None of the foregoing is admissible as evidence in this proceeding, or otherwise, with one exception, the need to resolve a subsequent dispute over the interpretation of any provision of this Settlement Proposal. Further, the Parties shall not disclose those documents or other information to persons who were not attendees at the Settlement Conference. However, the Parties agree that "attendees" is deemed to include, in this context, persons who were not physically in attendance at the Settlement Conference but were a) any persons or entities that the Parties engage to assist them with the Settlement Conference, and b) any persons or entities from whom they seek instructions with respect to the negotiations; in each case provided that any such persons or entities have agreed to be bound by the same confidentiality provisions.

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 8 of 63 Filed: September 24, 2019

This Settlement Proposal provides a brief description of each of the settled issues, as applicable, together with references to the evidence. The Parties agree that references to the "evidence" in this Settlement Proposal shall, unless the context otherwise requires, include a) additional information included by the Parties in this Settlement Proposal, and b) the appendices to this document. The supporting Parties for each settled issue, as applicable, agree that the evidence in respect of that settled issue, as applicable, is sufficient in the context of the overall settlement to support the proposed settlement, and the sum of the evidence in this proceeding provides an appropriate evidentiary record to support acceptance by the OEB of this Settlement Proposal. The Parties agree that references to the evidence in this Settlement Proposal shall, unless the context otherwise requires, include, in addition to the Application, the responses to interrogatories, responses to clarification questions and undertakings, and all other components of the record up to and including the date hereof, including additional information included by the Parties in this Settlement Proposal and the attachments to this document.

Included with the Settlement Proposal are attachments that provide further support for the proposed settlement. The Parties acknowledge that the attachments were prepared by API. While the Intervenors have reviewed the attachments, the Intervenors are relying on the accuracy of the attachments and the underlying evidence in entering into this Settlement Proposal.

For ease of reference, this Settlement Proposal follows the format of the final Approved Issues List, with additional sub-issues added as appropriate in order to highlight specific aspects of the settlement.

According to the Practice Direction (p.4), the Parties must consider whether a Settlement Proposal should include an appropriate adjustment mechanism for any settled issue that may be affected by external factors. Any such adjustments are specifically set out in the text of the Settlement Proposal.

The Parties have settled the issues as a package, and none of the parts of this Settlement Proposal are severable. If the OEB does not accept this Settlement Proposal in its entirety, then there is no settlement (unless the Parties agree in writing that any part(s) of this Settlement Proposal that the OEB accepts may continue as a valid settlement without inclusion of any part(s) that the OEB does not accept.)

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 9 of 63 Filed: September 24, 2019

In the event that the OEB directs the Parties to make reasonable efforts to revise the Settlement Proposal, the Parties agree to use reasonable efforts to discuss any potential revisions, but no Party will be obligated to accept any proposed revision. The Parties agree that all of the Parties must agree with any revised Settlement Proposal as it relates to that issue, or take no position, prior to its resubmission to the OEB.

Unless stated otherwise, the settlement of any particular issue in this proceeding and the positions of the Parties in this Settlement Proposal are without prejudice to the rights of the Parties to raise the same issue and/or to take any position thereon in any other proceeding, whether or not API is a party to such proceeding, provided that no Party shall take a position that would result in the Settlement Proposal not applying in accordance with the terms contained herein.

Where in this Settlement Proposal the Parties "accept" the evidence of API, or "agree" to a revised term or condition, including a revised budget or forecast, then unless the Settlement Proposal expressly states to the contrary, the words "for the purpose of settlement of the issues herein" shall be deemed to qualify that acceptance or agreement.

SUMMARY

The parties were able to reach agreement on all aspects of the application; capital costs, including the advanced capital module (ACM) issues for two distinct projects, operations, maintenance & administration (OM&A) costs, revenue requirement-related issues, including the accuracy of the requirement determination, OEB policies and practices, accounting, including the appropriateness of the required Rural and Remote Rate Protection (RRRP) funding, the cost recovery mechanism related to the cost incurred to acquire API's Dubreuilville service area and other related issues.

In reaching this Settlement Proposal, the Parties have been guided by the Filing Requirements for 2019 rates, as modified by the addendum issued on July 15, 2019, and the Approved Issues List.

This Settlement Proposal reflects a full settlement of the issues in the proceeding. The Parties have described below, in detail, areas where they have settled an issue by agreeing to adjustments to the application as updated.

This settlement will result in total bill increases of \$2.21, or 1.8% per month for the typical residential customer consuming 750 kWh per month. Under the RRRP program, base distribution rates for API's residential, commercial and industrial customers are adjusted annually based on the average increase for all other electricity distributors in Ontario.

API is part of the Distribution Rate Protection (DRP) program, which caps the base distribution charge for certain residential customers for eight distributors in the province. This program has been in effect since July 2017 and the current monthly distribution charge is capped at \$36.86. If there is a change to the DRP cap by January 1, 2020 there could be a further bill impact for residential customers.

The Parties note that this Settlement Proposal includes all tables, appendices and the live Excel models that represent the evidence and the settlement between the Parties at the time of filing the Settlement Proposal.

The overall financial impact of the Settlement Proposal is to reduce the total base revenue requirement by \$448,292, from \$25.9 million to \$25.45 million. This reduces the forecasted amount API collects from provincial ratepayers through RRRP funding from \$14.76 million to \$14.34 million.

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 11 of 63 Filed: September 24, 2019

A Revenue Requirement Work Form (RRWF), incorporating all terms that have been agreed to is filed with the Settlement Proposal. Through the settlement process, API has agreed to certain adjustments to its original 2020 Application. The changes are described in the following sections.

API has provided the following Table 1 - 2020 Revenue Requirement highlighting the changes to its Rate Base and Capital, Operating Expenses and Revenue Requirement from API's Application as filed as a result of interrogatories and this Settlement Proposal.

Table 1 - 2020 Revenue Requirement

	Application May 17 2019	IRR Aug 14 2019	Variance over Original Filing	Settlement Proposal Sep 24 2019	Variance over IRRs
Long Term Debt Rate	4.95%	4.95%	0.00%	4.95%	0.00%
Short Term Debt Rate	2.82%	2.82%	0.00%	2.82%	0.00%

Depreciation Expense	\$4,043,341	\$4,034,513	-\$8,828	\$4,034,602	\$89
Income Taxes (Grossed up)	\$333,974	\$360,566	\$26,592	\$340,058	-\$20,507
Service Revenue Requirement	\$25,937,065	\$25,954,755	\$17,690	\$25,943,364	-\$11,391
Revenue Offset	\$51,889	\$51,889	\$0	\$488,791	\$436,902
Base Distribution Revenue Requirement	\$25,885,176	\$25,902,866	\$17,690	\$25,454,574	-\$448,292
Gross Revenue Deficiency/Sufficiency	\$2,192,853	\$1,231,108	-\$961,744	\$282,638	-\$948,470

Based on the foregoing, and the evidence and rationale provided below, the Parties accept this Settlement Proposal as appropriate and recommend its acceptance.

Table 2 - 2020 Bill Impact Summary below illustrates the updated Bill Impacts based on the results of this Settlement Proposal.

The residential customer bill impacts below include the impact of the base distribution charge cap of \$36.86 per month under the DRP program.

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 14 of 63 Filed: September 24, 2019

RRF OUTCOMES

The Parties accept the Applicant's compliance with the Board's required outcomes as defined by the Renewed Regulatory Framework (RRF). For the purpose of the settlement of the issues in this proceeding, and subject to the adjustments noted in this Settlement Proposal, the Parties accept that API's proposed rates in the 2020 Test Year will, in all reasonably foreseeable circumstances, allow the Applicant to meet its obligations to its customers while maintaining its financial viability.

1 PLANNING

1.1 Capital

Is the level of planned capital expenditures appropriate and is the rationale for planning and pacing choices appropriate and adequately explained, giving due consideration to:

- customer feedback and preferences
- productivity
- benchmarking of costs
- reliability and service quality
- impact on distribution rates
- trade-offs with OM&A spending
- government-mandated obligations
- the objectives of API and its customers
- the distribution system plan, and
- the business plan

Full Settlement

The Parties accept the proposed 2020 capital expenditures in the amount of \$8.85 million as appropriate, subject to the addition of \$8,038 to 2020 capital expenditures, with corresponding adjustments to the forecast 2020 rate base and depreciation expense, reflecting the Parties' agreement that API will not include the amortization of pensions and other post-employment benefit (OPEB) related actuarial gains or losses in revenue requirement, as set out in issue 4.1.

A summary of API's fixed asset continuity schedule for the Bridge and Test Year is presented in Table 3 – Fixed Asset Continuity and 2020 Capital Expenditures below. The reduction in 2019 capital additions of \$474,024 during IRR's is the difference between total 2017-2019 DLI-related capital expenditures of \$927,246 in the original filing (which was kept consistent with the MAAD application amounts) and an updated forecast of \$453,221 in response to 4-Staff-57. \$250,000 of the 2017-2019 reduction, related to the timing of engineering for the 2020 substation rebuild, was added to 2020 capital expenditures as discussed in response to 9-Staff-77.

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 17 of 63 Filed: September 24, 2019

For the purposes of settlement of all the issues in this proceeding, the Parties accept the evidence of API that the level of planned capital expenditures and the rationale for planning and pacing choices are appropriate in order to maintain system reliability, service quality objectives and the reliable and safe operations of the distribution system.

None

1.2 OM&A

Is the level of planned OM&A expenditures appropriate and is the rationale for planning choices appropriate and adequately explained, giving due consideration to:

- customer feedback and preferences
- productivity
- benchmarking of costs
- reliability and service quality
- impact on distribution rates
- trade-offs with capital spending
- government-mandated obligations
- the objectives of API and its customers
- the distribution system plan
- the Business Plan
- affiliate relationships and shared services

Full Settlement

The Parties accept Test Year OM&A expenditures in the amount of \$13.69 million as appropriate. Relative to the updated application amount as provided at included as part of the interrogatory responses, the settled OM&A budget of \$13.69 million is a result of:

- a) a reduction of \$450,000 to the proposed 2020 OM&A budget;
- b) the reclassification of \$560,455 in costs related to IT assets shared by API with its affiliate, originally tracked as a offset to Other Revenue, to OM&A;
- c) the removal of \$123,553 (\$617,765/5) in costs related to the amortized recovery of certain DLI-related costs from OM&A, as set out in issue 4.3; and
- d) an increase of \$14,244 to the proposed 2020 OM&A budget reflecting the Parties' agreement that API will not include the amortization of Pension and OPEB related actuarial gains or losses in revenue requirement, as set out in issue 4.1.

The reclassifications described in items b) and c) above result in adjustments to the Administrative and General category of spending. For simplicity, API has reflected the adjustments resulting from items a) and d) as a net reduction of \$435,756 in the OM&A account with the largest 2020 balance (Account 5615). While the \$450,000 reduction in

the (adjusted) proposed OM&A budget described in item a) has been reflected as a reduction in the Administrative and General category of spending in Table 4 below, the Parties acknowledge that it is for API to manage the reduced spending in its sole discretion as it sees fit based on the actual operating circumstances it experiences in the test year and beyond.

2 REVENUE REQUIREMENT

2.1 Are all elements of the revenue requirement reasonable, and have they been appropriately determined in accordance with OEB policies and practices?

Full Settlement

The Parties agree that the methodology used by API to calculate the Revenue Requirement is appropriate.

A summary of the adjusted Revenue Requirement of \$25.45 million reflecting adjustments and settled issues in accordance with the above is presented in Table 5 - 2020 Revenue Requirement Summary below.

Table 5 - 2020 Revenue Requirement Summary

	Application May 17 2019	IRR Aug 14 2019	Variance over Original Filing	Settlement Proposal Sep 24 2019	Variance over IRRs
OM&A Expenses	\$13,677,187	\$13,687,136	\$9,949	\$13,688,282	\$1,146

2.1.2 Rate Base

Full Settlement

The Parties accept the evidence of API that the rate base calculations, after adjusting for updates to 2019 Dubreuil Lumber Inc. (DLI)-related capital expenditures in response to 9-Staff-77 and adjusting the working capital allowance included in the rate base, are reasonable and have been appropriately determined in accordance with OEB policies and practices. Table 7 – 2020 Rate Base below outlines API's Rate Base calculation. For clarity, this calculation will be further updated to reflect the pending updates to OEB cost of capital parameters discussed in issue 2.1.1 and the possible update to cost of power discussed in issue 2.1.3.

2.1.5 Taxes

Full Settlement

Subject to removal of the enhanced CCA smoothing adjustment made in response to 4-Staff-58, and updated to reflect the Settlement Proposal, the Parties accept that forecast taxes are appropriate and have been correctly determined in accordance with OEB accounting policies and practices, including the OEB's July 25, 2019 accounting direction regarding relating to changes to capital cost allowance.

A summary of the updated Taxes is presented in Table 10 – 2020 Income Taxes below.

Table 10 - 2020 Income Taxes

	Application May 17 2019	IRR Aug 14 2019	Variance over Original Filing	Settlement Proposal Sep 24 2019	Variance over IRRs
Income Taxes (Grossed up)	\$333,974	\$360,566	\$26,592	\$340,058	-\$20,507

An updated Income Tax / PILS Model has been submitted in Live Excel format as part of this Settlement Proposal.

2.1.6 Other Revenue

Full Settlement

The Parties agree that an Other Revenue forecast of \$612,344 is appropriate and has been correctly determined in accordance with OEB accounting policies and practices, . The adjustment from the API's filed evidence is result of: the reclassification of \$560,455 in costs related to IT assets shared by API's affiliate from an offset to Other Revenue to OM&A as described in issue 4.1. For the purpose of the RRWF and Cost Allocation models, the Other Revenue amount is adjusted by \$123,553 for costs related to the amortized recovery of certain DLI-related costs in order to include these costs in API's base revenue requirement as shown in Table 11 below and as explained in issue 4.3.

Table 11 - 2020 Other Revenue

	Application May 17 2019	IRR Aug 14 2019	Variance over Original Filing	Settlement Proposal Sep 24 2019	Variance over IRRs
Specific Service Charges	\$69,366	\$69,366	\$0	\$69,366	\$0
Late Payment Charges	\$33,000	\$33,000	\$0	\$33,000	\$0
Other Distribution Revenues	\$484,978	\$484,978	\$0	\$484,978	\$0
Other Income and Deductions	-\$535,455	-\$535,455	\$0	\$25,000	\$560,455
Total	\$51,889	\$51,889	\$0	\$612,344	\$560,455
Less Amortized Recovery of DLI-Related Costs ²				-\$123,553	
Total Adjusted Other Revenue for RRWF / Cost Allocation				\$488,791

3 LOAD FORECAST, COST ALLOCATION, AND RATE DESIGN

3.1 Are the proposed load and customer forecast, loss factors, CDM adjustments and resulting billing determinants appropriate, and, to the extent applicable, are they an appropriate reflection of the energy and demand requirements of API's customers?

Full Settlement

The Parties accept the evidence of API and its methodology used for the load forecast, customer forecast, loss factors, and CDM adjustments after incorporating the following adjustments:

- all adjustments in the load forecast model during the IRR process based on responses to interrogatories, including adjustments to reflect changes in OEB policy with respect to CDM adjustments related to the wind-down of the Conservation First Framework; and,
- an increase of 12.5 GWh in the 2020 load forecast for the R2 rate class for the purpose of settlement.

The resulting billing determinants are presented in Table 12 - 2020 Test Year Billing Determinants below.

Table 12 - 2020 Test Year Billing Determinants (CDM Adjusted)

Supporting Parties

API, VECC, SEC

Parties Taking No Position

3.3 Is API's methodology for allocating costs attributable to the Dubreuilville service area appropriate?

Full Settlement

The Parties agree that API will withdraw its proposal to directly allocate DLI related costs to the R1 and R2 class, instead allocating those costs in the manner prescribed by the OEB's cost allocation methodology. The Parties acknowledge that the impact of adding DLI related costs to API's overall cost structure is more than offset by the inclusion of DLI's customers to API's customer base for the purpose of cost allocation, such that API's customers outside of the Township of Dubreuilville, particularly in its Seasonal and Street Lighting rate classes, are not adversely affected by the inclusion of DLI related costs.

Supporting Parties

API, VECC, SEC

Parties Taking No Position

3.4 Are the applicant's proposals for rate design appropriate?

Full Settlement

The Parties accept the evidence of API that all elements of the proposed rate design have been correctly determined in accordance with OEB policies and practices, subject to the following adjustment:

the fixed and volumetric rates for the Seasonal and Street Lighting rate classes, which are to be determined starting from the fixed/variable split that results from the application of 2019 approved rates to the proposed 2020 load forecast.

With respect to the OEB's policy on residential rate design, API expects to transition its residential customers to a fully fixed rate by 2023 and expects to transition its seasonal customers to a fully fixed rate by approximately 2026.

Table 18 - 2020 Distribution Rates & Fixed to Variable Split

Rate Class	Billing Determinant for Variable	Application May 17 2019		IRR Aug 14 2019		Settlement Proposal Sep 24 2019

4 ACCOUNTING

4.1 Have all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the rate-making treatment of each of these impacts appropriate?

Full Settlement

Subject to the following reclassifications and accounting changes, the Parties agree that API has included all impacts of any changes in accounting standards, policies, estimates, and adjustments been properly identified and recorded, and is the ratemaking treatment of each of these impacts appropriate:

- a) \$560,455, reflecting API's allocation of costs (depreciation, return and gross-up for taxes) related to IT assets shared by API's affiliate, is reclassified from an offset to Other Revenue (Account 4380) to an OM&A expense (Account 5675);
- b) \$123,553, reflecting the amortized recovery of certain DLI-related costs (\$617,765/5) is removed from OM&A (Account 5655), but remains in API's base revenue requirement as an offset to Other Revenue (Account 4305) for the purpose of the RRWF and Cost Allocation models filed with this Settlement Proposal (see issue 4.3 for details of API's proposed accounting treatment); and,
- c) In an effort to enhance alignment around Board Policy, API will remove the amortization of actuarial gains and losses related to Pensions and OPEB in revenue requirement. Parts of the table below were provided in 9-Staff-73, and the rows at the bottom of the table show the calculated impact on 2020 capital expenditures and OM&A:

Table 21 - Amortized Actuarial Gains and Losses in Pension and OPEB Expense

Defined Benefit Pension Plan	2020 Test Year	
Pension Expense Excluding Amortized Actuarial (Gains) Losses	\$ 284,218	
Amortized Actuarial (Gains) Losses	\$ 54,418	A
Pension Expense	\$ 338,636	
Pension Expense Excluding Amortized Actuarial (Gains) Losses Allocated to Capital	\$ 102,533	
Amortized Actuarial (Gains) Losses Allocated to Capital	\$ 19,631	В
Pension Expense Allocated to Capital	\$ 122,164	
Post-Retirement Benefits Expense	2020 Test Year	
Post-retirement Benefits Expense Excluding Amortized Actuarial (Gains) Losses	\$ 540,111	
Amortized Actuarial (Gains) Losses	-\$ 76,700	С
Post-retirement Benefit Costs	\$ 463,411	
Post-retirement Benefits Expense Excluding Amortized Actuarial (Gains) Losses Allocated to Capital	\$ 194,847	
Amortized Actuarial (Gains) Losses Allocated to Capital	-\$ 27,670	D
Post-retirement Benefit Costs Allocated to Capital	\$ 167,177	
Pension Expense and Post-retirement Benefit Costs (Gains) Allocated to Capital	-\$ 8,038	E = B + D
Pension Expense and Post-retirement Benefit Costs (Gains) Allocated to OM&A	-\$ 14,244	A + C - E

As a result of removing the amortization of net actuarial gains in 2020, capital expenditures are increased by \$8,038 and OM&A expenses are increased by \$14,244. For simplicity in determining the required adjustments to 2020 revenue requirement, the \$8,038 capital expenditure increase is included as an adjustment to Account 1830 and the \$14,244 OM&A expense increase is

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 49 of 63 Filed: September 24, 2019

included as an adjustment to Account 5615. Starting the effective date of this proceeding, API will accumulate all actual amortized actuarial gains and losses in OEB 1508 Sub-Accounts;

Account 1508 Other Regulatory Assets, Subaccount – Amortized Pension Actuarial Gains/Losses

Account 1508 Other Regulatory Assets, Subaccount – Amortized OPEB Actuarial Gains/Losses

4.2 Are API's proposals for deferral and variance accounts, including the balances in the existing accounts and their disposition, requests for new accounts and the continuation of existing accounts, appropriate?

Full Settlement

The Parties agree that API's proposals for deferral and variance accounts are appropriate, subject the following:

- a) API will dispose of the forecasted balance in the 1508 sub-account related to pole attachment charges on a final basis,
- b) API will change its approach with respect to amortized actuarial gains and losses relating to OPEB and Pensions as discussed in issue 4.1, and
- c) The agreement with respect to recovery and proposed accounting treatment of DLI-related costs as further detailed in issue 4.3.

4.3 Is API's proposal for disposition of the Interim Licence Deferral Account and the Transaction and Integration Cost Deferral Account, including the balances and cost recovery mechanism appropriate?

Full Settlement

The Interim Licence Deferral Account ("ILDA") and the Transaction and Integration Cost Deferral Account ("TICDA"), established in prior OEB decisions, relate to costs incurred by API in relation to the 2017-2019 operation, acquisition and integration of the Dubreuilville portion of the distribution system. API proposed in the current Application to recover the forecasted costs of \$1,048,148 recorded in the ILDA and \$98,969 recorded in the TICDA accounts in three parts, as summarized below:

- a) recover the costs related to one-time events, transaction costs and integration costs of \$617,765 over a 5-year period from 2020 to 2024 through an adjustment of \$123,553 (1/5 of \$617,765) to its base revenue requirement, as shown in Table 5 under issue 2.1,
- b) include the 2020 average net book value of 2017-2019 capital investments in the DLI distribution system in API's 2020 rate base, and
- c) continue to dispose of a forecasted account balance of \$283,662 through a rate rider of \$11.16 per customer per month (to be recovered from former DLI customers) that was established in EB-2018-0271, on an interim basis. This rate rider recovers forecasted 2017-2019 OM&A costs, as well as depreciation and cost of capital on 2017-2019 capital investments. A request for final disposition of this account will be brought forward in the next rebasing application.

The Parties agree that this approach is appropriate as it ensures that existing API customers benefit from the RRRP and DRP for these amounts. By ensuring R1 and R2 customers benefit from the RRRP and DRP for the balance in the ILDA and TICDA, those customers are not harmed by the MAADs transaction between API and DLI. Furthermore, the Parties agree that the approach is appropriate due to the unique circumstances leading to the MAADs transaction, which resulted from an OEB order requiring API to become the licensed interim operator of DLI's distribution system as a result of DLI being unable to continue as the licensed distributor of its system.

The Parties further agree that, whether or not API rebase its rates in 2025, the revenue requirement impact of the DLI related adjustment to base rates will be removed from rates in 2025 and going forward to ensure there is no over-recovery of those amounts.

In order to effectively include the \$123,553 in API's base revenue requirement as discussed above, the Parties agree that in preparing the RRWF and Cost Allocation models API will include an adjustment to other revenue (specifically as an amount in Account 4305 in the Cost Allocation model). For clarity, this adjustment is made for the

Algoma Power Inc. EB-2019-0019 Settlement Proposal Page 55 of 63 Filed: September 24, 2019

sole purpose of being able to include the adjustment to API's base revenue requirement in the OEB models and API's proposed accounting treatment of the cost recovery is as follows:

- 1) The identified \$617,765 in one-time and transactional costs will remain in the 1508 sub-accounts.
- 2) API will transfer \$10,296 (\$123,553/12) per month from Account 4080 (Distribution Service Revenue) to the 1508 sub-accounts to draw down the regulatory asset balance by a total of \$617,765 over the 5 years.
- 3) This approach effectively treats the additional \$123,553 in base revenue in a manner that's comparable to what would have occurred if it had instead been collected through rate riders.

5.3 Is the proposal for an Advanced Capital Module for the Echo River TS appropriate, and does the proposal include sufficient justification and cost estimates to show need and prudence?

Full Settlement

The Parties agree that API's proposal for an Advanced Capital Module (ACM) for the Echo River TS in the amount of \$7.5 million, with a proposed in-service date of 2021 is appropriate. This agreement is subject to the condition that upon its next rebasing application after the completion of the Echo River TS project, API will provide information and business case analysis that incorporates the updated forecast cost responsibility for the project based on the outcome of Hydro One's detailed engineering study and cost estimate process. API must demonstrate to the satisfaction of the OEB that it will have considered the refined cost estimate and cost responsibility for the project in comparison to other reasonable alternatives prior to committing to having Hydro One proceed with the project.

The recovery of an annual revenue requirement impact of \$614,380 is discussed under issue 5.5. For clarity, this annual revenue requirement impact is estimated using the OEB's current ACM/ICM module, populated with certain placeholder values. In a future proceeding API will populate the OEB's most current ACM/ICM model as required to determine the actual incremental revenue requirement.

5.4 Is the proposal for an Advanced Capital Module for the Sault Ste. Marie facility appropriate, and does the proposal include sufficient justification and cost estimates to show need and prudence?

Full Settlement

The parties agree that the proposal for an ACM for the Sault Ste. Marie facility in the amount of \$12.69 million, with a proposed in-service date of 2022, is appropriate. The Parties agree to a reduction to the requested pre-approved capital budget of \$1.41 million from \$14.1 million to \$12.69 million. To the extent that API exceeds the approved \$12.69M capital budget when completing the project, API will have to explain and justify the prudence of the overspend if it seeks to include the full capital expenditure in rate base upon rebasing for rate-setting on a going forward basis.

For clarity, in a future proceeding API will populate the OEB's most current ACM/ICM model as required to determine the actual incremental revenue requirement associated with the project, subject to entering a maximum project cost of \$12.69 million in that model.

5.5 Is API's proposal for alternate funding treatment for ACM projects, under the RRRP framework, appropriate?

Full Settlement

The Parties agree that API's proposal to recover the portion of ACM revenue allocated to the RRRP-eligible rate classes through revenue requirement adjustments during the IRM period rather than ACM rate riders is appropriate. This agreement is based on the differences in the resulting bill impacts to the RRRP-eligible rate classes that would result from traditional ACM cost recovery through rate riders as compared to cost recovery through base rates. These differences are fully described in Section 1.3.5 of Exhibit 1 of the Application, and summarized below.

In the normal course, the incremental revenue requirement impact of any OEB-approved ACM projects would be recovered through rate riders. This approach is driven by administrative and regulatory efficiency, whereby the revenue collected by the utility and the total bill impact to the customer both approximate what would have occurred by including the investment in rate base and adjusting base rates accordingly.

In API's circumstance, the majority of its customers are eligible for rate protection under the RRRP and DRP programs. The RRRP programs provide funding that allows the base distribution rates for all RRRP-eligible rate classes to be held to inflationary adjustments, such that increases in revenue requirement are not entirely passed through to API's ratepayers. Further, the DRP program sets a cap on monthly base distribution rates, which does not include the impact of any rate riders. API's RRRP-eligible customers would therefore experience a materially larger bill impact as a result of ACM rate riders compared to the circumstance where the investment was instead added immediately to rate base and the costs were recovered through corresponding adjustments to API's revenue requirement.

It is the Parties' view that it is appropriate that API's ratepayers should receive the benefit of RRRP and/or Distribution Rate Protection for these capital related costs in the context of ACM cost recovery, based on the intent of the ACM policy to allow recovery of the incremental revenue requirement during non-rebasing years with bill impacts that approximate a situation where the project costs had been included in base rates.

Consistent with the rationale for this treatment, the Parties further agree that that in IRM years following the required revenue requirement adjustments, the amounts included with respect to ACM projects shall not be subject to adjustment by the Price-Cap IR factor.

Last Rebasing Year	2015

The RRWF has been enhanced commencing with 2017 rate applications to provide estimated base distribution rates. The enhanced RRWF is not intended to replace a utility's formal rate generator model which should continue to be the source of the proposed rates as well as the final ones at the conclusion of the proceeding. The load forecasting addition made to this model is intended to be demonstrative only and does not replace the information filed in the utility's application. In an effort to minimize the incremental work required from utilities, the cost allocation and rate design additions to this model do in fact replace former appendices that were required to be filed as part of the cost of service (Chapter 2) filing requirements.

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. Notes:

General

Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

- (1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)
- (2) Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I
- (3) Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount.
- (6) Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- (8) 4.0% unless an Applicant has proposed or been approved for another amount.
- (9) The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

Revenue Requirement Workform (RRWF) for 2019 Filers

Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

Notes:

⁽¹⁾ Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

Revenue Requirement Workform (RRWF) for 2019 Filers

Cost Allocation and Rate Design

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Per Board Decision

A) Allocated Costs

Name of Customer Class ⁽³⁾ From Sheet 10. Load Forecast		Allocated from rious Study (1)	%		llocated Class enue Requirement (1) (7A)	%
1 Residential 2 R2 3 Seasonal 4 Street Light 5 6 7 8 9 0 1 1 2 3 4 4 5 6 7 8 9 9 0 1 2 3 4 5 6 7 8 9 9 0 1 0 1 0 1 0 0 1 0 0 0 0 0 0 0 0 0	\$ \$ \$ \$	15,134,936 3,731,937 3,719,751 696,314	65.00% 16.03% 15.98% 2.99%	\$ \$ \$ \$ \$	17,181,123 5,153,895 3,435,887 172,459	66.23% 19.87% 13.24% 0.66%
Total	\$	23,282,938	100.00%	\$	25,943,364	100.00%
			Service Revenue Requirement (from Sheet 9)	\$	25,943,364.49	

- (1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 Low Voltage (LV) Costs are also excluded.
- (2) Host Distributors Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.
- (3) Customer Classes If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

B) Calculated Class Revenues

EB-2019-0019
Settlement Proposal
Attachment A - RRWF
Page 12 of 17
Filed: September 24, 2019

Algoma Power Inc.

Name of Customer Class		Forecast (LF) X		F X current roved rates X	LF X	Proposed Rates	scellaneous Revenues
		rates (7B)		(1+d) (7C)		(7D)	(7E)
Residential R2 Seasonal	\$ \$	17,466,400 4,662,668 2,822,776	\$ \$	17,662,518 4,715,021 2,854,471	\$	17,662,518 4,715,021 2,874,602	\$ 328,512 83,044 72,716
Street Light	\$	220,092	\$	222,563	\$\$	202,433	\$ 4,519
Total	\$	25,171,936	\$	25,454,574	\$	25,454,574	\$ 488,791

⁽⁴⁾ In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

⁽⁵⁾ Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

⁽⁶⁾ Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

⁽⁷⁾ Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

Algoma Power Inc. EB-2019-0019 Settlement Proposal Attachment A - RRWF Page 13 of 17 Filed: September 24, 2019

C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios	Status Quo Ratios	Proposed Ratios	Policy Range
	Most Recent Year: 2015	(7C + 7E) / (7A)	(7D + 7E) / (7A)	
	%	%	%	%
Residential	105.07%	104.71%	104.71%	85 - 115
R2	105.06%	93.10%	93.10%	80 - 120
Seasonal	85.00%	85.19%	85.78%	85 - 115
Street Light	42.79%	131.67%	120.00%	80 - 120

⁽⁸⁾ Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

⁽⁹⁾ Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".

⁽¹⁰⁾ Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

Algoma Power Inc. EB-2019-0019 Settlement Proposal Attachment A - RRWF Page 14 of 17 Filed: September 24, 2019

(D) Proposed Revenue-to-Cost Ratios (11)

Name of Customer Class	Propos	ed Revenue-to-Cost Ratio		Policy Range
	Test Year	Price Cap IR F		, ,
	2020	2021	2022	
Residential	104.71%	104.71%	104.71%	85 - 115
R2	93.10%	93.10%	93.10%	80 - 120
Seasonal	85.78%	85.78%	85.78%	85 - 115
Street Light	120.00%	120.00%	120.00%	80 - 120

⁽¹¹⁾ The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2019 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2020 and 2021 Price Cap IR models, as necessary. For 2020 and 2021, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2018 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

Revenue Requirement Workform (RRWF) for 2019 Filers

New Rate Design Policy For Residential Customers

Please complete the following tables

A Data Inputs (from Sheet 10. Load Forecast)

Customers	9,113
kWh	113,337,066
Proposed Residential Class Specific Revenue	\$ 5,636,857.66
Requirement ¹	

Residential Base Rates on Current Tariff				
Monthly Fixed Charge (\$)	\$	42.72		
Distribution Volumetric Rate (\$/kWh)	\$	0.0174		

B Current Fixed/Variable Split

	Base Rates	Billing Determinants	Revenue	% of Total Revenue
Fixed	42.72	9,113	\$ 4,671,608.92	70.32%
Variable	0.0174	113,337,066	\$ 1,972,064.95	29.68%
TOTAL	-	-	\$ 6,643,673.87	-

C Calculating Test Year Base Rates

Number of Remaining Rate Design Policy	
Transition Years ²	4

	Test Year Revenue @ Current F/V Split	Test Year Base Rates @ Current F/V Split	Reconciliation - Test Year Base Rates @ Current F/V Split
Fixed	\$ 3,963,649.48	36.25	\$ 3,964,087.62
Variable	\$ 1,673,208.18	0.0148	\$ 1,677,388.58
TOTAL	\$ 5,636,857.66	-	\$ 5,641,476.20

	New F/V Split	Revenue @ F/V Sp		Final Adj Base R		Revenue leconciliation @ Adjusted Rates
Fixed	77.74%	\$ 4,38	1,951.52	\$	40.07	\$ 4,381,820.44
Variable	22.26%	\$ 1,25	4,906.13	\$	0.0111	\$ 1,258,041.44
TOTAL	-	\$ 5,63	6,857.66	-		\$ 5,639,861.88

Checks ³	
Change in Fixed Rate	\$ 3.82
Difference Between Revenues @ Proposed Rates	\$3,004.22
and Class Specific Revenue Requirement	0.05%

Notes:

- 1 The final residential class specific revenue requirement, excluding allocated Miscellaneous Revenues, as shown on Sheet 11. Cost Allocation, should be used (i.e. the revenue requirement after any proposed adjustments to R/C ratios).
- The distributor should enter the number of years remaining before the transition to fully fixed rates is completed. A distributor transitioning to fully fixed rates over a four year period and began the transition in 2016 would input the number "3" into cell D40. A distributor transitioning over a five-year period would input the number "4". Where the change in the residential rate design will result in the fixed charge increasing by more than \$4/year, a distributor may propose an additional transition year.
- 3 Change in fixed rate due to rate design policy should be less than \$4. The difference between the proposed class revenue requirement and the revenue at calculated base rates should be minimal (i.e. should be reasonably considered as a rounding error)

Ontario Energy Board

Revenue Requirement-Workform (RRWF) for 2019 Filers

Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluentric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

² The Fixed Variable split, for each customer class, drives the "rate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months! / (Class Allocated Revenue Requirement).

Revenue Requirement Workform (RRWF) for 2019 Filers

Tracking Form

The first row shown, labelled "Original Application", summarizes key statistics based on the data inputs into the RRWF. After the original application filing, the applicant provides key changes in capital and operating expenses, load forecasts, cost of capital, etc., as revised through the processing of the application. This could be due to revisions or responses to interrogatories. The last row shown is the most current estimate of the cost of service data reflecting the original application and any updates provided by the applicant distributor (for updated evidence, responses to interrogatories, undertakings, etc.)

Please ensure a Reference (Column B) andor tem Description (Column C) is entered. Please note that unused rows will automatically be hidden and the PRINT AREA set when the PRINT BUTTON on Sheet 1 is activated.

(1) Short reference to evidence material (interrogatory response, undertaking, exhibit number, Board Decision, Code, Guideline, Report of the Board, etc.)

(2) Short description of change, issue, etc.
