**Re: Dominion Newenergy Inc., doing business as DNE Resources
Application for a Gas Marketer License/OEB #: EB-2019-0240**

Dear Mr. Pickernell,

In answer to your letter of October 3rd, 2019, please find below DNE Resources' answers to your question as follows:

1. Section 10, Page 8: Intended Market Activity

DNE Resources is actively keeping close tabs on the Ontario natural gas and electricity markets as a whole as it intends to re-enter the Ontario market should the value proposition dynamics change. Having experienced players in the energy industry acting for the company, DNE Resources regularly intervenes with other industry leaders in order to advance and keep up to date on its continued analysis of the Ontario market.

DNE Resources cannot anticipate how many low-volume consumers the applicant expects to serve at the present time and is keeping its Ontario licenses active in order to facilitate a rapid market entry as soon as it can and in accordance with its intended 2020 planned entry.

We hope the foregoing is to your satisfaction.

Should you require any other information, please do not hesitate to contact myself as I am assisting Mr. Gohier in this matter.

Yours truly,

DOMINION NEWENERGY INC.
