3.1 Application Introduction

IN THE MATTER OF the Ontario Energy Board Act, 1998, being Schedule B to the Energy Competition Act, 1998, S.O. 1998, c.15;

AND IN THE MATTER OF an Application by Newmarket -Tay Power Distribution Ltd. for an Order or Orders approving or fixing a proposed schedule of adjusted interim distribution rates, retail transmission rates and other charges, effective May 1, 2020

- Newmarket-Tay Power Distribution Ltd. ("NT Power") is incorporated pursuant to the Ontario Business Corporations Act. NT Power distributes electricity within the Town of Newmarket, Town of Midland and the Township of Tay as described in its license (ED-2007-0624).
- 2. NT Power applies for an order or orders under the Price Cap IR Index methodology approving just and reasonable rates and other charges effective May 1, 2020; and
- 3. NT Power requests that, pursuant to Section 34.01 of the Board's Rules of Practice and Procedure, this proceeding be conducted by way of written hearing.

3.1.2 Components of the Application Filing

1. Manager's Summary

NT Power's - Midland rate zone ("MRZ") current rates were effective May 1, 2019, reference EB-2018-0055. NT Power is seeking the Ontario Energy Board's (the "Board") approval for the rates it charges to distribute electricity to its customers, as is required of licenced and rate-regulated distributors in Ontario. NT Power is using the Price Cap IR for the NT Power-MRZ to set rates for 2020.

The scope of this section is to provide the information and rate adjustment request pertaining to the NT Power – MRZ of the NT Power 2020 IRM Rate Application.

Key Elements of Application

| # | Description | NT Power – MRZ (Midland Rate Zone) Inclusions |
|---|--|---|
| 1 | Z Factor Claim | No |
| 2 | Incremental Capital Module Claim | No |
| 3 | Advanced Capital Module Claim | No |
| 4 | Lost Revenue Adjustment Mechanism (LRAMVA) | Yes |
| 5 | Rate Harmonization pursuant to a prior Board's decision | No |
| 6 | Renewable Generation and/or Smart Grid Adder Request | No |
| 7 | Multiple Service Areas with Different Rates | Yes |
| 8 | Migration of customer into or out of Class A (Global Adjustment) | No |
| 9 | Other – Cost Allocation | Yes |

Rate Adjustment Requests

Lost Revenue Adjustment Mechanism Variance Account

A Rate Rider Recovery for the MRZ Lost Revenue Adjustment Mechanism Variance Account 1568 ("LRAMVA") effective until April 30, 2021. NT Power is seeking the Board's approval for a two-year disposition period for the combined principal and carrying charges LRAMVA total of \$92,978 (principal amount of \$90,126 and carrying charges of \$2,852).

Other - Cost Allocation Adjustment

In NT Power's Decision and Order on August 23, 2018 granting approval for NT Power to purchase and amalgamate with Midland Power Utility Corporation ("Midland Power" or "MPUC") EB-2017-0269, the Ontario Energy Board (the "OEB") ordered:

"Newmarket-Tay Power Distribution Ltd. shall update their cost allocation models and file these models with the OEB no later than twelve months following Newmarket-Tay Power Distribution Ltd.'s acquisition of all shares of Midland Power Utility Corporation. This filing shall also include a proposal that demonstrates how rates that are too high or too low relative to the OEB's cost allocation policies will be adjusted over time."¹

The Board did not specify that the update must comply with any particular filing requirements in its Decision and Order.

On September 12, 2019, NT Power filed updated cost allocation models and a proposal to align certain customer classes within the Board's cost allocation target bands. The MRZ customer classes are within the target allocation bands with the exception of the street light class. NT Power submits that the adjustment required in this case is immaterial and not warranted at this time.

On September 27, 2019, NT Power received a letter from the Board requesting further information and assigned case number EB-2019-0231 to the filing.

¹ Ontario Energy Board Decision and Order EB-2017-0269, August 23, 2018 p.24

The Board also noted within its letter:

"The OEB also notes that Newmarket-Tay Power is due to file an incentive rate-setting mechanism (IRM) application on November 4, 2019. It is the OEB's expectation that Newmarket-Tay Power will incorporate its cost allocation update and proposal as part of its upcoming IRM application."

On November 11, 2019, NT Power filed a response to the Board's letter of September 27, 2019 as well as corrected updated cost allocation models.

As it proposed in its November 11, 2019 response, NT Power is filing this IRM application for 2020 rates, in accordance with the Chapter 3 filing requirements with one change. Instead of using existing 2019 rates as the starting point for the 2020 IRM model, NT Power is using the 2019 proposed rates which are the output of the corrected updated cost allocation application filing as the input into the IRM model for 2020 IRM rates

The proposed 2019 rates and bill impact summary by customer class is provided in the following excerpt of Table 14 from NT Power's corrected updated cost allocation models filed on November 11, 2019 (EB-2019-0231).

| Table 14 2019 Proposed monthly rate charges | | | | | | | |
|--|-------------------------|------------|---------------|----------------------------|-----------|---------------|------------|
| | Fixed distribution rate | | | Variable distribution rate | | | |
| | | Fixed Band | Proposed rate | | Variable | Proposed with | Total bill |
| Rate Class | 2019 rate | adj | with band adj | 2019 rate | Band adj | band adj | impact % |
| Residential - NTRZ | 27.61 | 0.93 | 28.54 | - | - | - | 0.91% |
| General Service Less Than 50 kW - NTRZ | 31.01 | - | 31.01 | 0.0203 | - | 0.0203 | 0.00% |
| General Service 50 to 4,999 kW - NTRZ Thermal | 140.62 | - | 140.62 | 4.8511 | - | 4.8511 | 0.00% |
| General Service 50 to 4,999 kW - NTRZ Interval | 140.62 | - | 140.62 | 4.9867 | - | 4.9867 | 0.00% |
| Sentinel Lighting - NTRZ | 3.30 | (1.00) | 2.30 | 12.6396 | (3.8330) | 8.8066 | -9.09% |
| Street Lighting - NTRZ | 3.24 | (2.44) | 0.80 | 16.1088 | (12.1159) | 3.9929 | -14.80% |
| Unmetered Scattered Load - NTRZ | 17.91 | (9.43) | 8.48 | 0.0206 | (0.0108) | 0.0098 | -29.78% |
| Residential - MRZ | 30.94 | - | 30.94 | - | - | - | 0.00% |
| General Service Less Than 50 kW - MRZ | 23.03 | - | 23.03 | 0.0170 | - | 0.0170 | 0.00% |
| General Service 50 to 4,999 kW - MRZ | 65.09 | - | 65.09 | 3.3170 | - | 3.3170 | 0.00% |
| Street Lighting - MRZ | 3.94 | - | 3.94 | 9.0935 | - | 9.0935 | 0.00% |
| Unmetered Scattered Load - MRZ | 10.65 | - | 10.65 | 0.0114 | - | 0.0114 | 0.00% |

Deferral and Variance Accounts

NT Power has completed sheet '3. – 2018 Continuity Schedule' for MRZ and confirms the entries representing Group 1 Deferral and Variance Account balances as of December 31, 2018 are accurate. NT Power proposes to dispose of the balance of the Group 1 Deferral and Variance Accounts.

Distribution Rates

NT Power is applying for a Decision and Order approving the proposed distribution rates and other charges for the MRZ set out in this Application as just and reasonable pursuant to Section 78 of the Board Act, to be effective May 1, 2020.

If the Board is unable to provide a Decision and Order in this Application for implementation by May 1, 2020, NT Power requests that the Board issue an Interim Rate Order declaring the current MRZ Distribution Rates and Specific Service Charges as interim until the implementation date of the approved 2020 distribution rates.

NT Power recognizes it requested a filing extension of 5 calendar days for this application. NT Power respectfully submits that this is not a material extension of time. Should the effective date not coincide with the Board's implementation date for 2020 distribution rates and charges, NT Power requests permission to recover the incremental lost revenue from the effective date to the implementation date in the MRZ.

Proposed Rates and Charges

The bill impact per customer class, including a typical residential customer consuming 750 kWh, as per the Report of the Board – *Defining Ontario's Typical Residential Customer*.

| | | Consumption | Bill Imp | act |
|--|-------|-------------|------------|-------|
| Rate Classes/ Categories | Units | (kWh) | \$ | % |
| RESIDENTIAL SERVICE CLASSIFICATION - RPP | kWh | 750 | \$1.91 | 1.6% |
| GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION - RPP | kWh | 2,000 | \$2.34 | 0.8% |
| GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION - Non- RPP (Other) | kW | 210,000 | \$(247.49) | -0.7% |
| UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION - RPP | kWh | 275 | \$0.58 | 1.2% |
| STREET LIGHTING SERVICE CLASSIFICATION - Non-RPP (Other) | kW | 46,300 | \$(62.39) | -0.8% |
| RESIDENTIAL SERVICE CLASSIFICATION - Non-RPP (Retailer) | kWh | 750 | \$(0.24) | -0.2% |

Proposed Bill Impacts

MicroFIT Generator Service Charge

NT Power is applying to continue the current MRZ monthly service charge of \$5.40 as approved by the Board in its 2019 IRM Application (EB-2018-0055).

3. Rate Generator Model and Supplementary Workforms

NT Power has utilized the Board's 2020 IRM Rate Generator model, Global Adjustment Analysis Workform, and the LRAMVA Workform in the preparation for the MRZ filing. NT Power confirms the accuracy of the 2018 billing determinants and trial balance for the pre-populated models.

DVA Balance Reconciliation to RRR as of December 31, 2018

The RRR balances shown in the Rate Generator Model, sheet '3. Continuity Schedule', column BV are the consolidated NT Power balances for NTRZ and MRZ.

The variances in the table below are a result of the incorrect RRR filing in April, 2019 for the MRZ. NT Power will make the revisions in its next annual RRR filing.

| | Continuity Schedule | | | | | | | |
|----|---|---------|-------------------|------------------|--------------|--------------|-----------|--|
| | | | (Rate (| | | | | |
| # | Description | Account | NT Power- NTRZ | NT Power- MRZ | Total | RRR 2.1.7 | Variance | |
| | | | Α | В | C = A+B | E | F=E-C | |
| 1 | LV Variance Account | 1550 | \$852,571 | \$443,479 | \$1,296,050 | \$1,296,050 | \$0 | |
| 2 | Smart Metering Entity Charge Variance Account | 1551 | -\$38,272 | -\$10,348 | -\$48,620 | -\$48,619 | \$0 | |

| 8 | RSVA - Power | 1588 | \$4,887,299 | -\$108,719 | \$4,778,580 | \$4,778,581 | \$0 | |
| 9 | RSVA - Global Adjustment | 1589 | \$1,965,092 | \$488,993 | \$2,454,085 | \$2,454,085 | \$0 | |
| 10 | Disposition and Recovery/Refund of Regulatory Balances (2013) | 1595 | \$0 | \$0 | \$0 | \$7,713 | \$7,713 | |
| 11 | Disposition and Recovery/Refund of Regulatory Balances (2014) | 1595 | \$170,944 | \$0 | \$170,944 | \$189,971 | \$19,027 | |
| 12 | Disposition and Recovery/Refund of Regulatory Balances (2015) | 1595 | -\$14,842 | \$0 | -\$14,842 | -\$1,668 | \$13,174 | |
| 13 | Disposition and Recovery/Refund of Regulatory Balances (2016) | 1595 | \$0 | \$19,026 | \$19,026 | \$30,628 | \$11,602 | |
| 14 | Disposition and Recovery/Refund of Regulatory Balances (2017) | 1595 | \$17,532 | \$13,173 | \$30,705 | \$17,532 | -\$13,173 | |
| 15 | Disposition and Recovery/Refund of Regulatory Balances (2018) | 1595 | \$499,436 | \$30,628 | \$530,064 | \$499,436 | -\$30,628 | |
| | | | | | | Total | \$7,715 | |

4. 2019 Current Tariff Sheet

Appendix 1 contains the approved 2019 MRZ Tariff Sheet dated April 18, 2019 from EB-2018-0055. As explained in the Manager's Summary, NT Power is proposing no adjustment to the MRZ cost allocation bands. The rates and charges within the tariff sheet provide the basis for the starting point from which the 2020 rates and charges are calculated using the Board's 2020 IRM model.

5. Supporting Documentation Cited Within Application

NT Power has committed to citing the supporting documentation throughout the application.

6. Who Is Affected by the Application

Statement: This IRM application will affect NT Power's - MRZ customers within the defined service area consisting of the Town of Midland, as defined by its license (ED-2007-0624).

Distributor's Profile

NT Power - MRZ is a local electricity distribution company with approximately 7,300 customers/connections in the Town of Midland that comprises the MRZ. The MRZ's electrical system has a total service area of 20 square kilometres and is supplied by four 44,000 volt feeders shared with Hydro One Networks Inc.

A Decision and Order (EB- 2017-0269) from the Board was received August 23, 2018 granting approval for NT Power to purchase and amalgamate with Midland Power Utility Corporation. The transaction closed on September 7, 2018. The amended Licence ED-2007-0624 and notification from the Board that the MPUC Licence (ED-2002-0541) was cancelled was received on September 17, 2018. NT Power - MRZ's distribution service area within the Town of Midland is confined primarily within the legal boundary limits of the Town of Midland.

7. Publication Notice

The persons affected by this Application are the customers within NT Power - MRZ's service area. NT Power proposes a copy of the notices related to the application be available on the websites:

- www.tayhydro.com
- www.nmhydro.on.ca
- www.midlandpuc.on.ca

NT Power also proposes the notices related to the application be posted at the office locations:

- 590 Steven Court, Newmarket, Ontario, L3Y 6Z2
- 16984 Highway 12, Midland, Ontario, L4R 4P4

and to serve a copy of the application to the interveners in it's last Cost of Service application (EB-2012-0147).

8. Accuracy of Billing Determinants

Statement: NT Power has filed the 2020 Annual Incentive Rate-Setting Application for MRZ consistent with Chapter 3 of the Filing Requirements for Electricity Distribution Rate Applications ("Chapter 3"), last revised July 12, 2018 and the Addendum to Filing Requirements for Electricity Distribution Rate Applications – 2020 Rate Applications dated July 15, 2019 (the "Filing Requirements") in order to prepare this Application.

NT Power confirms the accuracy of the 2019 Board Approved Tariff of Rates and Charges, and the accuracy of the billing determinants prepopulated in sheet '2. Current Tariff Schedule' and, respectively, in sheet '4. Billing Det. For Def-Var' of the 2020 IRM Rate Generator model.

NT Power confirms that it has not diverged from the Board's IRM rate generator model concept.

DATED at Newmarket, Ontario this 11th day of November, 2019.

All of which is respectfully submitted,

Newmarket – Tay Power Distribution Ltd.

Val Paul Ferguson, President

Certification of Evidence

As President of Newmarket-Tay Power Distribution Ltd. and in my capacity as an officer of that corporation and without personal liability, I hereby certify to the best of my knowledge and as at the date of this certification that the evidence in the Application is accurate, consistent and complete. The filing is consistent with the requirements from Chapter 3 of the Filing Requirements for Transmission and Distribution Rate Applications revised on July 12, 2018 and the Addendum to Filing Requirements for Electricity Distribution Rate Applications – 2020 Rate Applications dated July 15, 2019 (the "Filing Requirements") in order to prepare this Application.

Paul Ferguson, President

3.2 Elements of the Price Cap IR Index Plan

3.2.1 Annual Adjustment Mechanism

In accordance with Chapter 3, NT Power is a Price Cap IR Index applicant for the MRZ resulting in the assignment of a 0.15% stretch factor. NT Power - MRZ has chosen the Board's Price Cap IR Index established by the Board in its *October 18, 2012 Renewed Regulatory Framework for Electricity Report*.

The 2020 Rate Generator Model for the MRZ is stretch factor group two.

NT Power - MRZ's rate-setting parameters are:

Annual price escalator: 1.5% Stretch factor: 0.15% Total price index: 1.35%.

3.2.1.1 Application of the Annual Adjustment Mechanism

The annual adjustment mechanism applies to distribution rates (fixed and variable charges) uniformly across customer rate classes.

The annual adjustment mechanism will not be applied to the following components of delivery rates:

- Rate Adders
- Rate Riders
- Low Voltage Service Charges
- Retail Transmission Service Rates
- Wholesale Market Service Rate
- Rural and Remote Rate Protection Benefit and Charge
- Standard Supply Service Administrative Charge
- Capacity Based Recovery
- MicroFIT Service Charge
- Specific Service Charges
- Transformation and Primary Metering Allowances
- Smart Metering Entity Charge

3.2.2 Revenue to Cost Ratio Adjustments

NT Power filed updated cost allocation models with the Board on September 12, 2019. In this filing, NT Power is proposing to adjust rates that are too high or too low effective May 1, 2020.

On November 11, 2019 NT Power filed corrected updated cost allocation models with proposed fixed and variable band adjustments for the affected customer classes (EB-2019-0231).

The MRZ customer classes are within the target allocation bands with the exception of the street light class. NT Power submits that the adjustment required in this case is immaterial and not warranted at this time.

3.2.3 Rate Design for Residential Electricity Customers

On April 2, 2015, the Board released its *Board Policy: A New Distribution Rate Design for Residential Electricity Customers (EB-2014-0210)*, which stated that electricity distributors will transition to a fully-fixed monthly distribution service charge for residential customers. NT Power transitioned to a fully-fixed monthly service charge for the residential class effective May 1, 2019.

Residential Rate Design – Exceptions and Mitigation

NT Power has no exceptions in the MRZ.

3.2.4 Electricity Distribution Retail Transmission Service Rates

NT Power seeks changes to its Retail Transmission Service Rates for the MRZ as detailed in 2020 IRM Rate Generator Model (sheets 10. to 15.).

Electricity distributors are charged for transmission costs at the wholesale level and then pass these charges to their distribution customers through the Retail Transmission Service Rates ("RTSR"). Variance accounts are used to capture differences in the rate a distributor pays for wholesale transmission service compared to the retail rate that the distributor is authorized to charge when billing its customers (variance Account 1584 and Account 1586).

NT Power acknowledges that the RTSR's may be adjusted by the Board. NT Power - MRZ's proposes the RTSR rates below for the MRZ based on the 2020 IRM Rate Generator Model:

| Rate Class | Unit | Current RTSR Network | Proposed RTSR Network | Current RTSR Connection | Proposed RTSR Connection |
|---|--------|----------------------------|-----------------------------|-------------------------------|--------------------------------|
| Residential Service Classification | \$/kWh | 0.0066 | 0.0069 | 0.0052 | 0.0058 |
| General Service Less Than 50 kW Service Classification | \$/kWh | 0.0059 | 0.0062 | 0.0048 | 0.0054 |
| General Service 50 To 4,999 kW Service Classification | \$/kW | 2.4187 | 2.5383 | 1.8945 | 2.1164 |
| Unmetered Scattered Load Service Classification | \$/kWh | 0.0059 | 0.0062 | 0.0048 | 0.0054 |
| Street Lighting Service Classification | \$/kW | 1.8243 | 1.9145 | 1.4646 | 1.6361 |

Proposed RTSR

In the Board's most recent Decision and Rate Order (EB-2019-0164), new Uniform

Transmission Rates were effective and are as follows:

Uniform Transmission Rates

| Network Service Rate | \$3.83 kW |
|--|-----------|
| Line Connection Rate | \$0.96 kW |
| Transformation Connection Service Rate | \$2.30 kW |

Other Rates and Charges

NT Power seeks continuation of the other rates and charges approved in EB-2017-0060 specifically the Allowances, Specific Service Charges, Retail Service Charges, and Loss Factors for the MRZ.

3.2.5 Review and Disposition of Group 1 Deferral and Variance Account

Balances

Chapter 3 of the Board's Filing Requirements and the *Report of the Board on Electricity Distributors' Deferral and Variance Account Review* provide that the distributor's Group 1 audited account balances will be reviewed and disposed of if the pre-set disposition threshold of \$0.001 per kWh (debit or credit) is exceeded. Consistent with a letter from the OEB on July 25, 2014, distributors may elect to dispose of Group 1 account balances below the threshold. Distributors must file in their application Group 1 balances as of December 31, 2018 to determine if the threshold has been exceeded.

The MRZ deferral and variance account balances do not exceed the threshold test with a total claim per kWh of \$0.0009. NT Power is requesting disposal of the deferral and variance account balances for MRZ in an effort to mitigate potential future rate increases in 2021.

NT Power - MRZ has completed the Board Staff's 2020 IRM Rate Generator model 'sheet '3. Continuity Schedule' and has projected interest to April 30, 2019 on the December 31, 2018 balances. Actual interest has been calculated based on the Board's prescribed rates. Projected interest for the period is based on the Q4, 2019 Board's prescribed rate of 2.18%.

Statement: NT Power confirms the accuracy of the billing determinants for the MRZ used in sheet '4. Billing Det. For Def-Var' of the 2020 IRM Rate Generator model. NT Power confirms no adjustments were made to the deferral and variance account balances previously approved by the OEB on a final basis for the MRZ.

3.2.5.1 Wholesale Market Participants

Deferral/Variance Accounts

In accordance with the Chapter 3, a wholesale market participant ("WMP") refers to any entity that participates directly in any of the Independent Electricity System Operator ("IESO") administered markets. These participants settle commodity and market-related charges with the IESO, including when they are embedded in a distributor's distribution system.

NT Power has one WMP customer in the MRZ General Service greater than 50 kW class. NT Power - MRZ does not invoice the WMP for the Wholesale Market Service Charge, Power or Global Adjustment. The Wholesale Market Service Charge, Power and Global Adjustment are settled directly with the IESO.

3.2.5.2 Global Adjustment

NT Power confirms that the RRR data is accurate in Note 2 of the 2020 GA Analysis Workform v1.9 for the combined entity. NT Power maintains two rate zones, NTRZ and MRZ. The table below provides a reconciliation by rate zone to the GA Analysis Work Form updated on July 24, 2018.

GA Analysis Rate Zone Reconciliation Table

| GA Analysis | NTRZ | MRZ | NT Power =NTRZ + MRZ | GA Analysis V1.9 Populated Values | Variance |
|--|-------------|-------------|----------------------------|--|----------|
| Please report the aggregate consumption and demand for Class A customers | 2018 | 2018 | 2018 | 2018 | 2018 |
| Total Metered excluding WMP C = A + B | 655,906,325 | 185,865,826 | 841,772,151 | 841,772,150 | - |
| RPP A | 375,134,315 | 78,542,965 | 453,677,279 | 453,677,279 | - |
| Non RPP B = D + E | 280,772,010 | 107,322,861 | 388,094,872 | 388,094,871 | - |
| Non-RPP Class A D | 65,401,139 | 49,773,175 | 115,174,314 | 115,174,314 | - |
| Non-RPP Class B* E | 215,370,871 | 57,549,686 | 272,920,558 | 272,920,557 | - |

NT Power has completed the Global Adjustment Analysis Workform ("GA Workform") for the MRZ and submitted the live Excel format. The MRZ has seven Class A customers with none transitioning between Class A and Class B for the 2018 year.

NT Power - MRZ confirms the following with respect to the monthly billing of GA:

- MRZ bills all non-RPP customers on the 1st estimate of the GA provided by the IESO.
- MRZ bills all customers on a calendar month basis.
- MRZ confirms where a billing spans more than one month, in the case of a final bill or a manual read, the GA billing rate is pro-rated based on consumption for the blended months.
- MRZ creates new GA billing rates for each consumption month in it's billing system, which enables the correct allocation of both consumption and GA rates when a customer is billed for consumption spanning over a calendar month.

• NT Power confirms the GA rate is applied consistently for all billed and unbilled revenue transactions in the MRZ for non-RPP Class B customers in each rate class.

The data provided in Note 4 of the GA Workform reflects actual consumption by calendar month. NT Power - MRZ's 2018 GA Workform calculates the total unresolved GA differences of \$30,369 or 0.5% in 2018. This is within the +/- 1% range of total annual IESO GA charges. This difference is insignificant given the large dollar value of transactions that flow through Account 1589.

Settlement Process

NT Power determines RPP eligibility for small business customers annually (General Service less than 50 kW) in the MRZ annually by performing annual customer reclassification based on annual demand or kWh and settles directly with the IESO.

On a monthly basis NT Power calculates an amount payable/receivable to/from the IESO for the MRZ to settle the previous month. The settlement amounts figures are communicated to the IESO via an online portal on or before the fourth business day of the month, and appear under certain charge types on the IESO invoice, which arrives mid-month. This process ensures that the IESO and NT Power are appropriately compensated for various government-mandated rates/plans/programs:

- 1. Ontario Fair Hydro Plan Eligible RPP Consumer Discount Settlement Amount charge type ("CT") 1142
- Ontario Fair Hydro Plan Eligible non- RPP Consumer Discount Settlement Amount CT 1143
- 3. Global Adjustment (GA) CT 147 and 148
- 4. Feed-In-Tariff (FIT) Program CT 1412
- 5. Ontario Electricity Support Program (OESP) CT 1420 and 1470
- 6. Ontario Rebate Electricity Consumers CT 9982

NT Power - MRZ runs a query from its billing system to provide the following data required for the settlement submission:

1. Actual customer consumption from the prior month

- 2. WAP on the actual consumption from the prior month
- 3. RPP/TOU dollars on the actual consumption from the prior month

The actual customer consumption data queried is separated by bill code between RPP and non-RPP customers. This query is used to calculate all of the submissions noted above. Monthly submissions are based on actual data from the prior month. An annual true-up is performed to align the settlement submissions with the fiscal year.

NT Power - MRZ bills customers based on the first monthly GA estimate. The monthly IESO submission calculates the difference between the final GA rate posted by the IESO and the first monthly estimate GA billed on actual consumption data from the previous month.

NT Power - MRZ bills customers on a calendar month basis. Therefore, little if any proration for each calendar month is required in the reconciliation process. The reconciliation amount is submitted to the IESO on an annual basis and is accrued in the financial statements of the fiscal year.

GA Methodology Description

Questions on Accounts 1588 & 1589

1. In booking expense journal entries for Charge Type (CT) 1142 and CT 148 from the IESO invoice, please confirm which of the following approaches is used:

a. CT 1142 is booked into Account 1588. CT 148 is pro-rated based on RPP/non-RPP consumption and then booked into Account 1588 and 1589 respectively.

b. CT 148 is booked into Account 1589. The portion of CT 1142 equaling RPP minus
 HOEP for RPP consumption is booked into Account 1588. The portion of CT 1142
 equaling GA RPP is credited into Account 1589.

c. If another approach is used, please explain in detail.

Response

The MRZ follows approach (a).

2. Questions on CT 1142

a. Please describe how the initial RPP related GA is determined for settlement forms submitted by day 4 after the month-end (resulting in CT 1142 on the IESO invoice).

Response

The billing system is queried for the amount of GA billed to RPP customers.

b. Please describe the process for truing up CT 1142 to actual RPP kWh, including which data is used for each TOU/Tier 1&2 prices, as well as the timing of the true up.

Response

Monthly true-ups only include billing corrections. If a correction is required on a bill the amount is included in the next monthly settlement submission.

The monthly submission of settlement forms submitted by day 4 after the month end are based on actual consumption and rates from the prior month. For example, the

settlement submission for September, 2018 is based on actual billed consumption and rates (RPP rates, WAP and Final GA rate) for August, 2018.

Therefore, an annual true-up is conducted at year end to align the settlement submissions to the correct fiscal year. The annual true-up amounts are booked to the financial statements of the settlement year. For example, true-up's related to 2018 amounts are included in the December 31, 2018 financial statements.

c. Has CT 1142 been trued up for with the IESO for all of 2018?

Response

Yes, all months of 2018 have been trued up for CT 1142.

d. Which months from 2018 were trued up in 2019?

Response

See response to (c) above.

e. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?

<u>Response</u>

Yes, NT Power - MRZ confirms the 2018 related true-up has been reflected in the DVA continuity schedule in this proceeding. Also see (b) above.

f. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

Response

The closing principal balances as of December 31, 2018 adjusted for disposition during 2018 in column BG of the continuity schedule is \$ \$480,036 for GA 1589. The net

3. Questions on CT 148

a. Please describe the process for the initial recording of CT 148 in the accounts (i.e. 1588 and 1589).

Response

In order to determine the initial RPP related GA for monthly settlement, NT Power - MRZ runs reports from the billing system that calculates the total kWh's billed for the month for all Class B customers. The monthly queries generate two reports; (A) total actual consumption for a particular month excluding Class A consumption data and (B) total actual RPP consumption. The RPP consumption (kWh) amount queried is then subtracted from the total consumption report to calculate the non-RPP consumption for Class B customers.

The RPP and non-RPP consumption amount percentages for Class B customers are then applied to the monthly CT 148 Class B Global Adjustment Settlement Amount in order to record the RPP portion of the Class B Global Adjustment to account 1588 and non-RPP portion of the Class B Global Adjustment to account 1589.

b. Please describe the process for true up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.

Response

The process for true up of the GA related costs follows the process outlined in 3 a) above.

c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as expense in Account 1589 for initial recording of the GA expense?

<u>Response</u>

Refer to 3 a) above.

d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated proportions to actuals based on actual consumption proportions for RPP and non-RPP?

<u>Response</u>

An annual true-up is conducted at year end to align the RPP and non-RPP costs relating to CT148 (Class B GA) which are reflected in Account 1588 and 1589 to the correct fiscal year. The annual true-up amounts are booked to the financial statements of the settlement year. (ie: True ups related to 2018 amounts are included in the December 31, 2018 financial statements).

e. Please indicate which months from 2018 were trued up in 2019 for CT 148 proportions between RPP and non-RPP.

Response

NT Power - MRZ performed a true-up for 2018. The true-up aligns the settlement periods to the correct fiscal year, as the monthly settlement submissions are based on prior month actual data. The annual true-up amounts are booked to the financial statements of the settlement year. (ie: True ups related to 2018 amounts are included in the December 31, 2018 financial statements).

 f. Are all true-ups for 2018 consumption reflected in the DVA Continuity Schedule under 2018.

Response

Yes.

g. Please quantify the amount reflected in the DVA Continuity Schedule, and the column where it is included.

<u>Response</u>

Refer to response 2. f).

4. Questions regarding principal adjustments and reversals on the DVA Continuity Schedule:

Questions on Principal Adjustments - Accounts 1588 and 1589

- Did the applicant have principal adjustments in its 2019 rate proceeding which were approved for disposition?
 <u>Response</u>
 No, NT Power MRZ did not receive approval for disposition of principal adjustments in its 2019 rate proceeding.
- Please provide a break-down of the total amount of principal adjustments that were approved (e.g. true-up of unbilled (for 1589 only), true up of CT 1142, true up of CT 148 etc.).

Response

No principal adjustments or dispositions were approved.

c. Has the applicant reversed the adjustment approved in 2019 in its current proposed amount for disposition?

Response

No principal adjustments or dispositions were approved.

d. Please provide a breakdown of the amounts shown under principal adjustments in the DVA Continuity Schedule filed in the current proceeding, including the reversals and the new true up amounts regarding 2018 true ups.

Response

Not applicable

e. Do the amount calculated in part d. above reconcile to the applicant's principal adjustments shown in the DVA Continuity Schedule for the current proceeding? If not, please provide an explanation.

Response

Not applicable

f. Please confirm that the principal adjustments shown on the DVA Continuity Schedule are reflected in the GL transactions. As an example, the unbilled to actual true-up for 1589 would already be reflected in the applicant's GL in the normal course of business. However, if a principal adjustment related to proportions between 1588 and 1589 was made, applicant must ensure that the GL reflects the movement between the two accounts.

Response

NT Power – MRZ is not requesting disposition of GA 1589 and COP 1588 at this time as a reallocation between the two accounts was discovered when completing the GA Analysis Workform. The reallocation of \$337,322 is required between the two accounts. This reallocation will be reflected in the 2019 audited financial statements. Disposition will be requested in the 2021 IRM filing.

3.2.5.3 Commodity Accounts 1588 and 1589

RPP Settlement True- Ups

Actual customer consumption, RPP charges, WAP and first estimate GA is generated through a billing system query. This query is used to determine RPP and non-RPP customers. The difference between the WAP and final GA rate less the Class B customer RPP rate charges is the amount included in the monthly settlement submission for CT 1142.

The RPP and non-RPP consumption amount percentages for Class B customers are then applied to the monthly charges (CT 148 Class B Global Adjustment Settlement Amount) in order to determine the RPP portion of the Class B Global Adjustment to account 1588 and non-RPP portion of the Class B Global Adjustment to account 1589.

NP Power performs an annual true-up at year end to align the RPP and non-RPP costs relating to CT 148 (Class B GA) which are reflected in Account 1588 and 1589 to the correct fiscal year. The annual true-up amounts are booked to the financial statements of the settlement year. For example, true ups related to 2018 amounts are included in the December 31, 2018 financial statements.

Description of Accounting Methods and Transactions for the Disposition Balance Years being Requested

NT Power - MRZ records power purchases, GA purchases and the RPP versus Market Price Claim in applicable Cost of Power (Account 4705) and GA (Account 4707) accounts. IESO CT 1142 is recorded to Account 4705. IESO CT 148 is recorded in Account 4707. At true-up of Account 4707 is performed at year end based on the actual RPP/non-RPP consumption for the fiscal year. The annual true-up amounts are booked to the financial statements of the settlement year.

NT Power - MRZ bills on a calendar month basis and bills non-RPP customers on the 1st estimate of GA provided by the IESO. NT Power - MRZ records Cost of Power revenues billed in the sale of electricity accounts and has corresponding sub-accounts for GA revenues billed.

The difference between Cost of Power revenue and expenses are recorded in RSVAPower and the difference between GA revenues and expenses are recorded in RSVAGA.

NT Power - MRZ confirms it does not use the actual GA price to bill non-RPP Class B consumers. NT Power - MRZ uses the 1st estimate GA as previously noted. Non-RPP Class B consumers are included in the allocation of the balance of RSVAGA and the calculation of the resulting rate riders

Certification of Evidence- Commodity Accounts 1588 and 1589

NT Power - MRZ confirms sound processes and internal controls are in place for the preparation, review, verification and oversight of the deferral and variance account balances being disposed.

3.2.5.4 Capacity Based Recovery (CBR)

NT Power applied the Board's *Accounting Guidance on CBR*, issued July 25, 2016. WMS are billed by the IESO for CBR.

In 2018, NT Power had seven Class A customers in the MRZ for the duration of the year. Sheet '6.2 CBR B' of the Rate Gen Model has a total CBR Class B allocated to current Class B customers of (\$3,142) therefore no rate rider was generated.

3.2.6 LRAM Variance Account (LRAMVA)

For CDM programs delivered within the 2011 to 2014 term and going forward within the 2015 to 2020 term, the Board established Account 1568 - LRAMVA to capture the variance between the Board-approved CDM forecast and the actual results at the customer rate class level.

Account 1568 - LRAMVA variance captures the difference between:

- The results of actual, verified impacts of authorized CDM activities undertaken by NT Power in the MRZ; and
- b) The Board-approved LRAMVA threshold.

In accordance with the Board's *Guidelines for Electricity Distributor CDM*, at a minimum, distributors must apply for disposition of the balance in the LRAMVA at the time of their Cost of Service rate applications. Distributors may apply for the disposition of the balance in the LRAMVA in IRM applications, if the balance is deemed significant by the applicant. Disposition requests for LRAMVA must be made together with carrying charges.

3.2.6.1 Disposition of LRAMVA

Statement Identifying Years of Lost Revenues and Prior Years Savings

NT Power deems the balance of the MRZ LRAMVA account is significant and is seeking disposition for the 2018 LRAMVA balance of \$92,978 (\$90,126 principal and \$2,852 interest) over the period of one year as it exceeds the threshold.

Statement Confirming LRAMVA was based on Verified Savings Results

The LRAMVA historically has been based on the Final Verified Annual Results published by the IESO. Following the Ministry of Energy, Northern Development and Mines' decision on March 20, 2019 to conclude the Conservation First Framework (CFF) led the IESO to no longer issue the annual verified report format which has been used historically. The net energy savings is based on the Participation and Cost Report provided as of April 15, 2019 for the MRZ. NT Power used the Detailed Project Level Savings file as provided by the IESO for the Net Demand Savings by program applying the outlined IESO saving calculation methodology and applicable reference table metrics. The Detailed Project Level Saving file contains customer information. Should this file be required NT Power will submit with confidentiality at the Board's request. This file was generated by program activity savings as reported by NT Power for the MRZ through the monthly LDC Report submission.

NT Power has submitted the excel workbook supporting the LRAMVA claim:

• Participation and Cost Report for NT Power's MRZ of April, 2019

NT Power used the most recent input assumptions available at the time of the program evaluation when calculating the lost revenue.

NT Power has not deviated from the Board's LRAMVA model concept.

Summary of LRAMVA balance requested for disposition

The following table presents the MRZ LRAMVA balances identified for disposition:

| Customer Class | Principal (\$) | Carrying Charges (\$) | Total LRAMVA (\$) |
|----------------|-------------------|-----------------------------|-------------------------|
| Residential | \$35,277 | \$1,116 | \$36,394 |
| GS<50 kW | -\$8,745 | -\$277 | -\$9,022 |
| GS>50 kW | \$63,311 | \$2,003 | \$65,314 |
| Street Lights | \$283 | \$9 | \$292 |
| Total | \$90,126 | \$2,852 | \$92,978 |

LRAMVA Claim

Statement: NT Power - MRZ requests a period of one year for LRAMVA recovery due to the significance of the rate riders.

Details for the forecast CDM savings included LRAMVA calculation

NT Power has followed LRAMVA Work Form Version 3.0 and the Board Report, *Updated Policy for the Lost Revenue Adjustment Mechanism Calculation: Lost Revenues and Peak Demand Savings from Conservation and Demand Management Programs* (EB-2016-0182).

In accordance with the *Guidelines for Electricity Distributors* (CDM – EE-20120003), NT Power has used the Board's approved volumetric rates for the MRZ. Carrying charges were applied on a monthly basis and are being requested to be recovered from the MRZ's customers. The LRAMVA threshold was received in NT Power - MRZ's Settlement Agreement from 2013 and is displayed in sheet '2. LRMAVA Threshold'. The recovery of the LRAMVA principal amount of one year is to reduce the impact on the customers bills in future years.

With respect to the entries in the LRAMVA, the CDM Guidelines specify that distributors must calculate the full year impact of CDM programs and compare that to the LRAMVA threshold amounts by rate class. The difference is multiplied by the distributor's Board approved variable distribution charge and customer rate class with which the volumetric variance occurred.

Statement: NT Power is requesting a LRMAVA claim of \$92,978 for the MRZ which includes the verified actual CDM savings and carrying charges.

Rationale confirming how the rate class allocations for actual CDM savings were determined

For CDM programs that are designed and designated for specific customer segments or rate classes, LRAMVA allocations for CDM savings are allocated directly to those specific rate classes. For example, the saveONenergy 'Coupon' and 'Heating and Cooling' Programs are designated as residential programs, while the saveONenergy 'Small Business Lighting' program limits eligibility to those customers with a demand of less than 100 kW.

CDM 'Coupon' and 'Heating and Cooling' program savings will be allocated 100% to the residential rate class. For programs with more limited customer participation, such as the Process & Systems Upgrades Program, the CDM savings for LRAMVA allocations are directly to the specific rate classes, in this case GS>50. For other programs, such as Retrofit that could have participants from multiple rate classes, NT Power analyzed the actual customer participation to calculate percent allocations. The 'Retrofit' program savings were allocated to

the general service less than 50 kW (GS<50kW) and the general service greater than 50 kW (GS>50kW) rate classes, based on the prior year's customer participant mix for the year in question.

A summary of the annual rate class allocations is within sheet '3-a.' of the LRAMVA work form for the MRZ. NT Power populated the sheet '5. 2015-2020' with persistence and 2018 current net energy savings. The relevant Board approved distribution rates were compiled within sheet '3. Distribution Rates' and used within the model calculations.

CDM Savings

The CDM savings are presented in the following table:

| Description | Residential | GS<50 kW | GS>50 kW | Street Lights |
|----------------------|-------------|----------|----------|---------------|
| 2018 | \$35,277 | -\$8,745 | \$63,311 | \$283 |
| Carrying Charges | \$1,116 | -\$277 | \$2,003 | \$9 |
| Total LRAMVA Balance | \$36,394 | -\$9,022 | \$65,314 | \$292 |

Final Verified CDM Savings

Additional Documentation or Data Statement

Statement: No additional documentation or data was provided in support of projects that was not included in the Participation and Cost Report and the Project listing from the IESO.

Board Approved Programs Before 2014

The proposed LRAMVA rate rider recovery period is one year. The proposed LRAMVA rate riders are presented below:

Proposed LRAMVA Rate Riders - Recover Period 1 Year

| Customer Classes | Unit | LRAMVA Rate Rider 2019 -2020 | LRAMVA Rate Rider 2020 |
|---------------------|--------|---------------------------------|---------------------------|
| Residential | \$/kWh | \$0.0012 | \$0.0007 |
| GS <50 kW | \$/kWh | \$(0.0018) | \$(0.0004) |
| GS >50 kW | \$/kW | \$0.3006 | \$0.2312 |
| Street Lights | \$/kW | \$0.4140 | \$0.2069 |

3.2.7 Tax Changes

The Board's supplemental report, 3rd Generation Incentive Regulation issued July 17, 2008, and the Chapter 3 Board's Filing Requirements last revised July 12, 2018, determined that a 50/50 sharing of the impact of currently known legislated tax changes, other than that related to the implementation of the Harmonized Sales Tax, as applied to the tax level reflected in the Board-approved base rates for a distributor, was appropriate.

NT Power has completed the 2020 IRM Rate Generator Model (sheet '8. STS-Tax Change' and sheet '9. Shared Tax-Rate Rider') for the MRZ, to calculate the annual tax changes that are to be allocated to the customer rate classes.

NT Power - MRZ has no changes to the service charges or loss factors approved in the 2013 Cost of Service Application (EB-2012-0147).

3.2.8 Z- Factor Claims

Z factor criteria is defined as an event that occurred outside of what the NT Powers current rates are derived from and outside of management's control. The amounts incurred must be larger than the Board defined materiality threshold and have a significant influence on the operations of the Applicant. NT Power is not seeking any recoveries of expenses under a Z factor.

3.3 Elements Specific only to the Price Cap IR Plan

3.3.5 Off-Ramp Provisions

NT Power's regulatory return on equity for 2018 was 11.91% which is within the maximum dead band of +/- 3% range of deemed return on equity of 9.66%.

3.4 Specific Exclusions from Price Cap IR Applications

Appendix A: Application of Recoveries in Account 1595

NT Power - MRZ has completed the tax sharing calculations in 'Tab. 9 Shared Tax' of the 2018 IRM Rate Generator model, in accordance with Chapter 3, applying the determined 50/50 sharing of the impact on NT Power - MRZ's tax rates approved by the Board. As the 2020 IRM Rate Generator model did not generate a rate rider, the entire 50/50 sharing amount will be transferred to Account 1595.

1595 Analysis Workform

In 2018, the Board Staff introduced the 1595 Analysis Workform as a requirement for rate applications if the distributor meets the requirements for disposition of residual balances. The purpose of the new workform is to assist the Board Staff to assess the residual balances in Account 1595 Sub-accounts for each vintage year are reasonable. NT Power - MRZ intends on meeting the requirements for disposition in the 2021 IRM application.

Appendix 1: NT Power's Current Tariff Sheet

Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0055

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account where energy is supplied to customers residing in residential dwelling units. Energy is generally supplied as a single phase, 3-wire, 60-Hertz, having a nominal voltage of 120/240 Volts and having only one Delivery Point per dwelling. For the purposes of calculating customer connection fees, the Basic Connection for Residential customers is defined as 100 amp 120/240 volt overhead service. A residential building is supplied at one service voltage per land parcel. Street Townhouses and Condominiums requiring centralization bulk metering are covered under General Service Classification. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Service Charge | \$ | 30.94 |
|---|------------------------|--------|
| Smart Metering Entity Charge - effective until December 31, 2022 | \$ | 0.57 |
| Low Voltage Service Rate | \$/kWh | 0.0020 |
| Rate Rider for Disposition of Global Adjustment Account (2019) - effective until April 30, 20 Applicable only for Non-RPP Customers - Approved on an Interim Basis | 020 \$/kWh | 0.0027 |
| Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRA - effective until April 30, 2021 | AMVA) (2019) \$/kWh | 0.0012 |
| Rate Rider for Disposition of Deferral/Variance Accounts (2019) - effective until April 30, 20 | | |
| - Approved on an Interim Basis | \$/kWh | 0.0006 |
| Retail Transmission Rate - Network Service Rate | \$/kWh | 0.0066 |
| Retail Transmission Rate - Line and Transformation Connection Service Rate | \$/kWh | 0.0052 |
| MONTHLY RATES AND CHARGES - Regulatory Component | | |
| Wheelessle Merket Comise Date (MMAC), and including CDD | ¢ (L) A (L | 0.0000 |

| Wholesale Market Service Rate (WMS) - not including CBR | \$/kWh | 0.0030 |
|--|--------|--------|
| Capacity Based Recovery (CBR) - Applicable for Class B Customers | \$/kWh | 0.0004 |
| Rural or Remote Electricity Rate Protection Charge (RRRP) | \$/kWh | 0.0005 |
| Standard Supply Service - Administrative Charge (if applicable) | \$ | 0.25 |
| | | |

Effective and Implementation Date May 1, 2019

This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

EB-2018-0055

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service Buildings requiring a connection with a connected load less than 50 kW, and, Townhouses and Condominiums that require centralized bulk metering. General Service buildings are defined as buildings that are used for purposes other than single-family dwellings. A General Service building is supplied at one voltage per land parcel. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

Rural or Remote Electricity Rate Protection Charge (RRRP)

Standard Supply Service - Administrative Charge (if applicable)

| Service Charge | \$ | 23.03 |
|---|--------|----------|
| Smart Metering Entity Charge - effective until December 31, 2022 | \$ | 0.57 |
| Distribution Volumetric Rate | \$/kWh | 0.0170 |
| Low Voltage Service Rate | \$/kWh | 0.0018 |
| Rate Rider for Disposition of Global Adjustment Account (2019) - effective until April 30, 2020 Applicable only for Non-RPP Customers - Approved on an Interim Basis | \$/kWh | 0.0027 |

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service customers requiring a connection with a connected load equal to or greater than 50 kW and less than 5,000 kW. A General Service building is supplied at one service voltage per land parcel. Depending on the location of the building, primary supplies to transformers and Customer owned Sub-Stations will be one of the following as determined by the Distributor:

- 2,400/4,160 volts 3 Phase 4Wire
- 4,800/8,320 volts 3 Phase 4 Wire
- 7,200/12,400 volts 3 Phase 4 Wire
- 8,000/13,800 volts 3 Phase 4 Wire
- 16,000/27,600 volts 3 Phase 4 Wire
- 44,000 Volts 3 Phase 3 Wire

Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Request fee, per request, applied to the requesting party | \$ | 0.50 |
| Processing fee, per request, applied to the requesting party | \$ | 1.00 |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail | | |
| Settlement Code directly to retailers and customers, if not delivered electronically through the | | |
| Electronic Business Transaction (EBT) system, applied to the requesting party | | |
| Up to twice a year | \$ | no charge |
| More than twice a year, per request (plus incremental delivery costs) | \$ | 4.00 |
| Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the | | |
| Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019) | \$ | 2.00 |
| | | |

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle. Total Loss Factor - Secondary Metered Customer < 5,000 kW 1.0682 1.0576

Total Loss Factor - Primary Metered Customer < 5,000 kW

Appendix 2: NT Power's Proposed Tariff Sheet

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account where energy is supplied to customers residing in residential dwelling units. Energy is generally supplied as a single phase, 3-wire, 60-Hertz, having a nominal voltage of 120/240 Volts and having only one Delivery Point per dwelling. For the purposes of calculating customer connection fees, the Basic Connection for Residential customers is defined as 100 amp 120/240 volt overhead service. A residential building is supplied at one service voltage per land parcel. Street Townhouses and Condominiums requiring centralization bulk metering are covered under General Service Classification. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

approved schedules of Rates, Charges and Loss Factors

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service Buildings requiring a connection with a connected load less than 50 kW, and, Townhouses and Condominiums that require centralized bulk metering. General Service buildings are defined as buildings that are used for purposes other than single-family dwellings. A General Service building is supplied at one voltage per land parcel. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service customers requiring a connection with a connected load equal to or greater than 50 kW and less than 5,000 kW. A General Service building is supplied at one service voltage per land parcel. Depending on the location of the building, primary supplies to transformers and Customer owned Sub-Stations will be one of the following as determined by the Distributor:

- 2,400/4,160 volts 3 Phase 4Wire
- 4,800/8,320 volts 3 Phase 4 Wire
- 7,200/12,400 volts 3 Phase 4 Wire
- 8,000/13,800 volts 3 Phase 4 Wire
- 16,000/27,600 volts 3 Phase 4 Wire
- 44,000 Volts 3 Phase 3 Wire

Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2018-0055

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account where energy is supplied to customers residing in residential dwelling units. Energy is generally supplied as a single phase, 3-wire, 60-Hertz, having a nominal voltage of 120/240 Volts and having only one Delivery Point per dwelling. For the purposes of calculating customer connection fees, the Basic Connection for Residential customers is defined as 100 amp 120/240 volt overhead service. A residential building is supplied at one service voltage per land parcel. Street Townhouses and Condominiums requiring centralization bulk metering are covered under General Service Classification. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service Buildings requiring a connection with a connected load less than 50 kW, and, Townhouses and Condominiums that require centralized bulk metering. General Service buildings are defined as buildings that are used for purposes other than single-family dwellings. A General Service building is supplied at one voltage per land parcel. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service customers requiring a connection with a connected load equal to or greater than 50 kW and less than 5,000 kW. A General Service building is supplied at one service voltage per land parcel. Depending on the location of the building, primary supplies to transformers and Customer owned Sub-Stations will be one of the following as determined by the Distributor:

- 2,400/4,160 volts 3 Phase 4Wire
- 4,800/8,320 volts 3 Phase 4 Wire
- 7,200/12,400 volts 3 Phase 4 Wire
- 8,000/13,800 volts 3 Phase 4 Wire
- 16,000/27,600 volts 3 Phase 4 Wire
- 44,000 Volts 3 Phase 3 Wire

Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

STREET LIGHTING SERVICE CLASSIFICATION

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Service Charge (per connection) | \$ | 3.94 |
|---|--------|--------|
| Distribution Volumetric Rate | \$/kW | 9.0935 |
| Low Voltage Service Rate | \$/kW | 0.5629 |
| Rate Rider for Disposition of Global Adjustment Account (2019) - effective until April 30, 2020 Applicable only for Non-RPP Customers - Approved on an Interim Basis Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2019) - effective | \$/kWh | 0.0027 |
| until April 30, 2021 | \$/kW | 0.4140 |
| Rate Rider for Disposition of Deferral/Variance Accounts (2019) - effective until April 30, 2020 - Approved on an Interim Basis | \$/kW | 0.3278 |
| Retail Transmission Rate - Network Service Rate | \$/kW | 1.8243 |
| Retail Transmission Rate - Line and Transformation Connection Service Rate | \$/kW | 1.4646 |
| MONTHLY RATES AND CHARGES - Regulatory Component | | |
| Wholesale Market Service Rate (WMS) - not including CBR | \$/kWh | 0.0030 |
| Capacity Based Recovery (CBR) - Applicable for Class B Customers | \$/kWh | 0.0004 |
| Rural or Remote Electricity Rate Protection Charge (RRRP) | \$/kWh | 0.0005 |
| Standard Supply Service - Administrative Charge (if applicable) | \$ | 0.25 |

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

| Service Charge | \$ | 5.40 |
|---|-------|--------|
| ALLOWANCES | | |
| Transformer Allowance for Ownership - per kW of billing demand/month | \$/kW | (0.60) |
| Primary Metering Allowance for Transformer Losses - applied to measured demand & energy | % | (1.00) |
| | | |

SPECIFIC SERVICE CHARGES

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Customer Administration

| Notification charge | \$ | 15.00 |
|---|----|--------|
| Account history | \$ | 15.00 |
| Returned cheque (plus bank charges) | \$ | 15.00 |
| Legal letter charge | \$ | 15.00 |
| Account set up charge/change of occupancy charge (plus credit agency costs if applicable) | \$ | 30.00 |
| Non-Payment of Account (See Note Below) | | |
| Late payment - per month | % | 1.50 |
| Late payment - per annum | % | 19.56 |
| Disconnect/reconnect at meter - during regular hours | \$ | |
| Disconnect/reconnect at meter - after regular hours | \$ | |
| Disconnect/reconnect at pole - during regular hours | \$ | 185.00 |

| Disconnect/reconnect at pole - after regular hours | \$ 415.00 |
|---|--------------|
| Install/remove load control device - during regular hours | \$ 65.00 |
| Install/remove load control device - after regular hours | \$ 185.00 |
| Other | |
| Specific charge for access to the power poles - \$/pole/year | \$ 43.63 |
| (with the exception of wireless attachments) | |
| Interval meter load management tool charge \$/month | \$ 25.00 |
| Temporary service - install & remove - overhead - no transformer | \$ 500.00 |
| Temporary service - install & remove - underground - no transformer | \$ 300.00 |
| RETAIL SERVICE CHARGES (if applicable) | |

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

| One-time charge, per retailer, to establish the service agreement between the distributor and the retailer | \$ | 100.00 |
|---|----------|-----------|
| Monthly Fixed Charge, per retailer | \$ | 40.00 |
| Monthly Variable Charge, per customer, per retailer | \$/cust. | 1.00 |
| Distributor-consolidated billing monthly charge, per customer, per retailer | \$/cust. | 0.60 |
| Retailer-consolidated billing monthly credit, per customer, per retailer | \$/cust. | (0.60) |
| Service Transaction Requests (STR) | | |
| Request fee, per request, applied to the requesting party | \$ | 0.50 |
| Processing fee, per request, applied to the requesting party | \$ | 1.00 |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail | | |
| Settlement Code directly to retailers and customers, if not delivered electronically through the | | |
| Electronic Business Transaction (EBT) system, applied to the requesting party | | |
| Up to twice a year | \$ | no charge |
| More than twice a year, per request (plus incremental delivery costs) | \$ | 4.00 |
| Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019) | \$ | 2.00 |
| | | |

LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

| Total Loss Factor - Secondary Metered Customer < 5,000 kW | 1.0682 |
|---|------------------------|
| Total Loss Factor - Primary Metered Customer < 5,000 k. Current Tariff Schedule | Issued Month day, Year |

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

Data on this worksheet has been populated using your most recent RRR filing. If you have identified any issues, please contact the OEB. Have you confirmed the accuracy of the data below? Yes

If a distributor uses the actual GA price to bill non-RPP Class B customers for an entire rate class, it must exclude these customers from the allocation of the GA balance and the calculation of the resulting rate riders. These rate classes are not to be charged/refunded the general GA rate rider as they did not contribute to the GA balance.

Please contact the OEB to make adjustments to the IRM rate generator for this situation.

| Rate Class | Unit | Total Metered <mark>kWh</mark> | Total Metered <mark>kW</mark> | Metered <mark>kWh</mark> for Non-RPP Customers (excluding WMP) | Metered kW for Non RPP Customers (excluding WMP) | Metered <mark>kWh</mark> for Wholesale Market Participants (WMP) | Metered <mark>kW</mark> for Wholesale Market Participants (WMP) | Total Metered <mark>kWh</mark> less WMP consumption <i>(if applicable)</i> |

Threshold Test

Total Claim (including Account 1568) Total Claim for Threshold Test (All Group 1 Accounts) Threshold Test (Total claim per kWh)²

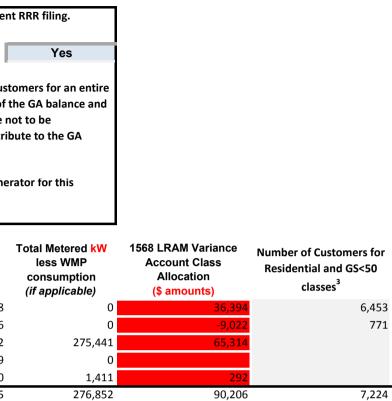

As per Section 3.2.5 of the 2019 Filing Requirements for Electricity Distribution Rate Applications, an applicant may elect to dispose of the Group 1 account balances below the threshold. If doing so, please select YES from the adjacent drop-down cell and also indicate so in the Manager's Summary. If not, please select NO. \$259,650 \$169,444 \$0.0009 Claim does not meet the threshold test.

¹ Residual Account balance to be allocated to rate classes in proportion to the recovery share as established when rate riders were implemented.

² The Threshold Test does not include the amount in 1568.

³ The proportion of customers for the Residential and GS<50 Classes will be used to allocate Account 1551.

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

No input required. This workshseet allocates the deferral/variance account balances (Group 1 and 1568) to the appropriate classes as per EDDVAR dated July 31, 2009

Allocation of Group 1 Accounts (including Account 1568)

| | % of Custor | | % of Total kWh adjusted for | | а | llocated based on Total less WMP | | allocated based on Total less WMP | | | |
|--|----------------|--------|--------------------------------|---------|------------------|-------------------------------------|--------|--------------------------------------|------|---------|--|
| Rate Class | % of Total kWh | | WMP | 1550 | 1551 | 1580 | 1584 | 1586 | 1588 | 1568 | |
| RESIDENTIAL SERVICE CLASSIFICATION | 26.7% | 89.3% | 27.3% | 47,650 | (6 <i>,</i> 845) | (8,754) | 4,924 | 3,355 | 0 | 36,394 | |

** Used to allocate Account 1551 as this account records the variances arising from the Smart Metering Entity Charges to Residential and GS<50 customers.

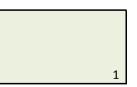

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

| 1a | The year Account 1589 GA was last disposed | 2017 |] |
|----|---|------|---|
| 1b | The year Account 1580 CBR Class B was last disposed | 2017 | Note that the sub-account was established in 2015. |
| 2a | Did you have any customers who transitioned between Class A and Class B (transition customers) during the period the Account 1589 GA balance accumulated (i.e. from the year after the balance was last disposed to the current year requested for disposition)? | No | (e.g. If you received approval to dispose of the GA variance account balance as at December 31, 2015, the period the GA variance accumulated would be 2016 to 2018.) |
| 2b | Did you have any customers who transitioned between Class A and Class B (transition customers) during the period the Account 1580, sub-account CBR Class B balance accumulated (i.e. from the year after the balance was last disposed to the current year requested for disposition)? | No | (e.g. If you received approval to dispose of the CBR Class B balance as at December 31, 2016, the period the CBR Class B variance accumulated would be 2017 to 2018.) |

3b

Enter the number of rate classes in which there were customers who were Class A for the full year during the period the Account 1589 GA or Account 1580 CBR B balance accumulated. Enter the total Class A consumption in the rate class in the table

Rate Classes with Class A Customers - Billing Determinants by Rate Class

| | Rate Class | | 2018 |
|--------------|------------|-----|------|
| Rate Class 1 | | kWh | |
| | | kW | |

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

The purpose of this tab is to calculate the GA rate riders for all current Class B customers who did not transition between Class A and B in the period since the Account 1589 GA was last disposed. Calculations in this tab will be modified upon completion of tab 6.1 a, which allocates a portion of the GA balance to transition customers, if applicable. Effective January 2017, the billing determinant and all rate riders for the disposition of GA balances will be calculated on an energy basis (kWhs) regardless of the billing determinant used for distribution rates for the particular class (see Chapter 3, Filling Requirements, section 3.2.5.2)

¹ When calculating the revenue reconciliation for distributors with Class A customers, the balances of sub-account 1580-CBR Class B will not be taken into consideration if there are Class A customers since the rate riders, if any, are calculated separately. ² Only for rate classes with WMP customers are the Deferral/Variance Account Rate Riders for Non-WMP (column H and J) calculated separately. For all rate classes without WMP customers, balances in account 1580 and 1588 are included in column G and disposed through a combined Deferral/Variance Account and Rate Rider.

Incentive Rate-setting Mechanism Rate G for 2020 Filers

Summary - Sharing of Tax Change Forecast Amounts

Notes

1. Regarding the small business deduction, if applicable,

a. If taxable capital exceeds \$15 million, the small business rate will not be applicable.

b. If taxable capital is below \$10 million, the small business rate would be applicable.

c. If taxable capital is between \$10 million and \$15 million, the appropriate small business rate will be calculated.

Calculation of Rebased Revenue Requirement and Allocation of Tax Sharing Amount. Enter data from the last OEB-Approved Cost of Service application in columns C through H.

As per Chapter 3 Filing Requirements, shared tax rate riders are based on a 1 year disposition.

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

Columns E and F have been populated with data from the most recent RRR filing. Rate classes that have more than one Network or Connection charge will notice that the cells are highlighted in green and unlocked. If the data needs to be modified, please make the necessary adjustments and note the changes in your manager's summary. As well, the Loss Factor has been imported from Tab 2.

| Rate Class | Rate Description | Unit | Rate | Non-Loss Adjusted Metered kWh | Non-Loss Adjusted Metered kW | Applicable Loss Factor | Loss Adjusted Billed kWh |

In the green shaded cells, enter billing detail for wholesale transmission for the same reporting period as the billing determinants on Tab 10. For Hydro One Sub-transmission Rates, if you are charged a combined Line and Transformer connection rate, please ensure that both the Line Connection and Transformation Connection columns are completed. If any of the Hydro One Sub-transmission rates (column E, I and M) are highlighted in red, please double check the billing data entered in "Units Billed" and "Amount" columns. The highlighted rates do not match the Hydro One Sub-transmission rates approved for that time period. If data has been entered correctly, please provide explanation for the discrepancy in rates.

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

If applicable, please enter any adjustments related to the revenue to cost ratio model into columns C and E. The Price Escalator and Stretch Factor have been set at the 2018 values and will be updated by OEB staff at a later date.

If applicable, Wheeling Service Rate will be adjusted for PCI on Sheet 19.

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

Update the following rates if an OEB Decision has been issued at the time of completing this application

Regulatory Charges

| Effective Date of Regulatory Charges | | January 1, 2019 | January 1, 2020 |
|--|--------|-----------------|-----------------|
| Wholesale Market Service Rate (WMS) - not including CBR | \$/kWh | 0.0030 | 0.0030 |
| Capacity Based Recovery (CBR) - Applicable for Class B Customers | \$/kWh | 0.0004 | 0.0004 |
| Rural or Remote Electricity Rate Protection Charge (RRRP) | \$/kWh | 0.0005 | 0.0005 |
| Standard Supply Service - Administrative Charge (if applicable) | \$/kWh | 0.25 | 0.25 |

Time-of-Use RPP Prices

| As of | | May 1, 2019 |
|----------|--------|-------------|
| Off-Peak | \$/kWh | 0.0650 |
| Mid-Peak | \$/kWh | 0.0940 |
| On-Peak | \$/kWh | 0.1340 |

Smart Meter Entity Charge (SME)

| Smart Meter Entity Charge (SME) | \$ 0.57 |
|---|-------------|
| | |
| Distribution Rate Protection (DRP) Amount (Applicable to LDCs under | |
| the Distribution Rate Protection program): | \$ 36.86 |

Miscellaneous Service Charges

| Wireline Pole Attachment Charge | Unit | Current charge | Inflation factor * | Proposed charge ** [/] *** |
|---|------|----------------|--------------------|-------------------------------------|
| Specific charge for access to the power poles - per pole/year | \$ | 43.63 | 1.50% | 44.28 |

| Retail Service Charges | | Current charge | Inflation factor* | Proposed charge *** |
|---|----------|----------------|-------------------|---------------------|
| One-time charge, per retailer, to establish the service | | | | |
| agreement between the distributor and the retailer | \$ | 100.00 | 1.50% | 101.50 |
| Monthly fixed charge, per retailer | \$ | 40.00 | 1.50% | 40.60 |
| Monthly variable charge, per customer, per retailer | \$/cust. | 1.00 | 1.50% | 1.02 |

| retailer | \$/cust. | (0.60) | 1.50% | (0.61) |

| Service Transaction Requests (STR) | | | - |
|--|------------|-------|-----------|
| Request fee, per request, applied to the requesting party | \$ 0.50 | 1.50% | 0.51 |
| Processing fee, per request, applied to the requesting party | \$ 1.00 | 1.50% | 1.02 |
| Electronic Business Transaction (EBT) system, applied to the | | | |
| requesting party | | | |
| up to twice a year | no charge | | no charge |
| more than twice a year, per request (plus incremental | | | |
| delivery costs) | \$ 4.00 | 1.50% | 4.06 |
| Notice of switch letter charge, per letter | \$ 2.00 | 1.50% | 2.03 |

* inflation factor subject to change pending OEB approved inflation rate effective in 2020
 ** applicable only to LDCs in which the province-wide pole attachment charge applies
 *** subject to change pending OEB order on miscellaneous service charges

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

In the Green Cells below, enter all proposed rate riders/rates. Please note that the following rates/charges are to be entered in the Final Tariff Schedule tab: Monthly Service Charge, Distribution Volumetric Rate and Retail Transmission Rates.

In column A, select the rate rider descriptions from the drop-down list in the blue cells. If the rate description cannot be found, enter the rate rider descriptions in the green cells. The rate rider description must begin with "Rate Rider for".

In column B, choose the associated unit from the drop-down menu.

In column C, enter the rate. All rate riders with a "\$" unit should be rounded to 2 decimal places and all others rounded to 4 decimal places.

In column E, enter the expiry date (e.g. April 30, 2020) or description of the expiry date in text (e.g. the effective date of the next cost of service-based rate order).

In column G, a sub-total (A or B) should already be assigned to the rate rider unless the rate description was entered into a green cell in column A. In these particular cases, from the dropdown list in column G, choose the appropriate sub-total (A or B). Sub-Total A refers to rates/rate riders that Not considered as pass through costs (eg: LRAMVA and ICM/ACM rate riders). Sub-Total B refers to rates/rate riders that are considered pass through costs.

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

RESIDENTIAL SERVICE CLASSIFICATION

This classification refers to an account where energy is supplied to customers residing in residential dwelling units. Energy is generally supplied as a single phase, 3-wire, 60-Hertz, having a nominal voltage of 120/240 Volts and having only one Delivery Point per dwelling. For the purposes of calculating customer connection fees, the Basic Connection for Residential customers is defined as 100 amp 120/240 volt overhead service. A residential building is supplied at one service voltage per land parcel. Street Townhouses and Condominiums requiring centralization bulk metering are covered under General Service Classification. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

| Service Charge | \$ | 31.36 |
|--|--------|--------|
| Smart Metering Entity Charge - effective until December 31, 2022 | \$ | 0.57 |
| Low Voltage Service Rate | \$/kWh | 0.0020 |
| Rate Rider for Disposition of Deferral/Variance Accounts (2020) - effective until April 30, 2021 | \$/kWh | 0.0008 |
| Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2020) - effective until April 30, 2021 | \$/kWh | 0.0007 |
| Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2019) - effective until April 30, 2021 | \$/kWh | 0.0012 |
| Retail Transmission Rate - Network Service Rate | \$/kWh | 0.0069 |
| Retail Transmission Rate - Line and Transformation Connection Service Rate | \$/kWh | 0.0058 |

MONTHLY RATES AND CHARGES - Regulatory Component

| Wholesale Market Service Rate (WMS) - not including CBR | \$/kWh | 0.0030 |
|--|--------|--------|
| Capacity Based Recovery (CBR) - Applicable for Class B Customers | \$/kWh | 0.0004 |
| Rural or Remote Electricity Rate Protection Charge (RRRP) | \$/kWh | 0.0005 |
| Standard Supply Service - Administrative Charge (if applicable) | \$ | 0.25 |

Effective and Implementation Date May 1, 2020

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service Buildings requiring a connection with a connected load less than 50 kW, and, Townhouses and Condominiums that require centralized bulk metering. General Service buildings are defined as buildings that are used for purposes other than single-family dwellings. A General Service building is supplied at one voltage per land parcel. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

| Service Charge | \$ | 23.34 |
|--|--------|----------|
| Smart Metering Entity Charge - effective until December 31, 2022 | \$ | 0.57 |
| Distribution Volumetric Rate | \$/kWh | 0.0172 |
| Low Voltage Service Rate | \$/kWh | 0.0018 |
| Rate Rider for Disposition of Deferral/Variance Accounts (2020) - effective until April 30, 2021 | \$/kWh | 0.0009 |
| Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2020) - effective until April 30, 2021 Rate Rider for Disposition of Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) (2019) | \$/kWh | (0.0004) |
| - effective until April 30, 2021 | \$/kWh | (0.0018) |

Effective and Implementation Date May 1, 2020

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION

This classification refers to the supply of electrical energy to General Service customers requiring a connection with a connected load equal to or greater than 50 kW and less than 5,000 kW. A General Service building is supplied at one service voltage per land parcel. Depending on the location of the building, primary supplies to transformers and Customer owned Sub-Stations will be one of the following as determined by the Distributor:

- 2,400/4,160 volts 3 Phase 4Wire
- 4,800/8,320 volts 3 Phase 4 Wire
- 7,200/12,400 volts 3 Phase 4 Wire
- 8,000/13,800 volts 3 Phase 4 Wire
- 16,000/27,600 volts 3 Phase 4 Wire
- 44,000 Volts 3 Phase 3 Wire

Class A and Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date May 1, 2020

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

Effective and Implementation Date May 1, 2020

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is unmetered. Such connections include cable TV power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

STREET LIGHTING SERVICE CLASSIFICATION

This classification applies to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Class B consumers are defined in accordance with O. Reg. 429/04. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

MONTHLY RATES AND CHARGES - Delivery Component

| Service Charge (per connection) | \$ | 3.99 |

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

| Install/remove load control device - after regular hours | \$ | 185.00 |
| Other | | |
| Specific charge for access to the power poles - \$/pole/year | \$ | 44.28 |
| (with the exception of wireless attachments) | | |
| Interval meter load management tool charge \$/month | \$ | 25.00 |
| Temporary service - install & remove - overhead - no transformer | \$ | 500.00 |
| Temporary service - install & remove - underground - no transformer | \$ | 300.00 |

RETAIL SERVICE CHARGES (if applicable)

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

| One-time charge, per retailer, to establish the service agreement between the distributor and the retailer | \$ | 101.50 |
|--|----------|-----------|
| Monthly Fixed Charge, per retailer | \$ | 40.60 |
| Monthly Variable Charge, per customer, per retailer | \$/cust. | 1.02 |
| Distributor-consolidated billing monthly charge, per customer, per retailer | \$/cust. | 0.61 |
| Retailer-consolidated billing monthly credit, per customer, per retailer | \$/cust. | (0.61) |
| Service Transaction Requests (STR) | | |
| Request fee, per request, applied to the requesting party | \$ | 0.51 |
| Processing fee, per request, applied to the requesting party | \$ | 1.02 |
| Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail | | |
| Settlement Code directly to retailers and customers, if not delivered electronically through the | | |
| Electronic Business Transaction (EBT) system, applied to the requesting party | | |
| Up to twice a year | \$ | no charge |
| More than twice a year, per request (plus incremental delivery costs) | \$ | 4.06 |
| | | |

Effective and Implementation Date May 1, 2020

This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)

2.00

\$

LOSS FACTORS

| If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors w | ill be implemented upon |
|---|-------------------------|
| the first subsequent billing for each billing cycle. | |
| Total Loss Factor - Secondary Metered Customer < 5,000 kW | 1.0682 |
| Total Loss Factor - Primary Metered Customer < 5,000 kW | 1.0576 |

Incentive Rate-setting Mechanism Rate Generator for 2020 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filling Requirements For Electricity Distribution face Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2018 of \$0.1117/kWh (IESO's Monthly Market Report for May 2018, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class. 2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Table 1

| RATE CLASSES / CATEGORIES (eg: Residential TOU, Residential Retailer) | Units | RPP? Non-RPP Retailer? Non-RPP Other? | Current Loss Factor (eg: 1.0351) | Proposed Loss Factor | Consumption (kWh) | Demand kW (if applicable) | RTSR Demand or Demand- Interval? | Billing Determinant Applied to Fixed Charge for Unmetered Classes (e.g. # of devices/connections). |

NEWMARKET TAY POWER DISTRIBUTION LTD. MIDLAND RATE ZONE

2018

Input cells Drop down cells

Note 1 Year(s) Requested for Disposition

Note 2 Consumption Data Excluding for Loss Factor (Data to agree with RRR as applicable)

| Year | | 2018 | | |
|-----------------------------|---------|-------------|-----|-------|
| Total Metered excluding WMP | C = A+B | 185,865,826 | kWh | 100% |
| RPP | A | 78,542,965 | kWh | 42.3% |
| Non RPP | B = D+E | 107,322,861 | kWh | 57.7% |
| Non-RPP Class A | D | 49,773,175 | kWh | 26.8% |
| Non-RPP Class B* | E | 57.549.686 | kWh | 31.0% |

*Non-RPP Class B consumption reported in this table is not expected to directly agree with the Non-RPP Class B Including Loss Adjusted Billed Consumption in the GA Analysis of Expected Balance table below. The difference should be equal to the loss factor.

Note 3 GA Billing Rate

GA is billed on the

1st Estimate

GA Billing Rate Description

Newmarket Tay Power Distribution Ltd. - Midland Rate Zone bills all Non-RPP customers based on the 1st estimate of GA provided by the IESO.

Newmarket Tay Power Distribution Ltd. - Midland Rate Zone confirms it bills customers on a calendar month basis. Consumption for each billing cycle is billed in the subsequent month.

Newmarket Tay Power Distribution Ltd. - Midland Rate Zone creates new GA billing rates each month in our billing system. The monthly rates have "rate effective dates" for the each month. This enables the proration of GA charges when a customer is billed over two months (ie: consumption billed from January 15, 2016 - Feburary 10, 2016)

Newmarket Tay Power Distribution Ltd. - Midland Rate Zone confirms where a billing spans more than one month, the GA billing rate is prorated based on the consumption for the blended months.

Newmarket Tay Power Distribution Ltd. - Midland Rate Zone confirms the GA rate is applied consistently for all billing and unbilled revenue transactions for non-RPP Class B customers in each rate class.

Note 4 Analysis of Expected GA Amount

| Year | 2018 | | | | | | | | |
|----------------|---|--|---|---|---------|-------------------------------------|---------------------------------|---------------------------------------|------------------------------|

Appendix 5: LRAMVA Model

(Presented in PDF and Excel Format)

Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) Work Form

Version 4.0 (2020)

Generic LRAMVA Work Forms

| Worksheet Name | Description |
|-----------------------------|---|
| 1. LRAMVA Summary | Tables 1-a and 1-b provide a summary of the LRAMVA balances and carrying charges associated with the LRAMVA disposition. The balances are populated from entries into other tabs throughout this work form. |
| 1-a. Summary of Changes | Tables A-1 and A-2 include a template for LDCs to summarize changes to the LRAMVA work form. |
| 2. LRAMVA Threshold | Tables 2-a, 2-b and 2-c include the LRAMVA thresholds and allocations by rate class. |
| 3. Distribution Rates | Tables 3-a and 3-b include the distribution rates that are used to calculate lost revenues. |
| 3-a. Rate Class Allocations | A blank spreadsheet is provided to allow LDCs to populate distributor specific rate class percentages to allocate actual CDM savings to different customer classes. |
| <u>4. 2011-2014 LRAM</u> | Tables 4-a, 4-b, 4-c and 4-d include the template 2011-2014 LRAMVA work forms. |
| 5. 2015-2020 LRAM | Tables 5-a, 5-b, 5-c and 5-d include the template 2015-2020 LRAMVA work forms. |
| 6. Carrying Charges | Table 6-b includes the variance on carrying charges related to the LRAMVA disposition. |
| 7. Persistence Report | A blank spreadsheet is provided to allow LDCs to populate with CDM savings persistence data provided by the IESO. |
| 8. Streetlighting | A blank spreadsheet is provided to allow LDCs to populate data on streetlighting projects whose savings were not provided by the IESO in the CDM Final Results Report (i.e., streetlighting projects). |

This Workbook Model is protected by copyright and is being made available to you solely for the purpose of filing your application. You may use and copy this model for that purpose, and provide a copy of this model to any person that is advising or assisting you in that regard. Except as indicated above, any copying, reproduction, publication, sale, adaptation, translation, modification, reverse engineering or other use or dissemination of this model without the express written consent of the Ontario Energy Board is prohibited. If you provide a copy of this model to a person that is advising or assisting you in preparing the application or reviewing your draft rate order, you must ensure that the person understands and agrees to the restrictions noted above.

While this model has been provided in Excel format and is required to be filed with the applications, the onus remains on the applicant to ensure the accuracy of the data and the results.

LRAMVA Work Form: Checklist and Schematic

General Note on the LRAMVA Model

The LRAMVA work form has been created in a generic manner that should allow for use by all LDCs. There are some elements that are not applicable at this time (i.e., 2019 and 2020 related components). These have been included (but hidden in the work form) in an effort to avoid major updates in the future. This LRAMVA work form consolidates information that LDCs are already required to file with the OEB. The model has been created to provide LDCs with a consistent format to display CDM impacts, the forecast savings component and, ultimately, any variance between actual CDM savings and forecast CDM savings. The majority of the information required in the LRAMVA work form will be provided to LDCs from the IESO as part of the Final CDM Results each year. Please contact the IESO for any reports that may be required to complete this LRAMVA work form.

The LRAMVA work form is unlocked to enable LDCs to tailor it to their own unique circumstances.

LRAMVA (\$) = (Actual Net CDM Savings - Forecast CDM Savings) x Distribution Volumetric Rate + Carrying Charges from LRAMVA balance

Important Checklist

| Not Applicable | o Highlight changes to this work form made by the LDC, if any, and provide rationale for the change in Tab 1-a |
|----------------|--|
| Not Applicable | o Include any necessary assumptions the LDC has to make in its LRAMVA work form in the "Notes" section of the work form |
| Yes | o Provide documentation on the LRAMVA threshold by providing the reference and source material from the LDC's cost of service proceeding where its most recent load fored |
| Yes | o Include a copy of initiative-level persistence savings information that was verified by the IESO in Tab 7. Persistence information is available upon request from the IESO |
| Yes | o Apply the IESO verified savings adjustments to the year it relates to. |
| Not Applicable | o Provide documentation or data substantiating savings from projects that were not provided in the IESO's verified results reports, inserted in Tab 8 (i.e., streetlighting projects |
| Yes | o Provide documentation or analysis on how rate class allocations were determined by customer class and program each year, inserted in Tab 3-a |

| Work Form Calculations | Source of Calculation | Inputs (Tables to Complete) | Source of Data Inputs | Outputs of Data (Auto-Populated) |

- r Final Disposition

Table 1-a. LRAMVA Totals by Rate Class

Please input the customer rate classes applicable to the LDC and associated billing units (kWh or kW) in Table 1-a below. This will update all tables throughout the workform.

The LRAMVA total by rate class in Table 1-a should be used to inform the determination of rate riders in the Deferral and Variance Account Work Form or IRM Rate Generator Model. Please also ensure that the principal amounts in column E of Table 1-a capture the appropriate years and amounts for the LRAMVA claim. Column F of Table 1-a should include projected carrying charges amounts as determined on a rate class basis from Table 1-b below.

NOTE: If the LDC has more than 14 customer classes in which CDM savings was allocated, LDCs must contact OEB staff to make adjustments to the workform.

| Customer Class | Billing Unit | Principal (\$) | Carrying Charges (\$) | Total LRAMVA (\$) |
|----------------|--------------|----------------|-----------------------|-------------------|
| Residential | kWh | \$35,277 | \$1,116 | \$36,394 |
| GS<50 kW | kWh | -\$8,745 | -\$277 | -\$9,022 |
| GS>50 | kW | \$63,311 | \$2,003 | \$65,314 |
| Street Lights | kW | \$283 | \$9 | \$292 |

| | 1 | | | |
|-------|---|----------|---------|----------|
| Total | | \$90,126 | \$2,852 | \$92,978 |
| | | | | |

Table 1-b. Annual LRAMVA Breakdown by Year and Rate Class

In column C of Table 1-b below, please insert a 'check mark' to indicate the years in which LRAMVA has been claimed. If you inserted a check-mark for a particular year, please delete the amounts associated with the actual and forecast lost revenues for all rate classes for that year, up to and including the total. Any LRAMVA from a prior year that has already been claimed cannot be included in the current LRAMVA disposition, with the exception of the case noted below.

If LDCs are seeking to claim true-up amounts that were previously approved by the OEB, please note that the "Amount Cleared" rows are applicable to the LDC and should be filled out. This may relate to claiming the difference in LRAM approved before the May 19, 2016 Peak Demand Consultation, and the lost revenues that would have been incurred after that consultation, as approved by the OEB. If this is the case, reference to the decision must be noted in the rate application. If this is not the case, LDCs are requested to leave those rows blank.

LDCs are expected to include projected carrying charges amounts in row 84 of Table 1-b below. LDCs should also check accuracy of the years included in the LRAMVA balance in row 85.

| Description | LRAMVA Previously Claimed | Residential | GS<50 kW | GS>50 | Street Lights | | | | | | Total |
|----------------------|------------------------------|--------------|---------------|--------------|---------------|--------|--------|--------|--------|--------|-------------|

Table A-1. Changes to Generic Assumptions in LRAMVA Work Form

Please document any changes in assumptions made to the generic inputs of the LRAMVA work form. This may include, but are not limited to, the use of different monthly multipliers to claim demand savings from energy efficiency programs; use of different rate allocations between current year savings and prior year savings adjustments; inclusion of additional adjustments affecting distribution rates; etc. All changes should be highlighted in the work form as well.

LRAMVA Work Form: Distribution Rates

Table 3. Inputs for Distribution Rates and Adjustments by Rate Class

Please complete Table 3 with the rate class specific distribution rates that pertain to the years of the LRAMVA disposition. Any adjustments that affect distribution rates can be incorporated in the calculation by expanding the "plus" button at the left hand bar. Table 3 will convert the distribution rates to a calendar year rate (January to December) based on the number of months entered in row 16 of each rate year starting from January to the start of the LDC's rate year. Please enter 0 in row 16, if the rate year begins on January 1. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas in Table 3-a accordingly.

Note: LDC to make note of adjustments made to Table 3 to accommodate the LDC's specific circumstances

 Table 3-a.
 Distribution Rates by Rate Class

Table 3-a below autopopulates the average distribution rates from Table 3. Please ensure that the distribution rates relevant to the years of the LRAMVA disposition are used. Please clear the rates related to the year(s) that are not part of the LRAMVA claim.

The distribution rates that remain in Table 3-a will be used in Tabs 4 and 5 of the work form to calculate actual and forecast lost revenues. If there are additional adjustments (i.e., rows) added to Table 3, please adjust the formulas from Table 3-a, as well as the distribution rate links in Tabs 4 and 5.

| Year | Residential | GS<50 kW | GS>50 | Street Lights | | | | | | | | | | |

LRAMVA Work Form:

Determination of Rate Class Allocations

Version 4.0 (2020)

Instructions

LDCs must clearly show how it has allocated actual CDM savings to applicable rate classes, including supporting documentation and rationale for its proposal. This should be shown by customer class and program each year.

LRAMVA Work Form: 2011 - 2014 Lost Revenues Work Form

Version 4.0

| Legend | User Inputs (Green) |
|--------------|--|
| | Auto Populated Cells (White) |
| | Instructions (Grey) |
| | |
| Instructions | LDCs can apply for disposition of LRAMVA amounts at any time, but at a minimum, must do so as part of a cost of service (COS) application. The following LRAMVA work forms apply to LDCs that need to recover lost revenues from the 2011-2014 period. Please input or manually link the savings, adjustments and program savings persistence data in these tables from the LDC's Persistence Reports provided by the IESO (in Tab 7). As noted earlier, persistence data is available upon request from the IESO. Please also be advised that the same rate classes (of up to 14) are carried over from the Summary Tab 1. Please ensure that the IESO verified savings adjustments apply back to the program year it relates to. For example, savings adjustments related to 2012 programs that were reported by the IESO in 2013 should be included in the 2012 program savings table. In order for persisting savings to be claimed in future years, past year's initiative level savings results need to be filled out in the tables below. If the IESO adjustments were made available to the LDC after the LRAMVA was approved, the persistence of those savings adjustments in the future can be claimed as approved LRAMVA amounts are considered to be final. The work forms below include the monthly multipliers for most programs in order to claim demand savings from energy efficiency programs, consistent with the monthly multipliers indicated in the OEB's updated LRAM policy related to peak demand savings in EB-2016-0182. Demand Response (DR3) savings should generally not be included with the LRAMVA calculation, unless suported by empirical evidence. LDCs are requested to confirm the monthly multipliers for all programs each year as placeholder values are provided. If a different monthly multiplier is used, please include rationale in Tab 1-a and highlight the new multiplier that has been used. LDC are requested to input the applicable rate class allocation percentages to allocate actual savings to the rate classes |
| | savings and its savings adjustments. If a different allocation is proposed for savings adjustments, LDCs must provide supporting rationale in Tab 1-a and highlight the change. |
| | 5. The persistence of future savings is expected to be included in the distributor's load forecast after re-basing. LDCs are requested to delete the applicable savings persistence rows (auto-calculated after the LRAMVA totals for the year) if future year's persistence of savings is already captured in the updated load forecast. Please also provide assumptions about the years in which persistence is captured in the load forecast calculation in the "Notes" section below each table. |

LRAMVA Work Form: 2015 - 2020 Lost Revenues Work Form

| Legend | User Inputs (Green) |
|--------------|---|
| | |
| | Auto Populated Cells (White) |
| | Instructions (Grey) |
| Instructions | 1. LDCs can apply for disposition of LRAMVA amounts at any time, but at a minimum, must do so as part of a cost of service (COS) application. The following LRAMVA work forms apply to LDCs that need to recover lost revenues from the 2015-2020 period. Please input or manually link the savings, adjustments and program savings persistence data in these tables from the LDC's Persistence Reports provided by the IESO (in Tab 7). As noted earlier, persistence data is available upon request from the IESO. Please also be advised that the same rate classes (of up to 14) are carried over 2. Please ensure that the IESO verified savings adjustments apply back to the program year it relates to. For example, savings adjustments related to 2016 programs that were reported by the IESO in 2017 should be included in the 2016 program savings table. In order for persisting savings to be claimed in future years, past year's initiative level savings 5. The work forms berow include the monthly multipliers for most programs in order to claim earning include to peak demand savings in EB-2016-0182. Demand Response (DR3) savings should generally not be included with the LRAMVA calculation, unless suported by empirical evidence. LDCs are requested to confirm the monthly multipliers for adjustments. If a different monthly multiplier is used allocated at a discusses. The generic template currently includes the same allocation percentage for program savings to the rate classes allocation percentage for program savings and its savings adjustments. If a different monthly multiplier is used allocate as avings to allocate a savings and its savings adjustments. LDCs must provide supporting rationale in 5. The persistence of future savings is expected to be included in the distributor's load forecast affer re-basing. LDCs are requested to delete the applicable savings persistence rows (auto-calculated after the LRAMVA totals for the year) if future year's persistence of savings is already captured in the updated load forecast. Please also provide |

LRAMVA Work Form: Carrying Charges by Rate Class

Legend

User Inputs (Green)

Auto Populated Cells (White)

Instructions (Grey)

Instructions

Incluse update ratio of as new approved presenced metrost rates for defentation variance accounts become available. Monthly metrost rates are used to calculate the variance on the carrying charges for LRAMVA. Starting from column I, the principal will auto-populate as monthly variances in Table 6-a, and are multiplied by the interest rate from column H to determine the monthly variances on carrying charges for each rate class by year.
 The annual carrying charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted CDM savings and what charges totals in Table 6-a below pertain to the amount that was originally collected in interest from forecasted constructions. As in the amount calculated in interest from forecasted constructions in the amount of the amount that was originally collected in interest from forecasted constructions in the amount of the amount calculated in interest from forecasted constructions in the amount of the

should have been collected based on actual CDM savings. As the amounts calculated in Table 6-a are cumulative, LDCs are requested to enter any collected interest amounts into the "Amounts Cleared" row in order to clear the balance and calculate outstanding variances on carrying charges. **3.** Please calculate the projected interest amounts in the LRAMVA work form. Project carrying charges amounts incuded in Table 6-a should be consistent with the projected interest amounts included in the DVA Continuity Schedule. If there are additional adjustments required to the formulas to calculate the projected interest amounts. please adjust the formulas in Table 6-a accordingly.

Table 6. Prescribed Interest Rates

Table 6-a. Calculation of Carrying Costs by Rate Class

Ontario Energy Board

Supporting Documentation: LDC Persistence Savings Results from IESO

| Legend | User Inputs (Green) |
|--------|-----------------------|
| | Drop Down List (Blue) |
| | Instructions (Grey) |

Instructions (Steps) 1. Columns B to H of this tab have been structured in a way to match the formatting of the persistence report provided by the IESO. Please copy and paste the program information by initiative in Columns B to H and the corresponding demand and energy savings data by initiative in Columns L to BT of this work form.

2. Please identify the source of the report via the dropdown list in Column I.

3. To faciliate the identification of adjustments that may be available in a prospective year's results report, it will be easier to sort all the savings by implementation year (Column H). This can be done by clicking on the filter button at cell H25 (highlighted in orange). Before you sort values, please ensure that all table columns have filters.

4. Please identify what the savings value represents (i.e., current year savings for the year or an adjustment to a prior year) via the dropdown list in Column J. Current year savings would be identified with an implementation year that matches the year of the persistence report. A savings adjustment would be identified with a prior year imple

5. Please manually input or link the applicable savings and adjustments (Columns L to BT) for all applicable initiatives in Tabs 4 and 5 of this work form.

NOTE: The Net Verified Peak Demand Savings table and Net Verified Energy Savings table below are in the reverse order to the accompanying tables in Tab 4 and Tab 5. The tables below match those provided by the IESO.

LRAMVA Work Form: Documentation for Streetlighting Projects

Legend

Instructions

Please provide documentation and/or data to substantiate program savings that were not provided in the IESO's verified results reports (i.e., streetlighting projects).

Distributors are encouraged to provide data in the following format, and complete a separate set of following tables for each project. The tables below are meant to be an example. Distributors should complete the tables based on the actual project details. Please create the necessary links to Tab 4/5 and tabulations within this LRAMVA workform to calculate the LRAMVA amounts. Alternatively, LDCs may submit a separate attachment with the project level details for billed demand by type of bulb.
