November 25 2019

Ontario Energy Board P.O. Box 2319 27th Floor 2300 Yonge Street Toronto, Ontario M4P 1E4

Attention: Ms. Kirsten Walli, Board Secretary Regarding: 2020 IRM Application (EB-2019-0026)

Dear Ms. Walli,

Chapleau Hydro Inc. is pleased to submit to the Ontario Energy Board its 2020 IRM Application in a searchable format. This application is being filed according to the Board's e-Filing Services.

Hard copies of the application will be sent to the OEB's offices within a week.

We would be pleased to provide any further information or details that you may require relative to this application.

Yours truly,

la fr.

Alan Morin, General Manager Chapleau PUC 110 Lorne Street South P.O. Box 670 Chapleau, ON, P0M 1K0 Phone: 705-864-0111 Fax: 705-864-1962

### **IN THE MATTER OF** the Ontario Energy Board Act, 1998, S.O.

#### 1998, c.15, (Schedule B); AND IN THE MATTER OF an

Application by Chapleau PUC.. to the Ontario Energy Board for an Order or Orders approving or fixing just and reasonable distribution rates and other service charges to be effective May 1, 2020.

#### 1 **1 INTRODUCTION**

Chapleau PUC. ("CPUC") ("Chapleau Hydro") hereby applies to the Ontario Energy Board
(the "Board") for approval of its 2020 Distribution Rate Adjustments effective May 1, 2020.
CPUC applies for an Order or Orders approving the proposed distribution rates and other
charges as set out in Appendix 2 of this Application as just and reasonable rates and
charges pursuant to Section 78 of the OEB Act.<sup>1</sup> The rates adjustment being applied for
affects all classes of CPUC s customer base; Residential, General Services less than 50kW,
GS 50kW to 4999kW, Street Lights, USL and and Sentinel Lights.<sup>2</sup>

9 CPUC has followed Chapter 3 of the Board's Filing Requirements for Transmission and
10 Distribution Applications dated July 15, 2019, along with the Key References listed at
11 section 3.1.1 of the Chapter 3 Incentive Rate-Setting Applications

12 In the event that the Board is unable to provide a Decision and Order in this Application for implementation by the Applicant as of May 1, 2020, CPUC requests that the Board 13 issue an Interim Rate Order declaring the current Distribution Rates and Specific Service 14 15 Charges as interim until the decided implementation date of the approved 2020 distribution rates. If the effective date does not coincide with the Board's determined 16 17 implementation date for 2020 distribution rates and charges, CPUC requests to be 18 permitted to recover the incremental revenue from the effective date to the 19 implementation date.

20 CPUC requests that this application be disposed of by way of a written hearing. CPUC 21 confirms that the billing determinants used in the model are from the most recent

<sup>&</sup>lt;sup>1</sup> MFR - Manager's summary documenting and explain all rate adjustments requested

<sup>&</sup>lt;sup>2</sup> MFR - Statement as to who will be affected by the application, specific customer groups affected by particular request

reported RRR filings. The utility reviewed both the existing "Tariff Sheets" and billing
 determinants in the pre-populated worksheets and confirms that they were accurate.

3 In the preparation of this application, CPUC used the 2020 IRM Rate Generator issued on July 15, 2019. The rate and other adjustments being applied for and as calculated through 4 the use of the above models include a Price Cap Incentive Rate-Setting ("Price Cap IR") 5 6 option to adjust its 2020 rates. (The Price Cap IR methodology provides for a mechanistic and formulaic adjustment to distribution rates and charges in the period between Cost of 7 8 Service applications). The model also adjusts Retail Transmission Service Rates per Board 9 Guideline G-2008-0001 - Electricity Distribution Retail Transmission Service Rates revised 10 on June 28, 2012.

- 11 CPUC also applies for the following matter;
- Continuance of the Specific Services charges and Loss Factors.
  - Continuance of the MicroFit monthly charge.
  - Continuance of the Smart Meter Entity charge.
- Approval of a revised Minimum Fixed Charges and volumetric charges for all
   classes. Further details on Bill Impacts are presented in Section 18 of this
   application.
- The annual adjustment mechanism is not being applied to the following components ofdelivery rates:
- Rate Adders, Rate Riders, Low Voltage Service Charges, Retail Transmission
   Service Rates, Wholesale Market Service Rate, Rural and Remote Rate
   Protection Benefit and Charge, Standard Supply Service Administrative
   Charge, MicroFIT Service Charge, Specific Service Charges, Transformation and
   Primary Metering Allowances, Smart Metering Entity Charge
- 25 CPUC recognizes that the utility, its shareholder, and all its customer classes will be
- affected by the outcome of the herein application.

27

13

#### Page 6 of 36

### **1 2 DISTRIBUTOR'S PROFILE**

Chapleau PUC is licensed by the Ontario Energy Board to distribute electricity to the inhabitants of the Town of Chapleau. Chapleau PUC is incorporated under the Business Corporation Act on August 18, 1999. The sole Shareholder of Chapleau PUC is the Town of Chapleau. The population of the Municipality of Chapleau is approximately 2,000. The distribution service area within the Town of Chapleau is bounded by the township of Panet, Cochrane and Chapleau.

- 8 CPUC is a utility that is tasked with the delivery of electricity. Profits are either reinvested
- 9 for infrastructure or distributed to its shareholder in the form of dividends.CPUC's service
  10 area is an embedded utility completely contained within the municipal boundaries of the
- 11 town of Chapleau therefore the utility only serves the community of Chapleau. The area
- 12 is embedded within the Hydro One Networks Inc
- 13 In 2019, CPUC will rely on its approximately 30 km of circuits deliver approximately 14 26,173,316 kWh and 19,722 kW of energy to approximately 1,200 customers. CPUC's distribution system is connected to the 115 kV transmission system through Chapleau DS. 15 The distribution system is comprised of two voltage systems: one at 4.16 kV and the other 16 17 at 25 kV. CPUC owns two 115-4.16 kV transformers at the DS totaling 6.2 MVA which 18 supply 3 feeders. In addition, CPUC has one 25 kV feeder supplied by Hydro One Networks 19 Inc. which is limited to supplying approximately 3.5 MVA of capacity. Approximately 60% of the distribution assets are rated at 4.16 kV and 40% are rated at 25 kV. 20
- CPUC does not host any utilities within its service area, nor have any embedded utilitieswithin its service area.
- CPUC is a registered Market Participant dealing directly with the IESO. CPUC's last Cost of
   Service application was for rates effective May 1, 2019.
- 25

### **1 3 PUBLICATION NOTICE**

2 3 4 5	Upon receiving the Letter of Direction and the Notice of Application and Hearing from the Board, the OEB will arrange to have the Notice of Application and Hearing for this proceeding published in the following local community not-paid-for newspaper which has the highest circulation in its service area.							
6		The Chapleau Express						
7		14 Richard Street						
8		Chapleau, ON P0M 1K0						
9		Phone # 705-864-2579						
10 11	Once the Notice of Application and Hearing has been published in the above listed newspapers, CPUC will file an Affidavit of Publication.							
12	Application contact information is as follows:							
13	Applicants Name:	Chapleau Public Utilities Corporation						
14	Applicants Address:	110 Lorne Street South						
15		P.O. Box 670						
16		Chapleau, ON, P0M 1K0						
17		Phone: 705-864-0111						
18 19		Fax: 705-864-1962						
20	CPUC's Contact Info.	Alan Morin						
21		General Manager						
22		amorin.puc@chapleau.ca						
23		Phone: 705-864-0111						
24	The alternate contact for the herein	application is;						
25		Manuela Ris-Schofield						
26		Tandem Energy Services Inc						
27		Phone: 519-856-0080						

Chapleau Hydro Inc. EB-2019-0026

#### Page **8** of **36**

- 1 This application and all documents related to this application will be made available on
- 2 CPUC's website at http://chapleau.ca/CPUC/. The application will also be available on the
- 3 OEB's website at www.ontarioenergyboard.ca, under Board File Number EB-2019-0026

### 1 4 PRICE CAP ADJUSTMENT

- 2 As per Board policy (Chapter 3), distribution rates are to be adjusted according to the Price Cap
- 3 model presented through the Board's Rate Generator model. The calculation would be based
- 4 on the annual percentage change in the GDP-IPI index.
- 5 In accordance with the Report of the Board: Rate Setting Parameters and Benchmarking under
- 6 the Renewed Regulatory Framework for Ontario's Electricity Distributors, CPUC was assigned
- 7 Stretch Factor Group II with a Price Escalator of 2.00, Price Cap Index of 1.55% and a Stretch
- 8 Factor Value of 0.45%.
- 9 The following table shows CPUC's applicable factor for its Price Cap Adjustment. (CPUC notes
- 10 that the IRM model has not been updated by the OEB to reflect the below parameters)

11

### **Table 1 - Price Cap Parameters**

Stretch Factor Group	II
Set Price Escalator	2.00%
Revised Price Escalator	0.00%
Stretch Factor Value	0.45%
Productivity Factor	0.00%
Price Cap Index	1.55%

- 12 While the price factor adjustment under this application would apply to the fixed and volumetric
- 13 distribution rates for CPUC, it would not affect the following:
- Rate adders and riders; Low voltage service charges; Retail Transmission Service
- 15 Rates; Wholesale Market Service Rate; Rural Rate Protection Charge; Standard Supply
- 16 Service Administrative Charge; MicroFIT Service Charge; Specific Service Charges.

Page **10** of **36** 

### **1 5 REVENUE TO COST RATIO ADJUSTMENT**

- 2 CPUC is proposing to adjust its revenue to cost ratios in accordance with its Board Approved
- 3 2019 Cost of Service Application.<sup>3</sup> As such, CPUC completed and is filing in conjunction with this
- 4 application, a completed revenue-to-cost ratio adjustment work form.<sup>4</sup>
- 5

### 6 6 RATE DESIGN FOR RESIDENTIAL CLASS

- In accordance with the Rate Design for Residential Electricity policy issued on April 2,
  2015, CPUC followed the approach set out in sheet 16 of the rate generator model to
- 9 implement the first of five yearly adjustment to its Monthly Fixed Charge. Worksheet 16
- 10 of the model, which is reproduced below, shows and incremental fixed charge of \$0.00
- 11 which falls below the \$4.00 threshold. Table 2b) show the existing rates compared to the
- 12 proposed rates. The bill impacts are discussed further at Section 15 of this application.<sup>5,6</sup>

<sup>&</sup>lt;sup>3</sup> MFR - If required, for distributors seeking revenue to cost ratio adjustments due to previous OEB decision, the Revenue to Cost Ratio Adjustment Workform must be filed

<sup>&</sup>lt;sup>4</sup> MFR - Completed revenue-to-cost ratio adjustment workform to adjust the revenue-to-cost ratio if previously approved by the OEB

<sup>&</sup>lt;sup>5</sup> MFR - Extension of OEB-approved transition period, if necessary (N/A)

<sup>&</sup>lt;sup>6</sup> MFR - Alternative/additional strategy in the event that an additional transition year is insufficient, or that no extension is necessary, however substantiated with reasons (N/A)

#### Page **11** of **36**

### 1 7 RTSR ADJUSTMENT

- 2 CPUC is applying for an adjustment of its Retail Transmission Service Rates based on a
- 3 comparison of historical transmission costs adjusted for new UTR levels and revenues generated
- 4 from existing RTSRs. This approach is expected to minimize variances in the USoA Accounts
- 5 1584 and 1586.
- 6 CPUC used the RTSR Adjustment Worksheets embedded in the IRM Model, to determine the
- 7 proposed adjustments to the current Retail Transmission Service Rates.
- 8 The Loss Factor applied to the metered kWh is the actual Board-approved 2019 Loss Factor.
- 9 The proposed adjustments of the Retail Transmission Service Rates are shown in the table
- 10 below, and the detailed calculations can be found in the 2020 IRM Model filed in conjunction
- 11 with this application.

#### 12

### Table 4 - Proposed RTSR

Retail Transmission Rate - Network Service Rate			
		Current	Proposed
Rate Description	Unit	RTSR-	RTSR-
		Network	Network
Residential	\$/kWh	0.0068	0.0068
GS<50 kW	\$/kWh	0.0060	0.0060
GS>50 kW	\$/kWh	2.5088	2.4939
USL	\$/kW	0.0060	0.0060
Sentinel Lights	\$/kWh	1.9017	1.8904
Street Lighting	\$/kW	1.8921	1.8809

Retail Transmission Rate –

Street Lighting	\$/kW	0.5099	0.5071

Page 13 of 36

### **1 8 DEFERRAL AND VARIANCE ACCOUNT**

CPUC has completed the Board Staff's 2020 IRM Rate Generator - Tab 3 Continuity 2 Schedule<sup>7</sup>. The Report of the Board on Electricity Distributors' Deferral and Variance 3 Account Review Report (the "EDDVAR Report") provides that during the IRM plan term, 4 5 the distributor's Group 1 audited account balances will be reviewed and disposed if the 6 preset disposition threshold of \$0.0004 per kWh (debit or credit) is exceeded. Since the threshold was met, CPUC is, therefore, seeking disposal of its deferral and variance 7 account in this proceeding. The CPUC Group, 1 total claim balance, is \$164,488 and is 8 comprised of the following account balances. Details of these balances can be found in 9 the 2020 IRM Model. 10

11

### Table 5 - Deferral and Variance Account balances

	т <u> </u>	
Group 1 Accounts		
LV Variance Account	1550	23,179

Adjustment		118,478
Total		164,488

<sup>&</sup>lt;sup>7</sup> MFR - Completed tab 3 - continuity schedule in Rate Generator Model

### Page **14** of **36**

1	CPUC notes that all accounts are being disposed of.
2	Concerning the explanation of variance between amounts proposed for disposition
3	and amounts reported in RRR for each account, the balance of account 1580 was put
4	into the general 1580 account. CPUC confirms that the amounts in the total column
5	claim are correct.
6	CPUC confirms that no adjustments have been made to balances previously
7	approved by the OEB on a final basis
8	CPUC confirms that the GA rate riders were calculated on an energy basis (kWh) as
9	per the OEB model.
10	CPUC is proposing to dispose of its balance using the 1-year default disposition
11	period.
12	<ul> <li>All rate riders are determined and calculated per the OEB model and policies.</li> </ul>
13	<ul> <li>Upon review of the OEB Ltr. Guidance on RPP Settlements and claims process_,</li> </ul>
14	CPUC, along with its accountants/auditors, confirm that, to the best of its knowledge,
15	it followed the guidance from the May 23 letter and does its "true-up" process
16	monthly.
17	<ul> <li>Upon review of the new accounting guidance related to accounts 1588 and 1589 –</li> </ul>
18	Feb 21, 2019, CPUC, along with its accountants/auditors KPMG, confirm that it
19	complies with the new policies that have come in effect on August 31, 2019. CPUC
20	does not report any adjustments as it uses actual numbers for accounts 1588 and
21	1589.
22	

Page **15** of **36** 

### 1 9 DISPOSITION OF ACCOUNT 1595

- 2 CPUC is not proposing to dispose of any 1595 balances as part of this application.
- 3 The 2017 audited balances which were approved as part of CPUC's 2019 Cost of Service
- 4 Applications were approved on a 2-year basis and as such have not reached sunset plus
- 5 1 year. All filing requirements related to 1595 including populating the 1595 Workform
- 6 are not applicable in this case. <sup>8</sup>
- 7 CPUC also confirms that there are no residual balances for vintage Account 1595 being
- 8 disposed of and that all historical dispositions of 1595 have only been done once.<sup>9</sup>
- 9 CPUC confirms that there are no material residual balances which require further
- 10 analysis, consisting of separating the components of the residual balances by each
- 11 applicable rate rider and by customer rate class.
- 12 As such, CPUC does not need to provide detailed explanations for any significant
- 13 residual balances attributable to specific rate riders for each customer rate class
- 14 including volume differences between forecast volumes (used to calculate the rate
- 15 riders) as compared to actual volumes at which the rate riders were billed.<sup>10</sup>

<sup>&</sup>lt;sup>8</sup> MFR - Distributors who meet the requirements for disposition of residual balances of Account 1595 subaccounts, must complete the 1595 Analysis Workform. Account 1595 sub-accounts are eligible for disposition when one full year has elapsed since the associated rate riders' sunset dates have expired and the residual balances have been externally audited.

<sup>&</sup>lt;sup>9</sup> MFR - Confirm disposition of residual balances for vintage Account 1595 have only been done once - distributors expected to seek disposition of the balance a year after a rate rider's sunset date has expired. No further dispositions of these accounts are generally expected unless justified by the distributor <sup>10</sup> MFR - Material residual balances will require further analysis, consisting of separating the components of the residual balances by each applicable rate rider and by customer rate class. Distributors are expected to provide detailed explanations for any significant residual balances attributable to specific rate riders for each customer rate class. Explanations must include for example, volume differences between forecast volumes (used to calculate the rate riders) as compared to actual volumes at which the rate riders were billed.

Page **16** of **36** 

### 1 11 GLOBAL ADJUSTMENT

2 Chapleau PUC.'s settlement process is summarized below.

#### 3 Global Adjustment

CPUC does not have any Class A customers. . Chapleau PUC.'s Class B 4 5 customers pay the global adjustment ("GA") charge based on the amount of electricity they consume in a month (kWh). Within the Class B group, 6 7 there are two categories of customers: RPP customers who pay an RPP rate, which has a built-in GA adjustment component, and the remaining 8 9 non-RPP customers who pay the Hourly Ontario Electricity Price, and a 10 monthly GA price listed separately on their bill. Chapleau PUC, uses the GA first estimate to bill its non-RPP Class B customers and to calculate and 11 12 record unbilled revenues. This treatment applies to all customer classes.

For Class B customers, RSVA Account 1589 captures the difference
between the GA amounts billed to non-RPP customers and the actual GA
amount paid for those customers by the distributor to the IESO.

### 16 Monthly Settlement Submissions

When completing the monthly submission for IESO settlements, Chapleau 17 PUC. uses a top-down approach. Chapleau PUC. starts by collecting the 18 19 current month's wholesale metering data from CPUC's third-party meter 20 management vendor. Data is then collected from the billing system to determine the split between RPP and non-RPP volumes. Chapleau PUC. is 21 22 required to settle the difference between revenues billed to RPP customers 23 (three-tiered TOU pricing and the two-tiered RPP pricing), and the wholesale cost of power, which includes the amount of the global 24 adjustment allocated to this portion of the distributor's load. The first 25 estimate of the GA is used for this initial calculation, but once the actual 26 27 GA rate is known, an adjustment is made to true-up in the following month. 28 Chapleau PUC. performs a reconciliation to verify that the year-end balances in the 1588-Power and 1589-GA variance accounts are accurate 29 while ensuring amounts requested for disposition pertain to the correct 30 31 year.

#### Page **17** of **36**

Chapleau PUC. has completed the Board's Account 1589 Global
 Adjustment Analysis Workform, which shows minimal unresolved
 differences from expected results.

# 4 Overall Process and Procedural Controls over the IESO Settlement 5 Process

6 Chapleau PUC. follows a substantive approach using reconciliation procedures to ensure accuracy and completeness for the settlement 7 8 submission process where possible. Management is knowledgeable on 9 the methodologies according to the OEB and IESO requirements and is 10 responsible for updating internal processes and procedures accordingly. 11 Management is also responsible for the settlement spreadsheet and to meet changing OEB/IESO settlement requirements. 12 CPUC uses the Commodity OEB Spreadsheet. 13

The process designed in Chapleau PUC.'s settlement process includes various reconciliation procedures, including monthly bill testing for each class of customer and regular month-end balancing processes, to ensure that information is accurate and the appropriate methodologies pursuant to the OEB and IESO requirements are met, as well as to ensure the accuracy and validity of the RPP claims.

The monthly IESO settlement (on or before 4<sup>th</sup> business day of the month) includes the previous month billed consumption and using the 1st GA estimate, which is then combined with the true-up the previous month using actuals.

RPP/non-RPP True-ups are done every month, and since CPUC requests
 GA disposal after true-ups are completed, no further adjustments are
 required.

#### 1 Detailed approach

- 2 CPUC's step by step approach can be described as:
- Charge types 1142, 101 and other Power expense items are
   booked into Account #4705 Power expense (a)
- 5 2. Charge type 148 are booked into Account #4707 GA 6 Expense (b)
- The actual Non-RPP usage (kWh), provided by CPUC's billing
  system, is multiplied by the Actual IESO posted GA rate to obtain
  the "Non-RPP GA Cost" (c)
- 104. The difference of the "GA expense" (b) less the "Non-RPP GA11Cost" (c) is credited from Account #4707 and debited in Account12#4705. For easier identification, this difference is named "GA RPP13portion transferred to Power" (d) in the steps below.
- 14The following section provides details that address questions on15Account 1588 & 1589 posed in Appendix A, GA Methodology16Description.
- 17 Account #1589
- 185. CPUC calculates the billed-to-actual variance of Non-RPP by19deducting the Billed GA in the billing system (which is actual20consumption multiplied by 1<sup>st</sup> estimate to the "Non-RPP GA cost"21(c). The difference is the monthly GA variance.
- 226. The monthly GA variance is then added to the yearly total GA23variance which results in a credit or debit of account #1589
- 24 Account #1588
- 257.For the Power billed-to-actual variance, account #1588,26CPUC deducts the actual monthly power billed in the billing system27to the sum of actual Power expense (a) + the "GA RPP portion28transferred to power" (d). The difference is the monthly Power29variance.

#### Page **19** of **36**

- 18.The monthly Power variance is then added to the yearly total2Power variance, which results in a credit or debit of account #1588.
- Please note all consumptions used in the steps above are actuals, not as
  billed. (ex: consumption billed in September are August actuals)
- 5 **Reconciliation**

6 CPUC uses a bottom up approach to complete the reconciliation, by using the
7 actual RPP volume, gathered from the Billing system, and the Global Adjustment
8 Actual rate. Any difference is settled every month. When true-up data is reported
9 with current data.

### 10 Capacity Based Recovery (CBR)

11 CPUC has robust processes and internal controls in place for the preparation, 12 review, verification, and oversight of the account balances being disposed, 13 consistent with the certification requirements in Chapter 1 of the filing 14 requirements

In 2012 CPUC reviewed Article 490 in the APH and ensured the correct accounting
 methods were being followed, specifically that at the end of the fiscal period, the
 RSVA balance represents the cumulative net differences between the
 revenue/"billed" and expense/"Charges" accounts and include carrying charges.
 CPUC uses accrual accounting.

### 20 Account 1589 – RSVA GA

CPUC splits the Global Adjustment Settlement Amounts charged by the IESO between RPP and non-RPP by using the actual percentage of RPP and Non-RPP of the total energy volume for the particular month, as gathered from the Comodity OEB Spreadsheet These amounts are posted to Account #4705 – Power Purchased for RPP and Account #4707 – Global Adjustment for Non-RPP in the particular month.

The Global Adjustment revenue, which is billed directly to the non-RPP customers,
is posted directly to GA Energy Sales –The variance between the expense and
revenue is transferred into Account 1589 – RSVA Global Adjustment.

#### 30 Account 1588 – RSVA Power

The value of the energy from the IESO monthly invoices are posted into Account 4705 – Power Purchased for the month the energy was consumed. The energy

- revenue is posted directly from the Billing system and poted into the appropriate
   month. The variance between accounts 4705 Power Purchased Energy Sales is
   posted into Account 1588 RSVA Power. Any balance as a result of the RPP
   reconciliation is posted into account 4705 Power Purchased in the appropriate
   fiscal year.
- 6 CPUC is seeking approval for 2018 audited balances,
- 7 CPUC notes that it has completed the GA workform per the filing requirements. The workform
- 8 has been filed along with this application.
- 9 Below are CPUC's responses to the questions in Appendix A of the GA Analysis Workform.
- 10
- 11

### Table 6 – Allocation of GA balances

		Total Metered Non-RPP 2018 Consumption excluding WMP	Non-RPP Metered Consumption for Current Class B Customers (Non-RPP Consumption excluding WMP, Class A and Transition Customers' Consumption)	% of total kWh	Total GA \$ allocated to Current Class B Customers	GA Rate Rider	
		kWh	kWh				
RESIDENTIAL SERVICE CLASSIFICATION	kWh	10,928	10,928	0.2%	\$84	\$0.0077	kWh
GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION	kWh	179,929	179,929	3.0%	\$1,385	\$0.0077	kWh
GENERAL SERVICE 50 to 4,999 kW SERVICE CLASSIFICATION	kWh	5,786,213	5,786,213	96.8%	\$44,540	\$0.0077	kWh
UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION	kWh	0	0	0.0%	\$0	\$0.0000	
SENTINEL LIGHTING SERVICE CLASSIFICATION	kWh	0	0	0.0%	\$0	\$0.0000	
STREET LIGHTING SERVICE CLASSIFICATION	kWh	0	0	0.0%	\$0	\$0.0000	
	Total	5,977,070	5,977,070	100.0%	\$46,009

1		Appendix A - GA Methodology Description
2		Questions on Accounts 1588 & 1589 <sup>11</sup>
3 4	1.	Please complete the Table below for principal adjustments on the DVA Continuity Schedule for Account 1588:

### Table 7 - Reconciliation of Account 1588

	Principal Adjustments	Was the amount a "Principal Adjustment" in the previous year? (Y/N)
Balance December 31, 2018	(240,675.05)	
Reversals of Principal Adjustments - previous year		
1. Reversal of Cost of Power accrual from previous year		#
2. Reversal of CT 1142 true-up from the previous year		#
3. Unbilled to billed adjustment for the previous year		#
4. Reversal of RPP vs. Non-RPP allocation		#
Sub-Total Reversals from previous year (A):		
	#	
Principal Adjustments - current year	1	1
5. Cost of power accrual for 2018 vs. Actual per IESO bill		
6. True-up of CT 1142 for 2018 consumption recorded in 2019 GL		
7. Unbilled accrued vs. billed for 2018 consumption		
<ol> <li>True-up of RPP vs. Non-RPP allocation of CT 148 based on actual 2018 consumption</li> </ol>		
9. Other	\$343,490.05	
Sub-Total Principal Adjustments for 2018 consumption (B)		
Total Principal Adjustments are shown for 2018 (A + B)		
Bal. For Disposition - 1588 (should match Total Claim column on DVA Continuity Schedule	\$102,815.00	
continuity schedule	#	#

<sup>&</sup>lt;sup>11</sup> MFR - All distributors must file the responses to the questions in Appendix A of the GA Analysis Workform.

1	2.	In boo	oking expense journal entries for Charge Type (CT) 1142 and CT 148 from the
2		IESO i	nvoice, please confirm which of the following approaches is used:
3		a.	CT 1142 is booked into Account 1588. CT 148 is pro-rated based on RPP/non-
4			RPP consumption and then booked into Account 1588 and 1589, respectively.
5		b.	CT 148 is booked into Account 1589. The portion of CT 1142 equaling RPP minus
6			HOEP for RPP consumption is booked into Account 1588. The portion of CT 1142
7			equaling GA RPP is credited into Account 1589.
8		С.	If another approach is used, please explain in detail.
9		d.	Was the approach described in response to the above questions used
10			consistently for all years for which variances are proposed for disposition? If not,
11			please discuss.
12			
13			CPUC uses method b. CPUC confirms that the approach is consistent all years
14			which variances are proposed for disposition.
15			
16	3.	-	ions on CT 1142
17		a.	Please describe how the initial RPP related GA is determined for settlement forms
18			submitted by day 4 after the month-end (resulting in CT 1142 on the IESO
19			invoice).
20			
21			CPUC uses estimated kWh data collected from our billing system. We then
22			complete the Commodity OEB spreadsheet template.
23			
24		b.	Please describe the process for truing up CT 1142 to actual RPP kWh, including
25			which data is used for each TOU/Tier 1&2 prices, as well as the timing of the true-
26			up.
27			CPUC uses the current TOU/Tier 1&2 prices posted by the OEB. CPUC then takes
28			actual RPP kWh data collected from our billing system and completes the
29			Commodity OEB spreadsheet template to determine the true up amount. True
30			ups are completed in the month following the original estimate.
31		C.	Has CT 1142 been trued up for with the IESO for all of 2018?
32			Going back to 2015, CPUC determine that there were errors in calculating true
33			ups. The net basis is an immaterial amount and will be trued up with the IESO in
34			2019 and will be reflected in the 2019 financial statements.
35			

### Page **23** of **36**

2       All         3       e. Were these true-ups recorded in the 2018 or 2019 balance in the General Ledger?         4       The true ups will be included the 2019 General Ledger         5       f. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?         8       Yes         10       4. Questions on CT 148         11       a. Please describe the process for the initial recording of CT 148 in the accounts (i.e., 1588 and 1589).         12       a. Please describe the process for true-up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.         16       b. Please describe the Cost of the RPP GA costs.         17       b. Please describe the Cost of the RPP GA costs.         20       CPUC completes the Commodity OEB spreadsheet to help determine the GA related cost for RPP customers and Non RPP customers. A journal entry is then made to move the cost of the RPP GA from 4707 to 4705.         23       c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as the initial GA expense in Account 1589?         24       c. What data is used to determine the roor sumption proportions to actuals based on actual RPP/non-RPP consumption proportions to actuals based on actual RPP-non-RPP consumption proportions to actuals based on actual RPP/non-RPP consumption proportions to actuals based on actual RPP-non-RPP consu	1		d	. Which months from 2018 were trued up in 2019?
4       The true ups will be included the 2019 General Ledger         5       f. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?         9       Yes         10 <b>4. Questions on CT 148</b> a. Please describe the process for the initial recording of CT 148 in the accounts (i.e., 1588 and 1589).         14 <b>CPUC debits the amount for CT 148 from IESO to account 4707.</b> 15       CPUC debits the amount for CT 148 from IESO to account 4707.         16       b. Please describe the process for true-up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.         20       CPUC completes the Commodity OEB spreadsheet to help determine the GA related cost for RPP customers and Non RPP customers. A journal entry is then made to move the cost of the RPP GA from 4707 to 4705.         23       c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as the initial GA expense in Account 1589?         24       c. What data is used to determine the roor support detailing the actual Non-RPP kWh volume.         31       d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated RPP/non-RPP consumption proportions to actuals based on actual RPP-non-RPP consumption proportions?         34       CPUC bills its customers monthly, and is being invoiced by IESO and Hydro O	2			All
5       f. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?         9       Yes         11 <b>4. Questions on CT 148</b> 12       a. Please describe the process for the initial recording of CT 148 in the accounts (i.e., 1588 and 1589).         14       CPUC debits the amount for CT 148 from IESO to account 4707.         16       b. Please describe the process for true-up of the GA related cost to ensure that the amounts reflected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.         20       CPUC completes the Commodity OEB spreadsheet to help determine the GA related cost for RPP customers and Non RPP customers. A journal entry is then made to move the cost of the RPP GA from 4707 to 4705.         24       c. What data is used to determine the non-RPP kWh volume that is multiplied with the actual GA per kWh rate (based on CT 148) for recording as the initial GA expense in Account 1589?         27       CPUC's billing system creates a monthly report detailing the actual Non-RPP kWh volume.         31       d. Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated RPP/non-RPP consumption proportions to actuals based on actual RPP-non-RPP consumption proportions?         34       CPUC bills its customers monthly, and is being invoiced by IESO and Hydro One	3		e.	Were these true-ups recorded in the 2018 or 2019 balance in the General Ledger?
6f. Have all of the 2018 related true-up been reflected in the applicant's DVA Continuity Schedule in this proceeding?8Yes104. Questions on CT 14812a. Please describe the process for the initial recording of CT 148 in the accounts (i.e., 1588 and 1589).14FUE15CPUC debits the amount for CT 148 from IESO to account 4707.16b.17b.18areouts for CT 148 from IESO to account 4707.18areouts felected in Account 1588 are related to RPP GA costs and amounts in 1589 are related to only non-RPP GA costs.20CPUC completes the Commodity OEB spreadsheet to help determine the GA related cost for RPP customers and Non RPP customers. A journal entry is then made to move the cost of the RPP GA from 4707 to 4705.23c.24c.25CPUC's billing system creates a monthly report detailing the actual Non-RPP kWh volume.31d.33Does the utility true up the initial recording of CT 148 in Accounts 1588 and 1589 based on estimated RPP/non-RPP consumption proportions to actuals based on actual RPP-non-RPP consumption proportions?34CPUC bills its customers monthly, and is being invoiced by IESO and Hydro One	4			The true ups will be included the 2019 General Ledger

1 2		e.	Please indicate which months from 2018 were trued up in 2019 for CT 148 proportions between RPP and non-RPP
3			December 2018
4		f.	Were these true-ups recorded in the 2018 or 2019 balance in the General Ledger?
5			2018
6		g.	Are all true-ups for 2018 consumption reflected in the DVA Continuity Schedule?
7			Yes
8 9	5.	Quest Sched	ions regarding principal adjustments and reversals on the DVA Continuity ule:
10		Quest	ons on Principal Adjustments - Accounts 1588 and 1589
11		a.	Did the applicant have principal adjustments in its 2019 rate proceeding
12			which were approved for disposition?
13			
14			No
15			
16		b.	If yes, please provide a break-down of the total amount of principal
17 18			adjustments that were approved (e.g., true-up of unbilled, true-up of CT 1142, true-up of CT 148, etc.) for each of Accounts 1588 and 1589.
19			N/A
20		C.	Has the applicant reversed the adjustment approved in 2019 rates in its
21			current proposed amount for disposition?
22			N/A
23	6.	NB: o	nly the principal adjustments amounts that were disposed of in the previous
24		proce	eding should be reversed in this proceeding. For example, if no amount
25		relate	d to unbilled to billed adjustment for 2018 consumption was included in
26			proceeding, this amount should not be included as a "reversal" from the
27			bus year.
28		a.	Please confirm that the allocation of charge type 148 has been trued up to actual
29			proportion of RPP/non-RPP consumption in the GL.
30			Yes

31 The tables below show the allocation of GA balance and the derivation of the GA rate riders.

Page 25 of 36

#### 1 12 DISPOSITION OF LRAMVA

Per the Board's Guidelines for Electricity Distributor Conservation and Demand
Management (EB-2012-0003) issued on April 26, 2012, at a minimum, distributors must
apply for disposition of the balance in the LRAMVA at the time of their Cost of Service
rate applications if the balance is deemed significant by the applicant.

6 CPUC is not filing the LRAMVA Workform as part of this application. <sup>12</sup>CPUC proposes to
 7 postpone the disposition of LRAMVA claim to a future rate application.

8

### 9 13 TAX CHANGE

10 CPUC has completed worksheets 8 of the IRM model, which resulted in a tax change of

11 \$0 from the tax rates embedded in its OEB 2019 Board Approved base rate. Since the

- 12 amount is nil, no further action is required.
- 13

### 14 **I4 ICM/ACM/Z-FACTOR**

- 15 CPUC did not apply for an Advanced Incremental module in its last Cost of Service nor is
- 16 applying for recovery of Incremental Capital or Z-Factor in this proceeding.<sup>13</sup>
- 17 CPUC notes that the Minimum Filing Requirements related to ICM / ACM and Z-Factors
- 18 are not applicable in CPUC's case.
- 19

### 20 15 REGULATORY RETURN ON EQUITY - OFF RAMP

- 21 CPUC's current distribution rates were rebased and approved by the OEB in 2012 and
- included an expected (deemed) regulatory return on equity of 9.12%. The OEB allows a

<sup>&</sup>lt;sup>12</sup> MFR - A distributor seeking to dispose of lost revenue amounts from conservation and demand management activities, during an IRM term, must file the Lost Revenue Adjustment Mechanism Variance Account (LRAMVA) Workform

<sup>&</sup>lt;sup>13</sup> MFR - For an incremental or pre-approved advanced capital module (ICM/ACM) cost recovery and associated rate rider(s), a distributor must file the Capital Module Applicable to ACM and ICM

#### Page **26** of **36**

distributor to earn within +/- 3% of the expected return on equity. The actual return on
equity for 2018 is -9.19%, which fell outside of the Board Approved 2012 rate of return.
The main reason being that with total costs being so low and one-time costs being
sometimes high, it is difficult for a small utility to keep within the range. Having rebased
in 2019, CPUC is confident that its Actual return will be in line with the Board Approved
return going forward. CPUC commits to using financial tools and checks to ensure the
utility maintains its profitability at the approved level going forward. <sup>14</sup>

- 9

### Table 8 - Return on Equity Table

	2012BA	2018
Achieved ROE	9.12	6.77
Deemed ROE		9.19
Difference		-18.31

10

#### 11 16 CURRENT TARIFF SHEET

12 CPUC's current tariff sheets are provided in Appendix 1.

13

#### 14 17 PROPOSED TARIFF SHEET

15 The proposed tariff sheets generated from the OEB Incentive Rate Setting Mechanism

16 Rate Generatior is provided in Appendix 2.

17

#### 18 18 BILL IMPACT

<sup>&</sup>lt;sup>14</sup> MFR - A distributor whose earnings are in excess of the dead band (i.e. 300 basis points) but nevertheless applies for an increase to its base rates - an explanation to substantiate its reasons for doing so required

#### Page **27** of **36**

- 1 The Minimum Filing Requirements state that distributors must provide bill impacts, including the
- 2 impact for residential customers at the distributor's 10th consumption percentile. In other
- 3 words, 10% of a distributor's residential customers consume at or less than this level of
- 4 consumption on a monthly basis. In CPUC s case, the 10% percentile was calculated in the
- 5 following manner;
- 6 The utility produced a report which included Residential Customer Number and their
  7 Monthly Consumptions.
- 8 The report filtered out customers that had less than 12 months of consumption and 9 those that used less than 50 kWh per month.
- 10 The report was then sorted by lowest to highest consumption.
- The utility then calculates the 10th percentile by taking 10% of the customer count
  (or number of records in the report).
- 13 The utility then found the record corresponding to this customer's consumption
- 14 became the "ceiling" for the lowest 10th percentile.
- 15 The 10th percentile was determined to be 405.<sup>15</sup>
- A list of bill impact scenarios is presented over the next several pages, with actual bill impacts
   following the table. <sup>16</sup>
- 18 Bill impacts are provided for typical customers and consumption levels for a range of
- 19 consumption levels relevant to the service territory. CPUC notes that it does not have any
- 20 customers with unique consumption and demand patterns where CPUC needs to show a typical
- 21 impact and provide an explanation.<sup>17</sup> The impacts are shown using the CPUC's EB-2018-0063
- 22 current approved rates and the proposed 2020 distribution rates, including rate riders for the
- 23 recovery of deferral and variance accounts discussed in Exhibit 9.

<sup>&</sup>lt;sup>15</sup> MFR - Evaluation of bill impact for residential customer at 10th consumption percentile. Describe methodology for determination of 10th consumption percentile. File mitigation plan for whole residential class if impact >10% for these customers.

<sup>&</sup>lt;sup>16</sup> MFR - Impact of changes resulting from the as-filed application on representative samples of end-users (i.e. volume, % rate change and revenue). Commodity and regulatory charges held constant

<sup>&</sup>lt;sup>17</sup> MFR - If applicable, for certain classes where one or more customers have unique consumption and demand patterns, the distributor must show a typical impact and provide an explanation

- 1 CPUC notes that at the time of this filing, the OEB has not yet updated its Bill Impact Work Form
- 2 such that CPUC used its own bill impact analysis which replicate an older format of the OEB's
- 3 calculation. <sup>18</sup> <sup>19</sup> The utility's proposed bill impacts are presented in Appendix C of this Exhibit. <sup>20</sup>

4

5

<sup>&</sup>lt;sup>18</sup> MFR - Completed Bill Impacts Model for all classes in the distributor's tariff schedule. Bill impacts must identify existing rates, proposed changes to rates, and detailed bill impacts.

<sup>&</sup>lt;sup>19</sup> MFR - Rates and charges input in the tariff schedule and Bill Impacts Model rounded to the decimal places as shown on the existing tariff

 $<sup>^{\</sup>rm 20}$  MFR - Mitigation plan if total bill increases for any customer class exceed 10%

<sup>&</sup>lt;sup>21</sup> MFR - If the total bill impact of the elements proposed in the application is 10% or greater for RPP customers consuming at the 10th percentile, a distributor must file a plan to mitigate the impact for the whole residential class or indicate why such a plan is not required

Page 29 of 36

### **1 19 CERTIFICATION OF EVIDENCE**

As General Manager of CPUC. I certify that, to the best of my knowledge, the evidence filed in CPUC.'s 2019 Incentive Rate-Setting Application is accurate, complete, and consistent with the requirements of the Chapter 3 Filing Requirements for Electricity Distribution Rate Applications as revised in July of 2019. I also confirm that internal controls and processes are in place for the preparation, review, verification, and oversight of any account balances that are being requested for disposal.

# Chapleau Public Utilities Corporation TARIFF OF RATES AND CHARGES

Effective and Implementation Date June 1, 2019 This schedule supersedes and replaces all previously

approved schedules of Rates, Charges and Loss Factors

EB-2018-0087

### **RESIDENTIAL SERVICE CLASSIFICATION**

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively by a single family unit, non-commercial. This can be a separately metered living accommodation, town-house, apartment, semidetached, duplex, triplex or quadruplex with residential zoning. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

#### **MONTHLY RATES AND CHARGES - Delivery Component**

### **GENERAL SERVICE LESS THAN 50 KW SERVICE CLASSIFICATION**

This classification refers to a non residential account taking electricity at 750 volts or less whose average monthly average peak demand is less than, or is forecast to be less than, 50 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### **RESIDENTIAL SERVICE CLASSIFICATION**

This classification refers to an account taking electricity at 750 volts or less where the electricity is used exclusively by a single family unit, non-commercial. This can be a separately metered living accommodation, town-house, apartment, semidetached, duplex, triplex or quadruplex with residential zoning. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

approved schedules of Rates, Charges and Loss Factors

EB-2019-0026

### **GENERAL SERVICE 50 TO 4,999 KW SERVICE CLASSIFICATION**

This classification refers to a non-residential account whose monthly average peak demand is equal to or greater than, or is forecast to be equal to or greater than, 50 kW but less than 5,000 kW. Further servicing details are available in the distributor's Conditions of Service.

#### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of WMS - Sub-account CBR Class B is not applicable to wholesale market participants (WMP), customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new Class B customers.

If included in the following listing of monthly rates and charges, the rate rider for the disposition of Global Adjustment is only applicable to non-RPP Class B customers. It is not applicable to WMP, customers that transitioned between Class A and Class B during the variance account accumulation period, or to customers that were in Class A for the entire period. Customers who transitioned are to be charged or refunded their share of the variance disposed through customer specific billing adjustments. This rate rider is to be consistently applied for the entire period to the sunset date of the rate rider. In addition, this rate rider is applicable to all new non-RPP Class B customers.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

EB-2019-0026

### UNMETERED SCATTERED LOAD SERVICE CLASSIFICATION

This classification refers to an account taking electricity at 750 volts or less whose monthly average peak demand is less than, or is forecast to be less than, 50 kW and the consumption is un-metered. Such connections include cable TV, power packs, bus shelters, telephone booths, traffic lights, railway crossings, etc. The customer will provide detailed manufacturer information/documentation with regard to electrical demand/consumption of the proposed unmetered load. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

approved schedules of Rates, Charges and Loss Factors

EB-2019-0026

### STREET LIGHTING SERVICE CLASSIFICATION

This classification refers to an account for roadway lighting with a Municipality, Regional Municipality, Ministry of Transportation and private roadway lighting operation, controlled by photo cells. The consumption for these customers will be based on the calculated connected load times the required lighting times established in the approved Ontario Energy Board street lighting load shape template. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable. In addition, the charges in the MONTHLY RATES AND CHARGES - Regulatory Component of this schedule do not apply to a customer that is an embedded wholesale market participant.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### microFIT SERVICE CLASSIFICATION

This classification applies to an electricity generation facility contracted under the Independent Electricity System Operator's microFIT program and connected to the distributor's distribution system. Further servicing details are available in the distributor's Conditions of Service.

### APPLICATION

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

### **MONTHLY RATES AND CHARGES - Delivery Component**

Service Charge	\$	5.40
ALLOWANCES		
Transformer Allowance for Ownership - per kW of billing demand/month	\$/kW	(0.60)
Primary Metering Allowance for Transformer Losses - applied to measured demand & energy	%	(1.00)

### SPECIFIC SERVICE CHARGES

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Customer Administration	
Arrears certificate \$	15.00

Account Service Charges effective July 1, 2019

\$

### **RETAIL SERVICE CHARGES (if applicable)**

The application of these rates and charges shall be in accordance with the Licence of the Distributor and any Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, which may be applicable to the administration of this schedule.

No rates and charges for the distribution of electricity and charges to meet the costs of any work or service done or furnished for the purpose of the distribution of electricity shall be made except as permitted by this schedule, unless required by the Distributor's Licence or a Code or Order of the Ontario Energy Board, and amendments thereto as approved by the Ontario Energy Board, or as specified herein.

Unless specifically noted, this schedule does not contain any charges for the electricity commodity, be it under the Regulated Price Plan, a contract with a retailer or the wholesale market price, as applicable.

It should be noted that this schedule does not list any charges, assessments or credits that are required by law to be invoiced by a distributor and that are not subject to Ontario Energy Board approval, such as the Global Adjustment and the HST.

Retail Service Charges refer to services provided by a distributor to retailers or customers related to the supply of competitive electricity.

One-time charge, per retailer, to establish the service agreement between the distributor and the retailer	\$	101.50
Monthly Fixed Charge, per retailer	\$	40.60
Monthly Variable Charge, per customer, per retailer	\$/cust.	1.02
Distributor-consolidated billing monthly charge, per customer, per retailer	\$/cust.	0.61
Retailer-consolidated billing monthly credit, per customer, per retailer	\$/cust.	(0.61)
Service Transaction Requests (STR)		
Request fee, per request, applied to the requesting party	\$	0.51
Processing fee, per request, applied to the requesting party	\$	1.02
Request for customer information as outlined in Section 10.6.3 and Chapter 11 of the Retail		
Settlement Code directly to retailers and customers, if not delivered electronically through the		
Electronic Business Transaction (EBT) system, applied to the requesting party		
Up to twice a year	\$	no charge
More than twice a year, per request (plus incremental delivery costs)	\$	4.06
Notice of switch letter charge, per letter (unless the distributor has opted out of applying the charge as per the		
Ontario Energy Board's Decision and Order EB-2015-0304, issued on February 14, 2019)	\$	2.00

### LOSS FACTORS

If the distributor is not capable of prorating changed loss factors jointly with distribution rates, the revised loss factors will be implemented upon the first subsequent billing for each billing cycle.

Total Loss Factor - Secondary Metered Customer < 5,000 kW

Effective and Implementation Date May 1, 2020 This schedule supersedes and replaces all previously approved schedules of Rates, Charges and Loss Factors

Total Loss Factor - Primary Metered Customer < 5,000 kW

Appendix 3 Bill Impacts

# Incentive Rate-setting Mechanism Rate Generator

for 2020 Filers

The bill comparisons below must be provided for typical customers and consumption levels. Bill impacts must be provided for residential customers consuming 750 kWh per month and general service customers consuming 2,000 kWh per month and having a monthly demand of less than 50 kW. Include bill comparisons for Non-RPP (retailer) as well. To assess the combined effects of the shift to fixed rates and other bill impacts associated with changes in the cost of distribution service, applicants are to include a total bill impact for a residential customer at the distributor's 10th consumption percentile (In other words, 10% of a distributor's residential customers consume at or less than this level of consumption on a monthly basis). Refer to section 3.2.3 of the Chapter 3 Filing Requirements For Electricity Distribution face Applications.

For certain classes where one or more customers have unique consumption and demand patterns and which may be significantly impacted by the proposed rate changes, the distributor must show a typical comparison, and provide an explanation.

#### Note:

1. For those classes that are not eligible for the RPP price, the weighted average price including Class B GA through end of May 2018 of \$0.1117/kWh (IESO's Monthly Market Report for May 2018, page 22) has been used to represent the cost of power. For those classes on a retailer contract, applicants should enter the contract price (plus GA) for a more accurate estimate. Changes to the cost of power can be made directly on the bill impact table for the specific class.

2. Please enter the applicable billing determinant (e.g. number of connections or devices) to be applied to the monthly service charge for unmetered rate classes in column N. If the monthly service charge is applied on a per customer basis, enter the number "1". Distributors should provide the number of connections or devices reflective of a typical customer in each class.

Note that cells with the highlighted color shown to the left indicate quantities that are loss adjusted.

Notes:

General Data inputs are required on Sheets 3. Data from Sheet 3 will automatically complete calculations on sheets 4 through 9 (Rate Base through Revenue Requirement). Sheets 4 through 9 do not require any inputs except for notes that the Applicant may wish to enter to support the results. Pale green cells are available on sheets 4 through 9 to enter both footnotes beside key cells and the related text for the notes at the bottom of each sheet.

(1) All inputs are in dollars (\$) except where inputs are individually identified as percentages (%)

Data in column E is for Application as originally filed. For updated revenue requirement as a result of interrogatory responses, technical or settlement conferences, etc., use column M and Adjustments in column I (2)

- (3) Net of addbacks and deductions to arrive at taxable income.
- (4) Average of Gross Fixed Assets at beginning and end of the Test Year
- (5)
- Average of Accumulated Depreciation at the beginning and end of the Test Year. Enter as a negative amount. Select option from drop-down list by clicking on cell M10. This column allows for the application update reflecting the end of discovery or Argument-in-Chief. Also, the (6) outcome of any Settlement Process can be reflected.
- (7) Input total revenue offsets for deriving the base revenue requirement from the service revenue requirement
- (8) 4.0% unless an Applicant has proposed or been approved for another amount.
- (9) The default Working Capital Allowance factor is 7.5% (of Cost of Power plus controllable expenses), per the letter issued by the Board on June 3, 2015. Alternatively, a WCA factor based on lead-lag study, with supporting rationale could be provided.

#### Load Forecast Summary

This spreadsheet provides a summary of the customer and load forecast on which the test year revenue requirement is derived. The amounts serve as the denominators for deriving the rates to recover the test year revenue requirement for purposes of this RRWF.

The information to be input is inclusive of any adjustments to kWh and kW to reflect the impacts of CDM programs up to and including CDM programs planned to be executed in the test year. i.e., the load forecast adjustments determined in **Appendix 2-I** should be incorporated into the entries. The inputs should correspond with the summary of the Load Forecast for the Test Year in **Appendix 2-IB** and in Exhibit 3 of the application.

Appendix 2-IB is still required to be filled out, as it also provides a year-over-year variance analysis of demand growth andf trends from historical actuals to the Bridge and Test Year forecasts.

	Stage in Process:	Se	ettlement Agreement							
	Customer Class		Initial Application		Settle	ment Agreement		Per	Board Decision

Notes:

(1) Input kW or kVA for those customer classes for which billing is based on demand (kW or kVA) versus energy consumption (kWh)

# Revenue Requirement Workform (RRWF) for 2019 Filers

#### **Cost Allocation and Rate Design**

This spreadsheet replaces **Appendix 2-P** and provides a summary of the results from the Cost Allocation spreadsheet, and is used in the determination of the class revenue requirement and, hence, ultimately, the determination of rates from customers in all classes to recover the revenue requirement.

Stage in Application Process: Settlement Agreement

A) Allocated Costs

Name of Customer Class <sup>(3)</sup> From Sheet 10. Load Forecast		Allocated from ous Studv <sup>(1)</sup>	%		llocated Class nue Requirement (1) (7A)	%
1       Residential         2       General Service < 50 kW         3       General Service > 50 to 4999 kW         4       Unmetered Scattered Load         5       Sentinel         6       Street Lighting         7       8         9       10         11       12         13       14         15       16         17       18         19       20	\$ \$ \$ \$ \$ \$	513,150 156,531 90,813 1,983 3,314 33,127	64.23% 19.59% 11.37% 0.25% 0.41% 4.15%	\$ \$ \$ \$ \$ \$	718,176 165,554 125,351 785 4,320 9,575	70.15% 16.17% 12.24% 0.08% 0.42% 0.94%
Total	\$	798,918	100.00%	\$	1,023,760	100.00%
			Service Revenue Requirement (from Sheet 9)	\$	1,023,759.75	

(1) Class Allocated Revenue Requirement, from Sheet O-1, Revenue to Cost || RR, row 40, from the Cost Allocation Study in this application. This excludes costs in deferral and variance accounts. For Embedded Distributors, Account 4750 - Low Voltage (LV) Costs are also excluded.

(2) Host Distributors - Provide information on any embedded distributor(s) as a separate class, if applicable. If embedded distributors are billed in a General Service class, include the allocated costs and revenues of the embedded distributor(s) in the applicable class, and also complete Appendix 2-Q.

(3) Customer Classes - If these differ from those in place in the previous cost allocation study, modify the customer classes to match the proposal in the current application as closely as possible.

#### B) Calculated Class Revenues

Name of Customer Class		Forecast (LF) X ent approved rates	LF X current approved rates X (1+d)		LF X	LF X Proposed Rates		LF X Proposed Rates (7D)		Miscellaneous Revenues
		(7B)		(7C)		(7E)				
1       Residential         2       General Service < 50 kW         3       General Service > 50 to 4999 kW         4       Unmetered Scattered Load         5       Sentinel         6       Street Lighting         7       8         9       10         11       12         13       14         15       16         17       16	\$ \$ \$ \$ \$ \$	491,667 150,035 103,727 1,375 3,365 33,392	\$\$ \$\$ \$\$ \$\$ \$\$	619,345 186,125 118,145 1,649 4,071 42,461	\$\$ \$\$ \$\$ \$\$ \$\$	630,695 186,130 118,151 1,127 4,071 31,623	\$ \$ \$ \$ \$	35,451 9,224 5,558 49 272 1,410		
18 19 20										
Total	\$	783,561	\$	971,796	\$	971,796	\$	51,964		

(4) In columns 7B to 7D, LF means Load Forecast of Annual Billing Quantities (i.e., customers or connections, as applicable X 12 months, and kWh, kW or kVA as applicable. Revenue quantities should be net of the Transformer Ownership Allowance for applicable customer classes. Exclude revenues from rate adders and rate riders.

(5) Columns 7C and 7D - Column Total should equal the Base Revenue Requirement for each.

(6) Column 7C - The OEB-issued cost allocation model calculates "1+d" on worksheet O-1, cell C22. "d" is defined as Revenue Deficiency/Revenue at Current Rates.

(7) Column 7E - If using the OEB-issued cost allocation model, enter Miscellaneous Revenues as it appears on worksheet O-1, row 19,

#### C) Rebalancing Revenue-to-Cost Ratios

Name of Customer Class	Previously Approved Ratios Most Recent Year:	Status Quo Ratios (7C + 7E) / (7A)	Proposed Ratios (7D + 7E) / (7A)	Policy Range
	2012 %	%	%	%
1       Residential         2       General Service < 50 kW	97.47 104.28 120.00 118.20 81.52 81.52	91.17% 118.00% 98.69% 216.47% 100.53% 458.19%	92.76% 118.00% 98.69% 149.92% 100.53% 345.00%	85 - 115 80 - 120 80 - 120 80 - 120 80 - 120 80 - 120

(8) Previously Approved Revenue-to-Cost (R/C) Ratios - For most applicants, the most recent year would be the third year (at the latest) of the Price Cap IR period. For example, if the applicant, rebased in 2012 with further adjustments to move within the range over two years, the Most Recent Year would be 2015. However, the ratios in 2015 would be equal to those after the adjustment in 2014.

(9) Status Quo Ratios - The OEB-issued cost allocation model provides the Status Quo Ratios on Worksheet O-1. The Status Quo means "Before Rebalancing".
 (10) Ratios shown in red are outside of the allowed range. Applies to both Tables C and D.

#### (D) Proposed Revenue-to-Cost Ratios (11)

(11) The applicant should complete Table D if it is applying for approval of a revenue-to-cost ratio in 2019 that is outside of the OEB's policy range for any customer class. Table D will show that the distributor is likely to enter into the 2020 and 2021 Price Cap IR models, as necessary. For 2020 and 2021, enter the planned revenue-to-cost ratios that will be "Change" or "No Change" in 2018 (in the current Revenue/Cost Ratio Adjustment Workform, Worksheet C1.1 'Decision - Cost Revenue Adjustment, column d), and enter TBD for class(es) that will be entered as 'Rebalance'.

## Revenue Requirement Workform (RRWF) for 2019 Filers

#### Rate Design and Revenue Reconciliation

This sheet replaces Appendix 2-V, and provides a simplified model for calculating the standard monthly and voluentric rates based on the allocated class revenues and fixed/variable split resulting from the cost allocation study and rate design and as proposed by the applicant. However, the RRWF does not replace the rate generator model that an applicant distributor may use in support of its application. The RRWF provides a demonstrative check on the derivation of the revenue requirement and on the proposed base distribution rates to recover the revenue requirement, based on summary information from a more detailed rate generator model and other models that applicants use for cost allocation, load forecasting, taxes/PILs, etc.

<sup>2</sup> The Fixed/Variable split, for each customer class, drives the "trate generator" portion of this sheet of the RRWF. Only the "fixed" fraction is entered, as the sum of the "fixed" and "variable" portions must sum to 100%. For a distributor that may set the Monthly Service Charge, the "fixed" ratio is calcutated as: [MSC x (average number of customers or connections) x 12 months] / (Class Allocated Revenue Requirement).
