Subject: Beverly Swamp Pipeline

Dear Ms. Long

This pipeline will most certainly impact an environmentally sensitive area . At a time when we should be doing all we can to preserve our vanishing natural heritage, it is especially important to look closely at all such planned installations. Open hearings should be held and environmental issues taken into consideration as well as a serious look at other possible routes for this pipeline which would have less potential for environmental destruction . It is also possible that such a pipe line is not really needed, since we are trying to cut down on the burning of fossil fuel.

Joan Shewchun, Burlington
