Subject: NO to Enbridge pipeline in Hamilton

PLEASE consider the climatic implications of this pipeline.

The ecological damage from clearing the permanent pipeline easement is the equivalent of an 8-9 lane highway. The fact that this would be entirely within the Greenbelt and across ecologically significant areas as the Beverly Swamp, Spencer Creek and Bronte Creek is not acceptable!!

We cannot go on business as usual in our destruction of the planet. We have to find a way to live in a post carbon society.

Please DO NOT allow this pipeline.

Signed,

Laura Katz
