Subject: 2021 Dawn Parkway Expansion Project

Hello!

Please please please reconsider this fracked gas pipeline project through the greenbelt and some of Hamilton's precious ecosystems.

We need to work together to stop expanding fossil fuel use, your pipeline project is completely at odds with climate care, endangered species protection, renewable energy resources, so many things that are necessary for us to curb our contribution to destroying this planet. The construction alone of this pipeline will devastate Hamilton's greenbelt and important waterways, and more of the dangerous pollution related to fracked gas is not what we need right now on this earth.

Please, stop. Please think about the life we humans share on this earth with trees and animals and plants and water; our collective wellbeing is far more important than your personal economic gain that might come from unleashing this proposed destruction on our planet.

Thank you

Justine, a concerned Hamiltonian
