Object to this request for a rate increase April. There was a rate increase earlier this year. Don't believe customers should pay for pollution costs.

Many out in the community are just making ends meet now. To continually incur rate increases from hydro and gas is difficult. Management in these companies have no problem paying for the increases. Think about the consumers when requesting cumulative rate increases. The federal pollution plan need not come off the backs of consumer but consumed within the companies. Or large companies need to take this up with federal government. Thank you
