**Subject:** Environmental impacts

Dear Sir/ Madam: There is absolutely no doubt that environmental impacts must be considered during any deliberation of expanding or enhancing natural gas pipelines. This includes “upstream “ considerations and all others. The deliberations should be open and transparent. This is 2020. There is a mountain of evidence that we must adjust our approach to the economy and everything we do. There is no maybe about it.

Please ensure environmental impacts are considered and accounted for during the next pipeline meetings

Richard De Jong
