OEB

"We have no policy consultations seeking consumer feedback at this time."

There should be. They should be in the form of oral hearings.

Hamilton is one of the municipalities that has declared a #ClimateEmergency. All decisions need to be seen through the climate lens. Climate models are running hotter than expected. We are running out of time with business as usual energy practices leading to catastrophes the world over. One can and should be able to make the argument that fossil fuel interests have misled Ontario consumers.

We need full transparent oral hearings.

Richard MacKinnon
