Subject: comments re Enbridge application #EB-2019-0159

Ontario Energy Board

Jeff Yurek, Minister of The Environment

Please consider my comments below in reference to Enbridge application [EB-2019-0159](#).

There is a climate emergency!

Therefore, please hold a fully transparent **oral hearing** at which the upstream and downstream effects of the proposed pipeline can be considered.

Humanity is rapidly running out of time to transform our economy and redefine our relationship to the land. This situation means **no more business as usual**.

There are risks and costs associated with more greenhouse gas pollution and the development/operations of these industries and these fossil fuel companies do not want you to think about these things.

The world's climate scientists warned in October 2018 that we must **cut greenhouse gas emissions at least in half by 2030**, and since then the warnings have become even more dire.

We should not allow the fossil fuel industry to keep pretending as though they can solve our problems **the land and planet can not always be sacrificed for their short term profits**.

We have recognized the deep connection between the climate emergency and the fossil fuel industry, making it especially outrageous to allow these companies greater control over the future of our planet.

I oppose this pipeline application.

Please acknowledge receipt of this message.

Yours truly,

Ken Stone
